### Energy alternatives for remote lodges and facilities

Toronto : Ministry of Energy, 1988. 37 p. : ill. Bibliogr.  
MICROLOG 90-01731 1 fiche

Operators of lodges and recreational facilities in remote (off-grid) locations face many economic and logistical obstacles to providing attractive, comfortable accommodations for tourists. Space heating, hot water, electricity for lighting and other amenities are costly to provide in remote areas when using gas or diesel powered generators with propane or kerosene heating to supplement wood fuel burning. This manual provides commercially available alternate energy systems and conservation opportunities suitable for Northern Ontario. Technical and economic information is included to help owners and operators identify and evaluate ways to effectively reduce their energy costs. This manual is intended to provide sufficient information to enable an owner/operator to make a preliminary assessment of the applicability of these alternate energy systems and energy conservation measures. Information about manufacturers and suppliers of products and services is included, as well as a number of sample projects.

### Energy conservation in the industrial mineral sector, comminution, vol. I

Canada Cement Lafarge. Montreal : The Company, 1990. xiii, 175 p. : ill. Bibliogr. CANMET contract: OSQ84-00432.  
MICROLOG 90-07141 3 fiche

Summary report of a project to develop the necessary technology to optimize the comminution of industrial minerals for direct and indirect energy consumption. Ten industrial minerals were chosen for study and the work was divided into 3 phases. The first phase covered plant studies to develop a data base, the second phase covered the establishment of particle size monitoring methodology and the development of a proposal for pilot plant testing, and the 3rd phase covered the development of the pilot plant system. This report summarizes the work on phase I and II.

### Energy conservation in the industrial mineral sector, comminution, vol. II

Canada Cement Lafarge. Montreal : The Company, 1990. 251 p. : ill. Bibliogr. CANMET contract: OSQ84-00432.  
MICROLOG 90-07142 3 fiche

Report on a project to develop the necessary technology to optimize the comminution of industrial minerals for direct and indirect energy consumption. Ten industrial minerals were chosen for study and the work was divided into 3 phases, covering plant studies to develop a data base, the establishment of particle size monitoring methodology and the development of a proposal for pilot plant testing, and the development of the pilot plant system. This report covers the asbestos, gypsum, limestone, cement and lime industries. The report first introduces the cooperating company, then describes the comminution processes monitored during the field work at the company's plant. Measurements made and results obtained are then reported and discussed. Each type of plant is addressed separately.

#### Energy conservation in the industrial mineral sector, comminution (crushing and grinding), phase III : activity 1

Witteck Development Inc. Mississauga, Ont. : The Corporation, 1987. 99 p. : ill. Contractor: Canada Cement Lafarge Ltd. CANMET contract: OSQ84-00432 MICROLOG 90-07144 2 fiche

This report is part of Phase III of a study to develop the necessary technology to optimize the comminution of industrial minerals in direct and indirect energy consumption. This report presents a description and results of activity 1 of the development of pilot plant systems. This test program examined the performance of a state-of-the-art high-efficiency classifier in a conventional dry milling circuit using calcite as a test material. The program established baseline data for a ball mill operated in closed circuit with a conventional classifier to produce a single product; with a high-efficiency classifier to produce a single product, and with a two-stage classification to produce a single product and to produce two products. Five tests were conducted.

#### Energy conservation in the industrial mineral sector, comminution (crushing and grinding), phase III : activity 2

Witteck Development Inc. Mississauga, Ont. : The Corporation, 1989. 153 p. : ill. Bibliogr. Contractor: Canada Cement Lafarge Ltd. CANMET contract: OSQ84-00432 MICROLOG 90-07145 2 fiche

As part of a project to assist the cement industry and other producers of non-metallic minerals to improve their energy efficiency and to promote research, a study was begun on

the development of current use of high efficiency air classification equipment. The study consisted of a literature review and bibliography of pertinent articles, tests with two state-of-the-art air classifiers using cement as the test material; and the examination of current trends in the application of high efficiency air classification equipment, their method of utilization and benefits derived with improved energy utilization and productivity in the production of cement.

#### Energy conservation in the industrial mineral sector, comminution (crushing and grinding), phase III : activity 3

Witteck Development Inc. Mississauga, Ont. : The Corporation, 1988. 136 p. : ill. Bibliogr. Contractor: Canada Cement Lafarge Ltd. CANMET contract: OSQ84-00432 MICROLOG 90-07146 2 fiche

This work forms Part III of a study on energy conservation in the industrial minerals sector. Phase I provided a data base of the direct energy consumed during the comminution of 10 industrial minerals; phase II reviewed an on-stream particle size analyzer; and phase III is divided into 7 sections, of which this is the 3d. This report includes a literature review and bibliography; the results of a questionnaire directed to a broad range of industrial mineral and cement processing companies to establish the degree of use of chemical additives in comminution and the overall effect on energy savings and/or process efficiencies; and bench scale static grinding tests using chemical additives of various types as suggested by other researchers on cement, calcium carbonate, silica, nepheline syenite and talc.

#### Energy consumption in the Norwegian fishing fleet, 1971-80

by H. Erstad. Ottawa : National Research Council, Canada Institute for Scientific and Technical Information, 1986. 6 p. (Canadian translation of fisheries and aquatic sciences ; no. 5263) Originally published in Norwegian, by the Institute of Fishery Technology and Research at Tromsø, Norway. ISSN 0704-3716 MICROLOG 90-02733 1 fiche

Based on accounting data from 1971-80, changes are shown in fuel consumption for coastal fishing, bank fishing, pollack seining, fresh and sail fish trawling, factory and industry trawling, ring net, and coastal and deep sea shrimp trawling. Estimates of total fuel consumption for the Norwegian fishing fleet from 1978-80 are also given, based on estimated energy coefficients multiplied by total catch. Only the table of contents and the summary are reproduced.

#### Energy consumption of heavy road vehicles : field parameter measurements and cross-impact analysis : summary report

prepared for the Transportation Development Centre, Policy and Coordination Group, Transport Canada ; by D.A. Ljubic, J. Nader and Y. Provencher. Pointe Claire, Que. : Forest Engineering Research Institute of Canada, 1989. vii, 34 p. : ill. MICROLOG 90-04097 1 fiche

Summary of the results of 3 years research on factors which influence the energy consumption of heavy road vehicles. A field analysis was conducted of driver-machine-environment-road interactions using a test truck and trailer for automatic, simultaneous logging of the key variables on the road, allowing for the exploration of overall differences in energy consumption or for instantaneous measurement of the variables. The work also explored

driving techniques by monitoring 35 drivers manoeuvring the same trucking rig (tractor, trailer and load) on the same road; correlated energy consumption and road curves, grades and surfaces, and investigated the impact of selected components of the test trailer undercarriage on energy consumption. A theoretical method that uses data logged in the field as the input was developed. Once validated, this method served as the basis for analysing the cross-impacts between various factors.

### Energy demand and fuel peat conversion study, Burin Peninsula

Provincial Consultants Limited. St. John's : Dept. of Energy, 1986. vii, 124 p. : ill., maps. Bibliogr. On cover: *Canada/Newfoundland Burin Peninsula Development Fund Subsidiary Agreement*. ISBN 0-920769-24-1  
MICROLOG 90-03769 2 fiche

The southern tip of the Burin Peninsula is one of 3 prime locations for fuel peat development in the province of Newfoundland. Peatlands in this area consist of blanket bogs of peat that are high in energy content and relatively easy to recover. This report examines the potential market for fuel peat conversion and provides a detailed assessment of 3 potential users. The resource potential and the potential peat fuel users are identified, then the technical and economic factors associated with the conversion of an oil-fired system to peat burning for a large fish processing plant, a medium size ship building plant and an elementary school are identified.

### Energy economy through the use of synthetic oils in the engine, transmission and two rear axles of a road transport vehicle

prepared by D.A. Ljubic and the Forest Engineering Research Institute of Canada. Ottawa : Transport Canada, Transportation Development Centre, 1986. xiv, 74 p. : ill. Bibliogr.  
MICROLOG 90-01734 1 fiche

To investigate and demonstrate the reduction in energy consumption obtained through the use of synthetic oils, comparisons were made for controlled conditions during oil temperature stabilization, at constant speeds, during acceleration and under actual operating conditions. New methods of analysis were also developed and verified for on-road evaluation of the energy balance of a moving vehicle. Compared to the reference mineral oils, polyalphaolefin base synthetic oils reduced energy losses in a truck driveline and can also be expected to increase driveline component life.

### Energy efficiency measures in the fishing fleet

by A. Berg. Ottawa : National Research Council, Canada Institute for Scientific and Technical Information, 1988. 43 p. : ill. (Canadian translation of fisheries and aquatic sciences ; no. 5428) Originally published in Norwegian, by the Institute of Fishery Technology Research, at Tromsø, Norway  
ISSN 0704-3716  
MICROLOG 90-01518 1 fiche

Description and results of a program conducted from 1980-86 by the Norwegian Fisheries Research Council, to reduce the effect of increasing oil prices by assessing the influence of increasing oil prices on various fishing methods, and by developing and implementing methods for reducing the oil consumption of new and existing fishing vessels. The work was divided into operation of current vessels, new construction and rebuilding of vessels, and evaluation of changes in relative profitability

between groups in the fleet as a result of increases in oil prices. This report covers resistance, propulsion and operational control; machinery and system developments; tactical resource projections, recovery of waste heat, and operational instrumentation and measurements for fuel efficiency.

### Energy in Quebec, 1988

Quebec : Ministère de l'énergie et des ressources, 1988. 115 p. : ill. French ed. (*L'Energie au Québec*) : 90-01667/2  
CSI 66110.014. ISSN 0715-8793 ISBN 2-550-19348-2  
MICROLOG 90-01666 2 fiche

This annual report compiles all the essential statistical data on Quebec's energy sector, accompanied by analyses of the outstanding facts and trends of the past year. The first part deals with the Quebec energy sector in general, including data and information showing the developments in total energy demand and energy distribution according to sector; the share claimed by each form of energy; a comparison between Quebec's energy consumption and that of the rest of Canada and certain OECD countries; the relative efficiency of energy supply systems in Quebec and Ontario; changes in energy prices; an evaluation of the economic impact of the energy sector; electricity exports; price price developments in energy markets, the characteristics of demand; and energy economies. The second part deals with various energy industries, grouped according to the form of energy concerned (electricity, natural gas, oil and alternative energy sources) and energy consumption adjusted for variations in weather. Technical data specifically related to the 1986 energy balance sheet are provided in an appendix, including data on the energy supply structure of Quebec's economy and statistics on the distribution of energy per consumption sector.

### Engineered control parameter for automated mine ventilation : final report

by J.-P. Saindon. Pointe Claire, Que. : Centre de recherche Noranda, 1989. ix, 248 p. : ill. Bibliogr. CANMET contract: 79040-01-SQ.  
MICROLOG 90-03961 3 fiche

In 1986, Brunswick Mining, a large underground lead-zinc operation at Bathurst, New Brunswick, and Noranda Technology Centre initiated a program to improve the efficiency of underground ventilation. The ventilating project is composed of several related projects, all contributing to providing a quality working environment while reducing energy costs. One project is to automate the ventilation system to eventually provide the required amount of ventilation based on underground measurements of air quality, using CO<sub>2</sub> as the engineering control criterion. Phase I requires collecting and consolidating existing data, obtaining underground pollutant profiles through a field survey, and verifying CO<sub>2</sub> can be used alone or in combination with other pollutants as a control parameter. Phase II requires the definition of hardware, software and transmission requirements for an automated ventilation system. This report details Phase I and II work.

### Enhanced hydrogen diffusion and removal techniques by electromigration

by K. Tashiro. Toronto : Ontario Hydro, Research Division, 1990. i, 11 p. : ill. Bibliogr.

(Report ; no. 90-51-K)  
MICROLOG 90-06098 1 fiche

The absorption of deuterium into zirconium is recognized as the current life limiting factor of Zr-2.5Nb pressure tubes. Large deuterium pickup rates are mainly found at the inlet and especially at the outlet ends while the remaining portion of the tube does not exhibit a large hydrogen concentration and therefore possess a large amount of remaining life. It could therefore be advantageous to redistribute this deuterium peak or remove it locally. This report describes the preliminary results of the effects of an electric field on hydrogen, including the magnitude of the effect and its potential applications as a removal technique.

MICROLOG 90-01605 1 fiche

Two variants of the classical Clarke and Wright algorithms. One variant generalizes the savings measure by considering a larger neighborhood of the current solution. The other variant introduces a penalty (or look-ahead) factor aimed at reducing the 'myopic' behaviour of the classical approach. Computational results show that these two variants generate better solutions than the classical Clarke and Wright algorithm. In particular, the penalty approach generates solutions that compare favorably to the generalized approach.

### Enjeux des propositions récentes de réforme de la Loi sur la faillite

par B.-M. Papillon. Ottawa : Conseil économique du Canada, 1990. vii, 84 p. Bibliogr. (Document ; no 367) ISSN 0225-8021  
MICROLOG 90-06652 1 fiche (Available on fiche only)

Ce rapport présente une critique des propositions récentes de réforme de la loi sur la faillite. La loi sur la faillite est inscrite parmi les politiques visant à faciliter les échanges et à offrir un cadre à l'ajustement au sein de l'économie; ceci fournit une première base d'interprétation. Après une description sommaire des parties de la loi plus particulièrement touchées par les propositions récentes de réforme, le rapport présente un survol critique des objectifs de la loi et des réformes, tels qu'énoncés par les législateurs. A cette fin, le rapport retrace brièvement les origines de la loi actuelle.

Ottawa : Santé et bien-être social Canada, 1989. 19 p. : ill. *L'éd. anglaise (National*

*survey on drinking...)* sur la même fiche.  
CSI 21112.211. ISBN 0-662-95745-8  
MICROLOG 90-02402 1 fiche

L'Enquête nationale sur l'alcool au volant a été menée par téléphone en mars 1988 par Statistique Canada, au nom de la Direction de la promotion de la santé de Santé et bien-être social Canada. Pour cette enquête téléphonique, qui visait les personnes de 16 à 69 ans, on a utilisé la technique de composition automatique de numéros au hasard pour rejoindre des ménages à travers le Canada. Les personnes résidant au Yukon et dans les Territoires du Nord-Ouest ont été exclues, puisque ces régions requièrent des méthodologies d'enquête différentes. Il en a été de même pour les personnes qui résident en permanence en institution et, à cause de la méthodologie employée, les personnes qui n'ont pas le téléphone (environ 2 % de la population canadienne). Ce document présente les résultats de l'enquête.

### The Ensilage of capelin for fish feed as an alternative to freezing : an economic analysis -- Rev.

by K.E. Andersen. Ottawa : National Research Council, Canada Institute for Scientific and Technical Information, 1989. 124 p. : ill. Bibliogr. (Canadian translation of fisheries and aquatic sciences ; no. 5266) Originally published in Norwegian, by the Institute of Fishery Technology Research at Tromsø, Norway. ISSN 0704-3716  
MICROLOG 90-02736 2 fiche

Financial analysis of using capelin ensilage as fish feed as an alternative for frozen capelin. The analysis includes technological, biological and financial data. A full cost estimation is used to determine the maximum price that can be paid for capelin to be used for ensilage and possible heat treatment. The profitability of investments in heat treatment equipment is also considered. An alternative method using lactic acid is also evaluated, and the maximum profitable price for lactic acid bacteria is calculated. A sensitivity analysis is also carried out involving changes in some of the most fundamental requirements underpinning the analysis.

# **Environmental code of practice for treatment and disposal of waste discharges from offshore oil and gas operations**

Ottawa : Environment Canada, Environmental Protection Service, 1990. x, 85 p. Bibliogr. (Report ; EPS 1/PN/2) ISBN 0-662-16128-9 MICROLOG 90-02964 1 fiche

This Code identifies and recommends environmental protection practices for the offshore oil and gas industry. The document addresses all wastes potentially generated at offshore facilities including chemical additives utilized in drilling fluids and in treating wastes. Potential environmental concerns and alternative methodologies, technologies, practices and procedures designed to minimize adverse environmental effects from discharges are discussed. Recommendations are presented which are judged to be reasonable and practical for preserving the quality of Canada's marine environment with respect to discharges from oil and gas operations. The Code is intended to be used with the guidelines developed by the Canadian Oil and Gas Lands Administration.

# **Environmental codes of practice for steam electric power generation : construction phase**

Ottawa : Environment Canada, Environmental Protection Service, 1989. vii, 57 p. Bibliogr. (Report ; EPS 1/PG/3) French ed. (Code de recommandations...) : 90-00952/1. ISBN 0-662-17182-9 MICROLOG 90-00953 1 fiche

This is one of a series of documents being developed for the steam electric power generation (SEPG) industry under the provisions of the Canadian Environmental Protection Act. This industry includes fossil-fuelled stations (gas, oil and coal-fired boilers) and nuclear-powered stations (CANDU heavy water reactors). This document discusses environmental concerns associated with construction activities, including practices recommended for the protection of terrestrial and aquatic life, for the preservation of archaeological and historical resources, for erosion and situation control, for the control of wastewater discharges and spills, for the management of solid wastes, for the control of air pollution and noise, and for environmental auditing, monitoring, and reporting. These practices are intended to mitigate or eliminate adverse environmental effects due to construction or modification of SEPGs.

# **Environmental databases for state of the environment reporting : Atmospheric Environment Service, Canadian Parks Service, Corporate Policy Group, Environment Canada regional offices**

by T. McRae. Ottawa : Canadian Wildlife Service, State of the Environment Reporting Branch, Strategies and Scientific Methods Division, 1990. ii, 161 p. Bibliogr. (Technical report series ; no. 16) MICROLOG 90-06380 2 fiche

State of the environment (SOE) reporting seeks to systematically analyse, describe and present credible, scientifically based information on environmental conditions and trends. In December 1988, an inventory was begun of Environment Canada databases of potential use to SOE reporting. This report summarizes the inventory's results for the Atmospheric Environment Service, Canadian Parks Service, Corporate Policy Group and Regional offices by identifying SOE-related databases held in those

responsibility centres.

# **Environmental databases for state of the environment reporting : Conservation and Protection Headquarters**

by C.J. Keddy and T. McRae. Ottawa : Canadian Wildlife Service, State of the Environment Reporting Branch, Strategies and Scientific Methods Division, 1989. ii, 176 p. Bibliogr. (Technical report series ; no. 9) MICROLOG 90-03118 2 fiche

In December 1988, the State of the Environment (SOE) reporting branch began an inventory of Environment Canada databases of potential use to such reporting. The inventory represents an initial step towards the development of an SOE information system (database referral component) to be established by Statistics Canada. This report summarizes the inventory results for Conservation and Protection headquarters by identifying SOE related databases held in that responsibility centre. Database inventories are indexed by framework category and by responsibility centre.

# **The Environmental effects of sea water fish farms**

by J. Aure., et al. Ottawa : National Research Council, Canada Institute for Scientific and Technical Information, 1989. 115 p. : ill., maps. Bibliogr. (Canadian translation of fisheries and aquatic sciences ; no. 5481) Originally published in Norwegian, by the Institute of Marine Research at Bergen, Norway. ISSN 0704-3716 MICROLOG 90-00586 2 fiche

Investigation to determine the extent to which fish farms in the sea off the coast of Norway influence the water masses and the benthic conditions around the farm. Field investigations were carried out at 9 fish farms in Norway (SorTrondelag and Hordeland) located in closed or protected areas. The farms varied in the amount of fish produced and the type of food used. Background data on operational practices, hydrography, topography and current were taken from another study on pollution in the marine environment. Examinations of the sediment and the benthos were conducted at all 9 farms, with additional analyses of nutrient salts and sedimentation of organic material in open water and the littoral zone at 2 of the farms.

# **Environmental effects of special waste**

ELI Eco Logic Inc. Toronto : Ontario Waste Management Corporation, 1987. x, 293 p. : ill., maps. Bibliogr. MICROLOG 90-02958 4 fiche

This analysis considers the occurrence of toxic chemicals in the Ontario environment which come from special waste, defined by OWMC as liquid industrial and hazardous waste that cannot be handled effectively by conventional municipal treatment and disposal facilities such as sanitary landfills, municipal incinerators and sewage treatment plants. The most common chemicals originating from special waste (agricultural application of pesticides or naturally occurring compounds) which bioaccumulate in the food chain or bioconcentrate and persist in living organisms including human tissues are selected for intensive review. Exposure and observable effects on environmental species are then considered at the regional and local levels and cause-effect relationships are established where possible on wild species. Exposure pathways are analysed, including the human food chain. The reasons for environmental sources are explored, including the impact of current waste disposal practices, data on major

municipal and industrial sources, technological problems, current regulation enforcement practices, and regulatory change. EV ON PR SC

# **Environmental guidelines : northern seismic operations**

Hardy BBT Limited. Ottawa : Indian and Northern Affairs Canada, Northern Affairs Program, 1988. iv, 34 p. : ill. Bibliogr. ISBN 0-662-16370-2 MICROLOG 90-03051 1 fiche

Handbook to assist hydrocarbon and mineral resource companies and geophysical contractors in the terms and conditions attached to their land use permits for seismic operations in northern Canada. Coverage includes land use permits and other applicable legislation; permafrost and its relationship to seismic operations in the north; and seismic operations in northern Canada sequentially from the planning stage through clearing and clean-up and restoration.

# **Environmental guidelines for decommissioning of service stations**

Petroleum Association for Conservation of the Canadian Environment. Environmental Quality Division. Ottawa : The Division, 1988. v, 20 p. (PACE report ; no. 88-5) MICROLOG 90-02795 1 fiche

These guidelines were designed to assist companies or individuals involved with the decommissioning of service station facilities. The term 'decommissioning' in these guidelines means dismantling, environmental cleanup and preparation for disposition of the property. The objective of an effective decommissioning program is to leave and/or sell properties in a condition that will be appropriate to the future land use of the site and surroundings and will provide to a vendor and purchaser information on the status of the site at the time of the sale.

**Environmental monitoring of forestry control operations : 1988 report**

compiled by W.A. Sexsmith. Fredericton : Environment New Brunswick, 1989. v, 42 p. : maps. CSI 45112.005. MICROLOG 90-03482 1 fiche

This multi-disciplinary compilation is concerned mainly with the environmental monitoring of the spruce budworm and forest herbicide aerial spray operations in New Brunswick in 1988. This report consists of 9 reports dealing with operational, research and regulatory aspects of both spray programs. Pesticides investigated are fenitrothion and Bacillus thuringiensis, glyphosate, hexazinone, triclopyr, sulfometuron-methyl and metsulfuron-methyl. AP EV FO PR SC ST

**Environmental monitoring report for the Point Lepreau, N.B., Nuclear Generating Station, 1985-86**

by R.W.P. Nelson, K.M. Ellis and J.N. Smith. Dartmouth, N.S. : Bedford Institute of

Oceanography, 1988. vi, 175 p. : ill., maps. Bibliogr. (Canadian technical report of hydrography and ocean sciences ; no. 107) ISSN 0711-6774 MICROLOG 90-05156 2 fiche

The Point Lepreau environmental monitoring program was established to assess the environmental impact of radioactive, thermal and chemical releases from the Point Lepreau, N.B. nuclear generating station located on the Bay of Fundy. This report contains results for the 3d and 4th years of the operational phase. Special emphasis was placed on the characterization of the thermal plume, the distribution of tritium within different phases of the environment and the uptake of radionuclides in lichen, an efficient accumulator of atmospheric particulates. Radionuclide measurements made on samples collected during the operational phase of the reactor were compared to pre-operational activities to assess the impact of the operation of the station. This report also includes the AERU responses to a boiler tube leak at the Point Lepreau station starting in December 1985, and the accident at the nuclear power station in Chernobyl, USSR for which samples were collected at various locations in the Atlantic region to assess the environmental impact. ● AP CA CF EN EV FI SC

David Bromley Engineering Ltd. Calgary. Alta. : Canadian Petroleum Association, 1988. 629 p. : ill., maps. Bibliogr. MICROLOG 90-04764 7 fiche (Available on fiche only)

This handbook begins by describing all the main regulatory bodies and the various divisions and approval procedures that make up these bodies, then addresses application procedures, permits and approvals and specific environmental guidelines for geophysical surveys and evaluation in exploration, drilling exploration and development, conventional and gas production facilities, pipelines, in situ heavy oil facilities, and development/operational activities such as access roads, stream crossings, reclamation and conservation, camp and camp operations, waste handling, noise, and abandonment and decommissioning. Appendices include relevant legislation, maps and directories for environmental parameters, pertinent contacts, and a glossary. A key word index is also included. ● AL CA EN EV SC

**Environmental quality of receiving waters at United Keno Hill Mines Ltd., Elsa, Yukon**

by D. Davidge and G. Mackenzie-Grieve. Ottawa : Environment Canada, Conservation and Protection, Environmental Protection Service, Pacific Region, 1989. viii, 99 p. : ill. (Regional program report ; 89-04) MICROLOG 90-03114 2 fiche

An investigation of water quality, stream sediments and aquatic invertebrate populations was carried out July 9-10 and August 21-22, 1985 in the South McQuesten River watershed in the vicinity of United Keno Hill Mine at Elsa, Yukon to determine if any significant impact from the mining and milling operations was detectable in the receiving waters of Flat Creek, Christal Creek and the South McQuesten River. The information from this survey is compared with that from 2 previous surveys conducted in 1974/75 and in 1980. The parameters found to exceed recommended levels for drinking water or which are known to be toxic to freshwater invertebrates and fish are identified and discussed. Pollution trends which can be attributed to mine activities are also identified. ● CA EV NO NR SC

**Environmental radioactivity in Canada, 1987**

Ottawa : Health and Welfare Canada, Environmental Health Directorate, Health Protection Branch, 1988. 49 p. : ill. maps. CSI 22140.001 ISBN 0-662-16552-7 MICROLOG 90-00469 1 fiche

The radiological surveillance program of the Department of National Health and Welfare is conducted to determine levels of environmental radioactivity in Canada and to assess the resulting population exposures. The report is prepared as a summary of work in progress, and as a means of publishing the results of ongoing programs. Special studies reported on included the evaluation of the contamination by cesium-137 of caribou, a major source of food in northern communities; the development of methods for the determination of radon, carbon-14, polonium-210, radium-228 and isotopic uranium in samples; and monitoring of fallout contamination from Chernobyl of imported foods. Environmental monitoring programs conducted included external radiation exposure, tritium in water vapour, gross beta radioactivity, and monitoring of air, drinking water, precipitation and milk. A list of reports and presentations is also included.

**L'Équité salariale dans les petites entreprises**

Toronto : Commission de l'équité salariale, 1989. 106 p. *French ed. (Pay equity in small...)* 90-04594/2 ISBN 0-7729-6212-X  
MICROLOG 90-06514 2 fiche

Le 1er janvier 1988, la Loi sur l'équité salariale est entrée en vigueur en Ontario dans le but d'éliminer la portion des écarts salariaux entre les hommes et les femmes qui sous-évaluent le travail accompli par les femmes dans la province. Ce guide explique brièvement l'équité salariale et aborde certaines questions de mise en oeuvre propres aux petites entreprises. Il fournit également des

exercices pour aider à élaborer son propre système ainsi que des conseils sur la façon de discuter de l'équité salariale dans une entreprise. Finalement, il donne des renseignements relatifs aux emplois et examine un système de comparaison des emplois dans les petites entreprises.

### Equity capital and economic development in Newfoundland and Labrador

Economic Council of Newfoundland and Labrador, Ottawa : Economic Council of Canada, 1989. xii, 47 p. Bibliogr. (Local development paper ; no. 8) ISSN 0225-8013 MICROLOG 90-04060 1 fiche (Available on fiche only)

Current approaches to economic development are placing more emphasis on the encouragement of entrepreneurship and stimulation of enterprise as a means to achieve self-reliance. In Newfoundland, small- and medium-sized enterprises (SMEs), as part of a balanced economic development strategy, can play an important role in moving the provincial economy toward this objective. However, one of the key requirements for the development of new and existing SMEs is equity capital. This study identifies and analyzes the market for equity capital in Newfoundland and discusses and recommends measures to stimulate demand and supply.

### Ergonomic assessment of information and communication systems for travellers with disabilities

prepared for the Transportation Development Centre, Policy and Coordination Group, Transport Canada ; by Tom Geehan and Ulrika Wallersteiner, TransVision Consultants Limited and Ergo Systems Canada Inc. ; in association with the Canadian Association of Disability Communicators. Vancouver, B.C. : TransVision Consultants Limited ; Ergo Systems Canada Inc., 1989. xviii, 140 p. : ill. Bibliogr. MICROLOG 90-04081 2 fiche

Study identifying and assessing the effectiveness of existing traveller information and communication systems in relation to those travellers with physical, visual, hearing and cognitive disabilities. Information was obtained by a literature review, interviews with transportation operators and authorities, simulated travel scenarios with individual with disabilities, and in-depth focus group sessions. Existing traveller information systems were reviewed, traveller information requirements defined, deficiencies in current systems identified, and opportunities for improvements delineated. Recommendations are included.

### Ergonomically designed workstation for training of electronic systems maintenance technicians

by Sypher/Mueller International ; in association with Socioscope Inc., et al. Montreal : Transportation Development Centre, 1988. 2 v. : ill. Bibliogr. Contents: Vol. 1 : Literature review -- vol. 2 : Baseline analysis, input devices, design recommendations and development of training workstation. MICROLOG 90-01738 4 fiche

Vol. I of this study is a comprehensive literature review summarizing the current state of knowledge and practice of the ergonomic design and use of workstations and the ergonomics of computer aided learning. The literature review includes the ergonomics of computer workstations; currently accepted ergonomics standards and norms for workstation design and use; and the ergonomics of computer aided learning. Vol. II contains 4 task reports, covering baseline analysis of typical training tasks to be performed at training workstations; input devices for interactive computer stations; design recommendations; and development of a training workstation.

### L'Ergonomie cognitive des systèmes informatiques : état de la question et pistes de recherche

par L. Giroux et S. Larochelle. Laval, Québec : Ministère des communications, Centre canadien de recherche sur l'informatisation du travail, 1987. v, 154 p. Bibliogr. MICROLOG 90-02315 2 fiche

L'étude présente l'état actuel des travaux dans ce nouveau domaine qu'est l'ergonomie cognitive des systèmes informatiques. Le rapport décrit les principaux problèmes ergonomiques que posent les nouvelles technologies informatiques, de même que les méthodes utilisées pour les résoudre et les résultats qui ont été obtenus. Enfin, les auteurs suggèrent des pistes de recherche susceptibles de faire progresser les connaissances en ce domaine. Le rapport comporte six chapitres. Les deux premiers chapitres situent l'ergonomie cognitive parmi les autres champs d'investigation scientifique et en décrivent la problématique générale. Les chapitres présentent successivement chacune des grandes composantes de l'interaction humain-ordinateur: le système informatique, l'utilisateur humain et la tâche. Au dernier chapitre, on formule quatre recommandations de recherche.

### Erosion-corrosion of Bruce 'A' blowdown lines during chemical cleaning

by A.M. McKay. Toronto : Ontario Hydro, Research Division, 1989. vii, 42 p. : ill. (Report ; no. 89-133-K) MICROLOG 90-00420 1 fiche

In a Bruce Nuclear Generating Station 'A' steam generator tubesheet chemical clean, the solvent must enter and exit the steam generator through the blowdown lines because design limitations prohibit any other access. These blowdowns are 1" or 1 1/2" pipe and are composed of various Inconel and carbon steel alloys. The combination of flow rates, pipe size, configuration, and materials may make the blowdown system susceptible to flow assisted corrosion, commonly called erosion-corrosion. The purpose of the tests described in this report was to determine if erosion/corrosion could occur.

### An Error sensitivity model for Doppler positioning using Transit satellites

by J.C. McMillan. Ottawa : Defence Research Establishment Ottawa, 1989. xiii, 132 p. : ill. Bibliogr. (Report ; no. 1015) MICROLOG 90-01633 2 fiche

Until very recently the Transit satellite positioning system was the only accurate navigation system available on a global basis. Transit is thus a commonly used navigation aid and was included in the DREO developed marine integrated navigation system (MINS-B II)

and primary land Arctic navigation system (PLANS). MINS and PLANS are Kalman filter based multi-sensor optimally integrated navigation systems and require detailed stochastic and deterministic error models for all of their sensors. This paper provides a detailed geometric derivation of the deterministic error model relating the position error of a Transit satellite Doppler position fix to the error in the velocity and height that is fed into the Transit receiver. This error model is presented as explicit functions of such variables as the satellite maximum elevation angle, the satellite direction of travel and the receiver latitude. Sample plots of these sensitivity functions are presented, along with experimental results for verification. This model is used in MINS and PLANS to form the Kalman filter measurement error sensitivity matrices.

### Errors in ageing hatchery rainbow trout from small lakes in southern British Columbia

by E.A. Parkinson. Victoria : Ministry of Environment and Parks, 1989. i, 7 p. : ill. Bibliogr. (Fisheries technical circular ; no. 87) ISSN 0319-9436 ISBN 0-7726-1001-0 MICROLOG 90-00640 1 fiche

Ageing errors, particularly when bias is involved, can have serious effects on the estimation of population parameters, such as growth and survival, that are important in fisheries management. This report estimated the accuracy of age determination for scales from marked rainbow trout stocked as yearlings into a variety of small, southern B.C. lakes and used the replication among readers to provide an estimate of the effect of ageing errors on an index of growth (length at age 2 plus) and age structure of this population.

### Espoirs et déceptions dans le domaine des femmes battues : progrès, dilemmes et perspectives de prévention : document de travail

par L. MacLeod. Ottawa : Santé nationale et bien-être social Canada, Division de la prévention de la violence familiale, 1989. vi, 60 p. Bibliogr. L'éd. anglaise (*Wife battering and the...*) : 90-00763/1. Présenté à la Conférence nationale sur la violence familiale : main dans la main. MICROLOG 90-00762 1 fiche

Au cours des années 80, d'importants progrès ont été réalisés dans le domaine de la violence faite aux femmes mais il reste encore beaucoup à faire. Les programmes d'intervention d'urgence, la sensibilisation accrue de la population à la question des femmes battues et la dénonciation de plus en plus courante des cas de violence familiales ont marqué ces progrès. Ce document a été conçu en vue d'étudier les points suivants : les dilemmes et les conséquences de la violence, les perspectives de prévention; le programme d'action pour la prévention; la prévention primaire; les comités de coordination, le rôle de l'appareil judiciaire; les défis particuliers aux femmes doublement isolées; les refuges; et les programmes pour les hommes violents.

### Estimated costs and returns for chinook salmon production in the Campbell River area

Victoria : Ministry of Agriculture and Fisheries, Aquaculture and Commercial Fisheries Branch, 1989. v, 25 p. ISBN 0-7726-1015-0 MICROLOG 90-00644 1 fiche

Response to the need for an estimate of costs and returns for chinook salmon production, for salmon farm business analysis and planning reference, primarily for chinook salmon producers in the Campbell River area. The assumptions and basic data were supplied by a small volunteer group of salmon farmers in June 1989 who specified a consensus resource base and production practices as well as the associated production costs and expected returns. The consensus farm is a grow-out operation with 30,000 regular and 120,000 monosexed female chinook smolts placed each May. The farm has a fish survivability to market rate of 70% and an annual production of 240 tonnes of dressed salmon. This document covers general background

information and assumptions, assumptions and calculations for capital investments and costs and returns, and analysis.

### Estimated incidental catches of smallmouth bass in commercial gill nets, Long Point Bay, Lake Erie, 1987

by R.B. MacGregor. Port Dover, Ont. : Ministry of Natural Resources, Lake Erie Fisheries Assessment Unit, 1987. 78 p. : maps. Bibliogr. (Report ; 1988-2)  
MICROLOG 90-00727 1 fiche

In 1983 and 1984, preliminary work was carried out in Long Point Bay on incidental catches of smallmouth bass in commercial gill nets. The estimates included only 6 weeks from late July through August. Confidence limits were wide and several information gaps were identified. Therefore, a further study was done in 1987 to provide a first estimate of the total annual catch of smallmouth bass in commercial gill net; to identify the critical areas and periods where bass are most vulnerable to commercial gear; and to evaluate the effect of the incidental catch on the smallmouth bass population, and on the sport fishery. This report summarizes the findings of the work carried out between April 25 and October 30, 1987.  
FI ON PR SC

### Estimated incidental catches of smallmouth bass in commercial gill nets, Long Point Bay, Lake Erie, 1988

by R.B. MacGregor and D.C. Howe. Port Dover, Ont. : Ministry of Natural Resources, Lake Erie Fisheries Assessment Unit, 1989. vi, 60 p. : ill., maps. Bibliogr. (Report ; 1989-2)  
MICROLOG 90-02970 1 fiche

An investigation was undertaken in 1988 to provide a second estimate of bass catches from Long Point Bay; to provide a more intense examination of bass catches in waters east of Port Dover and to define the critical period of vulnerability in this area and locate "hot spots" where bass catches are highest; to undertake a tagging program which focused on seasonal movements of bass within the bay, and to begin a more prolonged examination of potential survival rates of bass from entanglement. Simulated commercial fishing exercises were conducted to provide data on the seasonal and spatial distributions of bass catches in water east of Port Dover, and a series of on-board observations of actual commercial gill net catches were conducted throughout the bay between May 10 and October 6. This program provided the data necessary to calculate the catches of bass per unit of commercial effort. This annual report reviews the responsibilities and services of the Board, as well as its other functions. It also includes a summary of debenture borrowings approved in 1989, a summary of annexations granted in 1989, a summary of financial applications approved by local authority, a summary of annexation applications granted, by local authority, and a summary of applications approved/granted by category of local authority.

### Estimates of air pollutant concentrations and deposition due to electricity exports during the period 1991-2006

by O.T. Melo...et al. Toronto : Ontario Hydro, Research Division, 1989. i, 82 p. : ill., maps. Bibliogr. (Report ; no. 89-65-K)  
MICROLOG 90-01172 1 fiche

Ontario Hydro is preparing an application to the National Energy Board for a license to export electricity to the U.S. from 1991-2006. This application must cover the social costs incurred in Canada by generating electricity for export. The calculation of social costs involves assessments of air pollutant concentrations and deposition due to all sources and due to electricity exports alone, the relationship between pollutant dose and receptor response, and the cost associated with the incremental dose due to electricity exports. This report deals with the in-house assessment of the air pollutant concentrations and deposition associated with emissions from fossil-fuel-fired stations, estimated through the use of pollutant transport and deposition models for both short- and long-range transport, representative meteorological data from 1983 for short-range calculations and 1982 or 1976-85 for long-range calculations, and emissions data from 1980-82 as a baseline, then modified to take into account the implementation of acid rain control legislation in Eastern Canada, and Ontario Hydro's projections of export sales.

### Estimation of additional abatement costs for the proposed revisions to Regulation 308

SENEC Consultants Limited. Toronto : Environment Ontario, Policy and Planning Branch, 1990. ix, 276 p. Bibliogr. ISBN 0-7729-7290-7  
MICROLOG 90-07009 4 fiche

Since 1971, one of the main statutory means of controlling air pollution in Ontario has been the Environmental Protection Act and the regulations pursuant to the Act, in particular Regulation 308, which specifies the maximum permitted concentration of numerous contaminants at a point of impingement from a source of contaminant (other than a motor vehicle). The Ministry of the Environment proposed that Reg. 308 be revised so that the existing point of impingement standards are replaced with new ambient air standards and technology-based emission limits. The proposed revisions are expected to result in greater control of emissions and increased control costs. This study estimated the additional abatement costs necessary to ensure compliance with the proposed revisions to Reg. 308 for each major industrial sector, for waste disposal companies and for municipalities.

### Estimation of Canadian human capital stocks and flows : what can be done?

by H.H. Postner. Ottawa : Economic Council of Canada, 1989. vii, 51 p. Bibliogr. (Discussion paper ; no. 365) ISSN 0225-8013  
MICROLOG 90-01798 1 fiche (Available on fiche only)

Surveys the literature on estimation of human capital stocks and flows, and suggests a method and means of estimating Canadian human capital stocks and flows on a regular basis. The paper examines three main methods of estimating human capital stocks and flows for a nation's economy. The first method is called the retrospective approach to estimation, the second is called the prospective approach, and the third is referred to as the 'back-of-the-envelope' approach. The conclusion outlines some of the outstanding problems and related issues in the human capital area.

Cette étude porte sur certaines difficultés qu'ont connues les réfugiés venus du Salvador au cours de la période d'établissement et d'adaptation. L'étude traite principalement des éléments linguistiques, économiques, professionnels et sociaux de l'adaptation. On a choisi Toronto et Ottawa comme lieux de recherche. On a fait subir une entrevue à 15 réfugiés réétablis à Toronto, 12 à Ottawa et trois à Hull. Le plan d'entrevue comprenait principalement des questions ouvertes qui permettaient aux personnes interrogées de s'exprimer librement. Le document présente les résultats de ces interviews.

### Etablissement des routes et horaires réguliers dans les entreprises de transport routier des marchandises

par A. Blanchette. Montréal : Université de Montréal, Centre de recherche sur les transports, 1989. viii, 147 p. : ill. Bibliogr. (Publication : no. 663)  
MICROLOG 90-01614 2 fiche

L'industrie du transport routier des marchandises occupe une place importante dans l'économie canadienne. Plus de 65% des marchandises exportées et 70% des marchandises importées entre le Canada et les Etats-Unis sont transportées par camion. L'objectif de ce mémoire est de présenter une méthode de planification pour les routes et horaires des chauffeurs de camion dans les entreprises de transport routier des marchandises en charges partielles. Cette méthode fait appel à des techniques de recouvrement d'ensembles semblables à celles utilisées dans le domaine du transport aérien pour le problème des horaires d'équipages d'avions.

### Etat actuel et orientations futures projetées de la recherche sur la tordeuse des bourgeons de l'épinette de Forêts Canada

Ottawa : Forêts Canada, 1987. vi, 53, 52 p. L'éd. anglaise (*Spruce budworm...*) sur la même fiche.  
MICROLOG 90-00963 2 fiche

La tordeuse des bourgeons de l'épinette représente l'un des plus sérieux problèmes pour l'aménagement forestier dans une grande partie de l'est de l'Amérique du Nord. En défoliant les arbres, les larves de la tordeuse enlèvent une partie de l'usine de photosynthèse de même que des zones où les produits chimiques tels que les hormones de croissance sont fabriqués, cela affecte plusieurs fonctions vitales. A la suite de ces découvertes, le Comité d'examen a identifié des secteurs de préoccupation et formulé des suggestions et des recommandations quant aux mesures administratives à prendre. Dans le cadre de cet exercice, la recherche a été divisée en trois secteurs principaux: la biologie de la tordeuse des bourgeons de l'épinette, l'impact de la tordeuse sur la forêt et la lutte contre cet insecte. Le document vise à évaluer l'état actuel de la recherche sur la dynamique des populations de la tordeuse pour s'assurer de ne rater aucune occasion en 1987 de découvrir les facteurs affectant les modifications de population. Il effectue également un examen du programme de recherche de Forêts Canada sur la tordeuse en vue d'identifier et de coordonner les besoins futurs en matière de recherche.

### Ethnic origin mother tongue, Metropolitan Toronto region, 1981

Toronto : Metropolitan Toronto Planning Dept., Research Division, 1987. 20 p. : ill. (Metro facts : 05) CSI 89181.219.  
MICROLOG 90-06173 1 fiche

Cultural diversity exists in Metropolitan Toronto and the Metropolitan Region as a result of the wide range of ethnic mix. This report illustrates the extent of ethnic diversity by examining the ten largest ethnic groups and five largest

mother tongue categories. It is based on the 1981 Census of Canada. The ethnic profile is described in terms of sex, family structure, mobility, education, occupation and employment status. The mother tongue profile is described in terms of family structure, mobility, education, occupation and occupation by sex. In addition to revealing differences and similarities between the ten largest ethnic groups and five largest mother tongue categories that are profiled, the report examines differences in geographical distribution by region of the ethnic population groups.

### Etude collective des populations d'oiseaux nicheurs au Canada, 1988

par A.J. Erskine, B.T. Collins et J.W. Chardine. Ottawa : Service canadien de la faune, 1990. 16 p. Bibliogr. (Cahiers de biologie : no 188) L'éd. anglaise (*The Cooperative bird...*) : 90-04583/1. ISBN 0-662-95962-0  
MICROLOG 90-06277 1 fiche

L'Etude collective des populations d'oiseaux nicheurs (EPON), entreprise à titre expérimental aux Etats-Unis en 1965, a commencé au Canada en 1966, sous la coordination du Service canadien de la faune. Elle vise à mesurer les tendances dans les effectifs des oiseaux, en particulier les petits oiseaux terrestres, de l'Amérique du Nord. Il s'agit du type de suivi écologique à grande échelle le plus efficace pour les oiseaux terrestres. Chaque année, des données sur les oiseaux nicheurs sont recueillies par des bénévoles et des ornithologues professionnels versés dans l'étude des oiseaux nicheurs. Ce

rapport porte sur l'EPON de 1988 et donne un résumé des tendances observées de 1966 à 1988 et en 1987-1988 fondé sur une nouvelle approche statistique.

### Etude de l'exposition aux vibrations globales du corps dans des véhicules du service de la voirie

par P.-E. Boileau, H. Scory et J. Boutin. Montréal : Institut de recherche en santé et en sécurité du travail du Québec, 1988. 27 p. Bibliogr. (Etude : bilan de connaissances) ISSN 0820-8395 ISBN 2-551-06877-0  
 MICROLOG 90-02338 1 fiche

Les véhicules du service de la voirie tels que les niveleuses et les camions de chantier (6 et 10 roues) exposent les conducteurs à des vibrations mécaniques plus ou moins importantes causées par le déplacement des véhicules sur un sol irrégulier. Dépendant de son intensité, la nuisance vibratoire peut affecter le confort, la capacité de travail, voire à long terme la santé du conducteur. Cette étude présente des résultats de mesures de vibrations globales du corps effectuées sur trois niveleuses et trois camions de chantier utilisés par le service de la voirie. On a effectué ces mesures dans des situations réelles de travail de façon à évaluer l'importance des expositions pour les conducteurs et à estimer l'efficacité d'atténuation des différents sièges à suspension verticale utilisés dans ces véhicules.

#### Etudes sur la théorie de la production avec applications à l'industrie du transport par camion

par R. Gagnée. Montréal : Université de Montréal, Centre de recherche sur les transports, 1989. v, 123 p. Bibliogr. (Publication : no. 674)  
MICROLOG 90-03007 2 fiche

Cette thèse est divisée en quatre études, toutes reliées au thème de l'analyse de la structure de la technologie et des coûts des entreprises. La première étude présente de manière détaillée la méthodologie généralement employée pour l'analyse de la structure des coûts des entreprises de transport par camion.

Egalement, une section de cette étude est consacrée à l'utilisation de cette méthodologie pour l'analyse des rendements d'échelle, du progrès technique et des bénéficiaires de la réglementation. Ensuite, l'étude traite de l'interprétation de certaines mesures d'élasticité des coûts totaux en fonction de la mesure de production employée lors de l'analyse de la structure des coûts des entreprises de transport par camion: un nouveau test d'agrégation des mesures de la production pouvant être appliqué à des entreprises en situation de concurrence ou de monopole; et, une application de ce test à des entreprises canadiennes de transport par camion.

#### Etudes sur les débouchés canadiens aux Etats-Unis : appareils de mesure et instruments

Groupe conseil Peat Marwick. Ottawa : Affaires extérieures Canada, 1989. 77, 73 p. : ill. *Bilingue (Studies in Canadian...measuring...)*. ISBN 0-662-56019-1  
MICROLOG 90-01973 2 fiche

Les importations américaines d'appareils de mesure et d'instrument classés à la liste A à sept chiffres, que ce rapport analyse en détail, se chiffraient à 1,97 milliard de dollars US en 1987. Elles ont augmenté en moyenne de 24,48% par an entre 1982 et 1987. L'Europe et le Japon détiennent, respectivement, 44% et 28% de ce segment du marché des importations américaines, alors que la part du Canada se situe autour de 7%. De plus, ce rapport renferme certaines informations sur l'exportation, énumère les foires commerciales et les publications spécialisées que prêtent les importateurs américains, examine les idées que les importateurs américains se font de l'incidence de l'Accord de libre-échange sur leurs achats de produits canadiens, et donne le tarif douanier applicable montrant les étapes de la mise en application de l'Accord de libre-échange.

MICROLOG 90-01956 2 fiche

L'industrie du matériel ou des machines à travailler les métaux produit de nombreuses catégories de biens d'équipement et de services d'ingénierie essentiels à la fabrication. Les produits visés par cette étude sont les

suivants: tours à métaux, machines à fraiser, machines à poinçonner et à cisailer, machines-outils de finissage des métaux, à profiler les métaux et travaillant le métal par enlèvement, et pièces de machines-outils à métaux. Ce sont là les principaux produits fournis par les entreprises européennes et japonaises. Le document donne de l'information sur l'exportation; les foires commerciales et les publications professionnelles; les perceptions que les importateurs américains se font de l'incidence de l'Accord de libre-échange; et, les listes tarifaires pertinentes montrant les étapes de mise en application de l'Accord de libre-échange.

MICROLOG 90-01972 2 fiche

L'industrie du matériel agricole englobe une large gamme de produits, dont les suivants, qui sont visés par notre étude: pièces de tracteurs et de machines agricoles comme les charmes, les motobineuses, les semoirs, les planteuses, les presses à fourrages, les faucheuses, les javaleuses, les moissonneuses-andaineuses et les moissonneuses-batteuses. Ces produits occupent la plus grande place sur les marchés d'importations de machines agricoles approvisionnés par des entreprises des principaux pays développés. Ce rapport sectoriel identifie les principaux produits que les Etats-Unis importent depuis des pays développés, explore l'effet de la dévaluation du dollar américain sur le prix de ces importations, et indique lesquels de ces produits pourraient donner à nos fournisseurs de meilleures possibilités d'exportations aux Etats-Unis.

# **Les Etudiants africains au Canada : leur profil, les conditions de leur formation et leurs plans de carrières**

par M. Diambomba. Ottawa : Centre de recherches pour le développement international, 1989. xvii, 298 p. Bibliogr. (Rapport manuscrit ; 221f) MICROLOG 90-00270 4 fiche (Available on fiche only)

Cette étude a pour but de contribuer à une meilleure compréhension de la problématique des études à l'étranger. Dans un premier temps, il s'agit de dresser le profil des étudiants africains qui ont la chance de participer à ces programmes. Il s'agit de voir qui y participe, quel est ce qui motive leurs décisions; comment sont-ils sélectionnés; qui décide des choix des programmes d'études et des pays de formation; qui finance leurs études et quel est le degré d'intégration de ces étudiants dans les milieux étrangers. De plus, on évalue l'importance de ces programmes de formation pour l'accroissement du capital humain en Afrique. Finalement, il est question de voir si les participants à ces programmes subissent des changements majeurs quant à leurs objectifs scolaires et leurs plans de carrières, et d'identifier les facteurs qui sont à la base des changements éventuels.

# **Evaluate foams to improve oil recovery from heavy oil reservoirs : final report**

by M. Sarbar, B.B. Maini and J. Goldman. Calgary, Alta. : Esso Resources Canada, 1989. iv, 80 p. ill. Bibliogr. *CANMET contract: 89020-01-SQ* MICROLOG 90-03387 1 fiche

This experimental investigation was carried out to develop a foam treatment for possible field application in a steam flood operation. The study evaluated several available surfactants to select the most promising and provided data on the effect of several process parameters for the selected surfactant. Six different surfactants, representing a cross section of temperature stable surfactants currently in the market, were evaluated in Ottawa sand cores. The increase in pressure drop across the core resulting from injection of the foaming surfactant with steam into the core containing steam flood residual oil was measured. The extent of surfactant losses due to adsorption and thermal degradation in the field were also considered. The effects of concentration, flow rates, steam quality and non-condensable gas were examined using the selected surfactant.

#### **Evaluation du programme de perfectionnement provincial des professionnelles et des professionnels des cégeps : résumé du rapport et recommandations**

Québec : Ministère de l'enseignement supérieur et de la science, Direction générale de l'enseignement collégial, 1989. 17 p. ISBN 2-550-19769-4. MICROLOG 90-01877 1 fiche

Ce document résume les résultats d'une recherche effectuée au cours de l'année scolaire 1988-1989 dans le réseau collégial dont l'objectif est de procéder à l'évaluation du Programme de perfectionnement provincial des professionnels des cégeps. Plus précisément, le mandat de recherche porte sur la méthodologie de l'enquête; les données sur les groupes consultés; le personnel professionnel et de perfectionnement; les données sur les activités de perfectionnement; les règles administratives du programme provincial; les obstacles au perfectionnement; et, le programme de perfectionnement provincial. ED PR QU

#### **Evaluation du rapport 75-INSAG-3 de la Collection sécurité de l'AIEA : basic safety principles for nuclear power plants**

Canada. Comité consultatif de la sûreté nucléaire. Ottawa : le Comité, 1989. ii, 9 p. Bibliogr. L'éd. anglaise (*Assessment of IAEA safety series...*) sur la même fiche. MICROLOG 90-01712 1 fiche

Ce document présente le rapport INSAG qui est basé sur trois objectifs prépondérants de sûreté et une série de douze principes fondamentaux de sûreté, dont trois touchent à la gestion de la sûreté, trois à la défense en profondeur et six aux questions techniques. Il indique, en outre, certains principes particuliers de sûreté. Le Comité consultatif de la sûreté nucléaire a confronté les objectifs de sûreté mentionnés dans le rapport INSAG et le rapport CCSN-2 qui traite de ces objectifs par rapport aux activités nucléaires au Canada, puis les principes de sûreté du rapport INSAG et les exigences de sûreté prévues dans le rapport CCSN-4. Finalement, le rapport illustre particulièrement bien les liens qui existent entre les objectifs de sûreté et les principes de sûreté, ainsi que les liens logiques entre les objectifs et les principes. Le rapport souligne aussi comment certains principes fondamentaux (c'est-à-dire les responsabilités de gestion et la défense en profondeur) dominent toute la structure des principes de sûreté. • CA EN PS SC

#### **L'Evaluation du risque pour la santé : la protection de la santé : un défi**

Ottawa : Santé et bien-être social Canada, 1990. 34, 34 p. : ill. Bilingue (*Health risk determination...*). ISBN 0-662-56897-4. MICROLOG 90-03978 1 fiche

Depuis toujours, pour l'être humain, la vie quotidienne comporte des dangers, mais la nature de ces dangers a changé avec les années. Ce document étudie la question en se penchant sur les points suivants: les différents aspects de la protection de la santé; la notion de risque; la mise en application du modèle, les perspectives d'avenir; et la conclusion. CA HE SA SC

#### **Evaluation économique de l'intervention de zonage des plaines inondables dans la région de l'Outaouais**

par P. Morissette...et al. Sainte-Foy, Québec : Environnement Canada, Institut national de recherche sur les eaux, Direction de la recherche sur les lacs, Centre canadien des eaux intérieures, 1988. ix, 44 p. : ill. Bibliogr. (Série scientifique ; étude no 161) L'éd

anglaise (*An Economic assessment...*) sur la même fiche. ISBN 0-662-95216-2. MICROLOG 90-06403 2 fiche

Parmi toutes les mesures disponibles pour diminuer les pertes causées par les inondations, le zonage en est une qui permet de limiter l'accroissement des activités économiques dans certaines parties des plaines inondables. Cette étude a pour but d'évaluer la rentabilité économique du programme de zonage des plaines inondables appliqué par la Communauté régionale de l'Outaouais à la suite de la désignation de ses zones inondables dans le cadre du programme fédéral-provincial de cartographie des risques d'inondation. # **Evaluation of alumina/Zn-27Al metal matrix composites**

by S. Dionne, et al. Ottawa : Canada Centre for Mineral and Energy Technology, Metals Technology Laboratories, 1989. iii, 37 p. : ill. Bibliogr. (Report ; MTL 89-81(TR))  
MICROLOG 90-07114 1 fiche

Commercial Zn-Al foundry alloys such as ZA 27 are in increasing use in many applications and effectively compete against copper, aluminum and iron-based foundry alloys. However, Zn-Al alloys suffer from poor elevated temperature properties which restrict their performance for some applications. This investigation examined the effects of alumina fibre reinforcement on the elevated temperature properties of a Zn-Al foundry alloy. Billets of unreinforced Zn-Al matrix alloys were fabricated by squeeze casting. The chemical composition, reinforcement distribution and microstructure of these materials were characterized. Tensile and impact properties were evaluated at 25C, 100C and 150C as well as compression and fatigue properties at 25C and 100C. Wear and creep tests were also performed on the unreinforced alloy and composites. Fractographic examinations were carried out to

determine the operative fracture mechanisms.

# **Evaluation of and operating experience with a Heat Harvester green chip pre-furnace, 1985-86**

by C.A. Short. Ottawa : Energy, Mines and Resources Canada, Renewable Energy Division, 1987. 107 p. : ill. Bibliogr. MICROLOG 90-00383 2 fiche

Evaluation of the performance of a Heat Harvester green chip pre-furnace over the 1984-85 heating season. The combustion system was designed and fabricated by the Heat Harvester Corp., Carrboro, North Carolina and is intended to burn a variety of wood, vegetable, and paper waste fuels. The appliance incorporates a mechanically-stoked, horizontal tunnel burner and is equipped with various controls to provide automatic ignition of the fuel, removal of ash, rapid burn-out of remaining coals on shut-down, and a clean burn when running. A manually-filled hopper provided as part of the device holds a supply of fuel sufficient for several hours of continuous operation. It is intended to be coupled to a hot air furnace or a hot water boiler which serves as a heat exchanger.

# **Evaluation of ecological constraints on peat mining in New Brunswick**

by H. Gautreau-Daigle. Fredericton : Dept. of Natural Resources and Energy, Minerals and Energy Division, 1990. vii, 71 p. : maps. Bibliogr. (Open file report ; 90-6) ISSN 0712-4562  
MICROLOG 90-06086 1 fiche

Horticultural peat mining is a major natural resource based industry in eastern New Brunswick. The largest peat bog complex is located in the Escuminac Peninsula. Currently, 5 companies operate Crown leases and several resource development projects have been proposed, leading to concern over their impact on moose and waterfowl usage. This study was undertaken to obtain baseline information on moose and waterfowl usage of peatlands in the Escuminac bog complex to determine the impact of existing peat mining activities. The report presents the results of a waterfowl population survey and a moose population survey.

# **Evaluation of effects of deep waste injection in the Cold Lake area, Alberta**

by B. Bachu. Edmonton : Alberta Research Council, Alberta Geological Survey, 1989. v, 57 p. : ill., maps. Bibliogr. (Bulletin ; no. 60) MICROLOG 90-05913 1 fiche

The regional and local effects of underground injection of wastewater from in situ oil sands pilot plants were evaluated at sites in the Cold Lake area, using projected injection rates up to 2015. Geochemical effects were investigated in a suite of cases representative of the injection aquifers and conditions of injection in the Cold Lake oil sand deposit. Fracturing thresholds were evaluated at several sites, based on the geomechanical properties of the rocks. The regional effects of deep waste disposal were simulated on a large scale for pressure buildups at 27 sites. Local scale simulations were performed for the same sites as were the evaluations of geochemical effects and fracturing thresholds.

# **Evaluation of emission control systems on a catalytic woodstove as used in Whitehorse**

by C.A. Simons. Beaverton, OR : OMNI Environmental Services, 1989. v, 207 p. : ill. Bibliogr. CANMET contract: 89087-01-SQ. MICROLOG 90-02544 3 fiche

This report represents a follow-up study of the performance of the replacement catalytic combustors installed in Blaze King 'King' (Model KEJ 1101) woodstoves used during the 1987-88 heating season in two homes located in Whitehorse, Yukon Territory. The study evaluated the integrity of key components of the emission control systems of the 2 Blaze King 'King' catalytic woodstoves in the homes and assessed the emission reduction performance of the catalytic combustors in the stoves under laboratory conditions. The study included a thorough inspection of the emission control systems of the woodstoves in both homes in October 1988 and replacement of new combustors. To quantify the amount of catalyst bypass leakage, a testing instrument was used to measure flow rates at various draft levels. A detailed interview of the residents in both homes was conducted to

determine how their woodstoves were fueled and operated during the 1987-88 heating season.

#### Evaluation of estimates of phosphorus concentrations and loadings from Ontario municipal wastewater treatment plants

by D.T. Chapman and W.G. Randle. Toronto : Environment Ontario, 1990. x, 130 p. : ill. Bibliogr. ISBN 0-7729-6358-4 MICROLOG 90-04593 2 fiche

A study was undertaken to assist in the development of future management strategies for controlling phosphorus discharges into the Great Lakes from municipal wastewater treatment plants. The study evaluated the accuracy and precision of basin-wide estimates of phosphorus concentrations and loadings and developed recommendations for improving the management and analysis of data collected from the plants. For the 96 plants larger than 4,546 cu m/d, annual mean flow rates, effluent total phosphorus concentrations, and total phosphorus loadings for 1981-85 were obtained, as well as sets of completed questionnaires summarizing interviews with operators concerning factors affecting phosphorus removal efficiency. A second database was examined to establish how different types of samples (grab, composite, flow-weighted composite) influenced daily phosphorus concentration estimates. 1985 data were also obtained for 3 Metro Toronto plants to examine their performance.

#### Evaluation of hydrated lime as an anti-stripping agent in the hot-mix recycling of a badly stripped pavement

by R.C. Evers...et al. Toronto : Ministry of Transportation, Materials Information, Engineering Materials Office, 1989. 11 p. (Materials information report ; MI-139) ISBN 0-7729-6808-X MICROLOG 90-03537 1 fiche

Highway 11, Englehart northerly to the junction of Highway 112 called for the recycling of a badly stripped asphalt pavement. As some U.S. states have had success recycling stripped pavements using hydrated lime as an anti-stripping agent, it was decided to include a lime-treated trial for a portion of this project with a conventional proprietary anti-stripping agent as a control. The contract required the lime to

be uniformly pre-mixed through a pug-mill at the rate of 1% by weight of the respective aggregates having a minimum moisture content of 3%. This report presents the results of a field trial, conducted in July 1988.

#### An Evaluation of MTO specifications for tree planting and maintenance

by G.P. Lumis and K. Khanna. Toronto : Ministry of Transportation, Research and Development Branch, 1990. vi, 37 p. : ill. Bibliogr. MICROLOG 90-06623 1 fiche

There are conflicting reports in the literature and some differences of opinion among landscape professionals on the best methods of transplanting trees. A 4-year study (1985-90) was undertaken to determine the effects of backfill soil amendments, top pruning, surface treatment/weed control, and staking. The study site was on the west side of Highway 86 south of Rural Route 17, near St. Jacobs. Soil at the site consisted of 7-10 cm of top soil overlying 'heavy' grey clay. Three metre tall green ash trees were planted in augured holes 60 cm wide and 30 cm deep and parameters such as shoot growth, trunk taper or diameter, leaf water potential, canopy density, leaf colour, leaf scorch, foliar nutrient content, soil moisture and soil temperature were measured in most or all years. At the end of the study roots of the backfill and surface treatment trees were excavated for observation and measurement. Results in this report concentrate on the final year of study (1988).

### Evaluation of sapstain control chemicals on eastern spruce-fir and white pine

Norman Whitney ; with John Johnson, Shaun Price, Ronald Belczewski. Fredericton : University of New Brunswick, Wood Science and Technology Centre, 1990. vii, 22 p.  
MICROLOG 90-05702 1 fiche

Sapstain on lumber, caused by fungal growth on the surface of sawwood of freshly-sawn lumber, results in discoloration of the wood, thereby reducing its economic value. Traditional control of sapwood stains has consisted of treatment of freshly-sawn lumber with Pentachlorophenol (PCP) formulations. Recent banning of PCPs in some importing countries has necessitated the adoption of alternative fungicides. This is the 3-month report of an experiment evaluating the effectiveness of 10 fungicides for control of sapstain on freshly-sawn white pine, as well as on a spruce-fir mixture grown in New Brunswick.

### An Evaluation of the Beaufort Sea Environmental Assessment Panel review

by B. Sadler. Ottawa : Federal Environmental Assessment Review Office, 1990. 82, 86 p. : ill. Bibliogr. *Bilingual (Evaluation de l'examen mené...)*. ISBN 0-662-56796-X  
MICROLOG 90-03924 2 fiche

The final report of the Beaufort Sea environmental assessment panel was submitted in July 1984, concluding the lengthiest (4 years) and most comprehensive public inquiry conducted to date under the Federal Environmental Assessment and Review Process (EARP). The review also represented a significant expansion in the use of EARP for planning and management of northern development. For these reasons, the Review Office commissioned an evaluation of the Beaufort Sea experience to examine the policy and institutional implications of the mandate of the Beaufort Sea review; to analyze the operational effectiveness of review procedures, especially those that represent departures from conventional practice; and to consider the contribution of the panel's report to environment and development decision-making. This report examines the study strategy and research design; analyzes the role, practice, and impact of the panel review; and contains conclusions and recommendations on process development.

### Evaluation of the Canada-Manitoba Subsidiary Agreement on Communications and Cultural Enterprises, study no. 1 : final report

Epstein Associates Inc. Winnipeg : The Corporation ; The Agreement, 1988. iv, 169 p.  
MICROLOG 90-06251 2 fiche

Contains an evaluation of the Agreement's rationale, achievement of its objectives, and the need for a new federal-provincial agreement, including possible alternatives to the current ERDA model. It includes an assessment of the Agreement Management function and makes a number of recommendations with respect to the current Sub-Agreement and future federal-provincial arrangements. In addition, it contains an evaluation of three discrete Agreement components: the 1984-85 Film/Video/Audio Advisory Committee, the Ethnocultural Communications Centre, and the Public Information function.

### Evaluation of the crab industry diversification program, Partners 2000 : final report summary

by P. Poulin. Fredericton : Legislative Library, 1989. 41 p.  
MICROLOG 90-04557 1 fiche

Evaluation of the jobs created in Kent County, the Southeast and the Acadian Peninsula by the various programs developed in the Partners 2000 project, as well as the training programs attached to some of them. The report draws a profile of the labour force targeted by these programs, the level of satisfaction of both employers and employees, an evaluation of the system used to implement the effort undertaken, and a look at how the programs that were developed could be improved. A summary of the context surrounding the program is given, along with recommendations for improvements.

### An Evaluation of the harvest distribution, survival and exploitation rate of selected wild coho salmon stocks of the lower Fraser River area

by N.D. Schubert and M.R. Zallen. New Westminster, B.C. : Dept. of Fisheries and Oceans, Fisheries Branch, 1990. xiii, 97 p. : ill. Bibliogr. (Canadian manuscript report of fisheries and aquatic sciences ; no. 2052) ISSN 0706-6473  
MICROLOG 90-04974 2 fiche

Coded wire tags were applied to wild coho salmon stock in the Vedder-Chilliwack, upper Chilliwack, Salmon, upper Pitt, Birkenhead and Campbell rivers and Salween Creek from 1976-82. Harvest was assessed through the coast-wide mark recovery program, and escapement was assessed through field studies.

### Evaluation of the microbial loop in the North American Great Lakes

by T. Weisse and M. Munawar. Burlington, Ont. : Dept. of Fisheries and Oceans, Great Lakes Laboratory for Fisheries and Aquatic Sciences, Bayfield Institute, 1989. v, 30 p. : ill. Bibliogr. (Canadian technical report of fisheries and aquatic sciences ; no. 1709) ISSN 0706-6457  
MICROLOG 90-07231 1 fiche

Although the significance of pelagic micro-organisms composing the 'microbial loop' in marine and freshwater ecosystems has now been generally accepted, very little is known about the abundance, biomass, and population dynamics of bacteria and protozoa in the North American Great Lakes. This report provides, for the first time, detailed data on the abundance of bacteria, autotrophic picoplankton, and heterotrophic nanoflagellates in lakes Michigan, Huron, Erie, and Ontario. Size-fractionated primary production was measured simultaneously. Water samples were collected from 78 stations across the Great Lakes by an integrating water sampler from the euphotic zone from August-October, 1988 and 1989 and were separated into three size-fractions. Primary production was estimated by the C-technique.

#### Evaluation of the pole testing and treating program for distribution lines

by S.A. Bartlett. Toronto : Ontario Hydro, Research Division, 1989. i, 39 p. : ill. (Report ; no. 89-105-K)  
MICROLOG 90-00421 1 fiche

If a wooden pole has deteriorated past a certain threshold, it is replaced with a new pole. If not, it is retreated at the groundline with a preservative compound to delay deterioration of the outside shell. To assess the effectiveness of the treatment, a 2-phase program was instituted. The Phase I questionnaire indicated that the data available were not sufficient for the evaluation of the program, and a survey in the field was recommended to gather the required data. In Phase II, data were gathered and evaluated and the results are given in this report.

#### Evaluation of the Public Housing Program

Ottawa : Canada Mortgage and Housing Corporation, Program Evaluation Division, 1990. 332 p. Summary (67 p.) laid in. French ed. (Evaluation du Programme de...) : 90-05196/5. CSI 22118.214.  
MICROLOG 90-05197 5 fiche

The federal government has supported public housing since 1949 under the National Housing Act, which permits CMHC to cost-share with provinces and territories the costs related to the construction or acquisition of public housing projects and their ongoing operation. Although new commitment activity has ceased, the operation of this portfolio continues to consume 30% of CMHC expenditures on social housing. This evaluation assesses the extent to which the program is currently achieving its objectives and at what costs, in the areas of the physical condition of the stock, management performance, operating expenses, and the quality of life experienced by the program's clients. Data sources include a physical condition survey, questionnaire surveys of clients and project managers, data bases of detailed information on project characteristics and operating expenses, guidelines and procedure manuals, a follow-up telephone survey of public housing administrators, and 8 case studies exploring the need for conversions, redesign or redevelopment and clarifying the issues associated with these major upgrading activities.

#### Evaluation of the rare-element pegmatites in the N.W.T. : pegmatite studies in the Aylmer Lake area : preliminary report

by P. Cerny, P. Tomascak and M.A. Wise. Yellowknife : Indian and Northern Affairs Canada, NWT Geology Division, 1989. 10 p. : maps. Bibliogr.  
MICROLOG 90-00465 1 fiche

A reconnaissance study was initiated in the summer of 1988 in the Aylmer Lake-MacKay Lake basin in the central part of the Slave Province of the Canadian Shield. The initial effort was aimed at the Aylmer Lake region and 2 areas to the southwest, at Kirk and Reid Lakes. An isolated occurrence at Muskox Lake was also inspected, and a virgin pegmatite population at Thonokied Lake was discovered. The study explored the prospects of economically significant rare-element pegmatites in these basins. The examined pegmatite localities were sampled for geochemical characterization. Plutonic intrusions of granites suspected to be parental to the pegmatites were also sampled for whole-rock geochemical analysis.

#### Evidence of atmospheric transport and deposition of toxic substances in Canadian Arctic snow : 1986 progress report

by D.J. Gregor. Ottawa : Environment Canada, Water Quality Branch, 1987. v, 60 p. Bibliogr.  
MICROLOG 90-06747 1 fiche

The 1986 snow sampling program for NWT was undertaken mainly as a pilot study to determine whether or not it was possible to detect the presence of anthropogenic contaminants in the Arctic snow. During the spring of 1986, snow pack samples representing snow accumulation for the winter of 1985-86 were collected at 13 sites widely distributed throughout the Keewatin and High Arctic Districts of the NWT. One of these sites was collected in triplicate and snow samples representative of the preceding 4 winters were also collected from the site located on the Agassiz ice cap. All samples were collected as large volume snow samples, melted at room temperatures, and extracted in the field laboratories for analyses of organic contaminants. Subsamples were also prepared for analyses of major ions, some physical parameters, and selected metals and trace elements.

#### Evidence of dark avoidance by phototrophic periphytic diatoms in lotic systems

by M.L. Bothwell...et al. Saskatoon, Sask. : Environment Canada, Ground Water Division, National Hydrology Research Institute, 1989. 9 p. ill. Bibliogr. (NHRI contribution ; no. 88027) In *Journal of Phycology*: vol. 25, no. 1, 1989. ISSN 0838-1992  
MICROLOG 90-05379 1 fiche

In 1980-81 nutrient-limited periphyton growth rate studies were conducted using an experimental, continuous-flow trough apparatus on the North Thompson River, B.C. During these experiments with parallel light and dark troughs, 24 h chlorophyll accrual rates were often 2-4 times greater in the light trough than the dark. This difference could not be easily explained. A series of experiments were therefore conducted at the same site from 1983-86 to establish whether lotic periphytic diatoms are able to selectively leave darkened environments and to determine the physiological mechanisms responsible for rapid colonization of light vs dark habitats. These experiments included a series of short-term (24 h) colonization trials documenting changes in colonizing species of light vs dark troughs, and the testing of 2 hypothesized mechanisms which might explain a rapid preferential loss of cells from darkened substrata: cells become more adhesive in the light; or diatoms alter their buoyancy or form resistance resulting in a selective loss of cells from darkened environments.

### Examination of the explosion characteristics of methane/coal dust/dolomite/air mixtures

by P.R. Amyotte, M.J. Pegg and Y.-H. Sun. Sydney, N.S. : Cape Breton Development Corporation, 1990. xiii, 101 p. : ill. Bibliogr. CANMET contract: 89077-01-SQ. MICROLOG 90-03965 2 fiche

An experimental investigation of coal dust explosions was conducted in a 26-L, spherical chamber. The coal was run-of-the-mine and came from the Prince, Langan and Phalen mines of the Cape Breton Development Corp. The project investigated the explosion behaviour and dolomite inerting requirements of each of the 3 coals, alone and with admixed methane. Two size fractions were produced for each of the coals and particle size and methane concentration tests were conducted at coal dust concentrations ranging from the lean flammability limit to 1.0 kg/cu m. The explosion parameters measured for each test were the maximum explosion pressure and the maximum rate of pressure rise. In the portion of the study dealing with inerting requirements, the same matrix of coal type, particle size and methane concentration was used, along with a single coal dust concentration of 0.5 kg/cu m. Dolomite concentrations ranged from 20% of the total solids mixture to the percentage required to suppress an explosion. • AP CA CM NR PS SC

### An Examination of the impact of employment training programs on social assistance recipients in Hamilton-Wentworth

by C. Ball and A. Houser. Hamilton, Ont. : Social Planning and Research Council of Hamilton and District, 1989. xiv, 113 p. Bibliogr. MICROLOG 90-01852 2 fiche (Available on fiche only)

This document presents answers to the following questions: Which variables are the most characteristic or predictive determinants of clients' participation in a training program and their subsequent completion? What client-based impacts are most immediately measurable following program participation, in terms of quality of life and ability to overcome employment barriers? Why do trainees apply for or return to social assistance after leaving an employment training program? And what gaps in services currently exist in the larger training referral system, as identified by those who work within its structure? ED LA MU ON SA

### An Examination of the potential impacts of competition in long-distance service on rural and urban subscribers

Ottawa : Federal-Provincial-Territorial Task Force on Telecommunications, 1989. viii, 57 p. MICROLOG 90-02971 1 fiche

This study expands on a 1988 examination of the effects of competition by the Federal-Provincial-Territorial Task Force, which identified

the general impacts of competition on the subscriber's basic service rates. The study presents a case study of the impact of competition on the prairie region and especially for rural subscriber basic service rates in Saskatchewan. An alternative method to competition to achieve long-distance price reductions was identified. Rate rebalancing, which can be effected through direct regulatory action, is analyzed and contrasted to the likely impacts of competition on rural and urban subscribers. The study also contains a critique of the information and findings of the Federal-Provincial-Territorial Task Force report. AL MS PR SC TE

MICROLOG 90-03437 1 fiche

Summary of cruise results from a fishing vessel operating off northwestern Vancouver Island between August 15-28, 1989 to describe rockfish communities on hard (untrawlable) bottom and compare them to those found on smooth-bottom (trawlable) areas. In order to fish hard-bottom areas, the *MV Caledonian*, a chartered commercial trawl vessel, deployed and retrieved sunken gill nets. Fishing was conducted on the continental slope between 200-300 m. The survey was motivated by the hypothesis that hard-bottom areas provide refuge for rockfish, in particular, Pacific ocean perch, from the commercial trawl fishery. If this hypothesis were true, then potential yields from these stocks would be greater than currently estimated. This report presents the results of the second survey.

### An Experimental study of oxygen distribution

by V.A. Berezovsky...et al. Ottawa : National Research Council, Canada Institute for Scientific and Technical Information, 1986. 21 p. Bibliogr. (Canadian translation of fisheries and aquatic sciences ; no. 5209) Originally published in Russian, at Kiev, Ukrainian USSR. ISSN 0704-3716

MICROLOG 90-02700 1 fiche

The concentration of oxygen in animal cells is maintained by oxygen consumption and oxygen supply. As the rate of oxygen consumption increases, oxygen is supplied to the cell in greater quantities. According to the theory of diffusion, this is due to an increase in the concentration gradient in the cell, which leads to greater mass transfer of oxygen. This paper studies the distribution of oxygen in eggs of *Misgurnus fossilis*, the permeability of the membranes to the flow of oxygen and mass transfer of the latter in eggs.

### L'Expérimentation biomédicale sur l'être humain

Ottawa : Commission de réforme du droit du Canada, 1989. 73, 69 p. Bibliogr. (Document de travail ; 61) En tête du titre: *Protection de la vie. Bilingue (Biomedical experimentation involving...)*. ISBN 0-662-56900-8

MICROLOG 90-01587 2 fiche

De nos jours, le développement des sciences pharmacologiques, médicales et biologiques passe nécessairement par l'expérimentation sur l'être humain. L'efficacité des médicaments, des techniques de dépistage et des traitements doit, à un moment ou à un autre, être éprouvée sur l'être humain. S'ils restent indispensables, les essais sur les animaux de laboratoire, notamment sur ceux qui sont les plus près de l'être humain, ne sont pas suffisants pour déterminer avec certitude les effets et conséquences possibles de certains traitements; la tragique histoire de la thalidomide, pourtant essayée avec succès et sans inconvénient sur les singes, est là pour le rappeler. Ce document examine le domaine de l'expérimentation biomédicale sur l'être humain.

### Experimentation with various methods of de-icing and anti-icing for ships

prepared for the Transportation Development

Centre ; by Melville Shipping Ltd. Ottawa : Melville Shipping Ltd., 1989. xiv, 143 p. : ill. Bibliogr.

MICROLOG 90-01742 2 fiche

Study to improve ship and personnel safety and the practical operability of vessels exposed to severe ice accretion by experimentation with some icing control systems. As an initial test of selected ice phobic coatings, a series of laboratory experiments was completed. Ship board tests conducted during the winters of 1988 and 1989 assessed the efficiency of all of the de-icing/anti-icing methods under consideration (ice phobic paints, beating panels, air hammer, and inflatable panels). The project was adversely affected by mild weather.

### Experiments in the Au-Bi-Te system

by E.W. Winkler and N.F.H. Bright. Ottawa : Canada Centre for Mineral and Energy Technology, Mineral Sciences Laboratories, 1964. 9 p. Bibliogr. (Report ; MS 64-57)

MICROLOG 90-04691 1 fiche

The system Au-Bi-Te is of technological importance in view of the use of bismuth telluride in components of thermoelectric refrigeration devices and the employment of gold as a connecting link between such components. The system also has mineralogical significance in that both gold and bismuth occur naturally as tellurides. The phase relationships were studied using thermal analysis to give liquidus and solidus temperatures, DTA to give supplementary information on melting and transition points, X-ray diffraction for identification of phases, and metallographic polished sections to give information concerning the number of phases and physical structure of the assemblages.

### An Expert system for assessing the migration and transformation of pesticides in the subsurface

by A.S. Crowe, J.P. Mutch and R.E. Jackson. Burlington, Ont. : Canada Centre for Inland Waters, National Water Research Institute, 1989. 23 p. Bibliogr. (NWRI contribution ; 89-151)

MICROLOG 90-02449 1 fiche

Groundwater is an important source of domestic water supply in Canada, particularly in rural areas. Since pesticides have the potential to cause serious contamination of shallow aquifers in rural areas, techniques are required that can assess the potential for a pesticide and its degradation products to contaminate groundwater before the pesticide is approved for general use. This paper describes an expert system under development which would provide regulatory personnel with a tool for evaluating the fate of pesticides on the soil and shallow groundwater environment in order to identify potential groundwater problems. The expert system will consist of an existing numerical model which can be used to simulate the transport and transformation of pesticides in the unsaturated zone, coupled with a knowledge-based system that guides the user through the choice of all the necessary information for characterizing the geological, physical, climatic, hydrogeological, pedological and agricultural settings of typical agricultural zones across Canada required for a simulation.

# Exploration in British Columbia, 1989

Victoria : Province of British Columbia, Ministry of Energy, Mines and Petroleum Resources, Mineral Resources Division, Geological Survey Branch, 1990. 240 p. : ill., maps. Bibliogr. CSI/37104.004. ISSN 0823-2059 MICROLOG 90-06854 3 fiche

Annual report on exploration activity, geological descriptions of selected properties, and assessment report summaries of minerals and coals. The overview of exploration activities is presented by district and gives trends, highlights, a summary by mineral, coal or placer mine, development, operating mines and exploration opportunities. The geological descriptions are categorized by metals, industrial minerals, and a regional geochemical survey, and for each mine include location, claims, access, owners, operator, commodities, and a description including history. Assessment reports are presented geographically, with separate mineral and coal indices of property names, operators and authors. Property descriptions include name, location, claims, operator, author, commodities, description, work done, and references.

# Exploratory fishing and hydroacoustic observations of rockfish off Brooks Peninsula, Vancouver Island from the My Velma C and CSS John P. Tully, March 13-23, 1989

by K.R. Matthews...et al. Nanaimo, B.C. Dept.

of Fisheries and Oceans, Fisheries Research Branch, Pacific Biological Station, 1989. iv, 101 p. : ill. (Canadian manuscript report of fisheries and aquatic sciences : no. 2029) ISSN 0706-6473 MICROLOG 90-01421 2 fiche

Summary of cruise results from 2 vessels operating in Brooks Bay, on the west coast of Vancouver Island, from March 13-23, 1989, to describe rockfish communities on hard (untrawlable) bottom and to compare these communities with similar communities on smooth (trawlable) bottom. To fish hard-bottom areas, a chartered commercial longline vessel deployed and retrieved experimental sunken gillnets. Hydroacoustic observations were made concurrently. The survey was motivated by the hypothesis that hard-bottom areas provide refuge for rockfish, in particular, Pacific ocean perch, from the commercial trawl fishery. Due to equipment limitations, the cruise was limited to depths shallower than 200 m, which is shallower than the usual winter depth range of Pacific ocean perch.

#### Explosibility tests on reference sulphide mineral samples

by K.J. Mintz. Ottawa : Canada Centre for Mineral and Energy Technology, Mining Research Laboratories, 1990. iii, 15 p. : ill. Bibliogr. (Report ; MRL 90-007(TR))  
MICROLOG 90-03372 1 fiche

Under the Canadian certified reference material project, samples of ores, in the form of fine dusts, are prepared as analytical standards for the mining industry. Dust clouds of sulphide ores containing high concentrations of pyrite or pyrrhotite are known to be capable of exploding. Therefore, to ensure the safe processing of these materials, appropriate tests were carried out on the explosibility of a candidate reference material and a previously-processed reference material. Chemical analysis was carried out and the mineralogical composition estimated from that data. A sieve analysis was also conducted.

#### Exposure guidelines for residential indoor air quality : a report -- Rev.

Federal-Provincial Advisory Committee on Environmental and Occupational Health (Canada). Ottawa : Health and Welfare Canada, 1989. iii, 23 p. French ed. (Directives d'exposition...) on the same fiche. ISBN 0-662-17882-3  
MICROLOG 90-06861 1 fiche

It is now recognized that non-industrial indoor environments can contribute significantly to human exposure to airborne pollutants. This is particularly true in Canada, with its long cold winters and hot summers, which results in considerable amounts of time being spent in climate-controlled buildings. The working group was set up in October 1980 to consider a definition of acceptable air quality, the need for objective and/or maximum acceptable concentrations for specified substances and a specification of ventilation rates, or recirculation criteria in domestic premises. This report presents guidelines and recommendations for substances with non-carcinogenic and carcinogenic effects, and for substances with recommendations for controlling exposure. A description of the derivation of the guidelines is also included. Recommendations were not developed for radon because of the specialized knowledge required to develop guidelines.

### **Fabrication and fatigue evaluation of welded joints for structures in marine environment, phase II : final report**

by M.J. Pates...et al. S.I. : AMCA International, Research and Technology Centre, 1989.

337 p. : ill. Bibliogr. CANMET contract: OSQ84-00431.

MICROLOG 90-07135 4 fiche

The prediction of the fatigue performance of tubular welded joints, used in the construction of offshore structures, has received much attention during the last decade. This report presents results of fatigue testing on large scale tubular joints welded in the T configuration to determine the effects of stiffening internally with two ring plates welded in the chord tube. All tubular joints were subjected to constant amplitude loading; the brace tube loading was axial, in-plane bending or out of plane bending. Two unstiffened and 7 stiffened joints were tested in air, two stiffened joints were cathodically protected (-0.85 V Ag/AgCl) and tested in artificial seawater at 5C or -2C. Strain gauges were used to determine the stress distributions produced by each mode of loading. Potential drop techniques were used to detect crack initiation at the chord toe of the brace/chord weld and to monitor crack shape development.

### **Fact finding under the School Boards and Teachers Collective Negotiations Act of Ontario**

by R.L. Jackson. Toronto : Education Relations Commission, 1988. 92 p. : ill. Bibliogr. ISBN 0-7729-5984-6

MICROLOG 90-01580 1 fiche

Explores the nature and efficacy of fact finding under the Act. Recognizing that the principal goal of fact finding is to help the parties reach a settlement, it examines the impact of fact finding on negotiations, both pre- and post-fact finding and, particularly, on the attainment of settlements. It also discusses fact finding in a procedural, tactical and strategic perspective from the point of view of the fact finder.

CSI 21100.018F

MICROLOG 90-02780 2 fiche

Ce rapport contient une série de textes faisant état de la situation et des perspectives concernant les facteurs de production agricole (terres, main-d'oeuvre, crédit et financement, machines et bâtiments, engrais, produits agrochimiques et énergie), selon l'information disponible avant la fin d'octobre 1989, c'est-à-dire avant que les données du Recensement de l'agriculture de 1986 soient accessibles. Le

document examine particulièrement les points suivants : la main d'oeuvre agricole, les terres agricoles, la machinerie et les constructions agricoles, l'énergie, les engrais, les produits agrochimiques, le crédit et le financement agricoles, et le survol de la situation financière du secteur agricole canadien.

#### Fate and toxicity of the herbicide diclofop-methyl : a literature review

by D.R. Lintott and D.T. Waite. Ottawa : Environmental Protection Service, Western and Northern Region, 1989. 32 p. Bibliogr. (Report : CP(EP) WNR 89/90-3)  
MICROLOG 90-06743 1 fiche

Diclofop-methyl methyl 2-[4-(2,4-dichlorophenoxy) phenoxy] propionate, otherwise known as HOE-23408, Hoelox, HOE-GRASS and Illoxan, is a phenoxyalkanoic herbicide introduced several years ago by Farbwerke Hoechst AG. It is extensively used in western Canada as a post emergence herbicide for control of wild oats and other grassy weeds in crops such as wheat, barley and flax. Both diclofop-methyl and its hydrolysis product diclofop acid have herbicidal activity which may be toxic to humans and wildlife. This report summarizes the results of a literature review on the fate of diclofop-methyl in terrestrial and aquatic environments, its transport in the environment, and its toxicity to humans and wildlife on land and in the water.

#### Fatness in grenadiers of the North Atlantic

by P.I. Savvatimskii. Ottawa : National Research Council, Canada Institute for

Scientific and Technical Information, 1988  
25 p. : ill. Bibliogr. (Canadian translation of fisheries and aquatic sciences : no. 5390)  
Originally published in Russian, by PINRO, at Murmansk, U.S.S.R. ISSN 0704-3716  
MICROLOG 90-01513 1 fiche

Fat accumulates in perches, minnows, herring-like fishes and righteye flounder in the subcutaneous cellular tissue and in the internal organs, chiefly in the intestine; in cods and grenadiers the fat is concentrated in the liver. The behaviour of the fishes depends on the quantity of fat accumulated in the liver; those with much fat can remain in one place for a long time with little feeding. Grenadier fishing began in the North Atlantic only in 1967 and their habits have not therefore been well researched. A determination of the fatness of grenadiers aids in understanding and in predicting their behaviour and the intensity of fattening in different seasons and in different years, as well as its periods of migration and spawning. This report presents the results of a study of the fatness of North Atlantic grenadier that are of commercial importance and that show commercial promise.

### Feasibility of aquatic plant harvesting in water quality amelioration and nutrient management in a shallow impoundment : the Orangeville Reservoir

prepared by Beak Consultants Limited and Credit Valley Conservation Authority. Toronto : Environment Ontario, 1989. iii, 60 p. : map. Bibliogr. ISBN 0-7729-5284-1  
MICROLOG 90-01351 1 fiche

Aquatic plant harvesting represents a simple and low cost method of nutrient management. In most southern Ontario reservoirs, eutrophication is a major management problem. The Orangeville reservoir, located at the headwater of the Credit River, is typical of many southern Ontario impoundments. The reservoir is shallow and supports heavy growth of aquatic macrophytes in summer. Aquatic plant harvesting was carried out to a limited extent in 1984 and 1985, and more extensively in 1986. A study of the role of plant harvesting in the nutrient budget of the Orangeville reservoir was undertaken in 1986 to evaluate the potential of biomass harvesting as a water quality management tool for shallow reservoirs. This was accomplished through a 1-year evaluation of the nutrient budget for the reservoir, an evaluation of the role of sediments in the nutrient budget, and an

evaluation of the effects of plant harvesting on water quality through comparison with historic data.

### Feasibility study and costing of proposed pollution control measures in the Humber sewershed

Paul Theil Associates. Toronto : Toronto Area Watershed Management Strategy Steering Committee, 1986. 2 v. : ill., maps. Bibliogr. (Technical report ; no. 9) Contents: Vol. I : Technical report -- vol. II : Addendum.  
MICROLOG 90-01898 4 fiche

In an effort to maintain or upgrade water quality within the Toronto area watershed, the Ministry of the Environment has commissioned a number of studies. This study deals specifically with the watersheds of the Humber

River and the associated tributaries. Four specific tasks involving the feasibility and costing of various pollution control works were completed for this study, a brief description and the main objectives of which are given. The tasks included combined sewer overflow control at centralized locations, flow control in local combined sewers, separation of combined sewers, and stormwater detention ponds. Brief descriptions of the main advantages and disadvantages of the inlet control method and sewer separation are given, as well as the estimated costs for the proposed works. The cost estimates were based on 1984 construction costs and include installation, restoration, operation, maintenance and replacement costs, land costs and a 20% engineering and contingency allowance.

### Feasibility study of a wind shear/microburst detection, analysis and advance warning system for Canadian airports

prepared for the Transportation Development Centre : by Geoff Austin, Douglas Ballantyne and Karl Snider. Ottawa : MacDonald Dettwiler & Associates, 1989. xxiii, 164 p. : ill. Bibliogr.  
MICROLOG 90-01751 2 fiche

Hazardous wind shear conditions have been linked to the meteorological phenomena known as microbursts. Microbursts, and the associated wind shear conditions, are difficult to predict with the detection technology currently available at Canadian airports. This study examined the feasibility of a wind shear/microburst detection system for use at Canadian airports. Six user requirements for the detection system were established by Transport Canada, including cost, coverage and functionality. The report describes the meteorological causes of wind shear, including a detailed discussion of microbursts; current wind shear/microburst detection technologies; and a system consisting of Doppler radar and low level sensors.

### A Feasibility study of residential intensification in single-industry towns : a case study of Hemlo

by J. Stafford and B. McMillan. Ottawa : Canada Mortgage and Housing Corporation, 1987. 153 p. : ill., maps. Bibliogr.  
MICROLOG 90-01698 2 fiche

The study examines the flexibility of intensifying the existing stock of housing and serviced land in residential subdivisions in two Northwestern Ontario resource towns currently experiencing rapid population development related to the Hemlo goldfield expansions. It determines and discusses the opportunities for residential intensification through surveys with community residents and interviews with key municipal and community personnel, and data analyses which measure the physical potential of existing housing.

**A Feasibility study of solvent-assisted gravity drainage of heavy oil using propane vapour : development of the VAPEX process : final report**

by R.M. Butler and I.J. Mokrys. Calgary, Alta. : University of Calgary, Dept. of Chemical and Petroleum Engineering, 1989. 124 p. : ill. Bibliogr. CANMET contract: 79145-01-SS MICROLOG 90-05643 2 fiche

Final report summarizing experimental work carried out during the investigation of solvent-assisted gravity drainage of heavy oils using solvent vapour. The experiments were conducted in a scaled visual Hele-Shaw cell and in a scaled packed cell with Tangleflags North heavy oil and propane. All phases of the experimental development involved the contracting of bitumen with propane vapour at or above its dew point in a vertical cell. In the first experiments, the Hele-Shaw cell was exposed to saturated propane vapour along a vertical edge which was left open and the oil drainage was determined from photos. In later experiments, saturated propane vapour entered the vertical Hele-Shaw cell at the top and formed a V-shaped chamber. The rate of oil drainage was studied as a function of saturation temperature and pressure at a constant rate of withdrawal. In the final experiments, a scaled packed cell with 7 thermocouples arranged in a 7-spot pattern was designed. All heat to the oil was supplied by simultaneous injection of propane and hot water.

**The Fecundity of the Atlantic salmon *Salmo salar* L. from the Varguza River**

by M.N. Melnikova. Ottawa : National Research Council, Canada Institute for Scientific and Technical Information, 1984. 15 p. (Canadian translation of fisheries and aquatic sciences ; no. 5114) Originally published in Russian, in the USSR ISSN 0704-3716 MICROLOG 90-00043 1 fiche

The Atlantic salmon of the Varguza River are grouped into winter salmon (enters the river in June), summer salmon (enters the river at the end of June or the beginning of July), grise (July), and autumn salmon (enters the river mainly in October-November). Since females of the autumn salmon sharply predominate in the river, and the abundance of female grise and summer salmon constituted approximately 4% of the number of female autumn salmon in 1958 and 2.3% of the same in 1959, the data presented in this paper characterize mainly the fecundity of this particular group. The paper describes the relationship between size and weight and fecundity.

### Feeding of the ringed seal of the European north of the USSR

by Y.I. Nazarenko. Ottawa : National Research Council, Canada Institute for Scientific and Technical Information, 1985. 9 p. Bibliogr. (Canadian translation of fisheries and aquatic sciences ; no. 5166) Originally published in Russian, in the USSR. ISSN 0704-3716  
MICROLOG 90-00109 1 fiche

One of the objects of the hunting industry in the north of the USSR is the ringed seal, which in recent years has become a major

source of fur, leather, grease and meat. As the hunt for this seal expanded, it was claimed that the seal ate commercially important fish, thus reducing the fishery. This paper reports on seal stomachs examined in different regions of the White and Barents Seas, directly offshore and at some distance from the shore. In all, 195 seals were dissected and the contents of their stomachs described and identified.

### Ferroresonance tests on T14 tertiary at Claireville TS

by R.W. Cheung. Toronto : Ontario Hydro, Research Division, 1989. 14 p. : ill. Bibliogr. (Report ; no. 89-216-K)  
MICROLOG 90-00422 1 fiche

A ferroresonance condition was experienced at Claireville Transformer Station in June 1985. Methods for suppressing ferroresonance were investigated and validated by computer simulation. A method involving connection of a damping resistor across the spare-secondary windings of existing PTs connected in open-corner delta was recommended. In addition, low-voltage excitation tests were performed on T15 PTs to obtain data for estimating the damping resistor value. Full-scale switching operations were conducted on T14 autotransformer to duplicate the reported condition and to demonstrate effectiveness of the damping-resistor solution. This report presents results of full-scale switching operations and low-voltage excitation tests. It also gives an assessment of the test results and estimates the damping resistor value.

### Fertilization and thinning effects on a Douglas-fir ecosystem at Shawnigan Lake : 15 year growth response

by E.R. Gardner. Victoria : Forestry Canada, Pacific and Yukon Region, Pacific Forestry Centre, 1990. ix, 42 p. : ill. Bibliogr. (Information report ; BC-X-319) ISSN 0830-0453 ISBN 0-622-17647-2  
MICROLOG 90-05789 1 fiche

The Shawnigan Lake project was established in 1970 to determine the mechanisms of response to thinning and nitrogen fertilization within a Douglas-fir ecosystem. The study site is

located within the very dry maritime coastal western hemlock biogeoclimatic subzone. Thinning was conducted so as to obtain an even spacing of residual trees together with a maximum number of crop trees while maintaining representation across a range of diameter classes. The fertilizer applied was forest grade urea. This report summarizes the 15-year growth response in the main experiment and includes the recalculation of all merchantable volumes of Douglas-fir; the presentation of merchantable volumes to diameter limits of 12.5 and 17.5 cm; and the inclusion of measurements of the minor tree species present within the unthinned plots.

### The Fertilization of lakes in Kamchatka

by I.I. Kurenkov. Ottawa : National Research Council, Canada Institute for Scientific and Technical Information, 1989. 7 p. (Canadian translation of fisheries and aquatic sciences ; no. 5466) *Originally published in Russian.* ISSN 0704-3716

MICROLOG 90-00606 1 fiche

The fertilization of lakes is one of the methods used in pastoral fishery but it is at the experimental stage only. This paper gives the results of lake fertilization, beginning with Lake Listvennichnoe on the southeastern coast of the Kamchatka Peninsula. Superphosphate and carbamide were spread on June 26, July 3 and July 9, 1980. The quantity of algae was monitored from 1980-86, as well as the size of holopedium. Number of salmon returning to the lake was also monitored, as was their size. The success of this experiment promoted further experimentation with Lake Kuril, a volcanic lake. This lake was fertilized with Ammophos and was monitored for size and number of fish from 1981-87. In addition to the fertilizer added, the eruption of a nearby volcano added ash to the water.

### Fibre optic aircraft fuel gauge

prepared for the Transportation Development Centre, Policy and Coordination Group, Transport Canada ; by J.W. Snow, S.H. Woodside and P.D. Colbourne. Dartmouth, N.S. : Focal Technologies Inc., 1990. xi, 68 p. : ill.

MICROLOG 90-07190 1 fiche

Fibre optics technology is being considered increasingly by airframe manufacturers for such flight critical systems as primary surface and engine control systems, the so-called fly-by-light concept, and for numerous sensor applications. This project demonstrated the feasibility of a fibre optic continuous liquid level sensor for aircraft fuel quantity measurement, leading to a development application. Two sensor configurations were developed and tested, the first using a fluorescent optical fibre and the second using rod waveguides. Both sensor types were optimized through computer models and a common lead insensitivity scheme was also developed for both sensors. An automated, instrumented test tank facility was constructed to evaluate the sensors for key performance criteria against a generic FQM specification developed from inputs received from various airframe manufacturers and from relevant equipment standards.

### Field determination of ice jam porosity

by T.D. Prowse. Saskatoon, Sask. Environment Canada, Ground Water Division, National Hydrology Research Institute, 1988. 18 p. : ill. Bibliogr. (NHRI contribution ; no. 88039) *Prepared for the 9th International Symposium on Ice.* ISSN 0838-1992

MICROLOG 90-06477 1 fiche

The complex hydraulic and thermodynamic processes which control the formation, growth, decay and breakup of river ice produce a variety of ice forms and accumulations which vary widely in porosity (ratio of air and water pore volume to total volume). The porosity of ice jams is of particular interest because it is required for the direct accumulations of such data as jam volume, thickness, compressive strength, coefficient of internal friction and ultimately in the prediction of flood levels. Although a theoretical value of 0.4 is often assumed for the porosity of such accumulations no direct field verification of this value has been made. This paper reports on the direct calculation of jam porosity based on heat energy and mass balance computations associated with the thermal shrinkage of a

breakup ice jam on the Liard River.

### Field guide to pests of managed forests in British Columbia

by K.E. Finck, P. Humphreys and G.V. Hawkins. Victoria : Forestry Canada, Pacific and Yukon Region, Pacific Forestry Centre ; B.C. Ministry of Forests, 1989. viii, 188 p. : ill. (Joint report ; no. 16) ISSN 0843-4719 ISBN 0-7726-0910-1

MICROLOG 90-05921 3 fiche

Field guide to the identification of injurious insects, diseases and other agents in the forests of B.C. The selection of individual pests and abiotic agents was based on the level of damage, the frequency of encountering it in the field, and the age of the forest predominantly affected. Notes on the biology of a pest were included only if these were considered to be useful for identification purposes. In addition, pest management strategies were not addressed in any detail. Animal damage from porcupines, bears, deer, hares, rabbits, tree squirrels and voles is also described. A glossary is included.

### Field investigation of epoxy-coated reinforcing steel

by P. Hededahl and D.G. Manning. Toronto : Ministry of Transportation, Research and Development Branch, 1989. 28 p. : ill.  
MICROLOG 90-05895 1 fiche

Two cracked concrete barrier walls, built in 1979, which had shallow cover and were exposed to frequent applications of de-icing salts, were investigated. A similar barrier wall, also constructed in 1979 but with uncoated reinforcement, was used for comparison. Tests for chloride profiles, continuity, half cell potential, rate of corrosion and the condition of the steel and of the coating were conducted. This report presents the results of those tests.

### Field sampling manual for reactive sulphide tailings

Canect Environmental Control Technologies Ltd. Vancouver, B.C. : Energy, Mines and Resources, Mine Environment Neutral Drainage Program, 1989. v, 154 p. : ill. Bibliogr. CANMET contract: 89036-01-SQ.  
MICROLOG 90-03388 2 fiche

Manual covering sampling methods for tailings impoundments and their surrounding basins. The manual offers guidance and recommendations on the selection of appropriate sampling methodology while recognizing the importance of site-specific conditions and the value of on-site decision making. Emphasis is placed on maximizing sample quality by minimizing both sample disturbance and artificial contamination during sampling. The manual contains indexes to summarize the solid, liquid and pore gas phase methods according to such factors as the type

of required equipment and the degree of isolation from the atmosphere. Methods for the collection of samples are divided into liquid, solid and pore-gas phases, with concise presentations of each method to explain objectives, descriptions, advantages and disadvantages. A summary of quality control recommendations for the collection of high-quality solid, liquid and pore-phase samples is also included.

### Fifteen year assessment of thirty year old red spruce stands cleaned at various intensities in Nova Scotia

Truro, N.S. : Dept. of Lands and Forests, 1988. 8 p. : ill. Bibliogr. (Forest research report ; no. 2)  
MICROLOG 90-02222 1 fiche

Cleaning is utilized as a method to allow natural forest stands of dense saplings to reach a merchantable size sooner than if left to grow naturally. In some jurisdictions, variable density growth and yield computer programs were developed to aid in predicting these effects, among them the softwood variable density model for Nova Scotia. However, there is little long-term growth and yield data available to determine the accuracy of these growth model predictions for cleaned red spruce stands. Therefore, 2 red spruce stands cleaned at different intensities in 1968 were remeasured in 1983 and compared with projected values from the Nova Scotia Department of Lands and Forests variable density model for softwoods.

### Filler and extender minerals in Nova Scotia

by P. Luke. Halifax : Dept. of Mines and Energy, 1990. v, 64 p. : maps. Bibliogr. (Economic geology series ; 90-2)  
MICROLOG 90-05906 1 fiche

This report describes findings from research on potential filler consumers in Nova Scotia, New Brunswick, Prince Edward Island, Newfoundland, Maine and eastern Quebec. The major industry user groups, including plastics, paint, paper, rubber and carpet backing manufacturers, were identified. For these groupings, company names, numbers and contacts were supplied from manufacturers guides for all areas except eastern Quebec. The second part of the report is an assessment of deposits, beginning with a review of previous work on several mineral deposits and occurrences in the province, followed by field and sample investigations and lab testing. The focus of the study is on barite, diatomaceous earth, kaoline, muscovite, ground silica and calcium carbonate deposits with some attention being directed towards talc, titanium bearing minerals and wollastonite.

**Final report for field investigation of domestic hot water tanks as space heating appliances**

by R Thrall and W. Mayhew. Ottawa : Canada Mortgage and Housing Corporation, 1989. iii, 71 p. : ill. Bibliogr. MICROLOG 90-03778 1 fiche

As a result of the trend towards energy efficiency housing, the space heating load has been replaced by the domestic hot water load as the major heating load. This project reviewed relevant codes and standards and contacted appropriate authorities to approve domestic hot water tanks as hydronic space heating appliances in residential applications; determined the state and condition of 3 domestic hot water tanks currently being used as combination hot water and space heating appliances in the Northwest Territories; and analyzed the cost effectiveness of using domestic hot water tanks in such an application. Two of the 3 tanks were dissected in the presence of local officials, while the 3d tank was shipped to the manufacturer for a thorough inspection in their laboratory. An assessment of the overall condition of the tanks, including the degree of deterioration/corrosion of the liner, condition of the burner and the quality of the water was carried out. In addition a radiator and plumbing pipe were examined CA EN NO PL SC

**Final report for the 1986 National Housing Survey**

submitted to Jeanne Leong ; prepared by Ekos Research Associates Inc. Ottawa : Canada Mortgage and Housing Corporation, 1987. iv, 228 p. MICROLOG 90-02014 3 fiche

Provides information on the state of repair of the existing low rise housing stock, the nature and extent of low rise residential renovation activity in 1985 and underlying determinants and constraints, and the socio-economic characteristics and building operating costs of publicly-assisted renovators, non-assisted renovators and non-renovators. **Final report for the evaluation of property value impacts : non-profit housing**

Ekos Research Associates Inc. Toronto Housing Advocacy Task Force, 1989. 100, 113 p. : ill. Bibliogr. *Bilingual (Rapport final sur l'évaluation...)*. Summary reports (12, 14 p.) laid in. ISBN 0-7729-5771-1 MICROLOG 90-01862 3 fiche

In light of concerns about the impact of non-profit housing projects on property values, and the province's commitment to develop more affordable housing, a study documenting the true impact of non-profit development on property values, as well as the perception of neighbours regarding the impact of non-profit housing projects on the quality of the neighbourhood was needed. This report compared the selling prices of properties

surrounding non-profit housing projects with the selling price of a matched group of houses not having a non-profit housing project both before and after the introduction of the housing project. The report also addressed the issues of perception of quality of neighbourhood with or without the project and perceived impact of non-profit housing on property values. The final issue addressed was the extent to which non-profit housing projects were accepted, which involved surveying the perceptions of neighbours toward various forms of non-profit housing projects. **Final report on the determination of APIOS precipitation chemistry from the climatology of regional precipitation episodes**

by D.R. Hudak and T.B. Low. Toronto : Ministry of the Environment, 1987. 126 p. : ill. MICROLOG 90-00216 2 fiche

The complexity of Eulerian long range transport models now being developed in Canada and the US resulted in questions about applying such large computer models to derive seasonal and annual sulphate or nitrate deposition. Since the models require very detailed meteorological input data, the processing and subsequent running of the model requires significant amounts of time on large, fast computers. Several methods were suggested for obtaining long-term deposition results for Eulerian models, including development of a climatology of precipitation episodes for a given geographic region with subsequent derivation of physical-statistical relationships between the precipitation climatology and observed precipitation chemistry. The model would be run for a number of representative episodes during a year and seasonal and annual deposition totals would then be derived by using the climatological data for the year to extrapolate from the limited number of model runs. This report investigates the feasibility of this method for deriving long-term deposition. EV ON PR SC

**Final report on the economic and cultural impact of the Canada-Manitoba Subsidiary Agreement on Manitoba's book and periodical publishing industries : study no. 4**

prepared for the Canada-Manitoba Subsidiary Agreement on Communications and Cultural Enterprises, Evaluation Steering Committee ; by Paul Audley and Associates Ltd. Toronto : The Corporation, 1989. vi, 116 p. MICROLOG 90-06269 2 fiche

One of 4 studies evaluating the 1984 Canada-Manitoba Communications and Cultural Enterprises Subsidiary Agreement. The study considers the book and periodical publishing industries separately. It identifies major industry problems, develops a series of sectoral profiles using the main economic and financial indicators and putting the Manitoba industry into the Canadian and international perspective; assesses the Agreement and its effects and impact on each subsector using mainly the information provided by the beneficiaries; determines if the program will solve the problems identified; assesses the cultural impact of the contributions mainly through the accessibility and diffusion of cultural products; and suggests any changes to the program, if required. • CA CO MS TE

### Final report on the economic and cultural impact of the Canada-Manitoba Subsidiary Agreement on Manitoba's film, video and sound recording industries

prepared for the Canada-Manitoba Subsidiary Agreement on Communications and Cultural Enterprises ; by Paul Audley & Associates Ltd. Toronto : The Corporation, 1989. v, 160 p. MICROLOG 90-06246 2 fiche

This document contains a section which deals with the film and video industry, and a section which deals with the sound recording industry. Each of these sections includes an overview of the industry, which provides background and profile information concerning that industry, and then describes and assesses the impact of the support programs established under the Agreement. Each section then examines the relationship between the Agreement programs and other government support programs for the industry concerned, and proposes possible adjustments to the programs in the context of an assessment of the potential for further growth. Finally, it provides a summary of the recommendations related to film/video and sound recording.

### Financial analysis of salmon farming in coastal British Columbia : a computer-based model approach

by B.D. Egan, H.M. Egan and B.F. Wright. Ottawa : Dept. of Fisheries and Oceans, Economic and Commercial Analysis Directorate, 1989. viii, 95 p. : ill. (Economic and commercial analysis report ; no. 54) ISSN 0843-5626 ISBN 0-662-17703-7 MICROLOG 90-04883 2 fiche

A computer model of fish farming economics was developed for use as a planning tool to include all factors that affect the cost of production and farm viability. This report

provides a detailed explanation of the factors that determine the cost of production and affect a farm's viability, including a series of program modifications which, in addition to describing several likely salmon farm scenarios, demonstrate how to use the program to simulate still other operating scenarios. A standard farm is used to illustrate how operating decisions (changing program variables) affect farm viability and the cost of production. The standard farm is defined as 50% financed through debt, well financed for capital purchases, having transport costs similar to the Campbell River area, of a moderate size, having only one farm site, having good management, and raising monosex feminized chinook salmon and accelerated coho salmon in the same numbers each year. • BC CA CF FI SC

The Fraser Valley Access Committee was convened to make proposals for improved post-secondary educational access in the Fraser Valley. The Committee investigated the combined influence of population growth, demographic change and higher participation rates on regional access demand and identified the special barriers to accessibility presented by a deteriorating transportation infrastructure and insufficient institutional capacity. Fraser Valley College, Kwantlen College, Douglas College and Simon Fraser University each prepared an institutional profile that includes estimates of institutional growth required to serve their respective constituencies adequately. This report presents the Committee's conclusions and recommendations.

**Findings of the survey of rest and retirement homes**

Toronto : Office for Senior Citizen's Affairs, 1989. 35 p. CSI 56203.200. ISBN 0-7729-4428-8  
MICROLOG 90-02033 1 fiche

Although the rest and retirement home sector is well established in Ontario, neither the industry nor the government has had access to a reliable body of information about it. This study is the first overview of rest and retirement homes in Ontario. It describes the numbers, size, and geographic distribution of rest and retirement homes, the types of care and services available, and the primary client groups served.

**Finite element analysis of residual stresses in 2Cr-Mo repair welds including transformation plasticity**

by A.S. Oddy. Ottawa : Canada Centre for Mineral and Energy Technology, Metals Technology Laboratories, 1989. 16 p. : ill. Bibliogr. (Report ; MTL 89-16(TR))  
MICROLOG 90-03373 1 fiche

Welding is frequently used in the repair of pressure vessels. Accurate prediction of the residual stresses caused by welding is important to the safe operation of a pressure vessel especially when post-weld stress relief is not feasible. This report outlines some of the experience generated in the 3-dimensional finite

element analysis of welds. In particular, the importance of transformation plasticity to the prediction of residual stresses is examined. A method based on the fundamental laws of plasticity and basic material properties is proposed to incorporate transformation plasticity in a finite element program. The transformation plasticity which occurs depends on the stress state present in the material. During any time step, the stress state can change substantially and if the step size is too large the analysis may become unstable. A method which allows larger steps while eliminating the instability and improving the convergence is presented. A 3D analysis of a short longitudinal pipe weld in typical pressure vessel steel is also given.

#### Fire damages and losses in the local government District of Armstrong and the Rural Municipality of Woodlands : final report

Winnipeg : Manitoba Disaster Assistance Board, 1988. iii, 34 p. : ill.  
MICROLOG 90-01273 1 fiche

The severe fire which struck the local government district of Armstrong and the rural municipality of Woodlands on April 29, 1988 caused a number of farmers to suffer damages to their fencing and loss of hay bales. In addition, heavy fire-fighting costs were incurred. The Manitoba government announced an assistance program to financially assist those individuals who incurred losses and damages, as well as a reimbursement of fire-fighting costs. This report provides the details of this program as well as the activities and findings of the Manitoba Disaster Assistance Board.

#### Firm response to price uncertainty : tripartite stabilization and the western Canadian cattle industry

by T.M. Horbulyk. Ottawa : Agriculture Canada, Policy Branch, 1990. vi, 67 p. : ill. Bibliogr. (Working paper ; 2/90)  
MICROLOG 90-05917 1 fiche

Examines the optimal response of individual firms in the Western Canadian cattle industry to a participatory stabilization scheme. The type of stabilization scheme analyzed here is a stylized version of the National Tripartite Price Stabilization Program. The theoretical approach employs a static partial equilibrium model of firm behaviour under uncertainty, where competitive risk-neutral firms employ a two-stage production technology. The principal empirical findings are that a marginal increase in the size of a firm's breeding herd will increase the short-run own-price elasticity of supply.

#### First Joint Meeting of Round Tables on Environment and Economy

British Columbia Round Table on Environment

and Economy...et al. Victoria : The Round Tables, 1990. 169 p. *Bilingual (Première rencontre...)*.  
MICROLOG 90-07217 2 fiche

The national, provincial and territorial round tables arose out of a key recommendation of the National Task Force on Environment and Economy and were set up in 1988 to provide forums for continuing discussion between various sectors and organizations interested in achieving sustainable development. Membership includes premiers, senior cabinet ministers, top executives of major national corporations, leading environmentalists and senior leaders in labour, agriculture, small business and universities. This first joint meeting discussed the development of different round table models and sustainable development strategies and identified areas of mutual interest in furthering the integration of the economy and the environment in each of their jurisdictions. This document summarizes the concepts of round tables and of sustainable development, gives the program of the meeting, then presents the addresses of the speakers in both English and French.

### Fish discharge residency study, Pickering NGS B postoperational study, 1988

by L.P. King and J.K. Kwik. Toronto : Ontario Hydro, Research Division, 1989. vi, 62 p. : ill. Bibliogr. (Report : no. 89-253-K)  
MICROLOG 90-03994 1 fiche

A fish discharge residency study was conducted from March 15 to June 21, 1988 in the Pickering Nuclear Generating Station (NGS) A discharge, and from March 15-June 28, 1988 in the Pickering NGS B discharge as part of the third year of a 3-year postoperational aquatic program initiated in 1986. The study was undertaken to test the hypotheses that smallmouth bass would increase in the discharge, walleye would decrease, and more gizzard shad would be impinged in the discharge. This study identified fish species residing in the plume during the winter and early spring, assessed the abundance of gizzard shad, walleye and small mouth bass in the discharges, and determined whether walleye and smallmouth bass spawn there.

### Fish survey of S.E. Clayoquot Sound streams, Vancouver Island

by T.G. Brown, et al. Nanaimo, B.C. : Dept. of Fisheries and Oceans, Fisheries Research Branch, Pacific Biological Station, 1989. vi, 71 p. : ill. Bibliogr. (Canadian manuscript report of fisheries and aquatic sciences ; no. 2021) ISSN 0706-6473  
MICROLOG 90-02300 1 fiche

There has been considerable speculation as to the relationship between a watershed's logging history and its capacity to produce coho salmon. This survey was conducted in part to gain specific on-site information to support the Clayoquot Sound fish/forestry database. Minnow traps were used to capture juvenile salmonids from 6 locations in each of 23 S.E. Clayoquot Sound streams. At each location, the environmental features were noted, the length and weight of all captured juvenile coho were recorded, and scales were obtained for age determination. Juvenile coho catch/effort, mean length of 1-year-old coho, and percent 2-year-olds were calculated for each stream surveyed. The mean catch at each location was correlated to such environmental features as dominant biogeoclimatic variant, gradient, stream order, stream orientation, stream location, vegetation type, vegetation age, percentage in-stream cover, cover type, and substrate type.

# **Fisheries resources and fisheries potential of Williston Reservoir and its tributary streams, vol. II : fisheries resources potential of Williston Lake tributaries : a preliminary overview**

by P.G. Bruce and P.J. Starr. Victoria : Ministry of Environment, 1985. v, 150 p. : ill., maps. Bibliogr. (Fisheries technical circular ; no. 69) ISSN 0229-1150 ISBN 0-7726-0441-X  
MICROLOG 90-06966 2 fiche

In 1975, a study of the Williston Lake fisheries resource was initiated as one component of the Williston Potentials Study. An important part of the fisheries study was to survey streams in the reservoir watershed, to locate and describe important spawning areas in tributaries and evaluate reproductive and rearing capacity for stream resident and reservoir fish, and to determine fish species and diversity. Williston Lake is located 240 km north of Prince George and was formed by construction of the W.A.C. Bennett Dam on the Peace River. The physical habitat was described and samples were taken of fish and water for chemical analysis. Assessments were made of the streams of the Parsnip Reach Basin, the Finlay Reach Basin and the Peace Reach Basin.

### Fishing grounds for a possible deep-sea fishery west of the British Isles

by S. Ehrich. Ottawa : National Research Council, Canada Institute for Scientific and Technical Information, 1985. 13 p. Bibliogr. (Canadian translation of fisheries and aquatic sciences ; no. 5183) *Originally published in German, by Bundesforschungsanstalt für Fischerei, at Hamburg.* ISSN 0704-3716  
MICROLOG 90-00067 1 fiche

From 1974-1984, fishery research vessels conducted 8 trips to investigate the fish stocks on the continental slope of western Europe and its outlying banks. The program was undertaken to find alternatives for the German deep-sea fishery fleet in the face of a foreseeable decline in fishing opportunities. This paper uses the results from the 8 trips made to provide information on the commercially important species expected at the various fishing grounds over the year and to demonstrate the importance of the various fishing areas commercially. Fishing grounds were evaluated using the maximum catches for the various seasons of the year.

### The Fishing sector in Esbjerg, part I : description of status of the fishing sector in Esbjerg

by E. Roth. Ottawa : National Research Council, Canada Institute for Scientific and Technical Information, 1986. 8 p. (Canadian translation of fisheries and aquatic sciences ; no. 5278) *Originally published in Danish.* ISSN 0704-3716  
MICROLOG 90-02748 1 fiche

Report on the development of the fishing industry in Esbjerg, Denmark. The report begins with a description of the fishery, the cutter fleet, catches landed and landing patterns, pricing, seasonal fluctuations, sales of fish, the fishermen's organization, and increases in the value of the fisheries overall and that of Esbjerg. Production of fish and fish products includes the value of the fish meal industry. Unemployment is given special consideration, both in the fishing industry, in processing plants, and in other sectors involved with the fishing industry. Only the table of contents and the introduction are reproduced.

### The Fix is out : a defense of the floating Canadian dollar

by D.E.W. Laidler and W.B.P. Robson. Toronto : C.D. Howe Institute, 1990. 16 p. (Commentary ; no. 18) ISSN 0824-8001  
ISBN 0-88806-261-3  
MICROLOG 90-05907 1 fiche

The recent strength of the Canadian dollar has prompted proposals that Canada should adopt a fixed exchange rate against the U.S. dollar. Some proponents of this idea argue that a fixed exchange rate would help to insulate the Canadian economy from shocks arising in specific sectors. Others maintain that it would alleviate, or even make unnecessary, the pain of the Bank of Canada's current tight monetary policy. There are, however, reasons for scepticism about the capacity of a fixed exchange rate to deliver the benefits claimed for it. This document sets out these reasons. First, it discusses what fixing the exchange rate would mean in practice. It then reviews the manner in which the Canadian economy might respond to various economic forces under fixed and floating exchange-rate regimes.

**Flexible pavement condition rating : guidelines for municipalities**

by G.J. Chong, W.A. Phang and G.A. Wrong. Toronto : Ministry of Transportation, Research and Development Branch, 1989. iii, 95 p. : ill. Bibliogr.  
MICROLOG 90-01349 2 fiche

Most highway authorities use highway pavement surface condition ratings to judge the pavement's ability to continue providing required service to the public. Municipalities have the same duty to monitor and maintain the roads in their respective communities. Riding quality and distress manifestations are the bases of the pavement condition rating scheme used in Ontario by the Ministry of Transportation. However, a scheme is required that specifically addresses the unique conditions and needs of municipal roads. This document was prepared to meet this pavement management need and to present a pavement surface condition rating scheme for municipal roads and streets, also using riding quality and distress manifestations as its bases.

**Flexible systems for the design of heuristic algorithms in complex or domains**

by J.-Y. Potvin and S.F. Smith. Montreal : Université de Montréal, Centre de recherche sur les transports, 1989. 13 p. Bibliogr. (Publication : no. 668)  
MICROLOG 90-01606 1 fiche

This paper advocates a 'design through experimentation' methodology based on the use of flexible interactive tools to facilitate the process of relating characteristics of the problem at hand to the appropriateness of various alternatives. With such tools, it becomes possible to quickly configure different heuristic strategies and examine their performance in different problem solving contexts. The expertise gained in this experimentation can then be encoded to produce systems capable of automatically constructing resolution strategies well suited to the problems to be solved. This paper presents the system OPIS, a job-shop scheduling system, and ALTO, a system for the design of vehicle routing algorithms.

**The Flooding hydrology of Mackenzie Delta lakes near Inuvik, N.W.T., Canada**

by P. Marsh and M. Hey. Saskatoon, Sask. : Environment Canada, Ground Water Division, National Hydrology Research Institute, 1989. 9 p. Bibliogr. (NHRI contribution : no. 88008) In *Journal of the Arctic Institute of North America*: vol. 42, no. 1, 1989. ISSN 0838-1992  
MICROLOG 90-02433 1 fiche

An important feature of the Mackenzie Delta is the large number of freshwater lakes, which cover up to 50% of the deltaic plain. This paper analyzes the flooding regime of a large number of lakes in the east-central portion of the Mackenzie Delta and quantifies a simple lake classification system used in previous studies. The study was carried out in an area extending approximately 10 km southwest of Inuvik. The area was chosen because East Channel at Inuvik is the only gauging station within the delta with more than 10 years of records and in addition, East Channel is a major distributary channel of the Mackenzie River, controlling the water levels both within the study area and in a larger portion of the eastern section of the delta.

**Flow fingers and ice columns in a cold snow cover**

by P. Marsh. Saskatoon, Sask. : Environment Canada, Ground Water Division, National Hydrology Research Institute, 1988. 7 p. Bibliogr. (NHRI contribution : no. 88022) Paper presented at the Western Snow Conference. ISSN 0838-1992  
MICROLOG 90-02458 1 fiche

Melt water does not move uniformly into a snow cover, but instead a large proportion of the water follows distinct flow paths, commonly referred to as flow fingers. This paper reports on field observations of flow-finger and ice column growth in a low density Arctic snow cover and compares measurements of their size, spacing and aerial coverage to those from a denser snow cover in the high Arctic. The implications of these features to water movement in snow covers are then discussed.

### Food supply as a factor in seasonal changes of metabolism of Baltic cod

by V.V. Ipatov and D.V. Uzars. Ottawa : National Research Council, Canada Institute for Scientific and Technical Information, 1989. 14 p. Bibliogr. (Canadian translation of fisheries and aquatic sciences ; no. 5453) Originally published in Russian, by the Institut für Hochseelischerei und Fischverarbeitung Rostock-Marienehe at Rostock-Marienehe. ISSN 0704-3716  
MICROLOG 90-00582 1 fiche

Food supply is one of the very important factors determining the intensity and the direction of metabolism in fish, but it is very difficult to determine the impact of this factor on their vital functions under natural habitat conditions, because it depends on numerous components. The best way of studying the food supply is to determine the effect of its use from the intensity of the reserve substances storage, the intensity of weight gain and linear growth and the maturing of sexual products. This paper uses a combined analysis of the changes in the amount of food in the digestive tract and the dynamics of some morpho-physiological and physiologo-biochemical indexes in cod to determine the effect of the changes in food supply.

### Foraging activity of migrating brant at Stubbs Island in April 1989 following the Nestucca oil spill

by M.S. Rodway. Delta, B.C. : Canadian Wildlife Service, Pacific and Yukon Region, 1989. v, 27 p. : ill. Bibliogr. (Technical report series ; no. 77) ISSN 0831-6481 ISBN 0-662-17279-5  
MICROLOG 90-06371 1 fiche

As part of an ongoing evaluation of the impact of the Nestucca oil spill on the west coast of Vancouver Island, Clayoquot Spit on the north end of Stubbs Island was studied in spring 1989. This area is a traditional staging and feeding area for Brant migrating north along the west coast of Vancouver Island. The study monitored foraging behaviour to assess possible perturbations to their behaviour due to the oil spill and screened for marked birds, beginning in March and continuing until all Brant had left the area in April. Instantaneous samples of behaviour were taken at 15 minute intervals throughout the observation periods, for a total of 176 samples. The entire flock was scanned with a 20X telescope, and the behaviour of each bird was recorded as foraging, swimming, preening, flying, walking, standing, sleeping or agonistic.

### Forecasting the silver hake fishery in the Nova Scotia Shelf, Canada

by C. Garcia. Ottawa : National Research Council, Canada Institute for Scientific and Technical Information, 1986. 16 p. : ill. Bibliogr. (Canadian translation of fisheries and aquatic sciences ; no. 5217) Originally published in Spanish. ISSN 0704-3716  
MICROLOG 90-02692 1 fiche

In 1980, an 8-year study was begun of the behaviour of warm water incursions over the Nova Scotia Shelf in summer. In the summer, when warm waters enter the Shelf, the silver hake come up to spawn, and this is the most intense period of the fishery. Since the species responds to warm water, it appears that the greater the mass of warm water the higher the probability that the hake will enter and spawn, making it possible to forecast the fishery using water temperature. Temperature charts for 1970-74 and 1976-78 were used to prepare a short-term fisheries forecast, based on an 8-year series. The areas in the Shelf occupied by warm waters were delimited for each year in the series and a temperature analysis was performed using isothermal charts. The linear regression for the temperature values at the station and in the area, and the correlation coefficient were calculated. A detailed analysis of the near-bottom temperature charts for all the years was conducted.

### Forest ecosystem classification and land system mapping pilot project : Duck Mountain, Manitoba

prepared for Canadian Forestry Service and Manitoba Forestry Branch, Manitoba Dept. of Natural Resources ; by Pedocan Land Evaluation Ltd. (Edmonton). Winnipeg : Dept. of Natural Resources, Forestry Branch ; Ottawa : Canadian Forestry Service, 1988. 216 p. : ill., maps. Bibliogr. Fold. maps not filmed.  
MICROLOG 90-06243 3 fiche

This report summarizes the results of the first of 2 pilot projects to develop and test a site classification and forest land mapping system for the province of Manitoba. The project was conducted at Duck Mountain from 1987-88 and classified the pilot area within the ecoregions-subregions of Adams (1985); mapped ecological site units at 1:50,000 scale based upon land forms, soils, and plant community types; and characterized map units by productivity estimates of site index and mean annual increment of dominant and sub-dominant site types within map units using cruise and permanent sample plot data. Non-productive wetland ecosystems were not classified. A detailed description of the methods used are included.

### Forest insect and disease conditions in Alberta, Saskatchewan, Manitoba and the Northwest Territories in 1988 and predictions for 1989

by F.J. Emond and H.F. Cerezeke. Edmonton : Government of Canada, Canadian Forestry Service, Northern Forestry Centre, 1989. vi, 29 p. : maps. (Information report ; NOR-X-303) CSI 22249.004. ISSN 0704-7673 ISBN 0-662-16775-9  
MICROLOG 90-00671 1 fiche

Summary of forest pest conditions for 1988, with some predictions of infestation status for 1989. Nine major pests are discussed in order of importance (spruce budworm, forest tent caterpillar, mountain pine beetle, Dutch elm disease, dwarf mistletoe, yellowheaded spruce sawfly, larch sawfly, large aspen tortrix, jack pine budworm), and additional noteworthy insects, diseases, and tree damage agents are reported. Results of surveys for acid rain symptoms and pests and damage incidence in nurseries and plantations are also reported.

### Forest insect and disease conditions in Alberta, Saskatchewan, Manitoba and the Northwest Territories in 1989 and predictions for 1990

by F.J. Emond and H.F. Cerezeke. Edmonton : Forestry Canada, Northwest Region, Northern Forestry Centre, 1990. vi, 23 p. : maps. Bibliogr. (Information report ; NOR-X-313) ISSN 0704-7673 ISBN 0-662-17633-2  
MICROLOG 90-05782 1 fiche

This regional report summarizes the status of major forest insects and diseases and other tree damage agents within the 3 prairie provinces and Northwest Territories in 1989, and forecasts expected trends of some pests and their damage in 1990. Special surveys are reported on, and other noteworthy insects, diseases, and other tree damage agents are summarized in tabular form. Information for this report was contributed largely from field observations, special collections, and records collected from April to late October. The pests are arranged according to national and regional importance. Results of surveys for acid rain symptoms and pests and damage incidence in nurseries and plantations are also reported.

### Forest insect and disease conditions, British Columbia and Yukon, 1989

by C.S. Wood and G.A. Van Sickle. Victoria : Forestry Canada, Pacific and Yukon Region, Pacific Forestry Centre, 1989. v, 28 p. : maps. (Information report ; BC-X-318) ISSN 0830-0453 ISBN 0-662-17526-3  
MICROLOG 90-05790 1 fiche

This regional report reviews the status and impact of major forest insects and diseases and the effects of environmental factors on conifer and broadleaf forests in B.C. and the Yukon Territory in 1989. The subjective terms 'light', 'moderate' and 'severe' are used to describe levels of total defoliation; these are defined as 1%-25%, 26%-50% and more than 50% defoliated, respectively. The report is compiled from information obtained largely from field observations and records collected from May to October in 6 provincial forest regions and the Yukon Territory.

### Forest inventory south shore subdivision (Queen's & Lunenburg Counties), 1988

Halifax : Dept. of Lands and Forests, 1988. 102 p. (Information report)  
MICROLOG 90-07373 3 fiche

Inventory of forest resources in the south shore subdivision, using a 3-stage 3P technique. The first stage was delineation and classification of the forest or non-forest condition at the centre of each air photo. If the estimated cubic metres per hectare were equal or greater than the random number, the stand was field sampled using 3P point sample. Trees were also measured for diameter and length between measurements from stump height to top of tree, as well as for product and grade. The inventory covers land ownership (Crown, large private, small private), cover type (softwood, mixedwood, hardwood), maturity class (regeneration, young, immature, pole, mature, overmature), and type (sawlog, pulpwood).

### Forest land habitat management in New Brunswick : progress report

Fredericton : Dept. of Natural Resources and Energy ; Ottawa : Wildlife Habitat Canada Canada, 1989. 73 p. : ill. Bibliogr.  
MICROLOG 90-01724 1 fiche

The objective of the program is to develop a system that integrates wildlife habitat objectives into the 25-year forest management planning process used on Crown land in New Brunswick. The program establishes quantitative relationships between wildlife populations and forest habitats, identifies long-term wildlife habitat objectives that will accommodate desired wildlife population levels, and develops the computer procedures and management approaches that can integrate these objectives into the system used to determine annual allowable timber harvest levels for Crown timber licenses. This report covers the habitat relationships definition for marten, white-tailed deer and forest birds, licensee forest habitat objectives for marten and white-tailed deer; development of habitat supply analysis procedures; and public awareness measures.

AP EV FO PR SC

Ottawa : Wildlife Habitat Canada ; Fredericton : Dept. of Natural Resources and Energy, Fish and Wildlife Branch, 1990. v, 61 p. ill. Bibliogr. CSI 45124.202  
MICROLOG 90-06499 1 fiche

The goals of the New Brunswick forest land habitat management program are to define habitat objectives for Crown land that will accommodate desired wildlife population levels and to integrate habitat objectives into the forest management planning process for Crown land. This report is the third semi-annual progress report of a 5-year program and covers definitions of habitat relationships for white-tailed deer, marten, and forest birds, licensee forest habitat objectives for white-tailed deer winter habitat; mature and overmature coniferous forest habitat; habitat supply analysis procedures; and budget expenditures.

### The Forest Land Use Workshop

Forest Land Use Workshop (1987 : Edmonton, Alta.). Edmonton : Environmental Council of Alberta, Public Advisory Committees, Renewable Resources Sub-Committee, 1987. 77 p.  
MICROLOG 90-07360 1 fiche

This workshop discussed the relationships among the many users of Alberta's forests, as part of the preparation of a report on Alberta's forests. The workshop focused on defining the relationships among the various forest users, resolving the differences, and examining the future of forest management in the province. During the morning session, the workshop was divided into such different user groups as agriculture, natural habitat, logging, non-renewable resources, and recreation. After each group developed responses to the workshop questions, they reconvened for the afternoon plenary session at which the perspectives of each user group were discussed. This report contains notes recorded during the morning group sessions and an edited transcript of the afternoon plenary session.

### Forest management agreements : fourth five-year review, 1983-88

Toronto : Ministry of Natural Resources, 1989. 72 p. : ill. CSI 55116.013. ISSN 0838-3286  
MICROLOG 90-04144 1 fiche

Forest management agreements (FMAs) came into being in Ontario through an amendment to the Crown Timber Act in 1979. The agreements cover a specific section of Crown land and replace existing licensing

arrangements with an Agreement which requires the companies to manage the forests on a sustained-yield basis, including responsibility for harvesting, planning, regeneration and other silvicultural activities necessary for proper forest management, including construction of access roads. This report covers 5-year reviews on FMAs with Domtar Inc.'s White River forest and Quebec and Ontario Paper Co. Ltd.'s Cochrane forest, Gardiner forest, and Timmins forest. The report summarizes the various forest operations carried out by the 5 companies and presents the recommendations of the committee which conducted the reviews.

#### Forest management in Alberta

Alberta. Expert Panel on Forest Management. Edmonton : Alberta Forestry, Lands and Wildlife, 1990. iv, 128 p. : ill. Bibliogr. ISBN 0-86499-726-4  
MICROLOG 90-06668 2 fiche

The Expert Panel was appointed by the government following the announcement of the new forest management agreements (FMAs) in northern Alberta. A series of public meetings and workshops were held in northern Alberta, after which the Panel reviewed the issues arising, as well as reviewing any other forest land management issue in Alberta but not the environmental impacts of the proposed pulp mill facilities. The report covers recently announced forestry developments in northern Alberta, with existing FMA and quota operations considered in the more general forest management evaluations. The role of the government in allocating, planning, and regulating FMAs, the role of FMA holders in management, planning, and operations, and the role of the public in this process are all outlined and discussed, as well as technical aspects of forest management, environmental impact, wildlife management, and reforestation.

#### Forest regeneration in the ICHg, Prince Rupert Forest Region : a problem analysis

by L.J. Beaudry and L.D. McCulloch. S.I. : Forest Resource Development Agreement, 1989. vi, 65 p. : ill., maps. Bibliogr. (FRDA report ; 090) This is a joint publication of Forestry Canada and the British Columbia Ministry of Forests. ISSN 0835-0752 ISBN 0-7726-1014-2  
MICROLOG 90-05855 1 fiche

In the past, regeneration success has been inadequate in the Northwest transitional subzone of the interior cedar hemlock biogeoclimatic zone (the ICHg) in the Prince Rupert forest region. Historical records show that a large section of land denuded through logging and fire before 1986 is still not satisfactorily restocked. This project determined the nature and extent of reforestation problems and identified proven and potential solutions. The project specifically determined which factors contribute to lack of regeneration success in the subzone, ranked the relative importance of each factor, identified proven and potential methods for overcoming these factors, and recommended research priorities for problems that have not been resolved.

### Forest site classification manual : a field guide to the Damman forest types of Newfoundland

by W.J. Meades and L. Moores. S.I. : Forest Resource Development Agreement, 1989. xvi, 312 p. : ill. Bibliogr. (FRDA report ; 003) ISSN 0840-7673 ISBN 0-662-14644-1  
MICROLOG 90-05920 4 fiche

Manual providing a forest site classification system based on the natural relationships between forest vegetation and soils, identifying nutrient and moisture relationships between component forest types. The manual includes a vegetation and soil key to 33 forest types, cross referenced to 90 botanical illustrations. Fact sheets for each forest type provide a brief description of stand composition and soil characteristics followed by interpretations of productivity, succession, harvesting sensitivity, trafficability, suitability for road construction, natural regeneration, species suitability for artificial regeneration, forest heave hazard, windthrow hazard and vegetation competition hazard. The ecoregions and subregions of Newfoundland are described and selected toposquences are illustrated to show the position of the forest types at the landscape level.

### Forest tree seed inspector's manual : OECD scheme for certification of forest reproduction material moving in international trade

by F.T. Portlock. Ottawa : Government of Canada, Canadian Forestry Service, 1988. v, 44, v, 44 p. Bibliogr. (Information report ; DPC-X-22) *Bilingual (Guide de l'inspecteur des...)*. ISSN 0705-324X ISBN 0-662-55445-0  
MICROLOG 90-01185 2 fiche

Canada has assisted in formulating the scheme for the control of forest reproductive material moving in international trade. The object of the scheme is to encourage production and use of forest tree reproductive materials that have been collected, processed, raised and distributed in a manner that ensures their trueness to name. Forestry Canada is the designated administrative authority for this scheme. Its forestry centres are the responsible certifying authorities. Since certification may protect the seed trade and enhance the value of seed products it is essential that the procedures of seed certification be well defined and strictly applied. The purpose of this manual is to provide practical instructions to ensure that certification procedures are properly executed.

MICROLOG 90-06985 1 fiche

Compendium of interesting and unusual facts about the forestry sector in Canada, including Canada's place internationally, a comprehensive national overview, and capsule data organized by industry segment and by province or territory. National data covers forest management expenditures, silvicultural accomplishments, losses, prices of selected products, a comparison with other natural resources, and the top 10 forestry corporations. Data is also given on the roundwood, lumber, shingles and shakes, veneer and plywood, particleboard, waterboard, wood pulp, newsprint, and paper sectors of the industry.

### Forestry research and development in British Columbia : a vision for the future

British Columbia. Forestry Planning Committee. Victoria : Science Council of British Columbia, 1989. 62 p. Bibliogr. (Spark report)  
MICROLOG 90-01768 1 fiche

In September of 1987, the Science Council of B.C. established a number of sectoral planning committees to identify opportunities and develop specific plans for improving the application of science and technology to the economy of B.C. The sectoral committees are charged with identifying key strengths and weaknesses and of making broad recommendations. The committees include representatives of industry, universities, institutes and colleges, research institutions and the federal and provincial governments. The recommendations of each committee are reviewed by the Science Council for the establishment of priorities, then integrated into overall plans for science and technology by the Premier's Advisory Council on Science and Technology and by the provincial government itself. This report summarizes the deliberations of the Forest Planning Committee, covering their mission and objectives, R&D and economic implications, forest industry coordination and responsibility, and recommendations for the future.

### La Formation professionnelle et le secteur privé : choix et approches

Toronto : Ministère de la formation professionnelle, 1989. vi, 37 p. : ill. Bibliogr. *L'éd. anglaise (The Training decision : training...)* sur la même fiche. ISBN 0-7729-5374-0 MICROLOG 90-00401 2 fiche

Ce rapport présente les résultats d'une étude spéciale sur les facteurs qui influencent les entreprises lorsqu'elles décident de mettre sur pied un programme de formation, sur les types de formation offerts, sur leur organisation et administration au sein des entreprises et sur l'incidence des programmes de formation structurés que les entreprises offrent à leurs employés. L'étude comprend deux volets: une série d'entrevues approfondies menées auprès de 100 entreprises ontariennes qui ont offert des programmes de formation structurés à leurs employés en 1987, et un sondage par courrier d'un échantillon d'entreprises de l'Ontario. Finalement, on aborde les questions suivantes: les raisons pour lesquelles les entreprises offrent des programmes de formation; qui reçoit la formation, la décision

d'offrir une formation et le marché du travail; l'organisation et l'administration de la formation; les observations du secteur privé face au rôle du gouvernement en matière de formation. Le rapport se termine avec un résumé d'une brève discussion sur les retombées politiques de cette recherche.

# **The Fresh fish distribution industry in Ontario : implications for B.C. fresh salmon marketing**

by G. Petersen. Ottawa : Dept. of Fisheries and Oceans, Economic and Commercial Analysis Directorate, 1989. iv, 42 p. (Economic and commercial analysis report ; no. 55) ISSN 0843-5626 ISBN 0-662-17704-5  
MICROLOG 90-04881 1 fiche

Distribution channels for fresh fish appear poised to undergo a number of structural modifications as a result of changing factors in both the marketplace and the supply of fresh fish and seafood. This study represents an analysis of fresh fish and seafood distribution in the province of Ontario, focused on the distribution of fresh, farm raised salmon in general, and on B.C. salmon in particular. In-person and telephone interviews were conducted with over 25 companies and individuals at all levels of the seafood distribution industry. Three processors, 4 brokers, 2 integrated processor/wholesalers, 10 wholesalers, and 5 retail and food service buyers, all of whom serve the Ontario market, were contacted directly. In addition, a number of individuals not concerned with the Ontario market, as well as food industry consultants and fisheries officials, were contacted.

# **Friction courses for moderate traffic highways**

by R. Raciborski, K.K. Tam and D.F. Lynch. Toronto : Ministry of Transportation, Engineering Materials Office, 1990. 28 p. : ill. Bibliogr. (Report ; EM-94) Prepared for presentation at the 1990 TRB Annual Conference. ISBN 0-7729-6755-5  
MICROLOG 90-04828 1 fiche

Report on the final evaluation of the performance of 17 bituminous test sections constructed in 1978 on Highway 7 near Lindsay, Ontario. The objective of the trial was to develop suitable surface friction course mixes for highways carrying a moderate volume of traffic (about 5000 AADT) at a posted speed limit of 80 km/h. These mixes would provide and maintain adequate levels of surface friction to reduce wet pavement skidding accidents. Both open- and dense-graded mixes were included in the evaluation. Two standard mixes were incorporated for control purposes. A specialty mix (a patented

design mix called DELUGRIP) was also placed in the trial. Aggregates used consisted of crushed gravels, local sand and screenings of various blends. Frictional properties of the test sections were measured 3 times within the first 6-year period. Samples of the surface course mixes were periodically taken for laboratory testing and a performance rating system was developed to evaluate the test sections. The system is based on the average friction number values, mix characteristics and field observations.

# **The Friedland report : a synthesis and commentary, report no. 6**

by D.W. Conklin. Toronto : Ontario Public Sector Pensions Consultations, 1988. 43 p. : ill.  
MICROLOG 90-02980 1 fiche

The report is written on the basis of section 54 of the Pension Benefits Act, 1987 which requires that pensions be adjusted to provide inflation-related increases. The purpose of the report is to recommend how section 54 should be implemented. Three volumes of research studies analyze the issues involved in implementation and investigate alternative options for implementation. Chapters 1-13 are based on these research studies, and each chapter presents the analysis and options related to a particular aspect of inflation protection. Chapter 14 presents the opinions and recommendations of the Task Force.

# **Full employment is an achievable goal : a report**

presented to the Minister of Employment and Immigration ; by the Canada Employment and Immigration Advisory Council. Ottawa : The Council, 1990. ix, 48, ix, 50 p. Bibliogr. Bilingual (Le Plein emploi est un objectif...). MICROLOG 90-05873 2 fiche

This report comments on the uneven economic and employment recovery that occurred in Canada following the 1981-83 recession. It notes that there are some basic weaknesses in the economy which are aggravated by certain federal fiscal and monetary policies, particularly those resulting in high interest rates and unfavourable exchange rates. These and other impediments are preventing many regions, as well as pockets within the country's major urban centres, from participating in the post-recession recovery.

# **Full scale tests on the response of ice strengthened propeller blade to ice loads**

prepared for the Transportation Development Centre ; by Paul Spencer. Calgary, Alta. : Geotechnical Resources Ltd., 1989. 2 v. Bibliogr. Contents: Vol. I : Data collection report -- vol. II : Data analysis report.. MICROLOG 90-01754 9 fiche

Propellers on ice-going vessels break due to ice forces. A propeller test program consisted of loading a 2600 kg Cunial bronze blade from the Canmar Kigoriak. It was mounted on a reaction frame and 3 servo-controlled hydraulic actuators forced a 1.3 m diameter by 0.75 m thick block of fresh water ice onto the blade at speeds from 3 mm/s to 100 mm/s. The applied load (3 locations), blade strain (14 locations), blade deformation (3 locations) and local interaction pressure (5 locations) were recorded. The blade was loaded normal to its surface until permanent deformation occurred. Two tests used wood instead of ice and results were measured.

# **Fundamental study of HAZ corrosion : the effect of microstructure**

by S.R. Bala and T.W. Lau. Oakville, Ont. :

Welding Institute of Canada, 1988. 99 p. : ill.  
Bibliogr. CANMET contract: OSR84-00219.  
MICROLOG 90-01335 2 fiche

It is generally accepted that the corrosion of steel in neutral environments is limited by oxygen diffusion and that the composition and microstructure of a C steel has little effect on the corrosion behaviour. One form of localized dissolution that occurs in the region around a weld is known as heat affected zone (HAZ) corrosion. However, microstructure and compositional effects may be important in such localized corrosion. This is a serious problem in ice breakers in that the abrasion caused by the ice makes cathodic protection and coating schemes difficult. This program determined the effect of base plate composition and HAZ microstructure on the HAZ corrosion behaviour of C-Mn steels. Corrosion experiments were performed on actual weldments and Gleeble simulated specimens. The actual weldments were head-on-plate welds prepared using filler materials containing 3% Ni to ensure that the weld metal was more noble. By comparing Gleeble specimens and the actual weldment, the importance of microstructures could be evaluated.

#### Fundamental support to the development of Gulf's coal beneficiation process : final report

by B.Y.H. Wong...et al. Devon, Alta. : Gulf Canada Resources Inc., Coal Research Program, 1989. i, 134 p. : ill. CANMET contract: 79197-01-SQ.  
MICROLOG 90-02547 2 fiche

Residuum is used in the Gulf beneficiation process to seal pores and coat surfaces of thermally dried coals. Initial development of the Gulf process suggested that the level of beneficiation is dependent on the physical and chemical characteristics of the residuum. This report analyses the coal samples; characterizes 5 residuum samples for physical and chemical properties, designs, constructs, commissions, and operates a macroscale thermogravimetric analyzer (TGA simulator); studies the effect of heat treatment on residuum properties using the simulator, determines the changes in residuum properties after coal beneficiation; studies the effects of treatment medium, and residuum properties on the beneficiation of Obed and Highvale coals, characterizes the upgraded products and relates the degree of beneficiation with residuum properties, and evaluates the stability of the upgraded products.

#### Further laboratory studies of friction in TFE slide surface of a bridge bearing

by T.I. Campbell and M.J. Fatemi. Toronto : Ministry of Transportation, Research and Development Branch, 1989. iii, 25 p. : ill. Bibliogr.  
MICROLOG 90-05582 1 fiche

Tetrafluoroethylene (TFE) is used to provide sliding surfaces in bridge bearings because of its low friction properties, chemical inertness and resistance to water absorption and weathering. Current design requirements are based largely on practices in Ontario and Europe. To refine the requirements, a research project was undertaken, of which this is Phase II. This report summarizes the results from Phase I, then addresses the repeatability of the test data, the reduction of the initial coefficient of friction, contamination of the lubricant, and the eccentricity of loading.

# **Gear types, seasonal distribution of effort, and bycatch of the smelt fishery in the southern Gulf of St. Lawrence**

by D.K. Cairns. Moncton, N.B. : Dept. of Fisheries and Oceans, Gulf Region, Science Branch, 1989. v, 20 p. : ill., maps. Bibliogr. (Canadian technical report of fisheries and aquatic sciences ; no. 1668) ISSN 0706-6457 MICROLOG 90-01778 1 fiche

The smelt fishery in the southern Gulf of St. Lawrence is a significant part of the economy of the Maritime provinces and eastern Quebec. The revenue from the smelt fishery is particularly important to many people because smelts are caught in the fall and winter, when there is little income from other fisheries. This report presents results of a questionnaire sent to holders of smelt licences in the southern Gulf to gain basic information on the distribution of smelt fishing effort in the area, the timing of the fishery, and the type of gear used. An

important additional objective was to learn about the bycatch of other species in smelt gear, particularly that of juvenile Atlantic herring. Bycatch of blueback herring and alewives was also investigated.

# The Genera of larval midges of Canada, Diptera : Chironomidae

by D.R. Oliver and M.E. Roussel. Ottawa : Dept. of Agriculture, Research Branch, 1983. 263 p. : ill. Bibliogr. (The Insects and arachnids of Canada : pt. 11) ISSN  
0706-7313 ISBN 0-660-11385-6  
MICROLOG 90-00009 3 fiche

Publication on the larval midges of Canada, including an extensive section on anatomy to assist the non-taxonomist in identifying larvae, and general sections on classification, biology, and collecting, preserving, and preparing. The publication gives keys for the identification of the last larval stage of 123 of the 133 general Chironomids known to occur in Canada. In addition, each genus has been provided with a brief description and notes on its geographic distribution and habitat. Where possible the keys and descriptions are based on specimens associated with adults, as the taxonomy of Chironomids is largely based on the adult male. Specimens on which this publication are based come primarily from central Canada, the Canadian northwest, and the islands of the Arctic Archipelago. Limited larval material was available from the Atlantic Provinces, the Prairie Provinces, British Columbia, and southern Yukon.

# A General branch and cut procedure for stochastic integer programs

by G. Laporte and F.V. Louveau. Montreal : Université de Montréal, Centre de recherche sur les transports, 1990. 21 p. Bibliogr. (Publication ; no. 683)  
MICROLOG 90-04331 1 fiche

Paper showing that a general branch and cut procedure, first proposed by Laporte, Louveau and Mercure in the context of a particular vehicle routing problem, provides an exact algorithm for a large class of stochastic integer problems. The paper reviews the definition of 2-stage stochastic linear programs with recourse, provides a simple taxonomy for the various types of stochastic integer programs; presents

one example of an application, the stochastic vehicle routing problem; presents the general branch and bound procedure with definitions needed to prove its finite convergence; gives a full study of the application of the branch and cut procedure to the various classes of stochastic integer programs; and concludes with examples using the vehicle routing problem application.

# Générateur d'itinéraires d'enlèvement de la neige

par J. Gilbert. Montréal : Université de Montréal, Centre de recherche sur les transports, 1989. 76 p. Bibliogr. (Publication ; no. 648) (Publication ; no. 695)  
MICROLOG 90-01404 1 fiche

Le travail de déneigement comprend les opérations de déblaiement, de chargement et de transport de neige. Il ne doit être effectué qu'aux endroits où la Ville est tenue de le faire et ce, dans les délais prescrits. Le déneigement doit être fait complètement sur toutes les rues visées par le contrat en enlevant toute la neige accumulée des deux côtés en bordure de chaque rue. Dans ce

mémoire, on s'intéresse à l'opération de chargement. Cette opération comprend l'enlèvement mécanique de toute la neige accumulée sur les trottoirs et la chaussée et s'il y a lieu, sur les terres-pleins et les mails qui les séparent. L'opération est généralement exigée pour les accumulations de plus de cinq centimètres de neige provenant d'une ou de plusieurs précipitations.

# Geochemical analyses of bulk stream sediment samples from northern Nova Scotia

by R.F. Mills. Halifax : Dept. of Mines and Energy, 1989. i, 368 p. maps. Bibliogr. (Open file release ; 89-007) Fold. maps not filmed  
MICROLOG 90-03335 8 fiche

In 1986 and 1987 a regional stream sediment survey was carried out on northern mainland Nova Scotia and on Cape Breton Island to provide new geochemical data on stream water and two fractions of stream sediment to investigate the potential for gold mineralization in the northern half of Nova Scotia, an area largely unexplored for precious metals. Approximately 3300 stream sediment samples, including duplicates, were analyzed for 31

elements in the coarse (-60 plus 230) heavy mineral separate fraction, and 16 elements in the fine (-230) fraction, resulting in approximately 152,000 different elemental analyses. Some of these analyses are supplemented with fire assay analyses for gold. Stream waters were analyzed for uranium and fluorine; conductivity and pH measurements were taken in the field. The report consists of tables of the analysis of the stream sediments and their related water samples, field card data files, sample location maps, combination symbol and contour map plots for fine fraction gold, and the accompanying text.

### Geochemistry of Grenville marble in southeastern Ontario

by W.T. Grant, V.C. Papertian and P.W. Kingston. Toronto : Ontario Geological Survey, 1989. x, 266 p. : ill., maps. Bibliogr. (Ontario Geological Survey mineral deposits circular ; 28) *Fold. maps not filmed.* ISSN 0706-4551 ISBN 0-7729-5444-5 MICROLOG 90-01872 3 fiche

Summary of the results of a 3-year investigation of the geology and geochemistry of Grenville marble in southeastern Ontario. This material is a source of building stone, crushed stone, terrazzo chips, poultry grit, lime, and magnesium metal. The report identified areas of high-purity marble suitable as an industrial mineral source; assessed the variability, both geochemically and geologically, of marble; and determined regional calcium/magnesium trends within individual marble belts as a guide to industrial mineral and base-metal mineralization. Emphasis was placed upon the rapid chemical analysis of a large sample population. As a follow-up, areas containing high-purity marbles, as indicated by regional samples, were mapped in detail to better define the extent of the high-purity marble. Exactly 1912 samples were collected from lithologically homogeneous marble units and these samples were chemically analyzed for up to 28 elements, plus loss on ignition.

### The Geological and engineering classification of Nepean sandstone

by B. Gorski. Ottawa : Canada Centre for Mineral and Energy Technology, Mining Research Laboratories, 1989. vii, 201 p. : ill. Bibliogr. (Report ; MRL 89-118(Tr)) MICROLOG 90-02554 3 fiche

A rock substance may be classified differently for age, mineralogy, physical and mechanical properties depending on the scientific discipline involved in the study. Geologists, mining, and civil engineers require certain information about a rock substance for different reasons. This study brings together methods of rock classification based on geological and engineering properties using Nepean sandstone. This material is readily available and sufficient data exists to compare it with the test results of the study.

### Geology and mineral evaluation of Kokanee Glacier Provincial Park, southeastern British Columbia (82F/11, 14)

by D.A. Brown and J.M. Logan. Victoria : Province of British Columbia, Ministry of Energy, Mines and Petroleum Resources, Mineral Resources Division, Geological Survey Branch, 1989. 47 p. : ill., maps. Bibliogr. (Paper ; 1989-5) *Fold. maps not filmed.* ISSN 0226-9430 ISBN 0-7718-8889-9 MICROLOG 90-01759 1 fiche

Kokanee Glacier Park covers about 305 sq km within the Selkirk Mountains of southeastern B.C. It was established in 1922 over an area that had already undergone more than 2 decades of mineral exploration and mine development. In 1973 a general moratorium on mineral exploration in parks was established, but government's desire to resolve the conflict between recreational and mineral values led to the area being included in the 1985/86 Wilderness Advisory committee study. This committee recommended that the rectangular boundaries of the park be rationalized, based on an adequate assessment of park and resource values. A mineral potential study of the park and recreation area additions located outside the original rectangle were undertaken in 1987/88. This study identified the types and sizes of mineral deposits in the area and determined where the greatest potential lay for locating new deposits. This report provides valuable data and interpretations to assist exploration in the new recreation area additions and other adjacent areas.

### Geology of the Flin Flon-White Lake area

by A.H. Bailes and E.C. Syme. Winnipeg : Manitoba Energy and Mines, Geological Services, 1989. xx, 313 p. : ill., maps. Bibliogr. (Geological report ; GR87-1) *Fold. maps not filmed.* MICROLOG 90-02362 4 fiche

This report describes the geology of the Flin Flon-White Lake area by block, as well as including general descriptions of structure, metamorphism, geochemistry and economic geology. Field work was conducted in 1979, 1980, 1982 and 1983 with short field sessions in 1981 and 1984. Approximately 2,000 thin sections were cut and examined to establish the petrographic character of every unit. Two hundred and fifteen whole rock chemical analyses document the compositional variations of volcanic flows, volcanoclastic rocks, sedimentary rocks and intrusions. Nearly all of

the analyzed samples were collected by drill or with a sledge hammer, after the mapping had been completed and the stratigraphy established.

### Geology of the Shining Tree area, Districts of Sudbury and Timiskaming

by M.W. Carter. Toronto : Ministry of Northern Development and Mines, Mines and Minerals Division, 1987. xi, 41 p. : ill., maps. Bibliogr. (Ontario Geological Survey report ; 240) *Fold. maps not filmed.* ISSN 0704-2582 ISBN 0-7729-2232-2  
MICROLOG 90-01858 1 fiche

The Shining Tree area metavolcanic-metasedimentary belt and adjacent granitic rocks contain occurrences of gold, copper, lead, zinc, molybdenum, asbestos, nickel, iron, cobalt, and silver. A series of detailed mapping projects was begun in 1971 to provide a more effective basis for determining the mineral potential of the region and for guiding exploration. This report presents a compilation of the detailed projects and a regional synthesis and interpretation of the entire area.

### Geology of the Slate Lake area, District of Kenora (Patricia Portion)

by R.P. Bowen. Toronto : Ministry of Northern Development and Mines, Mines and Minerals Division, 1989. xii, 82 p. : ill., maps. Bibliogr. (Ontario Geological Survey report ; 256) *Fold. maps not filmed.* ISSN 0704-2582 ISBN 0-7729-2321-3  
MICROLOG 90-01871 1 fiche

Results of a detailed geological survey performed in 1980 and covering the Slate Lake area, east of Red Lake in northwestern Ontario. The survey is a continuation of a multi-year program to upgrade the geological data base available for and assess the mineral potential of the western part of the Uchi subprovince. The potential for gold and iron is explored, along with descriptions of properties in the area.

### Geology of the Stoney Creek oil and gas field, and its implications regarding the tectonic evolution of the eastern Moncton subbasin, New Brunswick

Fredricton : Dept. of Natural Resources and Energy, Minerals and Energy Division, 1989. xi, 77 p. : ill. Bibliogr. (Geoscience report ; 89-1) ISSN 0838-2565  
MICROLOG 90-03187 1 fiche

The Stoney Creek oil and gas field is situated 16 km south of Moncton, New Brunswick, on the west side of the Petitcodiac River. This report describes the results of a detailed study of the sedimentology, facies relationships and geological setting of the Albert Formation with the Stoney Creek oil and gas field. The well cuttings of 31 strategically located wells were relogged in detail and the data used in conjunction with existing lithological well data to

establish a computer supported subsurface model for the field. The geological data gathered were used to interpret the geotectonic evolution of the eastern part of the Moncton subbasin and the Sackville subbasin. The data are summarized in an interpretive model describing the regional controls on the reservoir geology.

### Geology, geochemistry and mineral potential of intrusive rocks in the eastern central mineral belt of Labrador : regional geochemical data and preliminary interpretation

by A. Kerr. St. John's : Dept. of Mines and Energy, Geological Survey Branch, 1989. iii, 144 p. : maps. Bibliogr. MICROLOG 90-04338 2 fiche

The central mineral belt (CMB) of Labrador is the principal area of exploration in Labrador for commodities other than iron ore. This project characterizes and assesses the mineral potential of intrusive rocks associated with known mineralization in the eastern CMB and, via a lithochemical exploration program, defines areas of similar intrusive rocks elsewhere in the belt. The project also refines geological map coverage in areas underlain by intrusive rocks, and evaluates the role of middle Proterozoic magmatism in the evolution of both the CMB and central Labrador in general. A 1:250,000 preliminary compilation map of the eastern CMB is included with this report.

### Geophysical assessment of waste drilling fluid containment sites in the Mackenzie River Valley region, NWT

Hardy BBT Limited. Ottawa : Indian and Northern Affairs Canada, Northern Affairs Program, 1988. x, 64 p. : maps. Bibliogr. (Environmental studies ; no. 54) ISBN 0-662-16380-X MICROLOG 90-04621 1 fiche

This study reports the results of a field survey utilizing geophysical soil conductivity measurements coupled with near-surface soil chemistry analyses to determine if drilling wastes are migrating away from the boundaries of 8 sumps abandoned over a range of permafrost conditions in the Mackenzie Valley region. Geophysical electrical conductivity measurements were made at each sump, supplemented by surface soil analysis to assess any chemical expression of geophysically detected wastes. Notes were taken on site stability, signs of accelerated erosion, and the success of revegetation. Contour maps of apparent conductivity were prepared for depths of 3.5 m and 7 m and surface soil analyses were correlated with apparent conductivities at each site.

### Geotechnical considerations for the design of the extended fly ash mound at Nanticoke TGS

by K.C. Lau and H.T. Chan. Toronto : Ontario Hydro, Research Division, 1989. i, 44 p. : ill. Bibliogr. (Report ; no. 89-229-K) MICROLOG 90-00423 1 fiche

Currently, a wet ash disposal method is being used at the Nanticoke Thermal Generating Station site, consisting of lagoons, ash settling cells and the permanent ash storage area. This facility covers 77 ha of land and is enclosed by a perimeter clay dyke rising about 10 m above the surrounding terrain. The dry ash disposal method will increase the storage volume of the existing ash storage facility by about 70%, equivalent to an additional storage life of 9 1/2 years. This report presents a conceptual design for the extension of the existing ash storage mound.

### La Gestion des déchets industriels

Toronto : Société ontarienne de gestion des déchets, 1989. 10, 10 p. : ill. Bilingue (Managing hazardous waste). MICROLOG 90-01880 1 fiche

La quantité de déchets industriels dangereux dérivée de la fabrication des produits de consommation courante croît d'année en année. On a longtemps déversé les matières non traitées, parfois même dangereuses, dans les puits, les fossés à ciel ouvert ou les égouts pluviaux et domestiques. L'environnement, et surtout la qualité de l'eau des lacs, des rivières et des nappes souterraines, a subi les dommages de ces pratiques irréflechies. Ce document se penche sur des questions telles, les sources de déchets dangereux, les types de déchets dangereux et leur incidence sur l'environnement. EV ON PR SC

### Gestion des huiles usées au Canada : situation actuelle et différentes options

Monenco Consultants Limited. Ottawa : Conseil canadien des ministres de l'environnement, 1989. xxvi, 103 p. Bibliogr. (Rapport ; CCME-TS/WM-TRE007F) L'éd. anglaise (Used oil management...) : 90-00955/2. ISBN 0-662-95614-1 MICROLOG 90-00954 2 fiche

Les huiles usées produites chaque année représentent la plus grande quantité de déchets liquides organiques dangereux au Canada. Afin

de diminuer le volume de ces huiles, la réutilisation et le recyclage des huiles usées et, au besoin, un traitement et une élimination appropriés semblent être des solutions tout à fait appropriées. Les huiles usées devraient être récupérées pour leur pouvoir lubrifiant ou être utilisées comme combustibles d'appoint dans des conditions de combustion contrôlées, dans la mesure où ceci est réalisable. En vue de faciliter ce mécanisme, on a entrepris des recherches sur la question de la gestion des huiles usées au Canada et le présent rapport a été rédigé pour servir de document de base à l'élaboration de programmes et de moyens de contrôle au sein de diverses juridictions canadiennes. # **Glacier mass balance for 1987 on Sentinel, Helm and Place Glaciers, British Columbia**

by O. Mokievsky-Zubok. Saskatoon, Sask. : Environment Canada, Surface Water Division, National Hydrology Research Institute, 1988. 17 p. : ill. (NHRI contribution ; no. 88009) ISSN 0838-1992  
MICROLOG 90-05373 1 fiche

In 1987 mass balance studies continued on 3 glaciers in southwestern B.C. Two of them, Sentinel Glacier and Place Glacier, were former International Hydrological Decade glaciers. Helm Glacier was added in 1976 because it has strikingly different behaviour from Sentinel Glacier only 10 km away in spite of a similar elevation range and aspects, and because it contributes meltwater runoff to a B.C. hydro reservoir. For each glacier the height of equilibrium line was established and summer runoff estimated.

# **Global cities and public policy : the case of Vancouver, British Columbia**

by M.A. Goldberg and H.C. Davis. Vancouver, B.C. : University of British Columbia, School of Community and Regional Planning, 1988. 23 p. Bibliogr. (Comparative urban and regional studies ; no. 17) ISSN 0828-2412  
MICROLOG 90-05488 1 fiche (Available on fiche only)

In the context of growing economic interrelationships between nations, a set of 'global' cities is emerging. These cities are evolving as the principal nodes in the international economic network. This paper identifies the primary distinguishing characteristics of these cities. In light of these attributes, and using Vancouver, B.C. as an illustrative case study, it focuses on policies designed to promote a particular metropolitan area within the global network.

# **A Global optimization routing model and applications in telecommunication networks**

by B. Sanso and F. Soumis. Montreal : Université de Montréal, Centre de recherche sur les transports, 1989. 23 p. : ill. Bibliogr. (Publication ; no. 657)  
MICROLOG 90-01616 1 fiche

Centralized optimization model for the routing of calls in circuit switched networks. The problem can be stated as a multicommodity model without capacity constraints that takes into account the stochastic character of the demand. This model is solved using a Frank-Wolfe algorithm. Several applications of the model are outlined in the paper. Results on routing policy evaluation and network reliability are shown.

# **Global warming : policies for amelioration**

by R. Milko. Ottawa : Library of Parliament, Research Branch, 1989. 43 p. : ill. Bibliogr. (Background ; BP-221E) *French ed. (Le Rechauffement...)* : 90-05370/1. ISBN 0-660-13498-5  
MICROLOG 90-05369 1 fiche

Background paper discussing policies of the federal government which aim to ameliorate the greenhouse effect. The paper discusses the 1986 U.S. Environmental Protection Agency report and its analysis in relation to greenhouse gases, reduction targets, fossil fuels and carbon dioxide production, as well as the use of energy conservation and efficiency in reducing these gases. The key Canadian energy sectors affecting the greenhouse gases are identified, including transportation and electricity generation in the production of CO2. Efficiency enhancement in industry, residential and commercial buildings, the use of alternate renewable and non-renewable energy sources, and land use management are recommended to reduce production of the gases. Other gases, such as CFCs and halons, are described. International policies which would contribute to greenhouse gas reduction are suggested, and the legal and regulatory approaches which could be used by the federal government are described.

### The Goal of price stability : a review of the issues

by J. Selody. Ottawa : Bank of Canada, 1990. ii, 52 p. : ill. Bibliogr. (Technical report ; 54)  
MICROLOG 90-05565 1 fiche

The basic responsibility of a central bank is to preserve the value of money--that is, to maintain stability in the general level of prices. This report pulls together the main arguments for and against price stability as the appropriate goal for monetary policy. The available evidence suggests that the benefits of price stability are many and large while the costs of getting there are transitory and small by comparison. It identifies areas which require further research. It also addresses the transition to price stability and the practical definition of price stability. It illustrates that progress towards price stability is easier when wages and prices are flexible and when the monetary authority has credibility.

### Gold production and reserves in British Columbia

by T.G. Schroeter, C. Lund and G. Carter. Victoria : Ministry of Energy, Mines and Petroleum Resources, Mineral Resources Division, Geological Survey Branch, 1989. 85 p. : ill., maps. Bibliogr. (Open file ; 1989-22) *Fold. maps not filmed*. ISSN 0835-3530 ISBN 0-7718-8892-9  
MICROLOG 90-01257 1 fiche

The mineral exploration industry in B.C. has enjoyed a substantial boom during the past several years. Since 1983 the focus has mainly been on gold as a result of the collapse of the speculative bubble in commodity prices in 1982 and the advent of flow-through share financing. This report documents the abundance and diversity of gold discoveries that have resulted from the tightly focused and successful exploration effort over the last several years, placing them in context with the province's earlier history of precious metal production. The report expands the listing of significant gold-bearing deposits from 148 to 191. Production statistics are completed to the end of 1987 and reserve estimates are the most recent available in January 1989.

### The Goods and Services Tax : a general equilibrium analysis

by B. Hamilton and C.-Y. Kuo. Ottawa : Dept. of Finance, Tax Policy and Legislation Branch, 1989. 68 p. Bibliogr. (Working paper ; 89-3)  
MICROLOG 90-02076 1 fiche

Describes the Department of Finance's analysis of the long-term economic effects of sales tax reform. For the purpose of this analysis, the Department has developed a regional general equilibrium model of the Canadian economy. The data used in the model reflect the structure of the Canadian economy in 1984. However, the federal and provincial sales tax data were adjusted to reflect the substantial changes to these systems since 1984. The general equilibrium model incorporates observed data for an economy into a theoretically consistent economic framework. Within this

framework, it analyzes the effects of the tax change on relative prices and on activity in key sectors.

#### A Gradient approach for the O-D matrix adjustment problem

by H. Spiess. Montreal : Université de Montréal, Centre de recherche sur les transports, 1990. 11 p. Bibliogr. (Publication ; no. 693) MICROLOG 90-06644 1 fiche

In the past, many different models using observed link volumes to estimate or adjust O-D matrices were proposed, but using them for real size networks is difficult because of the complexity of the computations involved and the need for very specialized software to carry them out. This paper presents a new gradient model which can and has been applied to large scale networks. Mathematically, the model is formulated as a convex minimization problem where, by following the direction of the steepest descent, it is ensured that the original O-D matrix is not changed more than necessary. The paper shows how this demand adjustment model can be implemented without the need to develop any new software, by using existing features of a standard transportation planning package (EMME/2). The model has been used successfully in urban and national scale projects in Switzerland, Sweden and Finland, using networks with up to 522 traffic zones and 12,460 links, results of which are given.

**Grain corn, public interest : preliminary examination of changed circumstances**

Ottawa : Canadian International Trade Tribunal,  
1989. 42, 42 p. : ill. *Bilingual (Mais-grain,  
intérêt...)*. *CSI 22197.201*. ISBN  
0-662-57201-7  
MICROLOG 90-03163 2 fiche

In March 1987, the Canadian Import Tribunal  
found that the subsidizing of importations into  
Canada of grain corn in all forms, excluding  
seed corn, sweet corn and popping corn,  
originating in or exported from the U.S., with  
certain exemptions, had caused, was causing  
and was likely to cause material injury to the  
production in Canada of like goods. A  
countervailing duty was imposed. In February  
1988, the level of countervailing duty was  
reduced and in 1989 the Tribunal was asked  
to reconsider the question and whether any  
new evidence had arisen leading to the need  
for a new inquiry into the subject. This report  
is the result of that request. The report gives  
data and an analysis of the current corn  
market; summarizes submissions from  
agricultural users, industrial users,  
governments, and corn users; and analyses the  
issues in the light of the 1988-89 drought, the  
Canada-U.S. free trade agreement, and the  
U.S. countervailing duty on pork.

**Grass genera of western Canadian cattle rangelands**

by S.G. Aiken and S.J. Darbyshire. Ottawa :  
Agriculture Canada, Research Branch, 1983.  
173 p. : ill. Bibliogr. (Monograph ; no. 29)  
ISBN 0-660-11386-4  
MICROLOG 90-03217 2 fiche

Western Canadian rangelands include all  
grazing land west of the Ontario-Manitoba  
border. 'Cattle' is used to distinguish  
grasslands where these animals are currently  
grazed from wildlife rangelands used by  
undomesticated herbivores. Introduced grasses  
are included along with native species in the  
generic descriptions. This key describes  
general vegetative and floral characters of  
grass morphology, as well as the specific  
genera. Generic descriptions and a glossary  
are included.

**Great Lakes, great legacy?**

by T.E. Colborn...et al. Ottawa : Institute for  
Research on Public Policy ; Washington,  
D.C. : Conservation Foundation, 1990. xliii,  
301 p. : ill., maps. Bibliogr.  
MICROLOG 90-05203 4 fiche

Results of a 2-year study of the Great Lakes  
basin to assess environmental conditions and  
trends and the adequacy of government  
programs. The study explores the linkages  
between economic development and  
environmental quality in the Great Lakes basin  
and identifies the need for greater integration  
of environmental considerations with economic  
decisions affecting agriculture, energy, and  
other social investments. The study also  
emphasizes the importance of institutional  
structure to assure widespread involvement and  
participation in community decisions and action  
to deal with these issues.

**Great lakes, great legacy? Foreword and overview**

Ottawa : Institute for Research on Public Policy ;  
Washington, D.C. : Conservation Foundation,  
1989. 29 p. ISSN 8902-5238 ISBN  
0-89164-115-7  
MICROLOG 90-00930 1 fiche

This study argues that simply augmenting  
actions already taken to remedy environmental  
degradation in the Great Lakes region, such as  
control of polluters, and piecemeal restrictions  
of physical development, is not a sufficient  
response. Rather, it shows that a far-reaching  
commitment to reduce the environmental assault  
on the Great Lakes from all sources is  
necessary. It also underscores the need for a

dramatic break from the crisis management approach to environmental degradation that persists in the region, and to develop a commitment to anticipate and prevent future legacies of environmental destruction.

### The Greenhouse effect and the Alberta fossil fuels industry : a discussion paper

by E.J. Wiggins and W.J. Yurko. Edmonton : Alberta Oil Sands Technology and Research Authority, 1989. 44 p. : ill. MICROLOG 90-02283 1 fiche

This study represents a preliminary attempt to assess the effects on the Alberta fossil fuels industry if international action is taken to limit emissions of 'greenhouse gases', and the measures that might be considered to minimize any negative impact on the provincial economy. The study considers the likely effects on the fossil fuel industry if an arbitrary reduction in fuel use were mandated by national or international policy, and the alternative forms of economic activity that might be available to Alberta, as well as possible ways of reducing the net emission of carbon dioxide to the atmosphere by reducing energy production from fossil fuels.

### Greenhouse vegetable production in Essex County : production costs and practices, 1986 and 1987

by G.A. Fisher. Toronto : Ministry of Agriculture and Food, Economics and Policy Coordination Branch, 1988. iii, 16 p. Bibliogr. (Economics information report ; no. 88-05) CSI 55137.007. ISSN 0708-482X ISBN 0-7729-4370-2 MICROLOG 90-04704 1 fiche

This report presents the results of a study on production costs and practices for 1986, as well as the updated cash costs of greenhouse tomatoes and cucumbers for 1987. In order to be able to study separately the costs and practices involved in the production of either greenhouse grown tomatoes and cucumbers, a confidential list of only those growers who produced either one of these crops was provided. In addition, the survey excluded growers with under 22,000 sq ft of production. Through the use of accounting production, marketing and other records, information was tabulated for each cooperating grower. Methods of calculating costs are given, along with a general methodology.

### Ground skidding second-growth timber in coastal British Columbia : a case study

by R.E. Roger and A.J. MacDonald. S.I. : Forest Resource Development Agreement, 1989. v, 19 p. : ill. Bibliogr. (FRDA report ; 101) ISSN 0835-0752 ISBN 0-662-17384-8 MICROLOG 90-04436 1 fiche

Evaluation of the productivity and profitability of ground skidding second-growth timber in coastal B.C. using 2 Caterpillar 518 rubber-tired cable skidders and a Caterpillar D4H skidder. The study was located 6 km south of Metchosin, B.C. in an area with a primarily second-growth Douglas-fir and balsam stand composition. The skidders were monitored at a detailed timing level for 10 days. During 3 of the detailed timing days, individual stems in each turn were scaled and graded. Skidding costs and profits for the detailed timing production were estimated using marginal economic analysis techniques.

### Ground water issues in the North

by D. Naughton. Saskatoon, Sask. : Environment Canada, Ground Water Division, National Hydrology Research Institute, 1987. 23 p. : maps. Bibliogr. (NIHRI contribution ; no. 87009) ISSN 0838-1992 MICROLOG 90-06482 1 fiche

This report describes the need for specific ground water studies in the North. Monitoring of leakage from the tailings ponds at the Canada Tungsten mine and regional hydrogeologic monitoring in Wood Buffalo National Park are discussed in some detail. Research on northern hydrogeological processes and monitoring of resource developments are identified as programs requiring ground water investigations in the future. Uranium mining is singled out as a special case apart from the general category of mining-related ground water issues, because of the federal government's responsibility for uranium mining and the nuclear fuel cycle.

### Groundfish stock assessments for the west coast of Canada in 1989 and recommended yield options for 1990

A.V. Tyler and J. Fargo, editors. Nanaimo, B.C. : Dept. of Fisheries and Oceans, Biological Sciences Branch, Pacific Biological Station, 1990. v, 343 p. : ill. Bibliogr. (Canadian technical report of fisheries and

aquatic sciences ; no. 1732) ISSN 0706-6457  
MICROLOG 90-05010 4 fiche

Stock assessments and yield options for lingcod, Pacific cod, petrale sole, Dover sole, rock sole, English sole, arrowtooth flounder, sablefish, Pacific hake, spiny dogfish, walleye pollock, Pacific ocean perch, yellowmouth rockfish, rougheye rockfish, redstripe rockfish, silvergray rockfish, yellowtail rockfish, canary rockfish, quillback rockfish, copper rockfish, and yelloweye rockfish. Biological considerations only, rather than economic factors, are considered. The yield options are quantitative and are based on a series of appropriate mathematical methods, including virtual population analysis, dynamic pool analysis, and Fournier stock-reconstruction procedures. Alternative options address the possibility of the fishery managers' considering high risk and low risk yields in relation to a stock's potential to produce.

### Groundwater resources protection from drilling waste, Northwest Territories and Yukon

Piteau Engineering Ltd. ; prepared under contract for the Water Resources Division, Natural Resources and Economic Development Branch, Dept. of Indian and Northern Development. Ottawa : Indian and Northern Affairs Canada, Northern Affairs Program, 1988. v, 98 p. : ill. Bibliogr. (Environmental studies ; no. 62) ISBN 0-662-17183-7  
MICROLOG 90-00444 2 fiche

In many regions of the Yukon and Northwest Territories, the presence of permafrost creates a potential for pollution of groundwater different from that common in temperate climates. Oil and gas exploratory drilling produces substantial volumes of liquid and solid wastes and environmental damage may be caused if they are toxic. This study compiles existing information on drilling wastes through a literature review and interviews with government and oil industry personnel, and identifies hydrogeological information deficiencies for northern regions, and research needs.

### Growth and movement of *Homarus Americanus* on the outer coast of Nova Scotia

by R.J. Miller...et al. St. Andrews, N.B. : Dept. of Fisheries and Oceans, Marine Fish Division, Biological Sciences Branch, Biological Station, 1989. v, 17 p. : maps. Bibliogr. (Canadian technical report of fisheries and aquatic sciences ; no. 1716) ISSN 0706-6457  
MICROLOG 90-03219 1 fiche

Increasing the recruit size of American lobsters may be the advice most frequently given by lobster biologists to fishermen and fisheries managers, who respond by asking if the larger lobsters will move away from their fishing

grounds, how quickly they will grow to the new legal size, and will they die of natural causes first. This report answers the first two questions. Tagged lobsters were released in 1978 and 1979 at one location each, and in 1982 at 7 locations, all on the outer (Atlantic) coast of Nova Scotia. The 1978 and 1979 releases were designed to show growth and movement of a large range of sizes, whereas the 1982 releases were intended to demonstrate to fishermen the amount of movement and growth of the recruit molt class only. The recruit molt class is the size group within one molt larger than minimum legal size. Because the interests of fishermen are often specific to their own fishing area, published studies of growth and movement are reviewed for several areas of Atlantic Canada and Maine, U.S.A. as a reference source.

### Growth room temperature control with water-source heat pumps

by H. Speiser and R. Pitblado. S.I. : Canadian Society of Agricultural Engineering ; St. Joseph, MI : American Society of Agricultural Engineers, 1989. 11 p. : ill. Written for presentation at the 1989 International Summer Meeting jointly sponsored by the American Society of Agricultural Engineers and the Canadian Society of Agricultural Engineering  
MICROLOG 90-03940 1 fiche

In order to develop and evaluate effective control measures for insect pests, researchers must be assured of a known and uniform infestation within their research plots. Ridgeway College began rearing their own insects, specifically the European Corn Borer, for research purposes 5 years ago, using a small clay-block building equipped with electric unit heaters and window air conditioners to maintain the desired air temperatures. Room

air temperatures would fluctuate 3C-4C from the desired air temperatures and the thermostats had to be manually adjusted twice daily to simulate day/night temperature swings. More space was required and a new rearing facility was planned, possibly using water source heat pumps to provide improved temperature controls. This paper determines the performance and economics of using water-to-air heat pumps to provide environmental temperature control in 8 insect rearing rooms for year-round production.

#### Guide de bonnes pratiques pour l'aménagement des structures d'entreposage des fumiers

Québec : Gouvernement du Québec, Ministère de l'environnement, 1989. 164 p. : ill., cartes géogr.  
MICROLOG 90-02975 2 fiche

Ce document comporte sept chapitres. Les chapitres 1 et 2 traitent des aspects se rattachant à la gestion des effluents d'élevage (classification et évaluation des volumes à entreposer) et au choix de la structure d'entreposage appropriée au cas à l'étude. Le chapitre 3 présente les principales exigences environnementales à respecter pour assurer le maintien de la qualité de l'air et de l'eau. Le chapitre 4 présente toutes les étapes de conception d'un système d'entreposage (études préliminaires, design et optimisation, confection des plans et normes de présentation). Le chapitre 5 quant à lui présente les étapes importantes de la réalisation du projet (choix de l'entrepreneur et surveillance des travaux). Finalement, les chapitres 6 et 7 traitent des responsabilités et des rôles de chacun des intervenants.

#### A Guide to implementation and operation of vehicle emissions inspection clinics

by D. Cope, F. Lavallée and R. Solman. Ottawa : Environment Canada, 1988. vii, 94 p. : ill. (Report ; IP-90)  
MICROLOG 90-02382 2 fiche

Vehicle emissions inspection clinics are a method of advertising an environmental agency's work in the field of vehicle emissions and their control and for disseminating information to the public. They can also serve as a source of data with respect to the in-use fleet of vehicles in a particular area. Ideas for and suggestions on how to plan, organize and run an inspection clinic are presented in this report. Agencies are encouraged to collect data following the standard format outlined in the text. Standardization of data recording will provide information which is more cross-comparable than may have been the case for previous clinics.

**Guidelines for Canadian drinking water quality -- 4th ed.**

Federal-Provincial Advisory Committee on Environmental and Occupational Health (Canada). Subcommittee on Drinking Water. Ottawa : Health and Welfare Canada, 1989. 25 p. *French ed. (Recommandations pour la qualité...)* on the same fiche. ISBN 0-660-13271-0  
MICROLOG 90-03927 1 fiche

This booklet is the 4th edition of the guidelines, including those guidelines approved by the Conference of Deputy Ministers of Health as of June 1989. Since the 1987 guidelines were published, no evidence has been presented which questions the suitability of new, revised or reaffirmed values included in that edition. These values have, therefore, been adopted and are presented in this edition as confirmed guidelines. Changes to the previous guidelines for chemical and physical characteristics, as well as those for microbiological characteristics, are proposed in this edition. These guidelines are intended to apply to all drinking water supplies, public and private. Guidelines are given for microbiological, chemical and physical, and radiological characteristics. The booklet also includes an explanation of terms used.

**Guidelines for mobile polychlorinated biphenyl destruction systems**

Ottawa : Canadian Council of Ministers of the Environment, 1990. xiv, 73 p. : ill. Bibliogr. (Report : CCME-TS/WM-TRE011E) *French ed. (Lignes directrices applicables aux...)* : 90-06126/1. ISBN 0-662-17657-X MICROLOG 90-06123 1 fiche

This report is one in a series dealing with the treatment, destruction and management of polychlorinated biphenyl (PCB) wastes in Canada. The report recommends appropriate procedures for application, siting, and operational requirements for mobile PCB destruction systems in Canada. These recommendations are not enforceable by law as federal and provincial regulatory agencies have the legal authority and responsibility to develop regulations in their jurisdictions. The main focus of the report is to describe or recommend protocols for each step of the PCB waste management process for generic mobile technologies that can be applied immediately and/or are most promising for use in Canada. Generic technologies addressed include high temperature incineration (rotary kiln, liquid injection) and other thermal degradation techniques (pyrolysis, thermal radiation, and plasma arc) that are intended to destroy PCB-containing wastes of both high and low concentration. CA EV SC

#### Guiding juvenile salmonids around obstacles and through thermoclines

by R. Bams. Nanaimo, B.C. : Dept. of Fisheries and Oceans, Fisheries Research Branch, Pacific Biological Station, 1989. iv, 8 p. Bibliogr. (Canadian technical report of fisheries and aquatic sciences ; no. 1701) ISSN 0706-6457  
MICROLOG 90-01116 1 fiche

During investigation of the colonization of habitats inaccessible to anadromous coho, problems arose in how to guide large numbers of fish around different types of physical barriers that may be present during different phases of their life-history. This report describes the successful passing of fingerlings through excessively warm surface waters of a lake and smolts around a 700 m stretch of cascades having a vertical drop of about 70 m in several abrupt falls, often among sharp rocks and without cushioning plunge pools. The techniques were developed and tested at a small lake in the Koksilah River watershed, first colonized in 1985 with coho fry obtained from various locations in the adjacent Cowichan River in the southeastern part of Vancouver Island.

#### Handling and curing peanuts in modified tobacco bins

by D.L. Van Hooren. Guelph, Ont. : Agricultural Energy Centre, 1989. 18 p. : ill. (Report ; no. 89-5104)  
MICROLOG 90-03941 1 fiche

This project determined if tobacco curing bins could be used for the handling and curing of peanut pods in tobacco kilns. The evaluation was done by determining the degree of modifications required to the bulk kiln to accommodate bins filled with peanut pods; product handling requirements with bins as compared to present methods used by the majority of the peanut industry; differences in the curing process resulting from pods being contained in bins rather than loose on the perforated floor of the bulk kiln; dried quality of peanuts cured in bins as compared to loose on the perforated floor of a bulk kiln; and differences in the amount of energy required to cure peanuts in bins as opposed to loose on the floor. The project was conducted in 1987 using 7 modified DeCloet tobacco bins.

#### Harnessing science and technology for cold regions

Science Council of Canada. Ottawa : The Council, 1989. 28, 28 p. : ill. Bibliogr. Bilingual (*Exploiter les sciences et les technologies...*). ISBN 0-662-57032-4  
MICROLOG 90-02313 1 fiche

This report summarizes the science and technology developed to cope with economic development in cold regions, an area in which Canada is a world leader. Background information describes the beginning of such

development during World War II, continuing with the oil and gas industry's exploration in the Beaufort Sea and the Mackenzie Delta. As well, the environmental knowledge gained is of great importance to all polar nations. The report identifies constraints on Canadian development of technology, including a small, unstable domestic market, difficulties in maintaining knowledge databases and qualified personnel, the scarcity of research infrastructure and facilities in Canada, the absence of national leadership and goals, and problems in securing foreign markets. Recommendations are given on collecting, preserving and disseminating information, the need for government investment in R&D, ensuring product quality, and strengthening research and training in technology.

#### Harp seals and seal invasions : what we know and what we believe

by O. Wiig. Ottawa : National Research Council, Canada Institute for Scientific and Technical Information, 1989. 20 p. : ill. (Canadian translation of fisheries and aquatic sciences ; no. 5480) *Originally published in Norwegian*. ISSN 0704-3716  
MICROLOG 90-00588 1 fiche

In the winter and spring of 1987, from 60,000-100,000 harp seals drowned, caught in fishing gear on the Norwegian coast. Causes of the so-called invasion were debated but with few facts given. While much of the harp seals' biology is well known, such other areas as stock sizes, migrations, and feeding are obscure. These are important factors in explaining the invasion. This paper gives an overview of harp seal biology and the seals' recent and earlier invasions along the Norwegian coast.

#### The Harvesting of the scallop *Pecten maximus* L. in France, part II : assessment and management of the Saint-Brieuc Bay population

by H. Dupouy, G. De Kergariou and D. Latrouite. Ottawa : National Research Council, Canada Institute for Scientific and Technical Information, 1988. 21 p. : ill. Bibliogr. (Canadian translation of fisheries and aquatic sciences ; no. 5416) *Originally published in French*. ISSN 0704-3716  
MICROLOG 90-01530 1 fiche

After having been abandoned for 30 years, the Saint-Brieuc Bay scallop fishery started up again on a modest scale in 1960. Within a few years, the fishery had become the largest in Europe, causing the fishing fleet to balloon to an excessive size, and necessitating the establishment of an authority with extensive regulatory powers. A research program was developed based on a study of the biological characteristics affecting the scallop population, assessment of recruitment and prerecruitment, and assessment of the harvesting effort and its impact on the population. This paper describes the research program, its findings in biology and growth and natural mortality, an estimation of the population, optimum harvesting conditions and commercial size, and improvements to date.

### Hazard analysis of OWMC treatment facility : summary of facility risk for typical waste : final report

Battelle Columbus Laboratories, Toronto  
Ontario Waste Management Corporation, 1988.  
xiii, 236 p. : ill. Bibliogr.  
MICROLOG 90-02878 3 fiche

The Ontario Waste Management Corporation (OWMC) is proposing to construct and operate an integrated facility for treating and disposing of hazardous wastes and liquid industrial wastes. A preliminary design, which has a projected initial capacity of 150,000 tonnes per annum with the capability to expand to 300,000 has been developed as a basis for an environmental assessment which includes the first results from an ongoing hazard analysis. A hazard analysis is an investigation of acute risks from abnormal operation or behaviour of a facility. This report describes the purpose, the methodology and the results of the first risk estimates from the hazard analysis, limited to offsite risk of the preliminary facility design and the treatment of typical wastes.

### Hazard from the seedling debarking weevil : a revised key to predicting damage on sites to be planted

S.I. : Canadian Forestry Service - Maritimes, 1990. 4 p. Bibliogr. (Technical note, no. 236) ISSN 0820-8107  
MICROLOG 90-04587 1 fiche

The seedling debarking weevil, a pest of newly established plantations, has caused significant

injury to seedlings during the last several years in Nova Scotia and Prince Edward Island and, to a much lesser extent, in New Brunswick. This hazard key incorporates the most recent information from study sites on P.E.I. in 1989, although its development began with work in Nova Scotia. The key is designed to be used in 1-year-old cuts and in areas of major concern, such as sites where the softwood content was greater than 25% or in those regions of the Maritimes where weevil damage has historically been a concern. The rating system follows a dichotomous key design.

**Healthy planet, healthy people**

Environment Council of Alberta. Pollution Subcommittee. Edmonton : The Council, 1989. 18 p. Bibliogr.  
MICROLOG 90-03246 1 fiche

This paper discusses some of the links between physical, mental, and emotional health, and points out why people working in the health and environmental areas should expect to have strong allies in each other. It briefly examines the healthy communities movement in Canada and in Alberta, with reference to the Ottawa Charter for Health Promotion and the guidelines it offers for working toward healthy communities.

### Heavy mineral till geochemistry (tin) of the eastern and central South Mountain Batholith

by P.W. Finck, F.J. Boner and R.M. Graves.  
Halifax : Dept. of Mines and Energy, 1990. 21 p. : maps. Bibliogr. (Open file report ; 90-004) Fold. maps not filmed.  
MICROLOG 90-05588 1 fiche

This geochemical release is part of the South Mountain Batholith (SMB) Pleistocene mapping project, a contribution to the Canada-Nova Scotia Mineral Development Agreement. Part of this project involved collection of 2100 till samples on a 2 sq km grid for regional geochemistry over the entire SMB. In this report tin data for heavy mineral concentrates are presented as raw and weighted values with accompanying contour maps for the eastern and central part of the SMB. The maps are not included.

### Height-of-the-Rockies Wilderness Area : management plan -- Draft.

Victoria : Ministry of Forests, 1989. 50 p. Bibliogr. Fold. map not filmed.  
MICROLOG 90-03823 1 fiche

In August 1987 the B.C. Forest Act was amended to provide for the designation of wilderness areas on Crown land in provincial forests. The Height-of-the-Rockies Wilderness Area was established as the first such area. This draft plan incorporates public input to date, available resource data and comments from the various government agencies. It covers wilderness concepts, recreation management, forest protection, range management, fish and wildlife management, mineral, petroleum and natural gas exploration, and the implementation and review of the plan.

The resource information is based on papers written about the area prior to its formal designation, discussions with the public and data gathered on site. A questionnaire was developed for public input on preferences for future use of the area and the results of the survey were incorporated into the plan.

### Herbicide efficacy trials in Alberta and Manitoba, 1980-85

by J.A. Drouin. Edmonton : Government of Canada, Canadian Forestry Service, Northern Forestry Centre, 1989. vii, 41 p. : ill., maps. Bibliogr. (Information report ; NOR-X-306) ISSN 0704-7673 ISBN 0-662-16778-3  
MICROLOG 90-01442 1 fiche

Vegetation control trials in Alberta and Manitoba in 1980-85 tested 9 herbicides to determine their capabilities for conifer release, chemical thinning, and site preparation. The herbicides tested were hexazinone in liquid, grid ball (10% and 20%) and granular (10% and 20%) formulations, metsulfuron methyl, fluzafop-butyl, bromacil, and fosamine ammonium. Data were obtained on conifer growth and tolerance to the herbicides, weed control, optimum timing of application, techniques, and equipment performance.

### Herbicide, nutrient and water balance from an irrigated field

by W. Nicholaichuk, R. Grover and J. Whiting. Saskatoon, Sask. : Environment Canada, Ground Water Division, National Hydrology Research Institute, 1988. 7 p. Bibliogr. (NHRI contribution ; no. 88003) Prepared for 6th IWRA World Congress on Water Resources. ISSN 0838-1992  
MICROLOG 90-06494 1 fiche

The full impact of irrigation development on the Canadian Prairies has not been fully assessed, even though the efficiency of irrigation conveyance systems has been studied in southern Alberta. None of the studies addresses the question of both the quantity and quality of drainage water that can be expected from surface irrigation. This report determines the amount of surface drainage water following each rainfall and irrigation event; the quality of surface drainage water; efficiency in application of irrigation water, nutrients and herbicides; and the impact of irrigation drainage and downstream flows on water quality.

### Herbicide, nutrient and water drainage from an irrigated field : final report

by W. Nicholaichuk, R. Grover and J. Whiting. Saskatoon, Sask. : Environment Canada, Ground Water Division, National Hydrology Research Institute, 1989. 19 p. Bibliogr. (NHRI contribution ; no. 89013) ISSN 0838-1992  
MICROLOG 90-02455 1 fiche

With the growing interest in expanding irrigation in Canada, the use of irrigation return flows is being explored. These can improve overall irrigation efficiency and reduce the unit costs of irrigation development but it is necessary to determine if this practice is environmentally sound. This report presents the results of a 3-year (1986-88) study of a south Saskatchewan soft white spring wheat crop to determine the amount of surface drainage water following each rainfall and irrigation event; the quality of surface drainage water with respect to nutrients and herbicides; irrigation efficiency with respect to the application of irrigation water, nutrients and herbicides; the impact of irrigation drainage and downstream flows on water quality; the opportunity for the reuse of irrigation drainage water downstream; and the effect of application techniques and/or crop situation by selecting different monitoring sites each year.

### High energy rate compaction of R.S. metal powders : final report

contractor: Limpact Industries Limited ; submitted by Brenton Chen, R.T. Lassau. Mississauga, Ont. : ORTECH International, 1988. 39 p. : ill. Bibliogr. *CANMET contract:*

69169-01-SQ  
MICROLOG 90-03959 1 fiche

Rapid solidification (R.S.) involves processes in which a molten alloy (or element) is cooled to a solid at a rate which is fast enough that the final system is not in an equilibrium state for that alloy. Since R.S. materials are formed from non-equilibrium processes, the products are inherently thermally unstable. For many applications, the production of bulk, solid components from R.S. powders by some type of consolidation process is required. One method being considered is that of shock wave compaction, which has the potential of treating (and possibly melting) the outside of the powder particles, a feature which is desirable in the bonding of thermally unstable materials. Cylindrical compaction, which must be carried out using explosives, has fewer equipment requirements, but tends to generate a structurally unsound region along the centre of the sample. This study used water atomized iron and nickel-aluminum-bronze powders for cylindrical compaction trials. This final report summarizes the work carried out and describes the method.

### High temperature uniaxial and triaxial compression tests on URL rock samples from borehole 401-009-HF1

by J.S.O. Lau and B. Gorski. Ottawa : Canada Centre for Mineral and Energy Technology, Mining Research Laboratories, 1990. viii, 90 p. : ill. Bibliogr. (Report ; MRL 90-05(TR))  
MICROLOG 90-06010 2 fiche

The Canadian Nuclear Fuel Waste Management Program is concerned with the safe, long-term disposal of high level nuclear wastes in vaults located at depth in plutonic rock. As part of the program, Atomic Energy of Canada Limited constructed the Underground Research Laboratory (URL) near Lac du Bonnet, Manitoba to provide a representative environment for in situ investigations. A series of uniaxial compression and triaxial compression tests at the confining pressures of 3.5, 17.0 and 35.0 MPa and at the test temperatures of 21°C, 75°C and 125°C were carried out in September 1989. Rock core samples were obtained from borehole 401-009-HF1, drilled at

the 420 level in the URL. This report presents the results of the program, compares the thermo-mechanical properties of the rock samples from the 420 level with those from the 240 level, and recommends what further laboratory work will be required to determine the thermo-mechanical properties of the rock in the URL characterization program during the operating phase of the URL.

#### Highvale soil reconstruction project : five year summary

by D.N. Graveland...et al. ; for the Plains Coal Reclamation Research Program. Edmonton : Alberta Land Conservation and Reclamation Council, Reclamation Research Technical Advisory Committee, Plains Reclamation Research Program, 1988. xxx, 102 p. : ill. Bibliogr. (Report ; RRTAC 88-11)  
MICROLOG 90-02884 2 fiche

The Highvale soil reconstruction project was initiated in 1982 by government and coal industry representatives to provide interpretive data for reclamation planning and post-mine land management of sodic strip-mined soils. The project determined the optimum depth of subsoil replacement over sodic minespoil to ensure adequate crop productivity; examined

slope configurations which could minimize soil quantities needed to restore the original productivity of reclaimed land; and assessed the sustainability of crop production on soil replaced over sodic minespoil by monitoring upward soluble salt migration into the root zone. This report presents a summary of the activities and results of the reclamation research project at the Highvale Mine from 1983-87.

#### A Historical perspective of sugar maple decline within Ontario and outside of Ontario

by W.D. McIveen, S.T. Rutherford and S.N. Linzon. Toronto : Environment Ontario, 1986. 40 p. Bibliogr.  
MICROLOG 90-01239 1 fiche

A disorder of sugar maple trees in North America, characterized by a general decline in health frequently leading to death, is now recognized. No single cause of the condition has been identified and it may be a non-specific response of the tree to a variety of combination of agents. Recently, consideration has been given to the possibility that acidic deposition or pollutants transported over long distances could be involved. This report summarizes the published data for maple decline in an attempt to place a historical perspective on the situation both within and without the province of Ontario.

Summary of monthly and annual mean discharges and annual extremes of discharge for rivers in the Yukon and Northwest Territories for which streamflow data to 1988 inclusive were collected. Data include a summary of monthly and annual mean discharges, annual maximum instantaneous discharges, annual maximum and minimum daily discharges, identification of the extreme recorded for the period of record, and annual total discharge in cubic decameters. Descriptive information about the gauging station is given, including latitude and longitude, drainage area, whether the flow is natural or regulated, whether the station is international, and the names of cooperating agencies who supply data.

# **History and present state of the odd- year pink salmon runs of the Fraser River region**

by W.E. Ricker. Nanaimo, B.C. : Dept. of Fisheries and Oceans, Fisheries Research Branch, Pacific Biological Station, 1989. vi, 37 p. : ill. (Canadian technical report of fisheries and aquatic sciences ; no. 1702)  
ISSN 0706-6457  
MICROLOG 90-01115 1 fiche

Pink salmon of the Pacific Ocean have a 2-year life history almost without exception. In even-numbered years pinks are very scarce in the Fraser River and most adjacent streams of the lower Strait of Georgia and Puget Sound, but are abundant in the odd-numbered years - a situation which has existed from the first historical records in the 19th century. This report concentrates on the history of the odd-numbered year stocks, explaining changes in abundance, the reaction of pink salmon to obstructions, the effect of the commercial fisheries, the size of Fraser-Puget pink salmon, and productivity of Upper Fraser pink stocks.

# **Hog fuel yield factors for British Columbia**

by M.R.C. Massie and G.H. Manning. Victoria : Government of Canada, Canadian Forestry Service, Pacific Forestry Centre, 1989. v, 15 p. (Information report ; BC-X-313) ISSN 0830-0453 ISBN 0-662-17358-9  
MICROLOG 90-02608 1 fiche

This report reviews the history of utilization of woody biomass for fuel in British Columbia and discusses the utilization of the various potential components of hog fuel. A listing of hog fuel yield (by proportion of total volume) factors from merchantable logs, by timber supply area or supply block, and species grouping is given. Waste is divided into sawdust, shavings, cedar wastes, veneer and plywood wastes, and lumber and pulp market effects. Factors were developed for timber supply areas on the basis of mill coefficients. Each area was considered on the basis of timber type and mills supplied. Where relationships were unclear, average coefficients were used that reflected mills in the general supply area as well as the proportions of whitewood (pine, spruce, balsam, hemlock), cedar and other softwoods, mainly Douglas-fir and larch, coming from the supply area. The hog fuel factors for timber supply areas developed in this report are based on data from 1978-88 and represent the technology being used in forest products manufacturing during that period, as well as the timber being harvested during that period.

## Housing Indian elders on-reserve

by Randy Pecarski, Margaret Eberle, David Hulchanski ; for Canada Mortgage and Housing Corporation. Ottawa : David Nairne & Associates Ltd., 1989. 75 p. : ill. Bibliogr. MICROLOG 90-06833 1 fiche

This study examines the issues surrounding the provision of elders housing on B.C. Indian reserves. It is concerned with how Bands allocate limited housing funds in light of changing demographic trends. Indian elders are identified as a group about which little research or policy making has occurred in the past and little is known about their existing housing conditions or needs. The Lytton Indian Band has addressed its elders needs by constructing a 22 unit multiple housing complex. The complex, which was completed in 1985, has generated much interest on the part of other B.C. Indian bands. This document provides a way for this experience to be shared.

To help the wood-burning appliance industry develop more efficient appliances, and to help the consumer select the best appliance for their requirements, the Canadian Standards Association developed a methodology for rating the efficiency of, and the emissions from, wood-burning appliances in the residential range. Manufacturers may use a portion of this test methodology, the dilution tunnel sampling procedure, to do their own performance testing. Because B415 performance testing and appliance labelling is not mandatory in Canada, it is not being done. On the other hand, the

U.S. Environmental Protection Agency has legislated maximum levels for particulate emissions from wood heaters for sale in the U.S. after July 1988. American manufacturers have been forced to react and are rushing to improve their products before the deadline, and Canadian manufacturers who export to the U.S. are doing the same. This report documents the reliability of the dilution tunnel sampling procedure as a tool which can be used by Canadian manufacturers to develop cleaner-burning products.

**How to work safely with dangerously reactive liquids and solids**

by M. Lowther. Hamilton, Ont. : Canadian Centre for Occupational Health and Safety, 1989. i, 16 p. Bibliogr. French ed. (Comment travailler en toute...) : 90-05751/1. ISBN 0-660-13449-7

MICROLOG 90-03616 1 fiche

General information on how to work safely with dangerously reactive liquids and solids, intended for workplaces where such liquids and solids are present in storage containers holding 250 litres (55 gallons) or less. It does not cover bulk storage tanks, piping systems, dangerously reactive compressed gases, peroxides formed during the storage of chemicals such as ethers, or specific processes using dangerously reactive liquids or solids. The publication describes the characteristics of such liquids and solids; their dangers from fire, explosion and hazards to health; presents basic safety practices; and covers methods of safe working, including substitution, ventilation, storage, dispensing, handling, disposal, protective equipment and emergency procedures.

**Hudson Bay and Ungava Bay ice-melt cycles for the period 1963-83**

by R.H. Loucks and R.E. Smith. Dartmouth,

N.S. : Bedford Institute of Oceanography ; Dept. of Fisheries and Oceans, Scotia-Fundy Region, Physical and Chemical Sciences, 1989. vi, 48 p. : ill. Bibliogr. (Canadian contractor report of hydrography and ocean sciences ; no. 34) ISSN 0711-6748  
MICROLOG 90-05160 1 fiche

The river runoff discharging through Hudson Strait from 1963-83 was calculated using 3 drift speed scenarios, with the important freshwater contribution from ice-melt to the freshwater budget remaining to be treated. This report assembles monthly and annual time series of ice volumes and ice-melt discharges for Hudson Bay, James Bay, Fox Basin, Hudson Strait and Ungava Bay from 1963-83. Sub-area ice-melt discharges are combined to estimate ice-melt discharge through Hudson Strait. Three ocean drift speed scenarios are again used to simulate the transport of the melt water from each area toward the entrance to Hudson Strait. It is assumed that the melt water leaves Hudson Strait in a low-salinity surface layer. The question of the salt balance is not addressed.

### Human performance factors in aviation

by D.A. Klassen. Ottawa : Transport Canada,

Policy and Coordination, Transportation Development Centre, 1989. ix, 23 p. Bibliogr.  
MICROLOG 90-04086 1 fiche

Human performance factors account for over 80% of the system failures, therefore to improve system safety it is necessary to minimize the opportunities for error, reduce the consequences of error and adapt the system to manage the risk. Following a review of current accident statistics in Canada, the report discusses the myth of 'pilot error' and describes 2 error taxonomies; presents the rationale for a 'human-centred' approach to cockpit and air traffic control automation; describes the importance of the socioeconomic environment with respect to economic regulatory reform and cabin safety; and presents the need for training in decision making and crew resource management to improve judgement and interpersonal relations. Specific recommendations are made to develop human factors and decision making training programs and to improve cabin safety and passenger awareness. Long term initiatives are suggested in information transfer problems, data collection methods, pilot and controller selection and training criteria, unique Canadian operations and shift work schedules.

## Humber River bacteriological study : a report

Gore & Storrie Limited. Toronto : Toronto Area Watershed Management Strategy Steering Committee, 1985. ix, 112 p. : ill., maps. Bibliogr. (Technical report ; no. 6)  
MICROLOG 90-05245 2 fiche

A bacteriological study was carried out in Humber River Basin as part of the Toronto Area Watershed Management Study to establish the bacteriological quality of the Humber River relative to applicable provincial water quality objectives and to identify the origins of fecal contamination in the Humber River. The study area included the main Humber River from Steeles Avenue to Lakeshore Boulevard and Black Creek from Lawrence Avenue to its confluence with the Humber River. There were 4 stations on Humber River and 2 stations on Black Creek. Ten dry weather surveys were carried out from September 12-October 25, 1983, including one Sunday sampling. Two wet weather events were monitored from October 3-4 and November 15-17, 1983. The bacteriological parameters monitored include fecal coliforms, fecal streptococci, Enterococci, E. coli and P. aeruginosa.

## Humber River bacteriological study : identification of faecal coliforms and faecal streptococci and verification of newer tests to determine human and non-human faeces

prepared for Ontario Ministry of the Environment ; by P. Seyfried and E. Harris, M. Young. Toronto : University of Toronto, Dept. of Microbiology, 1987. vii, 62 p. : maps. Bibliogr.  
MICROLOG 90-01240 1 fiche

A bacteriological study of the Humber River Basin within the Metropolitan Toronto boundaries was conducted during the fall of 1983 to assess the bacteriological water quality of the Humber River and Black Creek and to identify the origin of fecal contamination in both watercourses (human or non-human). Two newly developed media for the isolation and enumeration of E. coli (m-TEC-IG with indoxyl-B-D-glucoside) and enterococci (m-ME with indoxyl-B-D-glucoside) were tested under field conditions during the study. The specificity of the new media were assessed using data pertaining to the isolation and identification of 3,683 bacterial isolates taken from samples analyzed during the study. Information on the bacterial populations in the Humber River and Black Creek was studied to determine the

original sources of faecal contamination.

## A Hybrid III headform with a frangible facial insert

for the Road and Motor Vehicle Safety Branch of Transport Canada ; prepared by Tom J. Szabo, Brian M. Gallup and James A. Newman. Ottawa : Biokinetics and Associates Ltd., 1989. 83 p. : ill. Bibliogr.  
MICROLOG 90-04091 1 fiche

A headform was developed capable of monitoring for fractures of the principal facial bones on the regions of the nose (the zygoma and the maxilla), based on a GM Hybrid III headform with a methylmethacrylate insert representing the bones. Over the past 3 years, attempts to improve the overall suitability of the device have proven largely unsuccessful, due mainly to problems in the insert manufacturing process as well as deficiencies in the certification procedures. This study continued experimentation with the insert to both quantify, and where possible, rectify those noted deficiencies by testing each sub-component of the design as independently as possible, as well as by experimenting and testing the manufacturing and certification process. To evaluate further the device's applicability in automotive testing, destructive testing was carried out.

## Hydroacoustic herring survey results from Hecate Strait, December 7-18, 1988 : J.P. Tully cruise JPT88A

by B. McCarter, R. Kieser and D.E. Hay. Nanaimo, B.C. : Dept. of Fisheries and Oceans, Fisheries Research Branch, Pacific Biological Station, 1989. iv, 69 p. : maps. Bibliogr. (Canadian manuscript report of fisheries and aquatic sciences ; no. 2040) ISSN 0706-6473  
MICROLOG 90-02299 1 fiche

Continuation of the investigation into the feasibility of using hydroacoustic biomass estimates of Pacific herring for stock assessment. The survey also identified and confirmed sites where herring concentrate to overwinter prior to moving into shallower water for spawning. The identity of major hydroacoustic targets were determined by echogram interpretation, based on previous

winter acoustic and fishing surveys in 1984, 1985, and 1987. These herring estimates are compared with other independent stock estimates which are based on spawn surveys and analyses of catch and age structure. Information from this survey also contributes to the Hecate Strait Project in which the overall objective is to map fish assemblages and develop an ecological basis for mixed-species assessment and management techniques.

## Hydrochemical aspects of lakes and channels in the Mackenzie Delta, N.W.T.

by S.C. Bigras. Saskatoon, Sask. : Environment Canada, Hydrology Division, National Hydrology Research Institute, 1988. vi, 40 p. : ill. (NHRI contribution ; no. 88019) ISSN 0838-1992  
MICROLOG 90-05378 1 fiche

In recent years, the Mackenzie River basin has been undergoing extensive natural resource development through a series of mega-projects, including hydroelectric installations, pipeline construction, and facilities for exploration and extraction of hydrocarbons. This study was conducted as part of the Mackenzie Delta lake regimes study, to identify the potential environmental impacts river flow regulation could have on the hydrologic regime of lakes in the Delta. The analysis of over 200 snow, ice core and water samples collected prior to break-up, and at peak and low stage periods during 1982 and 1983 field seasons from 30 lake and channel sites throughout the Mackenzie Delta were used to ascertain if and how the hydrological processes controlling lake and channel water levels affect the water quality characteristics of Delta lakes and channels. Water quality parameters analyzed water temperature, conductivity, pH, turbidity and ionic concentrations of calcium and magnesium.

## Hydrogen peroxide contents in some marine foods

by S. Umamoto. Ottawa : National Research Council, Canada Institute for Scientific and Technical Information, 1989. 16 p. Bibliogr. (Canadian translation of fisheries and aquatic

sciences ; no. 5483) Originally published in Japanese, by the Tokai Regional Fisheries Research Laboratory in Japan. ISSN 0704-3716

MICROLOG 90-01679 1 fiche

In recent years, together with the carcinogenicity of hydrogen peroxide having been made an issue in Japan, regulations have been changed to indicate that prior to finishing an end food product, hydrogen peroxide must be decomposed or eliminated. To cope with this regulation tightening, the establishment of a method of analysis of trace hydrogen peroxide in foods was sought. This paper describes the modification of a method using an oxygen electrode which attained a higher recovery of added hydrogen peroxide by use of acidic extractant (pH 2.7) in place of neutral extractant adopted in the original method.

### Hydrographic measurements from C.S.S. Hudson Cruise 82-002

by R.M. Hendry. Dartmouth, N.S. : Bedford Institute of Oceanography, 1989. iv, 112 p. : ill. Bibliogr. (Canadian technical report of hydrography and ocean sciences ; no. 118) ISSN 0711-6774

MICROLOG 90-05159 2 fiche

Between April 11 and May 2, 1982, the CSS HUDSON occupied a line of hydrographic stations in the North Atlantic Ocean near 48N, running from the mouth of the English Channel to the Grand Banks of Newfoundland. This work was done to obtain a high quality set of measurements of temperature, salinity and associated chemical parameters as part of an international effort to provide a modern large-scale description of the North Atlantic Ocean, to quantify the ocean's role in the global climate system and to investigate possible long-term changes in ocean properties as a measure of interannual climate variability. This report discusses procedures followed in the collection and processing of the resulting conductivity-temperature-pressure (CTP) measurements and discrete measurements of salinity, dissolved oxygen and nutrients. Estimates of the accuracies of measurement for the various parameters are also discussed. Section figures of temperature, salinity, potential

density, dissolved oxygen and nutrients are included. Subsampled CTP data and derived parameters at standard levels and the entire discrete bottle data set and similar derived parameters are tabulated.

### Hypereutectic aluminum-silicon alloys produced by powder metallurgy techniques

by C.F. Dixon and H.M. Skelly. Ottawa : Canada Centre for Mineral and Energy Technology, Physical Metallurgy Research Laboratories, 1965. i, 20 p. : ill. Bibliogr. (Report ; PM-M 65-14)  
MICROLOG 90-04672 1 fiche

Three hypereutectic aluminum-silicon alloys containing 25%, 35% and 45% Si were prepared using powder metallurgy techniques. Pre-alloyed powders, produced by atomization of the molten alloys, were fabricated by hot pressing and extruding to give material with density close to theoretical. The main object of the investigation was to determine if atomization of the alloys would result in refinement of the primary silicon.

### Ice crushing by impact and indentation : a literature review

Ian Jordaan and Associates Inc. Ottawa : National Research Council, 1988. 126 p. : ill.  
MICROLOG 90-05210 2 fiche

The design of Arctic structures and vessels requires estimates of global and local ice forces involving an analysis of the extreme forces likely to be encountered. To achieve this, an understanding of how ice fails represents an important step. This report represents an initial stage of a program of research to investigate the mechanisms involved in the ice crushing part of the interaction of ice with structures or ships. The report covers ice mechanics; impact, indentation and penetration; ice indentation and impact; damage processes in ice; and the flow of crushed material.

### Ice data management systems

by B.F. Terry. Ottawa : Environmental Studies Research Funds, 1989. vi, 208 p. : ill., maps. (Environmental Studies Research Funds report ; no. 104) ISBN 0-921652-08-9  
MICROLOG 90-01183 3 fiche

Oil and gas companies engaged in exploration and production drilling off the coast of Newfoundland and Labrador must cope with the seasonal presence of pack ice and icebergs. This is done through ice data management. In late 1983, the 3 oil companies planning drilling programs in winter 1984 responded to a set of regulatory guidelines/directives regarding winter drilling on the Grand Banks by establishing a cooperative arrangement known as the Grand Banks Operators' Joint Ice Management Plan. In 1984 and 1985, the plan called for the establishment and operation of a central land-based ice data management system. This study analysed the 1985 system and future ice data management requirements.

### Ice thickness data, winter 1985-86

Ottawa : Environment Canada, Atmospheric Environment Service, Climatology and Applications, Ice Centre, 1986. vii, 80 p. : ill. Bilingual (Données sur l'épaisseur...). CSI 21214.004. ISSN 0835-4332 ISBN 0-662-56972-5  
MICROLOG 90-03164 1 fiche

Ice thickness data from freeze-up 1985 to break-up 1986, from 123 sites across Canada, including the Arctic areas. Data is based on weekly ice thickness measurements which begin as soon as the ice is thick enough to bear a person's weight and end in the spring when the ice becomes unsafe. In addition to ice thickness, the average depth of snow on the ice is included. Where freeze-up and break-up data is available, 2 dates are given marking the beginning and end of each process. Additional measurements are incorporated, giving the ice thicknesses taken along the St. Lawrence Seaway from the Lake Ontario entrance to Montreal. Data is given by station, listed alphabetically, and includes water type (salt, fresh) and location of measurement site.

### Icebreaker design synthesis analysis of contemporary icebreaker performance

by A.J. Keinonen, R.P. Browne, C. Revill ; for Transportation Development Centre, Policy and Coordination Group, Transport Canada. Calgary, Alta. : AKAC Inc., 1989. xvii, 160 p. : ill. Bibliogr.  
MICROLOG 90-05803 2 fiche

Seven major icebreakers were developed in support of oil and gas exploration and development in the Canadian Beaufort Sea during the late 1970s and early 1980s which depart in design considerably from any other icebreakers. Another ship incorporating innovative technology is the German ship, *Max Waldeck*. This report presents the results of an extensive evaluation of the Beaufort Sea icebreaker technology, enhanced with the *Max Waldeck* data. The captains of 5 of the Beaufort Sea icebreakers were interviewed to determine how the ships performed in their design mission roles. The full-scale data for the ships were analysed, and comparisons were made among their performances, with the results then used to determine the dependencies of performance on variations in design parameters. Performance estimation models were developed utilizing the results from the full-scale data analysis. The models included level ice, ridges, turning in ice, transit and open water.

### The Icelandic scallop off western Greenland

by S.A. Pedersen. Ottawa : National Research Council, Canada Institute for Scientific and Technical Information, 1987. 67 p. : ill. (Canadian translation of fisheries and aquatic sciences ; no. 5379) Originally published in Danish, by the Greenland Institute of Fisheries and Environment Research at Copenhagen, Denmark. ISSN 0704-3716  
MICROLOG 90-01638 1 fiche

Commercial Icelandic scallop fishing was started at Nuuk in the latter half of 1983, followed by a growing interest in increasing the scallop fishery effort in the area. As a result of reports issued in 1986 and 1987, there

appears to be a risk of overfishing. This led to a project in March 1987 to establish the degree to which the Icelandic scallop population has been affected by the fishery up to the present, and the reason, if any, to change the catch quota currently recommended. This report uses the March 1987 study and the new catch information based on the commercial fishery to answer these questions. The report also includes a summary of the biology of the Icelandic scallop.

### Identification of the necessary organizational and planning process requirements of the Fundy Trail Agency : final report

Malone Given Parsons Ltd. Fredericton : Study Steering Committee, 1989. 42 p. : ill. *Flow charts not filmed.* MICROLOG 90-01597 1 fiche

The concept of a Fundy Trail has been discussed for over 20 years and involves the establishment of a coastal route beginning in St. Stephen and continuing along the coast to Saint John and on to St. Martin's, Riverview/Moncton and the Nova Scotia border at Aulac. It is believed that this trail has the potential to become a major tourist destination in southern New Brunswick similar to the Cabot Trail in

Nova Scotia. This report describes the organizational structure required to oversee the planning and development of the trail and, in particular, the missing link section from St. Martin's to Fundy National Park. The report also proposes a planning process for the entire Fundy Trail as well as the missing link.

### Illustrations of fish pathogens in Hubei Province : section on Myxosporidia

edited by the Hubei Provincial Research Institute of Aquatic Biology, Ottawa : National Research Council, Canada Institute for Scientific and Technical Information, 1986. 153 p. : ill. Bibliogr. (Canadian translation of fisheries and aquatic sciences ; no. 5204) *Originally published in Chinese, by the Science Publishing House at Peking.* ISSN 0704-3716 MICROLOG 90-02705 2 fiche

Myxosporidians are parasites of fishes, amphibians and reptiles. More than 700 species have already been discovered, with the vast majority being parasitic in fishes.

Systematic surveys of the fish parasites occurring in Huama Lake in Hubei Province were carried out from 1959-60 and in 1962, leading to the discovery of 97 species of myxosporidians. This paper describes their morphology, life history and their relationship with the host fish. Descriptions of each of the 97 species are given.

# **Immobilization of grizzlies with ketamine-xylazine and morphometrics of the bears drugged in Kananaskis Country, Alberta**

by H.D. Carr. Edmonton : Alberta Forestry, Lands and Wildlife, Wildlife Management Branch, 1989. vii, 25 p. Bibliogr. (Wildlife research series ; no. 3a) ISBN 0-86499-665-9  
MICROLOG 90-06663 1 fiche

From 1980-84, a major investigation of grizzly bears was conducted in Kananaskis Country to obtain demographic and distributional information to assist in conservation of grizzlies in that developing outdoor recreation area about 50 km southwest of Calgary. For that investigation, it was necessary to capture, mark, and release as many study-area bears as possible. Because of their relative availability, cost, and safety and the absence of legal restrictions, a mixture of the drugs ketamine hydrochloride and xylazine hydrochloride was used to immobilize the bears for processing. This report analyzes the drugging and morphometric data collected, evaluates the performance of the ketamine-xylazine mixture for immobilization of grizzlies, and categorizes, evaluates, and summarizes the morphometric information collected.

# **L'impact de l'acidification des plans d'eau sur la valeur économique de la pêche récréative au Québec**

Luc Michaud Inc. Ottawa : Ministère des pêches et des océans, Direction de l'économie et de la coordination des programmes, 1989. 80 p. : cartes géogr. Bibliogr. (Rapport d'analyse économique et commerciale ; no 1) ISSN 0847-1185 ISBN 0-662-95357-6  
MICROLOG 90-03224 1 fiche

Cette étude touche uniquement le Québec pour l'année 1985. Un modèle économétrique fiable a été construit afin d'être capable de prédire les effets de l'acidification sur la demande en matière de pêche, exprimée en nombre de jours par zone de pêche. Les recherches ont permis d'estimer l'existence d'un lien très significatif entre la demande en matière de pêche et la production biologique des étendues d'eau exprimée par la formule de la biomasse (en grammes) par unité d'effort de prise. Durant cette étude, l'application de la méthode du coût de transport fut utilisée afin d'estimer la valeur économique liée à une réduction du nombre des journées de pêche'.

# **The Impact of acidification on the economic value of recreational fishing in eastern Canada**

Luc Michaud Inc. Ottawa : Dept. of Fisheries and Oceans, Economic and Commercial Analysis Directorate, 1989. xiii, 125 p. : maps. Bibliogr. (Economic and commercial analysis report ; no. 14) ISSN 0843-5626  
MICROLOG 90-03223 2 fiche

Recreational fishing is one of the most popular outdoor activities in Canada, with direct

spending by recreational fishermen generating significant economic activity. There is increasing recognition that acidic precipitation impairs the biological productivity of fish habitat, making game fish more scarce. This study follows a similar report conducted in Quebec using the travel cost method and including a biological variable in the econometric model. The model is based on the relationship, determined by biologists, between the acidity of a body of water and its biological production, measured in biomass per unit of fishing effort. The study included all of Eastern Canada (Ontario, Quebec, the Maritimes). The economic loss related to a decline in biological productivity is represented by a reduction in the number of fishing days and a decline in satisfaction of the remaining users. It is expressed in current dollars per year discounted over 50 years at an annual rate of 10%. The discount reference year is 1988. In total, 5 hypothetical scenarios are evaluated.

# **Impact of porcupine feeding damage on intensive forest management in the Prince Rupert Forest Region : problem analysis**

by T.P. Sullivan and C. Cheung. Victoria : Forest Resource Development Agreement,

1989. vi, 20 p. : ill. Bibliogr. (FRDA report ; 083) ISSN 0835-0752 ISBN 0-7726-0981-0 MICROLOG 90-01341 1 fiche

During the winter months, porcupines feed on the vascular tissues of pole-size (10-30 cm dbh) trees. Damage is particularly significant in the second-growth western hemlock-Sitka spruce forests of the North Coast and Kalum Forest districts. This analysis presents a synopsis of the general population biology of the porcupine, assesses the effectiveness and practicality of control strategies for porcupine populations and damage, assesses the impact of feeding damage on not satisfactorily restocked land, stand tending, and allowable annual cut; develops a conceptual forecast model to predict when and where outbreaks of porcupine damage will occur; and develops a plan of action with an assessment of alternatives to control porcupine damage in the Kalum and North Coast Forest districts.

#### Impact of steam additives on the productivity of the cyclic steam stimulation process

by L.L. McCorniston, V. Trocan and J.G. Boyd. Calgary, Alta. : Gulf Canada Resources Limited, 1988. x, 190 p. : ill. Bibliogr. CANMET contract: 79064-01-SQ MICROLOG 90-03384 3 fiche

The effects of alkalinity and steam additives on interfacial tension and oil recovery are impossible to recreate except in changing reservoir conditions induced by alkaline steam injection. This study determines the changes in production as a result of steam additives, the interfacial tension of produced and injected fluids with and without additives; the effect of steam additives on the emulsion formation tendency of boiler effluents and reservoir water, and the impact of alkaline boiler effluent reactions as well as steam additive adsorption or decomposition. Eight primary production wells drilled in 1986 at Pelican Lake project were selected and divided into 4 well pairs, one of which was steamed with additive. For each well, produced fluid (oil and water) samples were taken during the primary production phase (pre-steam). During steaming, samples of both steam generator, source water and boiler effluent (condensate) were taken, as well as any pre-flush/workover fluids. More frequent produced fluid sampling took place for the initial high water cut flowback, when some of the steam additive was expected to be produced back.

#### The Impact of the insecticide carbofuran (Furadan 480F) on the burrowing owl in Canada

by G.A. Fox...et al. Ottawa : Canadian Wildlife Service, 1989. x, 54 p. : ill., maps. Bibliogr. (Technical report series ; no. 72) ISSN 0831-6481 ISBN 0-662-17150-0 MICROLOG 90-06379 1 fiche

The Burrowing Owl is officially listed as a threatened species in Canada. Because of its limited range and specialized life habits, concerns were raised as to its vulnerability to insecticides used to control grasshopper infestations. In 1986 and 1987 research was undertaken to investigate the impact of operational grasshopper control on Burrowing Owl nesting in Saskatchewan. Three study areas (one predominantly rangeland and two heavily cultivated) were selected using the predicted severity of grasshopper infestation and known burrowing owl density. Active sites were located in May and early June, with repeated observations made at occupied burrows to determine nest success and brood size. Twenty-nine of the 30 sites studied in 1986 were revisited in 1987 to determine the number of pairs present. Landowners, land managers and rural municipalities provided details of their grasshopper control measures, including the date, location, and the agent applied.

#### Impacts d'un changement climatique sur les ressources naturelles du Québec

par B. Singh. Ottawa : Environnement Canada, 1988. 11, 11 p. : cartes géogr. (Sommaire du changement climatique ; SCC 88-08) Bilingue (The Implications of climate change.). ISSN 0835-3980 ISBN 0-662-56161-9 MICROLOG 90-01110 1 fiche

L'atmosphère terrestre subit de grands changements dans sa composition à l'échelle mondiale. Les activités humaines, comme le déboisement, l'utilisation des combustibles fossiles et, même, les opérations agricoles ont nettement accru la quantité de gaz carbonique et d'autres 'gaz de serre' de l'atmosphère. Il est de mieux en mieux établi du point de vue scientifique que l'accroissement de la concentration de ces gaz pourrait entraîner, au cours des prochaines décennies, une augmentation de la température moyenne mondiale supérieure à toute autre augmentation survenue depuis l'arrivée de l'homme sur terre. Ce numéro donne les résultats sommaires d'une étude portant sur les effets d'un changement climatique à long terme sur les ressources naturelles pour la province du Québec. Du fait de leur importance économique pour le Québec, trois secteurs y sont étudiés: l'énergie, l'agriculture et la foresterie.

#### Impacts of a change in the method of payment : a discussion paper

for the Agricultural Advisory Council, by Deloitte Haskins and Sells. Winnipeg : The Company, 1989. 25 p. : ill. MICROLOG 90-02352 1 fiche

The Agricultural Advisory Council was appointed in May 1989 to initiate and guide research on a variety of agricultural and agri-food issues. The first project involved an analysis of the impact of a potential change in the method of payment of the Crow benefit on Manitoba's economy. This discussion paper is the first of a series outlining the major findings of the research. This paper covers the cost to the farmer of maintaining the status quo; the concept of 'pay the producer' from the individual perspective, the impact on the farmer's decision making and on the grain handling and transportation system and processing sector, alternative Crow benefit payments; and the complexity of the proposal.

#### Impacts of a change in the method of payment : discussion paper no. 2

for the Agricultural Advisory Council ; by Deloitte Haskins and Sells. Winnipeg : The Company, 1989. 84 p. MICROLOG 90-02351 2 fiche

The Agricultural Advisory Council was appointed in May 1989 to initiate and guide research on a variety of agricultural and agri-food issues. The first project undertaken by the Council involved an analysis of the impact of a potential change in the method of payment of the Crow benefit on Manitoba's economy. A change in the method of payment of the Crow benefit to producers, rather than to the railways, as at present, would have significant long-term impacts on a wide variety of sectors within the agriculture and related industries in Manitoba. This study reviews 11 alternative methods of payment and analyzes their impacts. It also analyzes the production shifts which can be expected to occur at the primary level, including livestock production, under several different policy scenarios.

### Impacts of a change in the method of payment of the Crow benefit : discussion paper no. 3

prepared for the Agriculture Advisory Council ; prepared by Deloitte Haskins & Sells.  
Winnipeg : The Company, 1990. xi, 132 p.  
MICROLOG 90-04941 2 fiche

This report addresses the changes in the types and volumes of secondary processing which would occur as a result of changes in freight costs paid by the producer due to introducing the pay-the-producer method of payment. The processing industry is defined as the manufactured livestock feed and the food and beverage processing sectors. Each industry is examined to determine the likely direction and magnitude of change as a result of a change in the method of payment, with particular emphasis on livestock processing and oilseed crushing. The various industries are analyzed for volume and value of output market opportunities and constraints, existing and future capacities, and current employment levels under 2 policy options. The methodology includes a literature review, the formulation and testing of likely scenarios, and the analysis of the resulting information for the processing sector, the transportation and handling sector, rural communities, and the Canadian Wheat Board.

### Implementation of an integrated rock mechanics programme for cut and fill potash mining

by R.J. Beddoes, J.J. Streisel and B.V. Rouleston. Fredericton : Dept. of Natural Resources and Energy, Minerals and Energy Division, 1989. ix, 76 p. : ill., maps. Bibliogr. (Open file report : 89-48) ISSN 0712-4562  
MICROLOG 90-01600 1 fiche

Unique rock mechanics problems are presented by the steeply dipping and contorted potash ore body mined by the Potash Co. of America near Sussex, New Brunswick. This report presents the results of an integrated program of in situ measurements, laboratory testing and computer modelling for a solution to the problems presented. In situ measurements of deformation and pressure were begun in virgin ground excavations in the ore and in the major evaporite strata surrounding it, then expanded to include active mining areas. Strength and creep tests of evaporite core were carried out and finite element and finite difference computer models were calibrated against the virgin ground in situ measurements and then tested in real design simulations.

### The Implications for future urban growth of land fragmentation in urban fringe areas

Calgary, Alta. : Calgary Regional Planning Commission, Urban Planning Division, 1987. 2 v. : ill., maps. Bibliogr. Contents: Vol. 1 : *A Review of recent experience -- vol. 2 : Technical appendix : background working papers*  
MICROLOG 90-04191 4 fiche

Since the ratification of the Calgary Regional Plan in May of 1984, there have been a number of applications to re-subdivide 20-acre parcels in the urban fringe from hobby farm use to residential suburban development. This investigation analyzed the implications of such fragmentation urban fringe areas, which were intended as a mechanism to protect future long term growth options for urban municipalities. The study explores its impacts on an urban municipality's future expansion lands and the significance of these impacts. An extensive literature review was the first step, followed by a questionnaire survey of 39 urban municipalities across Canada. The survey was supplemented by personal interviews with professional planners working for selected municipalities in Ontario and Alberta. The information from the literature review, the questionnaire survey and the personal interviews with planning professionals were then reviewed and analyzed to identify relevant themes and issues.

#### The Implications of climate change for natural resources in Quebec

by B. Singh. Ottawa : Environment Canada, 1988. 11, 11 p. : maps. (Climate change digest ; CCD 88-08) *Bilingual (Impacts d'un changement...)*. ISSN 0835-3980 ISBN 0-662-56161-9  
MICROLOG 90-01110 1 fiche

Summary results of a study on the implications of long-term climate change for energy, agriculture and forestry in Quebec. In the energy sector, attention focused mainly on the hydro-electric power generating potential of the James Bay area and then on the projected interior space heating requirements in the southern part of the province. In the forestry sector, the potential for displacement of tree communities and potential changes in tree growth rates were examined. In the agriculture sector, the study focused on projected effects on agroclimatic resource potential and on crop productivity for grain and fodder corn, soybeans, potatoes, spring wheat, beans, sorghum, barley, oats, rape-seed and sun flowers, and orchard crops such as grapes and apples. When possible, preliminary economic impact assessments involving simple cost-benefit analyses were performed.

#### The Importance of a fixed crossing, over the Great Belt, for the fisheries in the Baltic -- Rev.

by H. Frost and H.P. Jorgensen. Ottawa : National Research Council, Canada Institute for Scientific and Technical Information, 1988. 26 p. (Canadian translation of fisheries and aquatic sciences ; no. 5304) *Originally published in Danish, by the Institute of Fisheries Economics, in Denmark.* ISSN

0704-3716  
MICROLOG 90-02087 1 fiche

In the debate over the establishment of a fixed crossing over the Great Belt, the environmental impact on the Baltic Sea has often been discussed. Research and economic calculations do not specifically assess the effects of such construction on pollution, ice conditions and fishing potentials because of the high degree of uncertainty. This report quantifies the potential influence on the cod fisheries of a fixed crossing, particularly in the reduction of the salinity and oxygen content of water flowing into the spawning basins of the Baltic Sea. The report also covers the economic effects on the cod and sprat fishery.

#### The Importance of by-catches for economic viability, raw material supply and employment in the food fish industry : an introduction

by H. Frost. Ottawa : National Research Council, Canada Institute for Scientific and Technical Information, 1987. 4 p. (Canadian translation of fisheries and aquatic sciences ; no. 5305) *Originally published in Danish.* ISSN 0704-3716  
MICROLOG 90-02086 1 fiche

The Danish fisheries sector is currently the largest in the European Common Market in total sales of fish and fishery products. Supply of fish is now a problem which has led to increasing imports. It is also important for employment that the processing industry has an even and stable supply of raw material for both food and industrial uses. The paper covers the limitations to continued growth, sales and employment in the fishing industry, raw material supply, economic conditions in the fishery, the importance of various vessel groups for raw material supply and employment, and landing seasons in the 6 largest ports. Only the summary and table of contents was translated.

#### The Importance of chemicals in controlling forest vegetation

Victoria : Ministry of Forests and Lands, Forest Service, 1987. 13 p.  
MICROLOG 90-04745 1 fiche

In forests, the greatest competition to crops of conifers comes from woody plants that grow rapidly in height, herbaceous plants that spread through underground stems, and coarse grasses. This report describes the methods of controlling such vegetation, gives the history of the use of chemical controls, and presents the direct and indirect effects of banning chemical controls.

#### The Importance of wildlife to Canadians in 1987 : highlights of a national survey

Federal-Provincial Task Force for the 1987 National Survey on the Importance of Wildlife to Canadians. Ottawa : Environment Canada,

Canadian Wildlife Service, 1989. 45 p. : ill. Bibliogr. French ed. (*L'importance de la faune...*) : 90-04861/1. ISBN 0-662-17074-1 MICROLOG 90-01703 1 fiche

The 1987 national survey on the importance of wildlife to Canadians was carried out by Statistics Canada under the sponsorship of the Federal-Provincial Wildlife Conference and the direction of the Canadian Wildlife Service, and updates the 1981 survey. The study questioned approximately 80,000 Canadians 15 years of age and over. This report presents highlights of the survey, covering participation, time spent, expenditures, attitudes towards wildlife, single- vs multiple-activity participation, fishing and trapping, and implications for conservation policies and programs. A glossary of terms is included. CA EV SC

#### An Improved airborne wind measurement technique for the NAE Twin Otter

by B.W. Leach and J.I. MacPherson. Ottawa : National Aeronautical Establishment, 1989. v, 39 p. : ill. Bibliogr. (Aeronautical note ; NAE-AN-61) MICROLOG 90-02002 1 fiche (Available on fiche only)

The NAE Twin Otter atmospheric research aircraft was first instrumented for air motion measurement in 1980 and has undergone continual instrumentation development since then. The recent acquisition of a Litton LTN-90-100 inertial reference system, supplemented by the existing Doppler velocity sensor and airborne Loran-C positioning receiver sparked an interest in developing an integrated navigation system approach. This report describes the hardware currently on board for both inertial navigation and air data sensing, and 3 relatively standard wind computation techniques currently implemented, with the fundamental limitations of each shown using flight data; provides details of a Kalman filter integrated navigation algorithm designed specifically for the navigation sensor configuration onboard the Twin Otter and demonstrates its expected accuracy; then summarizes the reasons for utilizing a Kalman filtering technique for airborne wind measurement, the results achieved to date using this approach and future plans for its implementation onboard the Twin Otter. • CA PS SC TR

#### Improved make-up air supply techniques : a report -- Rev.

Buchan, Lawton, Parent Ltd. Ottawa : Canada Mortgage and Housing Corporation, Research Division, 1989. 90 p. : ill. Bibliogr. MICROLOG 90-03774 2 fiche

Description of the development of an improved system to provide make-up air for combustion and ventilation purposes. The work was divided into development of evaluation criteria for make-up air inlets; examination and testing of existing make-up air devices and systems in light of the above criteria; and development, testing and monitoring of improved make-up air systems to better meet the criteria. CA PL PS SC

#### Improvement of the quality of retorted kamaboko, I : influence of heating conditions on the quality of kamaboko

by M. Yamazawa, M. Murase and I. Shiga. Ottawa : National Research Council, Canada Institute for Scientific and Technical Information, 1987. 14 p. : ill. Bibliogr. (Canadian translation of fisheries and aquatic sciences ; no. 5326) Originally published in Japanese, by Nihon Suisan Gakkai, in Japan. ISSN 0704-3716 MICROLOG 90-02101 1 fiche

The recent prohibition of AF-2 (2-(2-furyl)-3-(5-nitro-2-furyl) acrylamide) as a food preservative

for the food paste kamaboko required a new retorting procedure of the manufacturers. Kamaboko retorted by the conventional method is sometimes subject to such deteriorations as off-flavour, browning, and decrease of jelly strength. To improve these deteriorations, the influence of heating conditions on the quality of kamaboko was examined. • CA CF FI SC

#### Improvements to OPTSTOR program : summary report

MacLaren Plansearch Limited. Toronto : Environment Ontario, 1988. 12 p. ISBN 0-7729-4676-0 MICROLOG 90-01990 1 fiche

OPTSTOR was originally developed as a computer tool for determining cost-effective locations and volumes for storage in a surcharged sewer network requiring relief. Though successfully applied in analyzing the City of Edmonton sewer system, the program was limited or deficient in several respects. This report reviews the limitations/deficiencies and implements those improvements which were feasible. The upgraded program was then applied to a sewer system in the Town of Vaughan. EV ON PR PS SC

#### Improving health and safety in the pulp and paper industry : report

Provincial Inquiry into Health and Safety of Workers in the Pulp and Paper Industry (Ont.). Toronto : Ministry of Labour, 1990. 96 p. : ill. French ed. (*L'Amélioration de la santé...*) : 90-06758/2. CSI 55114.202. MICROLOG 90-06759 2 fiche

Identifies needs with respect to the health and safety of workers in the Pulp and Paper Industry and develops a sector specific action plan to address these needs. It addresses: a commonly accepted accident data base; training, research as it applies to health and safety; safety standards as they relate to preventative maintenance and operating procedures; hazard identification systems within the sector; the role, responsibilities, and effectiveness of joint health and safety committees; regulatory initiatives; and MOL role and inspection procedures. #### In Baffin land to study the narwhal *Monodon monoceras*

by G. Pilleri. Ottawa : National Research Council, Canada Institute for Scientific and Technical Information, 1985. 139 p. : ill. (Canadian translation of fisheries and aquatic sciences ; no. 5192) Originally published in German, by Verlag des Hirnanatomischen Instituts at Ostermundigen, Berne, Switzerland. ISSN 0704-3716 MICROLOG 90-00059 2 fiche

Though much has been written about the narwhal, our knowledge of its natural history is still full of gaps, particularly since it is not possible to maintain the animal in aquariums for prolonged periods. The narwhal generally lives north of the Polar Circle, and catch quotas are controlled by Canada and Greenland, but it is highly prized for its ivory tusk, making it a valuable animal economically. This report gives the author's impressions of Baffin Land and the Inuit, and presents an overview of the ecology and behaviour, migrations, feeding, palaeontology, special morphological characteristics, function and morphogenesis of the tusk, the fluke, and sonar sounds and fields. • CA CF FI LS SC

It indicates grade levels by broad categories, and particular suitability, and, where provided, it states price and ISBN for each item. The reviews fall into four categories, highly recommended, recommended, recommended with reservations and new this year, not recommended. ED MS PR

#### In situ burning of oil in experimental ice leads

by H.M. Brown and R.H. Goodman. Ottawa : Environmental Studies Research Funds ; Esso Resources Canada Limited, 1987. vi, 27 p. : ill. Bibliogr. (Environmental Studies Research Funds report ; no. 064) ISBN 0-920783-63-5 MICROLOG 90-06984 1 fiche

Oil-spill cleanup in Arctic waters poses unique problems because of the presence of ice and the remoteness of potential spill sites. This work investigates the removal by burning of spilled oil in leads. Twenty-five burns of weathered Norman Wells crude were carried out under varying wind conditions in leads cut in an ice sheet at the Esso Resources ice test basin in Calgary, Alberta in February 1986. The tests were designed to evaluate the effects of wind herding, oil weathering, oil thickness, lead geometry, and the presence of brash ice on burning efficiency. The size of the facility allowed burning experiments to be carried out at essentially full scale. • CA EN EV NO SC

#### In situ testing of the thermal performance of wall sections in N.W.T.

G.K. Yuill and Associates. Ottawa : Canada Mortgage and Housing Corporation, 1989. 42 p. : ill. Bibliogr. MICROLOG 90-05769 1 fiche

An evaluation of the thermal performance of composite wall sections in Arctic housing was carried out over the 1988/89 heating season in

Rankin Inlet, Northwest Territories. The project involved in situ testing in 4 housing units that were of different styles and constructed in different years to determine if significant reductions in the insulating value of otherwise physically sound composite wall sections have occurred as a result of wall degradation caused by exposure to the harsh Arctic environment. Performance testing included inspections using infrared thermography equipment and continuous monitoring using guarded hot box calorimetry instrumentation. CA EN NO PS SC

**In-situ feeder pipe gamma spectrometry in support of PNGS unit 3 decontamination**

by A. Husain. Toronto : Ontario Hydro, Research Division, 1990. iii, 17 p. (Report ; no. 89-256-K) MICROLOG 90-06032 1 fiche

A 3-step decontamination of Pickering Nuclear Generating Station Unit 3 was performed from June to August 1989 in preparation for its refueling. The first step, a CAN-DECON treatment, was applied in June following partial defuelling of the reactor core; the second step, an oxidizing dilute alkaline permanganate treatment and the final CAN-DECON step were successively applied in August 1989 after complete removal of fuel from the reactor core. Gamma spectrometry of various primary heat transport system components was performed in support of the decontamination. Included were scans of 2 outlet and 2 inlet feeder pipes located in the west feeder cabinet. A recently developed technique was used to convert measured counts into radioisotope activity. This report describes briefly the pipe source calibration procedures undertaken and interpretation of spectral results, assesses the validity of measured activities and briefly examines the significance of the data. ### Indian government : its meaning in practice

by F. Cassidy and R.L. Bish. Lantzville, B.C. : Olchichan Books. Halifax : Institute for Research on Public Policy, 1989. xxvii, 186 p. Bibliogr. ISBN 0-88982-095-3

MICROLOG 90-00929 3 fiche

This document provides an insight into the practical dynamics of First Nations government. It shows how First Nations government, as it is practised by Indian people in Indian communities, can be integrated in a practical manner with the Canadian constitutional, federal system. The focus is on one group of aboriginal peoples, the members of Canada's approximately 580 Indian bands, particularly those who are citizens of First Nations bands in Quebec, Ontario, Manitoba, Alberta, and British Columbia. In addition the focus is on one set of governing arrangements: band and tribal councils and closely associated groups.

### L'industrie canadienne du textile : étude des ressources humaines

Canada. Emploi et immigration Canada (Ministère). Direction des perspectives du marché du travail et analyse structurelle. Recherche et études spéciales. Ottawa : Emploi et immigration Canada, 1988. ix, 61, ix, 56 p. : ill. Bilingue (Canadian textiles industries...). MICROLOG 90-00780 2 fiche

L'étude des ressources humaines dans l'industrie textile et la bonneterie au Canada vise deux principaux objectifs: examiner l'incidence de l'évolution de la concurrence internationale sur l'industrie canadienne et, évaluer et prévoir les conséquences de cette évolution pour l'avenir de cette industrie au chapitre de l'emploi et des besoins en compétences. L'étude est fondée sur des entrevues avec des dirigeants d'entreprises textiles et de bonneterie. Le rapport porte sur quatre principaux thèmes: l'évolution de la concurrence et de la technologie dans l'industrie textile internationale; la performance et les marchés de l'industrie canadienne; les tendances du niveau et de la nature de l'emploi dans l'industrie; les conséquences de l'évolution de la technologie et de la concurrence pour l'éducation et la formation des employés actuels et futurs de l'industrie. Finalement, l'étude tire diverses conclusions concernant l'industrie canadienne du textile. CA LA

### L'industrie de l'accueil en Ontario : ses besoins en matière de ressources humaines et de formation

étude effectuée par Laventhol & Horwath Management Consultants pour le comité directeur. Toronto : Ministère de la formation

professionnelle ; Ministère du tourisme et des loisirs ; Ministère des collèges et universités, 1990. 151 p. : ill. L'éd. anglaise (Human resource and training...) : 90-07077/2. Sommaire (9, 2) inclus. CSI 55131.206F. ISBN 0-7729-6314-2 MICROLOG 90-07078 2 fiche

Cette étude sur les besoins en ressources humaines et en formation de l'industrie de l'accueil en Ontario est née des préoccupations de cette industrie concernant ses problèmes importants au plan de la main-d'oeuvre et les mesures à prendre pour y remédier. Pour aider l'industrie à résoudre ces difficultés, les ministères ontariens de la Formation professionnelle, du Tourisme et des Loisirs, et des Collèges et Universités, ont chargé une équipe de travail d'effectuer une étude ayant les objectifs suivants: déterminer l'état actuel de l'industrie de l'accueil en ce qui a trait à l'embauche d'un nombre suffisant d'employés qualifiés; évaluer la façon dont cette situation pourrait changer au cours des trois ou cinq prochaines années; et, déterminer les lacunes et les possibilités de remédier à toute pénurie de main-d'oeuvre qualifiée par le biais de programmes de formation ou d'autres mesures. Ce document présente un sommaire des besoins en matière de ressources humaines et de formation dans l'industrie de l'accueil en Ontario. CU LA ON PR ST

### L'industrie de la palette de manutention en bois au Québec : profil sectoriel

par A. Duquet. Québec : Gouvernement du Québec, Ministère de l'énergie et des ressources, Direction du développement industriel, Division des études industrielles, 1988. xix, 53 p. : ill. En tête du titre: Etude. ISBN 2-550-20176-0 MICROLOG 90-02799 1 fiche

Le profil sectoriel de l'industrie de la palette de manutention en bois présenté dans ce document a été établi à partir des renseignements fournis par toutes les entreprises de l'industrie en réponse à un questionnaire ou à l'occasion d'une rencontre avec l'auteur de l'étude. Les problèmes et les perspectives de développement sont abordés en même temps que la présentation des caractéristiques de cette industrie. Le répertoire des manufacturiers et le questionnaire sont reproduits en annexe. On considère comme faisant partie de l'industrie, les établissements spécialisés dans la fabrication de palettes de manutention en bois qu'on retrouve à la classification des activités économiques à la rubrique 'Industries des boîtes et palettes en bois'. Finalement, le document aborde les sujets suivants: les livraisons; la structure de l'industrie; les approvisionnements; l'utilisation de la capacité de production; les marchés; la main-d'oeuvre; et, la compétitivité et les performances financières. **L'Industrie laitière canadienne : l'intégration de la tradition et de la technologie**

Ottawa : Commission canadienne du lait ; Bureau laitier du Canada, 1989. 20 p. : ill.  
L'éd. anglaise (*The Canadian dairy industry...*) sur la même fiche. ISBN 0-662-95771-7  
MICROLOG 90-03254 1 fiche

La production laitière est l'une des activités agricoles les plus importantes du Canada puisqu'elle a généré au delà de 3,8 milliards de dollars en recettes monétaires agricoles pour les ventes de lait et de vaches laitières en 1988. Ce document se penche sur les points suivants: la production laitière; les produits laitiers; les responsabilités fédérales et provinciales; la salubrité et le contrôle de la qualité; la recherche et la technologie laitière; le Canada et le marché laitier mondial; et, la coopération.

**L'Industrie minière du Québec, 1988**

Québec (Province). Service de l'économie minière. Québec : Gouvernement du Québec, Ministère de l'énergie et des ressources, Direction des communications, 1989. 130 p. : cartes géogr. CSI 66110.004. ISSN 0822-1170 ISBN 2-550-19698-8  
MICROLOG 90-00740 2 fiche

Les expéditions minérales du Québec sont restées sensiblement au même niveau que l'année précédente pour atteindre 2,72 milliards de dollars. Les baisses constatées dans les métaux (argent et cuivre) et les matériaux de construction (ciment) ont été partiellement compensées par la bonne tenue des minéraux industriels et particulièrement de l'amiante. Ce document présente une synthèse de l'activité minière en 1988, puis traite de l'investissement minier, de sa fiscalité et de son financement. Les mémentos de la deuxième partie du

rapport précisent ces données pour chacune des substances produites au Québec.

#### L'inférence des taux marginaux d'impôt à partir des cours boursiers

par J.-M. Gagnon, J.-M. Suret et D. Morissette. Ottawa : Conseil économique du Canada, 1987. xi, 66 p. Bibliogr. (Document ; no 325) ISSN 0225-8021 MICROLOG 90-06650 1 fiche (Available on fiche only)

La fiscalité joue un rôle important en théorie financière. En effet, le principe de la maximisation de la valeur boursière des actions implique que le gestionnaire adapte ses politiques aux désirs des investisseurs et, par conséquent, tienne compte non seulement de l'impôt des sociétés mais également de celui des particuliers. Au début de chacune des sections, le document expose les modèles avant de les adapter à la fiscalité canadienne. Ensuite, il les applique à des données de ce pays, pour obtenir des estimations des taux d'impôt, dont les distributions de fréquence seront étudiées. Dans chaque cas, les modèles sont soumis à trois tests: la vraisemblance des estimations obtenues, leur stabilité et les différences entre les taux attribués à divers groupes de contribuables.

#### L'infertilité à l'heure de la procréatique, et la prévention?

par H. Bryant. Ottawa : Conseil consultatif canadien sur la situation de la femme, 1990. iii, 45 p. : ill. Bibliogr. (Document de référence ; DR 1989-3F) *L'éd. anglaise (The Infertility dilemma : reproductive...)* :

90-06116/1. ISBN 0-662-95853-5 MICROLOG 90-06117 1 fiche

Dans ce document de référence on examine d'abord les répercussions des nouvelles techniques de procréation mises en oeuvre pour traiter l'infertilité. Les approches préventives en matière d'infertilité, plus particulièrement leurs possibilités et leurs chances de réussite, sont ensuite examinées. Enfin, on fait le point sur les recherches qui s'imposent et sur les changements à apporter aux programmes sociaux pour pouvoir mettre l'accent sur les causes de l'infertilité plutôt que sur les remèdes à apporter.

#### Inflow/outflow model for net depletion of the Val Marie area

prepared by Charles Belhumeur ; submitted to Brian Yee. Regina : Environment Canada, Water Resources Branch, Saskatchewan District, 1989. iv, 26 p. : ill. Bibliogr. MICROLOG 90-02436 1 fiche

In Saskatchewan, the Val Marie portion of the Frenchman River basin contains 2 reservoirs (Huff Lake and Newton Lake), 5 irrigation canals and 2 significant tributaries (Denniel Creek and Denniel Creek East Tributary). Since the Frenchman River is an international stream, a close tally of water usage must be kept to determine natural flow at the international boundary and to properly apportion the flow. At present in the Val Marie area, a

complex system of flow, level, gate and pump stations is used to determine net depletion. This report examines the procedure and accuracy of net depletion calculations using the proposed system of stations.

**L'influence du type de poêle à bois sur le rendement**

par A.C.S. Hayden et R.W. Braaten. Ottawa : Centre canadien de la technologie des minéraux et de l'énergie, Laboratoires de recherche sur l'énergie, 1980. iii, 16 p. : ill. Bibliogr. (Rapport, ERP/ERL 80-46F(TR))  
Document présenté à la réunion annuelle du Canadian Wood Energy Institute.  
MICROLOG 90-06014 1 fiche

Le laboratoire canadien de recherche sur la combustion a mené une série d'expériences sur les appareils de chauffage au bois (poêles à bois) au moyen d'une méthode indirecte de perte de chaleur pour en mesurer les caractéristiques d'efficacité et de rendement. Un bon poêle à bois doit pouvoir fonctionner la plupart du temps à des niveaux d'air excédentaire et de température de fumée raisonnablement bas, sans émettre trop de produits de combustion incomplète. Des expériences ont été menées relativement à un

certain nombre de poêles à bois représentant les cinq types fondamentaux. Dans le texte qui suit, les résultats de ces expériences sont décrits et la relation entre la conception et le rendement discutée du double point de vue de l'efficacité et des émissions.

**Influence of axle group spacing on pavement damage**

by J.J. Hajek and A.C. Agarwal. Toronto : Ministry of Transportation, Research and Development Branch, 1989. iii, 25 p. : ill. Bibliogr.  
MICROLOG 90-02019 1 fiche

The extent to which structural pavement damage is caused by heavy vehicles depends on such loading characteristics as axle loads, axle group configuration and spacing, load contact pressure, dynamic loading effects, and on their interactions. This study evaluated the influence of axle spacing on damage caused to flexible pavements and determined maximum weights on dual and triple axles which would cause the same damage, axle per axle, as that caused by a single axle with the maximum legal load. The study is based on measured pavement response data obtained during the course of an RTAC study and on calculated pavement responses using the elastic layer theory.

**Influence of initial spacing on jack pine wood yield and quality : a literature review**

by F.W. Bell, W.D. Baker and R. Vassov. Thunder Bay, Ont. : Ministry of Natural Resources, Northwestern Ontario Forest Technology Development Unit, 1990. v, 26 p. : ill. Bibliogr. (Technical report ; no. 10)  
MICROLOG 90-07167 1 fiche

Regulation of stand density is one of the most effective methods for controlling the yield and quality of wood produced in plantations. There has recently been a three-fold increase in the number of hectares being planted to jack pine in northwestern Ontario, raising questions regarding the initial spacing regimes on the quantity and quality of wood produced. This paper reviews the current literature regarding the influence of initial density on jack pine yield and quality and provides a summary of initial spacings suggested in the literature for jack pine pulpwood and sawlog crops.

**Influence of theobromine on heat production and body temperatures in cold-exposed humans : a preliminary report**

by A.L. Vallerand, L.C.H. Wang and I. Jacobs. Downsview, Ont. : Defence and Civil Institute of Environmental Medicine, 1989. 31 p. : ill. (DCIEM research report ; no. 89-RR-50)  
MICROLOG 90-01828 1 fiche

One of the most successful class of drugs employed to enhance cold tolerance in animals appears to be the methylxanthines such as caffeine, theophylline and theobromine. These drugs increase heat production and delay hypothermia, thus improving cold tolerance. The influence of theobromine was investigated in 8 healthy young male subjects during 2 semi-nude exposures to cold air (3h, 7°C, 1 m/s wind speed). The ingestion of theobromine (7.5 mg/kg at min 0; double-blind placebo-controlled trial) produced 2 different types of responses.

## Information technology trends report, 1988

Toronto : Management Board of Cabinet, 1988.  
iv, 24 p. : ill. CSI 55100.201. ISBN  
0-7729-4650-7  
MICROLOG 90-02584 1 fiche

Overview of trends in information technology  
use throughout the Ontario government, their  
relationship to general industry trends, and  
highlights of the information technology  
innovations introduced in the Ontario  
government from 1985-87. Statistics on  
expenditures and other data were collected  
from all ministries and then consolidated to  
identify historical trends in spending, staffing  
and technology penetration. While some  
comparative information is presented on  
individual ministries, the report does not provide  
a detailed examination of trends at the ministry  
level. Data used was collected from individual  
ministries in 1987-88, and covers actual  
expenditures from 1985-86 and 1986-87, and  
estimated expenditures in 1987-88. The central  
data was collected following the completion of  
the 1986-87 fiscal year.

## Information, communication and dissemination of knowledge : example, Infotish -- Rev.

by S.O. Olsen. Ottawa : National Research  
Council, Canada Institute for Scientific and  
Technical Information, 1988. vi, 92 p.  
Bibliogr. (Canadian translation of fisheries  
and aquatic sciences ; no. 5247) Originally  
published in Norwegian, by the Research  
Institute of Fishing Technology, Norway.  
ISSN 0704-3716  
MICROLOG 90-02718 2 fiche

Report on different aspects of securing,  
processing and disseminating information,  
beginning with a theoretical survey of the  
building and evaluation of an information system  
using various approaches but emphasizing the  
system theory by which relations between  
structures and processes are studied  
simultaneously and at different levels. The  
different dimensions, units or variables, and the  
relations between them, are structured into a  
single model for the study of market  
information systems. This theoretical  
framework is utilized for a case study of a  
project for market information and advisory  
services for fish and fish products in Asia and  
the Pacific region. The project, named Infotish,  
was initiated to help the countries in this area  
to build up a market-oriented fishing industry.  
The study of Infotish was carried out over 2  
months at the Kuala Lumpur headquarters of  
the project. Interviews were held with project  
staff and 4 regional offices were visited.  
Interviews were also conducted with 7 users of  
the project.

## L'informatisation au quotidien : comportements et attitudes de la population canadienne face à l'informatique

par L. Deschênes. Laval, Québec :

Communications Canada, Centre canadien de  
recherche sur l'informatisation du travail,  
Direction de la recherche organisationnelle,  
1988. iv, 32 p. : ill. L'éd. anglaise  
(Computers in daily...) : 90-00685/1. ISBN  
0-662-95167-0  
MICROLOG 90-02845 1 fiche

Menée au printemps 1987, l'enquête CROP sur  
les attitudes et les comportements de la  
population canadienne face à l'informatique a  
d'abord permis d'établir qu'environ trois  
Canadiens sur dix utilisent aujourd'hui  
l'informatique dans l'une ou l'autre de leurs  
sphères d'activité. Alors que cette utilisation  
est surtout répandue au travail (17%), on la  
retrouve également présente dans le contexte  
domestique où elle rejoint 10% de la population.  
Le document se penche particulièrement sur  
l'utilisation de l'ordinateur, l'ordinateur au travail  
et l'ordinateur au foyer.

## L'informatisation du Québec : profil de la demande

par Alain Grisé ; en collaboration avec Lucie  
Noël et Luc Guay. Québec : Gouvernement du  
Québec, Ministère des communications, 1989.  
xvii, 206 p. : ill. Bibliogr. ISBN  
2-551-08466-0  
MICROLOG 90-04353 3 fiche

Ce rapport se veut une synthèse des  
principaux travaux (études de marché, rapports  
d'enquête, monographies, répertoires statistiques,  
etc.) réalisés depuis 1985 et portant sur les  
progrès de l'informatisation dans la société  
québécoise. Six grands secteurs y sont  
analysés: l'administration provinciale, les  
municipalités, le réseau de l'éducation, le  
réseau de la santé et des services sociaux,  
les entreprises et les ménages. Pour chaque  
secteur étudié, on a rassemblé des données  
d'ordre général sur la pénétration et l'utilisation  
de l'informatique: taux et rythme  
d'informatisation, nature et particularité des  
technologies en cause, dépenses et  
investissements en informatique, profil socio-  
démographique des utilisateurs, caractéristiques  
des équipements utilisés, comparaisons  
nationales et internationales, et stimulants et  
obstacles à l'informatisation. Ce rapport est un  
bilan qui fournit une première vision d'ensemble  
de l'évolution récente et des tendances actuelles  
de l'informatisation au Québec.

## L'informatisation et les emplois au cége Montmorency

par René Andrews et Antonin Tremblay ; avec  
la collaboration de Francine Rancourt. Laval,  
Québec : Ministère des communications,  
Centre canadien de recherche sur  
l'informatisation du travail, Direction de la  
recherche organisationnelle, 1988. vi, 127 p. :  
ill. L'éd. anglaise (Automation and jobs...) :  
90-04200/2. ISBN 0-662-95053-4  
MICROLOG 90-02846 2 fiche

L'objectif premier de la recherche effectuée au  
cége Montmorency par le CCRIT vise à  
déterminer l'incidence de l'informatisation sur les  
unités organisationnelles sélectionnées ainsi que  
sur les emplois au sein de ces unités. Pour  
ce faire, les quatre dimensions suivantes ont  
été considérées: les structures organisationnelles,  
le contenu des tâches, l'évaluation des emplois,  
et la rémunération. Les trois premières  
dimensions ont fait l'objet d'une analyse détaillée  
pour chacun des services sélectionnés. Les  
chapitres III à VI de ce rapport contiennent  
des renseignements sur chacune de ces  
dimensions. En ce qui a trait à la dimension  
intitulée rémunération, elle est traitée sous la  
forme de pistes ou d'hypothèses de recherche  
dans le chapitre VII.

**Infrared spectroscopic group analysis of solid aromatic multicomponent mixtures**

by H.H. Oelert. Ottawa : National Research Council, Canada Institute for Scientific and Technical Information, 1986. 35 p. : ill. Bibliogr. (Canadian translation of fisheries and aquatic sciences ; no. 5203) Originally published in German. ISSN 0704-3716 MICROLOG 90-02706 1 fiche

The methods of sample preparation for infrared spectroscopy of solids are discussed. A quantitative calculation of error as a function of sample homogeneity is described. Increments for determining structural groups in aromatic solids mixtures are calculated on the basis of infrared spectra of aromatic substances. A method of almost completely determining carbon distribution into various groups is described. The results obtained for three seam coals from the Ruhr region are used as examples of application

**Infrasonic enhancement of heat transfer : preliminary report**

by B.G. Woods. Toronto : Ontario Hydro, Research Division, 1989. 23 p. : ill. Bibliogr. (Report ; no. 89-230-K) MICROLOG 90-03526 1 fiche

Claims have been made that infrasound can be used to significantly reduce the electricity consumption in a convection heating process (up to 94% reduction) by enhancing the rate of heat transfer. In response to these claims, preliminary lab tests were performed to evaluate the electricity savings potential of infrasound

**Inhibitory and stimulatory effects of Cu, Cd, Zn, Hg, and Se on microbial production of methyl mercury in sediments**

by T.A. Jackson. Saskatoon, Sask. : Environment Canada, Ground Water Division, National Hydrology Research Institute, 1989. ii, 4 p. : ill. Bibliogr. (NHRI contribution ; no. 89033) Prepared for the Heavy Metals in the Environment international conference. ISSN 0838-1992 MICROLOG 90-06466 1 fiche

Micro-organisms in sediments vary widely in their requirements, limits of tolerance, and mutual interactions. The dominant species at any given time are those which are best adapted to the prevailing conditions, and a change in environment such as the introduction of a toxic pollutant may cause other, better adapted species to replace them, altering the character and activities of the microflora. This paper deals with effects of heavy metals and selenium on the microbial transformation of inorganic mercury (Hg) into methyl mercury (CH<sub>3</sub>Hg) in lake sediments. The paper treats the results of experimental study of effects of Cu, Cd, Zn, Hg, and Se on CH<sub>3</sub>Hg production in mud samples dredged from Clay Lake, Ontario, Tyrell Lake, Saskatchewan, and East Mynarski Lake, Manitoba in the Boreal forest zone of Canada.

**Initial environmental evaluation for the Mount Norquay ski area, 1988 development plan : final report**

by B. Beswick. Calgary, Alta. : Environment Canada, Canadian Parks Service, Western Region Office, Natural History Research Division, 1989. xi, 118 p. : ill. Bibliogr. MICROLOG 90-02394 2 fiche

Canadian Parks Service policy states that although no new ski areas were to be established in Canada's national parks, existing ski areas would be permitted to develop to the capacity of their legislated boundaries, with

environmental protection the main consideration. In June 1982, Banff Lifts Ltd. submitted a development plan for the Mount Norquay Ski Area. The most recent revision of the plan was submitted in September 1988. This initial environmental evaluation is a preliminary examination of the environmental considerations inherent in ski hill redevelopment and possible expansion. This report covers the project setting, the proposal, the existing environment and environmental impacts on climate, geology and landforms, soils, vegetation, hydrology and watershed, fish and wildlife, air quality, aesthetic resources, archaeological resources, people, recreation and land use, and hazardous natural phenomenon and public safety concerns; public consultation; and knowledge deficiencies.

**Innovation and intellectual property rights in Canada**

Ottawa : Science Council of Canada ; Industry, Science and Technology Canada ; Consumer and Corporate Affairs Canada, 1990. 39 p. : ill. Bibliogr. (Discussion paper) French ed (L'Innovation et la propriété...) on the same fiche. ISBN 0-662-17599-9 MICROLOG 90-05422 1 fiche

In 1988, a major survey was commissioned regarding intellectual property rights in Canada and reporting on the attitudes and practices of more than 700 Canadian companies with respect to Canada's intellectual property rights system. The company survey was supplemented with more than 110 interviews with industry associations and research institutes across Canada. This discussion paper summarizes the findings of the company survey and focuses on the particular situation of advanced-technology companies. It puts the survey findings in the broad context of industrial innovation and intellectual property policy and law, at both the domestic and international levels. Findings of the association interviews are used to supplement the survey where appropriate.

**Innovations dans les programmes scolaires et taux de rétention dans les écoles secondaires de l'Ontario des années 1920 aux années 1970 : un rapport à l'Étude sur le système d'éducation et les abandons scolaires en Ontario**

par R.M. Stamp. Toronto : Ministère de l'éducation, 1988. v, 102 p. Bibliogr. (Maintien des élèves à l'école et leur transition) ISSN 0839-5047 ISBN 0-7729-3799-0 MICROLOG 90-04309 2 fiche

Depuis le début des années 1920 jusqu'au début des années 1970, les écoles publiques de l'Ontario ont connu une augmentation du taux de rétention scolaire, qui s'explique par les modifications apportées aux programmes et aux divers facteurs sociaux externes. Cette étude montre qu'un nombre de plus en plus grand d'élèves fréquente les écoles secondaires publiques en Ontario et révèle un taux de persévérance scolaire de plus en plus grand. L'étude se penche sur la question en mettant l'accent sur les faits saillants entre les années 1920 et 1970.

#### Inorganic chemicals : prospects for Ontario's industrial minerals

prepared by Law, Sigurdson & Associates and SRI International. Toronto : Ministry of Northern Development and Mines, Mines and Minerals Division, Mineral Development and Lands Branch, 1989. 93 p. (Industrial mineral background paper ; 11) ISSN 0228-7811 ISBN 0-7729-6218-9  
MICROLOG 90-01859 1 fiche

Study to identify potential commercial opportunities for industrial minerals in Ontario that result from growing, or new, North American markets for derived inorganic chemicals. Such opportunities could include supplying provincial industrial minerals to the North American chemicals market as well as producing chemicals in Ontario from these raw materials. The study excluded fertilizer chemicals as well as products, such as surface-modified fillers, that do not undergo full chemical processing or transformation. The study scanned for commercial inorganic chemicals; rated approximately 200 chemicals for growth, technology change, and Ontario's position; selected 30 chemicals for detailed study; evaluated and selected potential opportunities which included examination of major industrial consumer segments; and conducted a detailed examination of the market factors involved in 5 chemicals selected as potential opportunities.

#### An Inquiry into textile tariffs, vol. 1 : report

Ottawa : Canadian International Trade Tribunal, 1990. xvii, 99, xvii, 111 p. : ill. Bibliogr. *Bilingual (Une Enquête...vol. 1...)*. ISBN 0-660-55687-1  
MICROLOG 90-04261 3 fiche

In 1989, the Tribunal was asked to conduct an investigation on how to reduce textile tariffs to levels which would be more in line with those of other industrialized countries. The recommendations produced apply to the portions of the textile industry which produce fibres, yarns, fabrics and certain specialty products, and which generally serve as input in the manufacture of other products. This report presents the results of that investigation after public hearings, plant visits and interviews with those involved in the textile industry. The report reviews the structure, performance, competitive factors and future directions of the textile and downstream industries, the international setting, concentrating on such factors as the MFA, VERs and the MTN; analyzes the tariff structures of Canada, the EEC, Japan and the U.S., then shows the actual tariff comparisons focusing in particular on differences in tariffs between Canada and the U.S.; describes the illustrative tariff options developed by the Tribunal staff; then sets out recommendations and the rationale underlying them.

#### Integrated retorting combustion system using fixed bed technology : final report

submitted to Monenco Consultants Ltd. Fredericton : New Brunswick Research and Productivity Council, 1987. 102 p. : ill. Bibliogr. *ESA shearer loaders range of application and operational results (89 p.) laid in. CANMET contract: 69108-01-SQ.*  
MICROLOG 90-00180 3 fiche

In this integrated system, the pyrolysis of oil shale known as retorting is carried out in a fixed bed reactor to produce liquid and gaseous fuels and a by-product spent shale. The heat of retorting is supplied by the flue gases from a circulating fluidized bed combustor operating on a mixture of spent shale and a high sulphur coal. The spent shale which has calcium and magnesium oxides act as a sulphur capture medium. Excess heat from the combustor could be used for steam raising and power generation. This report describes the results of an extended 48-hour run using the integrated system with Minto coal and Alberta county oil shale. Measurements were taken regularly to evaluate the performance and for the calculation of material and heat balances. The report gives details of the experimental work, results, discussions and recommendations for future work.

#### Integration of food crops, fisheries, and nutrition research in northeast Thailand : an extract from the proceedings of a workshop

by R.H. Young and A.K. Bernard. Ottawa : International Development Research Centre, 1989. 28 p. (Manuscript report ; 228e) MICROLOG 90-00248 1 fiche (Available on fiche only)

Although considerable advances have been made in upgrading the nutritional status of the rural population of Thailand, particularly through the government rural development program, deprivation and malnutrition continue to exist in the northeastern provinces. Several national and international programs have recognized this fact, but so far there has been little institutional collaboration or coherence between individual projects. To assist in catalyzing such coordination, a workshop was convened in Khon Kaen to articulate the various linkages between agriculture, fisheries and nutritional improvement; to determine requirements for additional knowledge and identify entry points for further research and training, and to formulate a program for collaborative, inter-institutional support for nutritional improvement. This report summarizes information given at the workshop on nutritional deficiencies and interventions, the agricultural situation, and the significance of the fisheries. Group

recommendations on research priorities are included also.

#### Interim report on dispersal of lobsters *Homarus americanus* tagged off southern Nova Scotia

by A. Campbell. Nanaimo, B.C. : Dept. of Fisheries and Oceans, Fisheries Research Branch, Pacific Biological Station, 1989. iv, 29 p. maps. Bibliogr. (Canadian manuscript report of fisheries and aquatic sciences ; no. 2022) ISSN 0706-6473  
MICROLOG 90-01066 1 fiche

The American lobster is one of the most valuable commercial species in the coastal waters of southern Nova Scotia. An understanding of their distribution and migration is therefore essential to management of the stock, yet little is known of their geographic discreteness. As part of an ongoing series of tagging studies of Nova Scotia lobsters, this study determined if there was lobster movement between the east and west side of the Cape Sable area, and the mid- and offshore areas, and whether lobsters make seasonal deep-shallow movements. Lobsters were tagged in the midshore and inshore

areas to take advantage of fishing effort occurring in offshore areas (more than 92 km from the coast), mid- and inshore areas in obtaining recoveries. A total of 9,254 lobsters ranging from 20-173 mm carapace length (CL) were tagged and released at 5 locations from 1983-87. A reward of up to \$5 was paid for tag returns with information on recapture date, location, depth and CL. Data from tag returns up to March 31, 1988 were analyzed in this study.

#### Interim report on the cost-effectiveness analysis of road weather information systems and enhancement project

IDON Corporation. Toronto : Ministry of Transportation, Research and Development Branch, 1988. iv, 28 p.  
MICROLOG 90-00782 1 fiche

The new system supplements existing off-line communication with video display terminals to provide timelier and more accurate weather information to Ministry road maintenance crews. The graphical displays are intended to improve maintenance decisions reducing the consumption of resources because of winter maintenance and adverse weather conditions. This report develops estimates of the cost-effectiveness of the system.

#### Internal biocorrosion of steel pipes : final report

by F.G. Ferris and B. Bramhill. Calgary, Alta. : Nova Husky Research Corporation, 1990. ix, 48 p. : ill. Bibliogr. CANMET contract: 99006-01-SQ.  
MICROLOG 90-05673 1 fiche

Evaluation of the effects of biocide dose on the development of corrosive microbial biofilms, corrosion rates, and deposition of corrosion deposits at an oilfield water injection field test facility near Wainwright, Alberta. Attached microbial populations were allowed to develop in 5 test lines during the first 4 weeks of operation during 2 separate experimental runs. Then biocide was injected for 10 weeks into 4 lines in paired combinations of 2 different concentrations and time intervals. A different cocodiamine-based biocide formulation was used in each experimental run. In both cases, the remaining test line was used as an untreated control. Ultraviolet irradiation was used to disinfect input water streams on 2 test lines under biocide treatment during the last 4 weeks of the first experimental run.

#### The Internal structure of ovicells in salmonidae and coregonidae and the taxonomic status of these groups of fishes

by V.N. Ivankov and N.I. Sergienko. Ottawa : National Research Council, Canada Institute for Scientific and Technical Information, 1985. 14 p. : ill. Bibliogr. (Canadian translation of fisheries and aquatic sciences ; no. 5134) Originally published in Russian, at Moscow,

USSR. ISSN 0704-3716  
MICROLOG 90-00111 1 fiche

At the present time, there are 2 views regarding the taxonomic status of whitefish: those who regard the group as a subfamily, Coregoninae, of the family Salmonidae; and those who regard it as an independent family. Various methods have been used to determine the taxonomic status of this group, including embryological, morphological, biochemical, genetic and paleontological. To this date, there is still no unified opinion on the matter. This paper is an attempt to determine the rank of the differences between the Salmonidae proper, and the Coregonidae, based on a study of the internal structure of oviducts at various stages of growth.

### Interpretation of deflection basin for real-world materials in flexible pavements

by F.W. Jung. Toronto : Ministry of Transportation, Research and Development Branch, 1990. 29 p. : ill. Bibliogr. MICROLOG 90-05539 1 fiche

The PROBE computer program was developed to calculate critical response parameters in the top layer and subgrade of flexible pavements, under the test load of a falling weight deflectometer. The Boussinesq hyperbola, which describes surface deflections from a single concentrated static load at a distance from the load axis, was used to compute subgrade moduli. This original PROBE program was tested on an experimental site north of Toronto. Two adjacent pavement sections of different strengths were built on the same uniform subgrade, but inconsistencies were discovered for the calculated subgrade moduli. This report describes both the original and the new PROBE programs.

### Interprovincial barriers to trade in agriculture and food products

interprovincial Conference of Ministers and Deputy Ministers of Agriculture (1989 : Prince Albert, Sask.). Ottawa : Canadian Intergovernmental Conference Secretariat, 1989. 4, 5 p. *Bilingual (Obstacles au commerce interprovincial...).* MICROLOG 90-02632 1 fiche

The movement of goods and services within Canada is hindered by both federal and provincial government measures, reducing the ability of Canadian industries to compete in global markets. At the 1988 Conference, a study was presented identifying 169 interprovincial trade barriers and examining ways of reducing them, with food standards identified as a priority issue. This paper refocuses the discussion on how the provincial and federal departments of agriculture should address the issue of interprovincial trade barriers in agricultural and food products. The paper describes the developments since the 1988 conference, discusses possible approaches, and sets out 3 recommendations.

### Intersection casualty accidents : trends, characteristics, persons involved, and consequences, British Columbia, 1985

by G.W. Mercer. Victoria : Ministry of Attorney General, Police Services Branch, CounterAttack Program, 1987. 21 p. Bibliogr. MICROLOG 90-03076 1 fiche

Traffic accidents where one road crosses another make up almost half of all traffic accidents that produce injury or death in B.C. In urban areas intersection casualty accidents comprise over half of all casualty accidents. In order to devise countermeasures aimed at reducing these accidents, it is necessary to know the characteristics of the accidents and of the drivers involved. This paper examines intersection casualty accidents in B.C. for their trends and patterns, time and conditions, vehicles involved, pre-collision and collision events, post-collision events and contributing factors, drivers and passengers, victims, and charges laid.

# The Intestinal tube absorption process with regard to shaped components : sumi powder, tubercle bacilli, blood corpuscle powder, carmine

by K. Kumagaya. Ottawa : National Research Council, Canada Institute for Scientific and Technical Information, 1988. 6 p. (Canadian translation of fisheries and aquatic sciences ; no. 5422) Originally published in Japanese. ISSN 0704-3716  
MICROLOG 90-01524 1 fiche

According to traditional general physiological principles, the absorption of substances by the muscles, stomach and intestinal tube takes place in liquids and dissolved substances. This is not necessarily always the case, since shaped bodies, such as tubercle bacilli are also absorbed by the digestive tube. There are extremely few histological studies explaining through what part of the intestines and by what process these tubercle bacilli achieve their penetration or by which route they enter the body. This study was undertaken to clarify these questions and to examine the process whereby sumi powder, carmine, and blood corpuscle powder are absorbed inside the digestive tube.

### **Inventaire des superficies cartographiées non régénérées**

par J.-Y. Perron et R. Rouleau. Québec : Gouvernement du Québec, Ministère de l'énergie et des ressources, Service de l'inventaire forestier, 1985. 23 p. : ill.  
MICROLOG 90-02510 1 fiche

Ce document présente une méthode d'inventaire relativement simple et rapide, permettant d'évaluer la proportion réelle des superficies non régénérées parmi les strates identifiées comme telles sur les cartes forestières produites dans le cadre du programme d'inventaire forestier. Cette méthode permet de quantifier et de localiser ces superficies non régénérées. Elle fut appliquée avec succès dans la région de Trois-Rivières.

### **Inventaire des terres fédérales de la division d'enregistrement d'Abitibi (84)**

Québec : Gouvernement du Québec, Ministère de l'énergie et des ressources, Service de l'intégrité du territoire, 1989. 212 p.  
MICROLOG 90-02988 5 fiche

Le Service de l'intégrité du territoire est chargé de mettre à jour et de refondre les rapports d'inventaire des terres fédérales des régions administratives sur la base des divisions d'enregistrement du Québec. Pour les terres fédérales de la Division d'enregistrement d'Abitibi, l'inventaire couvre la période allant jusqu'en octobre 1987. La compilation des données relatives aux terres fédérales a notamment pour objectifs de favoriser la connaissance du domaine public fédéral, la centralisation et l'accès aux documents pertinents, la diffusion de l'information régionale

et thématique, la vérification des conditions de cession des terres publiques québécoises au gouvernement du Canada ou aux organismes fédéraux.

### **Inventaire national des sources et des émissions de benzène, 1985**

par A.P. Jaques. Ottawa : Environnement Canada, Service de la protection de l'environnement, 1990. xii, 67 p. : ill. Bibliogr. (Rapport ; SPE 5/AP/1) L'édition anglaise (*National inventory of sources...*) : 90-04606/1.  
ISBN 0-662-95923-X  
MICROLOG 90-04605 1 fiche

L'objet du présent rapport est de résumer les estimations des émissions de benzène dans l'environnement en 1985. Les émissions ont été classées par source, secteur et province. On a effectué les calculs en se fondant sur des données d'échantillonnage, des facteurs d'émission établis pour les divers procédés examinés et des chiffres de production. Le document fournit un bref résumé des sources et utilisations du benzène et de ses effets sur la santé ainsi qu'une analyse et une description des tendances quant aux émissions de benzène.

### **Inventaire national des sources et des émissions de dioxyde de carbone, 1987**

par A.P. Jaques. Ottawa : Environnement Canada, Service de la protection de l'environnement, 1990. xvii, 40 p. : ill. Bibliogr. (Rapport ; SPE 5/AP/2) L'édition anglaise (*National inventory of sources...*) : 90-05430/1. ISBN 0-662-96161-7  
MICROLOG 90-05304 1 fiche

Les estimations des quantités de dioxyde de carbone libérées dans l'environnement sous forme d'émissions en 1987 sont résumées dans ce rapport. Les émissions ont été classifiées par source, secteur, province et type de combustible. Les estimations présentées sont fondées sur des données d'échantillonnage, des données sur la production et des équations stoechiométriques. Le rapport comprend un résumé concis des sources de dioxyde de carbone ainsi qu'une analyse détaillée des méthodes utilisées pour estimer les émissions.

### **Inventaire sommaire de petits boisés**

par C. Noel et R. Rouleau. Québec : Ministère de l'énergie et des ressources, Service de l'inventaire forestier, 1989. 59 p. : ill. ISBN 2-550-20179-5  
MICROLOG 90-02759 1 fiche

Ce document s'adresse à toute personne qui a un minimum de connaissances en foresterie et qui veut faire l'inventaire d'un boisé dont la superficie peut varier de 10 à 100 hectares. La méthode décrit d'une façon simple, le processus à suivre et les formules à employer pour produire une carte et les résultats correspondants. Cet inventaire est divisé en étapes bien distinctes soit: la carte de base, le plan de sondage, le sondage en forêt, la carte forestière, les compilations, et le rapport. Ces étapes sont expliquées une à une, de sorte qu'à la fin, l'utilisateur a en main une carte forestière et un rapport donnant les volumes de bois par strate (tous les peuplements de même identification) et pour l'ensemble du lot.

#### An Investigation into allegations of administrative favouritism by the Ministry of Forests to Doman Industries Ltd.

Victoria : Ombudsman of British Columbia, 1989. 41 p. (Public report ; no. 20)  
MICROLOG 90-00758 1 fiche

In April 1989 a complaint was received against Doman Industries, alleging the failure of the company to adhere to allowable annual cut (AAC) requirements as established; the lack of any penalty imposed by the Ministry even though firms in similar circumstances suffered a reduction in AAC; forestry trespass; and general concerns such as adequacy of silvicultural regeneration of harvested lands and an increase in the rate of harvest in an area deemed to be environmentally sensitive. This report presents the results of the investigation

following a review of the relevant files, interviews with various levels of resource and public officials up to the ministerial level, and senior officers of Doman Industries. The company's new log merchandising plant at Duke Point near Nanaimo was inspected, and a professional silviculture evaluation was carried out in August 1989.

#### Investigation of a practical method for measuring the surface area of metal powders

by C.F. Dixon. Ottawa : Canada Centre for Mineral and Energy Technology, Physical Metallurgy Research Laboratories, 1974. i, 18 p. : ill. Bibliogr. (Report ; PM-R 74-10)  
MICROLOG 90-04660 1 fiche

The surface area of metal powders is an important parameter in characterizing physical and metallurgical properties such as sinterability, compressibility, interparticle frictional forces, and green strength. The method normally used is the Brunauer, Emmett, and Teller (BET) gas adsorption method, but the analysis is time-consuming and the cost of the equipment is high. This investigation examined the feasibility of developing a simple and economical method of measuring surface area by depositing a thin, uniform coating of a known thickness of a suitable metal on all powder particles and calculating the area from the weight gain. Two iron powders were plated using a commercial, electroless nickel-plating solution and the areas of the powders were calculated.

#### Investigation of calcium magnesium acetate (CMA) and sodium formate (NaFo) for use as a de-icer at Transport Canada airports

prepared by G.B. Hamilton...et al. ; for Transportation Development Centre, Policy and Coordination Group, and Airports Authority Group, Transport Canada. Ottawa : Sypher/Mueller, 1989. xx, 118 p. : ill. Bibliogr. MICROLOG 90-05795 2 fiche

Recent concern over the impact of urea on the surrounding environment, when used as a de-icer, has resulted in the search for a de-icer with less severe environmental impact. This report reviews past and current R&D relating to calcium magnesium acetate (CMA). Sodium formate was later added to the study as this chemical shows potential for highways. The urea, CMA and sodium formate knowledge base was analyzed to determine research gaps requiring further investigation before adopting widespread use of CMA or sodium formate in an airport environment. Areas of investigation included aircraft materials compatibility; operational effectiveness; environmental impact; airport runway materials compatibility; cost/benefit; and technical specifications.

#### An Investigation of the transfer of monopulse tracking between two coherent point sources

by S. Charland. Ottawa : Defence Research Establishment Ottawa, 1989. ix, 27 p. : ill. Bibliogr. (Technical note ; no. 89-15)  
MICROLOG 90-01801 1 fiche

Investigation dealing with the effects of phase and amplitude differences between 2 coherent point source radiators on the tracking behaviour of a monopulse radar. The tracking function of the radar is modelled in a single plane containing 2 point sources located at a finite distance from the radar antenna. The complex illumination of the antenna aperture by the point sources and the resulting monopulse sum and difference antenna responses are derived, including the effects of finite range. The monopulse discriminator characteristic is formed using the antenna responses. A set of calibration curves are presented which show the transfer of the tracking point of the radar from one source to the other as the phase and amplitude differences between the sources vary.  
CA EX PS SC TE

#### Investigation of the use of porous membranes for the treatment of crude oil emulsions : final report

Zenon Environmental Enterprises, Ltd. Burlington, Ont. : The Corporation, 1989. ii, 86 p. : ill. Bibliogr. CANMET contract: 79169-01-SQ  
MICROLOG 90-03963 1 fiche

Assessment of the technical feasibility of treating water-in-oil emulsions from in-situ bitumen/heavy oil recovery operations using porous membranes. The treatment removes water from the oil to meet pipeline specifications for water in oil of 0.5%. This study evaluated the feasibility of the oil permeation process, in which oil is driven through the membrane by the applied pressure and the oleophilic nature of the membrane material while the water in the emulsion is retained and concentrated on the feed side of the membrane because of the size of the water droplets and the hydrophobic nature of the membrane material. The second process evaluated was a water permeation process which destabilized the water-in-oil emulsion by removal of the salts and surfactants which stabilize the emulsion. Water and caustic were added to the water-in-oil emulsion to produce an oil-in-water emulsion and then the water together with the extracted salts and surfactant is removed by porous membrane filtration.

**Investigations by the Geological Survey of Canada in Manitoba and Saskatchewan during the 1984-89 Mineral Development Agreements**

compiled by A.G. Galley. Ottawa : Energy, Mines and Resources Canada, Geological Survey of Canada, 1989. 194 p. : ill., maps. Bibliogr. (Open file ; 2133)

MICROLOG 90-02342 3 fiche

In early 1984 the federal cabinet and those of Manitoba and Saskatchewan approved 2 separate mineral development agreements as a cost-sharing arrangement to establish a framework for implementation of programs to strengthen and diversify the mineral resource base of the provincial economies; to increase mineral exploration and the development of mineral resources in the provinces; and to assist in a more effective assessment and utilization of the provinces' mineral resources. Programs were divided into geoscientific studies, mining and mineral technology R&D, development and marketing studies, and public information, evaluation and administration. The projects covered by this summary volume were from the geoscientific studies program, which concentrated in the Precambrian Shield and along the Shield margin. It included airborne vertical gradient and total field magnetometer surveys, an airborne electromagnetic survey, lake sediment and water surveys, and re-analysis of older regional survey samples and detailed follow-up surveys over certain greenstone belts.

**IRRIGATE : user guide for irrigation management by computer**

by J.B. Boisvert...et al. Ottawa : Agriculture Canada, Research Branch, 1990. 65 p. (Technical bulletin ; 1990-2E) (LRRC contribution ; no. 87-39) *French ed* (*IRRIGUE : manuel...*) : 90-04233/1. ISBN

0-662-17492-5

MICROLOG 90-04232 1 fiche

Guide to IRRIGATE, software for the BASIC microcomputer version of a soil moisture model. This version was primarily written for the daily management of water in irrigation and is considered a complementary tool to assist in judging the severity and the frequency of stress during the growing season. It can estimate the number of days before an irrigation is required, provide estimates of the soilwater status within the whole profile and the water deficit in the root zone, and can take into account many fields each having a specific crop and soil, irrigated or not.

**Irrigation pumping plant evaluation : interim report**

by D.L. Van Hooren. Guelph, Ont. : Agricultural Energy Centre, 1989. 13 p. (Report ; no. 89-2301)

MICROLOG 90-03938 1 fiche

In June and July 1987, tests were conducted at 15 farm sites that were applying water to tobacco crops. Each irrigation system monitored was usually unique, including the distance between the water source and the discharge and the method of application and rate of discharge. Because of these differences, the fuel efficiency of each pumping plant was calculated from the relationship between the useful work produced by the pump (output water power, kW) and the amount of fuel consumed (input power). Potential fuel savings resulting from switching fuel sources was also investigated. Equivalent fuel energy values were used to determine the fuel consumption of a proposed fuel source that was then compared against the fuel consumption of the present source.

prepared for the Federal Environmental Assessment Review Office, by LURA Group. Toronto : The Group, 1989. iii, 33 p. Bibliogr.  
MICROLOG 90-02840 1 fiche

The Environmental Assessment Panel has been directed to undertake a public review of the economic, social and environmental effects of Transport Canada's proposed medium- and long-term measures to address the problem of increasing air traffic at the Lester B. Pearson International Airport. Medium-term measures include the expansion of runway capacity to resolve the present congestion and to ensure the efficiency of airport use until the end of the century. Long-term measures involve determining the ultimate capacity of the airport and identifying the role that other airports in southern Ontario could play in accommodating the aviation needs of the Toronto area. The alternatives and issues related to these proposed measures are covered in this paper in a generic sense.

**The Kaminak Lake alkaline intrusion : final report**

by P.A. Cavell and H. Baadsgaard. Yellowknife : Indian and Northern Affairs Canada, Geology Division, 1989. 23 p. : maps. Bibliogr. *Fold. map not filmed.*  
MICROLOG 90-01954 1 fiche

The Kaminak Lake intrusion is a small pluton of alkaline, silica-undersaturated rocks with associated carbonatite dykes and lenses in the District of Keewatin, Northwest Territories. This study focused on the radioisotope systematics of the rocks to determine an accurate and precise age and to characterize

the magma source(s). Field work in 1988 involved the collection of a comprehensive and representative suite of samples from the alkaline intrusion; a range of metavolcanic rocks of various compositions and several of sample size likely to yield zircons for U-Pb geochronology; granitoid intrusive rocks covering the entire range in compositions and from different locations and thus possibly representing different times of intrusion. The field work and later laboratory studies also assessed the possible enrichment of gold or other rare metals in the rock.

**Kaministiquia River : acute lethality and chlorophenol bioconcentration in fish exposed downstream of a combination groundwood sulfate and bleached kraft mill effluent**

by K. Flood...et al. Toronto : Environment Ontario, 1989. x, 75 p. : ill. Bibliogr. ISBN 0-7729-5453-4  
MICROLOG 90-05170 1 fiche

Two fish bioassay assessments were carried out in August 1985 and 1986 in the Kaministiquia (Kaministiquia) River downstream of Great Lakes Forest Products. The studies were carried out as part of the MISA pilot site project on the lower Kaministiquia River to assess the effects of a large pulp and paper mill complex on water quality in a riverine setting and to provide an update on potential effects of the mill on the river fishery for the region to use in future control order negotiations with Great Lakes Forest Products. A dissolved oxygen survey was also undertaken by the region in 1987 and some of those findings are included in this report. During the study, fish were exposed in cages at various sites in the river to measure acute lethality downstream of the mill. Chemistry analyses of the river and mill effluents for contaminants and laboratory bioassays of the effluent were undertaken in support of the field study. Upon completion of the work, fish surviving the field exposure were sacrificed and analyzed for chlorophenols.

This report summarizes progress to date in the implementation of the Kananaskis Country sub-regional integrated resource plan, approved March 1986. This is the first annual review to be completed since its approval and covers 1986-87. The report identifies completed projects and in-process projects and provides direction for the coming year. Projects are documented by management intent, results

expected, results achieved and anticipated activities. Resource areas include ecological, natural and cultural resources; fisheries; interpretation and environmental education; recreation and tourism; range resources; research; timber resources, water resources; land use, wildlife; and transportation.

#### Kelly Lake Substation to Cheekye Substation : a second 500 kV transmission line : prospectus

Vancouver, B.C. : B.C. Hydro, External Relations Dept., 1989. 10 p. : maps. ISBN 0-7726-0968-3  
MICROLOG 90-00638 1 fiche

Recent forecasts of electrical demand in the Lower Mainland and on Vancouver Island, combined with engineering studies of the electrical transmission system, have identified a potential requirement for new transmission in the mid-1990s. This prospectus outlines B.C. Hydro's studies for a second 500kV transmission line between Kelly Lake Substation near Clinton and Cheekye Substation near Squamish. The prospectus includes a brief description of the project and a schedule for meeting an in-service date as early as the fall of 1995, a summary of the rationale for carrying out studies for a second Kelly Lake to Cheekye 500kV line; and an outline of the studies planned to determine a route for the line, including a comprehensive public consultation program.

#### Laboratory evaluation of recycled hot mixes, vol. 2 : moisture susceptibility and strength characteristics

by P.E. Joseph, K.K. Tam and D.F. Lynch.  
Toronto : Ministry of Transportation, Engineering Materials Office, 1989. 33 p. : ill. Bibliogr. (Report ; EM-89) ISBN 0-7729-5894-7  
MICROLOG 90-00427 1 fiche

To follow up the field investigation on the performance of recycled asphaltic concrete pavements (RAP), a material characterization study was undertaken to evaluate in the laboratory the moisture susceptibility and strength characteristics of recycled hot mixes containing various amounts of RAP materials in comparison to a virgin mix. It was also considered important to carry out an objective comparative study to gain better understanding of the effect of factors such as recycling ratio, and rejuvenating agent aggregates. The study also examines the feasibility of using shear strength criterion to supplement Marshall test, as there have been concerns with adequacy of mixtures designed according to Marshall method to withstand heavy traffic loads in heat.

#### Laboratory evaluation of recycled hot mixes, vol. 3 : fatigue resistance to dynamic loading

by P.E. Joseph, K.K. Tam and D.F. Lynch.  
Toronto : Ministry of Transportation, Engineering Materials Office, 1989. 31 p. : ill. Bibliogr. (Report ; EM-90) ISBN 0-7729-5895-5  
MICROLOG 90-00428 1 fiche

Summary of the findings of a study on the evaluation and comparison of the flexural fatigue characteristics of recycled hot mixes and conventional mix. Mixtures with different recycling ratios from 5 projects in Ontario were evaluated using the flexural fatigue test method. The test was carried out at 21C under controlled strain mode, and a haversine wave loading of 0.1 s duration and a 0.4 s rest period was used to simulate the effect of traffic loading. The test results were presented as plots of strain E versus the number of cycles to failure, and the estimates of fatigue coefficients were obtained from these graphs.

#### Laboratory methods for testing peat : Ontario Peatland Inventory Project

by J.L. Riley. Toronto : Ministry of Northern Development and Mines, Mines and Minerals Division, 1989. viii, 51 p. : ill. Bibliogr. (Ontario Geological Survey miscellaneous paper ; 145) ISSN 0704-2752 ISBN 0-7729-6000-3  
MICROLOG 90-01874 1 fiche

This inventory of the peat and peatland resources of Ontario was intended to provide information on possible fuel peat deposits as a means of encouraging increased energy self-sufficiency, as well as information on the resources of horticultural peat in the province. The inventory undertook laboratory analyses of over 1700 peat samples collected during the studies, the analysis of which entailed the development and standardization of required laboratory methods, and the assessment of the precision and accuracy of the reported data. This report details the specific laboratory methods which were used, and evaluates the results of internal and blind quality control tests. It also reports the results of several tests of particular methods, and suggests the precision levels from the use of these techniques.

#### Labour market developments in the 1980s -- Rev.

by K. Kerr. Ottawa : Library of Parliament, Research Branch, 1989. 14 p. Bibliogr. (Current issue review ; 89-1E) French ed. (Le Marché du travail...) on the same fiche. ISBN 0-660-13322-9  
MICROLOG 90-01844 1 fiche

Recent estimates suggest that more than four million people secure employment each year, while a similar number become unemployed or leave the labour market. Conditions in this market throughout the 1980s have been influenced by a number of factors, chief among which are the 1981-82 recession, the disproportionate growth in regional employment during the recovery and an increase in the incidence of long duration unemployment. These, and other trends which have developed since the beginning of the decade, are the subject of this review.

**Lake dynamics and the effects of flooding on total phosphorus**

by B.C. Kenney. Saskatoon, Sask. : Environment Canada, Ground Water Division, National Hydrology Research Institute, 1990. 8 p. : ill. Bibliogr. (NHRI contribution ; no. 89016) In Canadian Journal of Fisheries and Aquatic Sciences : vol. 47, no. 3, 1990 ISSN 0838-1992  
MICROLOG 90-06491 1 fiche

This paper models the dynamics of total phosphorus in lakes as a first-order linear system with time dependent coefficients. The model has one source term for phosphorus, the total inflow to the lake. Two sink terms remove phosphorus from the model lake, the outflow from the lake, and sedimentation to the lake bottom. The forced response of the model is calculated using 16 years of published inflow data from Lake Washington as input. Results are compared with the measured response for Lake Washington following sewage diversion from the lake.

**Lake hydrology studies in the Mackenzie Delta, N.W.T.**

by P. Marsh and S.C. Bigras. Saskatoon, Sask. : Environment Canada, Ground Water Division, National Hydrology Research Institute, 1988. 7 p. : ill. Bibliogr. (NHRI contribution ; no. 88032) Prepared for the 17th Canadian Hydrology Symposium. ISSN 0838-1992  
MICROLOG 90-06473 1 fiche

In the late 1970s, B.C. Hydro proposed the development of 2 hydroelectric dams on the Liard River. It was soon realized that the resulting changes in the hydrologic regime of the Liard River could be wide ranging and might even affect the Mackenzie Delta, 1700 km downstream. In light of these environmental concerns, a study of lake hydrology in the Mackenzie Delta was initiated in 1980 to improve the understanding of the hydrological processes controlling lake levels. This paper describes the research undertaken and the results obtained.

**Lake neutralization experiments in Ontario, 1981-87 : summary of phase 1**

by D.P. Dodge...et al. Toronto : Environment Ontario ; Ministry of Natural Resources, 1988. 39 p. : ill. Bibliogr. ISBN 0-7729-4429-X  
MICROLOG 90-01113 1 fiche

In July 1981, a 5-year investigation of the feasibility of using neutralization to protect Ontario lakes that are in danger of acidification and rehabilitate lakes already acidified was announced. One of the initial objectives of the program was to test the feasibility of whole-lake liming to rehabilitate an acidified lake. Because of the importance of lake trout as a sport fish in Ontario and the sensitivity of lake trout to acidification, the study concentrated initially on rehabilitating a lake trout fishery. One acidic lake, Bowland Lake, and 2 lakes sensitive to acidification, Trout and Miskokway Lakes, were

selected for intensive studies. A 4th lake (Fowke Lake) with a self-reproducing native lake trout population was chosen as a non-acidic control lake for bioassay experiments. A moderately acidic lake, Laundrie Lake, was chosen for shoal liming experiments (site-specific neutralization). Field work began in the spring of 1982 with the neutralizing of Bowland Lake in August 1983 and Trout Lake in May 1984. This report provides a summary of the results.

#### Land use planning for housing : a statement of Ontario Government policy issued under the authority of section 3 of the Planning Act, 1983

Toronto : Ministry of Housing ; Ministry of Municipal Affairs, 1989. 13, 14 p. Bilingual (Aménagement du territoire...). At head of title: The Planning Act : policy statement. MICROLOG 90-05006 1 fiche

Policy statement addressing the relationship between housing and the land use planning process. The statement covers the supply of land for residential development; the land use planning approval process, land use standards which regulate the range of housing types which can be provided; and the effective use of existing building stock and previously developed land for new housing. The statement describes how these housing issues are to be addressed by planning jurisdictions in Ontario using the authority under the Planning Act, including official plan policy, zoning provisions, and the development appeals process.

#### Language and literacy problems in Alberta's labour force

by M.D. Harvey. Edmonton : Alberta Community and Occupational Health, Occupational Health and Safety Division, Research Branch, 1987. vii, 52 p. Bibliogr. CSI 36016.201.  
MICROLOG 90-05865 1 fiche

Questions arise periodically regarding the effects of language difficulties on the health and safety of workers. Problems may be experienced by persons whose native language is not the language of the workplace, and by persons who are illiterate. The basic issue is whether or not persons in these two categories are adequately informed regarding health and safety at work. The purpose of this report is to present statistics which will indicate the degree to which language and literacy problems may exist in the Alberta workplace. The principal source of this information is the 1981 Canada Census.

#### The Language of pain : perspectives on behaviour management

Downsview, Ont. : G. Allan Roeher Institute, 1988. 180 p. Bibliogr. French ed. (Un Discours douloureux...). : 90-03796/3. ISBN 0-920121-36-5  
MICROLOG 90-03795 2 fiche (Available on fiche only)

This collection of articles looks at how aversive techniques are used as a form of 'therapy' for people with mental handicaps, who present what

are known as 'challenging behaviours'. The work includes the views of a number of specialists (doctors, lawyers, psychologists) who argue that the use of aversive procedures to alter human behaviour is not only socially, ethically, legally and scientifically untenable; it is also unjust.

**Laws governing the dynamics of the  
population size of chum in the basin  
of the Kamchatka River**

by E.T. Nikolaeva. Ottawa : National Research Council, Canada Institute for Scientific and Technical Information, 1989. 19 p. : ill. (Canadian translation of fisheries and aquatic sciences ; no. 5463) *Originally published in Russian.* ISSN 0704-3716  
MICROLOG 90-00603 1 fiche

Study undertaken to improve the estimates of the chum stock, a species of salmon which after pink salmon is next in commercial and economic importance in the Far East, including Kamchatka. Taking as an example the large commercial population of chum in the basin of the Kamchatka River, the study aimed at establishing the basic laws that govern the dynamics of the stock and, using this information, at developing a methodology of long-term forecasting and a set of recommendations for a rational exploitation of the stock. The study uses Japanese and Soviet data on the Kamchatka River chum caught in the sea (1952-76) and at the coast (1937-86), and the numbers of spawners at the spawning grounds (1945-86). Biosamples were taken in the fishing season every year, starting in 1945, and the age composition of the catch taken from the sea and from the spawning grounds was compared with that of the fishes caught in the coastal zone.

nitrogen compounds from fish stored  
in ice**

by E. Langmyhr, G. Tertnes and F. Iversen. Ottawa : National Research Council, Canada Institute for Scientific and Technical Information, 1988. 34 p. : ill. Bibliogr. (Canadian translation of fisheries and aquatic sciences ; no. 5336) *Originally published in Norwegian, by the Fisheries Directorate, at Bergen, Norway.* ISSN 0704-3716  
MICROLOG 90-01471 1 fiche

Water soluble compounds in fish leach into the melt water when fish is stored in ice and into the sea water when it is stored in RSW. This experiment studied leaching in ice through collection of the melt water. The experiment used coalfish caught in April 1983. The coalfish were used whole, blood-drained and gutted and deheaded and stored in ordinary fish boxes with ice, one type per box. The boxes were kept in cold storage at 3C. One box with gutted and deheaded fish was also stored at 25C. Each box contained 20 kg of fish and more ice was added when necessary. The melt water was collected and samples were taken after 1, 3, 6, 9, 13 and 16 days and analyzed and the collecting container was replaced each time. The melt water was analyzed for volatile nitrogen, trimethylaminoxide, trimethylamine, dimethylamine, hypoxanthine, inosine, inosinemonophosphate, ninhydrin reactive substances, and dry matter.

### Lewis acid catalysed synthesis of di- and tri-saccharide sequences in O- and N-glycoproteins : the use of trimethylsilyltrifluoromethanesulfonate

by H. Paulsen and M. Paal. Ottawa : National Research Council, Canada Institute for Scientific and Technical Information, 1985. 23 p. (Canadian translation of fisheries and aquatic sciences ; no. 5148) Originally published in German, by Elsevier Science Publishers at Amsterdam, The Netherlands. ISSN 0704-3716 MICROLOG 90-00090 1 fiche

Paper on the utilization of trimethylsilyltrifluoromethane sulfonic acid (trimethylsilyltriflate) as Lewis acid catalyst. The glycosidic reactions under Lewis acid catalysis and Koenigs-Knorr conditions are compared and the efficiency of the Lewis acid-catalyzed procedure demonstrated. • CA CF FI LS SC

### Lexique : droits de la personne

Gaston Veilleux ; en collaboration avec Paola Piantone, Yolande Bernard. Ottawa : Secrétariat d'Etat du Canada, 1989. vi, 59 p. Bilingue (Glossary : human rights). ISBN 0-660-54910-7 MICROLOG 90-00456 1 fiche

Ce lexique fournit une terminologie portant sur les droits de la personne, domaine peu exploité sur le plan de la terminologie. CA JU

### Lexique : emballage

par J. Le Page. Ottawa : Secrétariat d'Etat du Canada, 1989. 52 p. Bibliogr. Bilingue (Glossary : packaging). ISBN 0-660-54907-7 MICROLOG 90-00923 1 fiche

Lexique comprenant les termes anglais et français les plus souvent utilisés dans le domaine de l'emballage. Tout en tenant compte des progrès de la technologie, on y explore le domaine des machines et des équipements d'emballage, y compris l'emballage dit 'de sécurité', ainsi que le secteur des dispositifs et des techniques de fermeture des récipients. CA CO

### Lexique : immobilier -- 2e éd.

Janeen Johnston-Des Rochers ; en collaboration avec la Direction des langues officielles, Travaux publics Canada. Ottawa : Travaux publics Canada, Secrétariat d'Etat du Canada, 1990. viii, 90 p. Bibliogr. Bilingue (Glossary : realty). ISBN 0-660-55521-2 MICROLOG 90-05908 2 fiche

Cette publication constitue une mise à jour du lexique de l'immobilier préparé par le Service d'aide à la rédaction du ministère des Travaux publics avec la collaboration des Services de l'immobilier de ce Ministère et du Bureau de la traduction du Secrétariat d'Etat. Elle contient la terminologie de base relative à l'immobilier utilisée dans l'Administration fédérale ainsi que des expressions juridiques et des termes propres à la construction, la finance, l'administration, la fiscalité, l'arpentage et les marchés publics généralement associés au domaine de l'immobilier. Plus de 300 paires de termes ont été ajoutées aux 450 entrées de la version originale. CA SA

### Lexique : informatique -- 3e éd.

par L. Buendia. Ottawa : Secrétariat d'Etat du Canada, Bureau de la traduction, Direction de la terminologie et des services linguistiques, 1989. vi, 78 p. Bibliogr. Bilingue (Glossary : informatics). ISBN 0-660-55537-9 MICROLOG 90-02504 1 fiche

Le 'Lexique de l'informatique' appartient à une série d'ouvrages terminologiques destinés à faciliter la communication technique, en français et en anglais, dans les services de l'administration fédérale aussi bien que dans le secteur privé. Les entrées françaises et anglaises sont présentées dans l'ordre alphabétique absolu. Les abréviations et les synonymes sont séparés du terme ou de l'expression par un point-virgule. Les mots anglais à double orthographe sont donnés suivant l'usage britannique plutôt qu'américain, notamment les termes 'colour, disk, analogue' et 'programme'.

#### Lexique : les explosifs

par M. Boileau. Ottawa : Secrétariat d'Etat, Bureau de la traductions, Direction générale de la terminologie et des services linguistiques, 1989. vi, 36 p. Bibliogr. *Bilingue (Glossary : explosives)* ISBN 0-660-55067-9  
MICROLOG 90-02228 1 fiche

Ce lexique contient des termes relatifs à l'utilisation des explosifs dans le domaine de l'exploitation minière. Il contient des termes réunis à partir de lexiques, de vocabulaires et de monographies diverses. Les entrées françaises et anglaises sont présentées dans l'ordre alphabétique absolu.

CA PS SC

#### Lexique analogique : analogies, synonymes, traductions, citations

par J. Dubé. Ottawa : Secrétariat d'Etat du Canada, 1989. vii, 257 p. ISBN 0-660-92673-3  
MICROLOG 90-02824 3 fiche

Ce document présente un mini-dictionnaire de synonymes, qui aide à la découverte du mot juste 'en français'. Par exemple, un rédacteur francophone veut rendre l'idée de 'fournir' dans un contexte particulier. Il consulte ce terme dans l'index français, qui le renvoie à provide, delivery, support et input, où il trouvera plusieurs éventuels de synonymes ou termes apparentés. En plus des entrées du lexique (en caractères gras), cet index contient des termes ou expressions plus ou moins analogues (par ex., locate - non traité - renvoie à identify). Les analogies ont été inventoriées sur le tas pendant environ un an.

This manual provides ideas, methods and philosophies to assist public libraries in determining how they might best provide support and assistance for literacy in their communities. CU ON PR SA

**Le Libre-échange Canada-Etats-Unis : vers la mise en oeuvre -- Rév.**

par A. Chapman. Ottawa : Bibliothèque du Parlement, Service de recherche, 1989. 36 p. (Bulletin d'actualité ; 88-8F) *L'éd anglaise (Canada-U.S. free trade...)* sur la même fiche. ISBN 0-660-92803-5 MICROLOG 90-03025 1 fiche

Le 2 janvier 1988, le premier ministre Mulroney et le président Reagan ont signé l'Accord de libre-échange entre le Canada et les Etats-Unis, qui éliminerait pratiquement tous les droits de douane entre les deux pays d'ici

à dix ans. Bien que le gouvernement ait annoncé son intention de chercher à conclure un accord de libre-échange avec les Etats-Unis à peine deux ans avant d'atteindre cet objectif, l'idée est loin d'être nouvelle au Canada. Ce document fait le point sur la mise en oeuvre du libre-échange entre le Canada et les Etats-Unis. CA CO EX

**Libre-échange entre le Canada et les Etats-Unis : une bibliographie -- 5e éd.**

par D. Milne. Ottawa : Ministère des affaires extérieures et commerce extérieur, 1989. 147 p. *Bilingue (Canada-United States Free...)*. MICROLOG 90-03917 2 fiche

Cette bibliographie rassemble principalement des ouvrages qui se trouvent aux bibliothèques principales et juridiques des Affaires extérieures et Commerce extérieur Canada. Les cotes de classification dans la bibliographie réfèrent aux bibliothèques mentionnées ci-dessus. Elle comprend plusieurs nouvelles vedettes qui simplifient la lecture de la bibliographie en divisant le volume grandissant de la documentation portant sur le sujet. Elle comprend aussi les ouvrages qui traitent des aspects politiques, économiques ou commerciaux du libre-échange soit d'une façon générale ou soit en touchant plusieurs facettes du sujet. Ces catégories comprennent aussi les titres portant sur des aspects plus spécifiques pour lesquels des sections séparées n'existent pas. La plupart des ouvrages publiés avant 1984 se trouve dans la section 6. CA CO EX

**Licensing requirements of fish farms and control under the Water Rights Act**

by T. Ojanen and S. Salonen. Ottawa : National Research Council, Canada Institute for Scientific and Technical Information, 1986. 3 p. (Canadian translation of fisheries and aquatic sciences ; no. 5276) *Originally published in Finnish. ISSN 0704-3716* MICROLOG 90-02746 1 fiche

Description of water pollution control planning under water rights legislation in Finland as indicated by the need for a licence for fish farming.

Toronto : Association of Municipalities of Ontario, 1987. 31 p. (AMO report : report series 1987 ; 87-12) MICROLOG 90-00855 1 fiche (Available on fiche only)

Examines the need for general licensing legislation. It also includes an analysis of and response to the discussion paper on municipal

licensing in Ontario, and presents the Association's own proposal for licensing legislation. CO MU ON PA

**Lichens de la région d'Ottawa -- 2e éd.**

par I.M. Brodo. Ottawa : Musée national des sciences naturelles, 1990. 115 p. : ill. Bibliogr. ISBN 0-660-90304-0 MICROLOG 90-04804 2 fiche

Cet ouvrage présente d'abord une discussion générale sur les lichens en tant qu'organismes et fournit des instructions concernant leur collection, leur préservation et leur étude. Ensuite apparaissent des clefs diagnostiques des genres des lichens crustacés basées sur des spécimens fertiles ou stériles. Puis, il y a une série de clefs pour identifier les espèces individuelles, ces clefs sont classées selon les genres. Les clefs des lichens foliacés et des lichens fruticuleux terminent cette section. Finalement, on trouve en annexe un glossaire de termes spéciaux, employés dans les clefs, ainsi qu'un répertoire des espèces mentionnées dans l'ouvrage. CA LS SC

**Licit and illicit drugs in Canada**

Ottawa : Health and Welfare Canada, 1989. vi, 32 p. : ill. *French ed. (Les Drogues licites...)* on the same fiche. ISBN 0-662-17136-5 MICROLOG 90-05214 1 fiche

This document draws together data from an array of sources to trace trends in drug use in Canada. The distinction in this report between illicit and licit drugs is predominantly historical and legal in nature rather than purely pharmacological. It focuses on the use and effects of selected 'licit' drugs, in particular, tranquilizers, sleeping pills, analgesics, and amphetamines. It also summarizes recent Canadian data on a range of 'illicit' drugs, including cocaine, marijuana, hallucinogens, heroin, and volatile substances. CA HE

**Lieu historique national de la Grosse-Ile : étude de marché**

présentée à la Section politiques et recherche, Service des parcs, Environnement Canada, Région du Québec. S.I. : L'Ecart-type inc., 1990. 2 v. : ill., cartes géogr. Bibliogr. Contient: Vol. 1 : L'Environnement -- vol. 2 : Annexe. CSI 21140.202. MICROLOG 90-06278 2 fiche

Cette étude de marché comporte deux phases bien distinctes soit une première phase portant sur l'environnement, la concurrence et la demande potentielle et une deuxième phase touchant plus particulièrement le marketing-mis, la fréquentation, le profil actuel du visiteur et le contexte de la venue à la Grosse-Ile. La première phase, qui fait l'objet de ce rapport de recherche, vise à cerner l'environnement dans lequel se situe le lieu historique national de la Grosse-Ile, à identifier et décrire, en termes d'offre de services et de fréquentation, les principaux concurrents de la Grosse-Ile. La deuxième phase permet de cerner la sensibilité aux différentes variables du marketing-mis et de tester des scénarios d'expérience de séjour après la première phase. CU EV PR QU SC ST

## Lignes de conduite régissant l'assurance-prêt hypothécaire LNH dans les collectivités à hauts risques

Ottawa : Société canadienne d'hypothèques et de logement, 1988. 21, 17 p. *Bilingue (National Housing Act...)*  
MICROLOG 90-00945 1 fiche

La Société canadienne d'hypothèques et de logement (SCHL) travaille à améliorer l'accès de l'emprunteur au financement hypothécaire assuré en vertu de la Loi nationale sur l'habitation (LNH) dans les collectivités où la situation économique indique qu'il y a possibilité d'un nombre élevé de défauts de paiement hypothécaire et de demandes de règlement auprès du Fonds d'assurance hypothécaire (FAH). En mai 1986, la Société canadienne d'hypothèques et de logement amorçait, au nom du gouvernement fédéral, un examen consultatif de l'assurance-prêt hypothécaire publique. Les participants à cet examen ont insisté particulièrement sur le maintien de l'assurance-prêt hypothécaire comme le moyen de réaliser l'objectif fédéral qui consiste à favoriser l'accès à la propriété et à faciliter la construction de logements locatifs dans tout le pays. Ce document fait la lumière sur la question de la

LNH dans les collectivités à hauts risques et en présente les conclusions.  
CA CO SA

## Lignes de conduite touchant la représentation des minorités visibles et ethniques, et celle des autochtones dans les communications gouvernementales

Ottawa : Conseil du trésor du Canada, Secrétariat, 1984. 9 p. *Présenté à la Réunion du Comité permanent des fonctionnaires sur les droits de la personne. Bilingue (Guidelines for the representative...)*.  
MICROLOG 90-02827 1 fiche

Ces lignes de conduite s'inspirent de la théorie et de la pratique du multiculturalisme dans un cadre bilingue. A cet égard, il convient que la contribution de tous les groupes, indépendamment de leurs origines, soit présentée. Les lignes de conduite énoncées dans ce document donne une image des diverses races et communautés ethniques. Elles touchent les points suivants: le champ d'application; les autorisations et les annulations; les rôles et fonctions; les définitions; les éléments visuels; la langue; le rapport annuel; le manuel de la politique administrative; et, les demandes de renseignements.

## Lignes directrices relatives à la protection des enfants victimes de mauvais traitements et de négligence, partie 1 : santé et services communautaires

Fredericton : la Province, 1989. 32 p. *Bilingue (Guidelines for protecting...part 1...)*.  
MICROLOG 90-05030 1 fiche

En mars 1985, les ministres de la Santé, de l'Éducation, de la Justice et des Services sociaux signaient une entente qui engageait leurs Ministères respectifs à travailler en collaboration pour régler le problème des enfants victimes de mauvais traitements et de négligence. Afin de concrétiser cet engagement de collaboration, des lignes directrices ont été élaborées conjointement par les représentants de ces Ministères. Elles servent à guider les organisations et les professionnels à qui incombent la responsabilité de s'occuper de ces enfants et l'obligation de les protéger contre les

mauvais traitements et la négligence.

**List of scholarships and grants in aid of research, 1988-89 : appendix to the report of the president**

Ottawa : Natural Sciences and Engineering Research Council of Canada, 1989. xxi, 730 p. Bilingual (Liste des bourses...). MICROLOG 90-00197 8 fiche

The objective of the program of scholarships and grants in aid of research is to promote and support both research and the provision of highly qualified personnel in the natural sciences and engineering. The program is divided into grants awarded to individuals and groups of researchers for research expenses in support of a spectrum of research activities; operating grants which assist in the promotion and maintenance of a diversified base of high quality research in the natural sciences and engineering in Canadian universities, and targeted research, including collaborative research initiatives, equipment grants, general research grants, and other general support. There is also a program of grants and scholarships administered on behalf of other departments, agencies and organizations, such as CIDA, NATO, Canadian Shield Foundation research awards, and visiting fellowships. This document lists the recipients of these grants alphabetically within categories, gives the title of the project, the type of project, and the amount of the grant. CA ED

**Little Grand Lake wood harvesting operation : environmental impact statement -- 1st draft.**

Northland Associates Ltd. ; prepared for Newfoundland Dept. of the Environment. Corner Brook, Nfld. : Corner Brook Pulp and Paper Ltd., 1989. ix, 113 p. : ill., maps. *Fold. maps not filmed*  
MICROLOG 90-02606 2 fiche

Corner Brook Pulp and Paper Ltd. proposes to carry out long term timber harvesting and forest management on its timber limits in the Grand Lake-Little Lake area as part of an integrated wood procurement program for its newsprint mill at Corner Brook. Because there are no alternative sources of wood on the island or in Labrador, the acquisition of wood from all of the company's limits (including the Grand Lake-Little Grand Lake limits) on the island is essential if the Corner Brook operation is to continue. This environmental impact statement assesses the impact of the undertaking on pine marten, historic resources and steep terrain, identified as valued ecosystem components. Other environmental elements, which were not deemed to be valued ecosystem components, were evaluated from existing information and from interviews with knowledgeable individuals. The statement also includes a discussion of the public information program and mitigative measures.

### Load forecasts report no. 891211 : system demands, 1990

Toronto : Ontario Hydro, Load Forecasts Dept., Economics and Forecasts Division, Corporate Planning Branch, 1990. ii, 113 p. : ill.  
CSI 56125.005.  
MICROLOG 90-06170 2 fiche

Two load forecasts are normally issued each year, a 25-year long-term forecast produced in the fall for system planning purposes, and a short-term forecast produced in the early summer for revenue planning, rate development and budget purposes. This report contains both the short-term and long-term forecasts approved in December 1989. The short-term primary forecast section includes a comparison of the primary load forecast with last year's forecast and this basic load forecast, a discussion of the net impact of program driven demand management and load displacement generation, and a summary of the regional estimates. The long-term forecast includes econometric and end-use models to forecast the load from 1995-2015, as well as using statistical confidence interval or alternative load growth scenarios generated by the econometric model derived from alternative macroeconomic

scenarios.

### Loading effects of fish farming with net cages on coastal waters : can it be reduced?

by T. Makinen. Ottawa : National Research Council, Canada Institute for Scientific and Technical Information, 1986. 11 p. Bibliogr. (Canadian translation of fisheries and aquatic sciences ; no. 5268) Originally published in Swedish. ISSN 0704-3716  
MICROLOG 90-02738 1 fiche

Fish farming is one of the basic industries which, in recent years, has developed very rapidly in Finland in both the sea and inland waters. Discussions about the environmental impact of fish farming appear confused between water pollution and an increase in fish haul. This paper describes the loading effects of the waste products from the metabolism of the fish as well as waste feed upon the environment and calculates their amount. Suggestions for decreasing the loading are also given.

### A Local seismic survey at Creighton Mine

by M. Plouffe. Ottawa : Canada Centre for Mineral and Energy Technology, Mining Research Laboratories, 1990. iv, 37 p. : ill. Bibliogr. (Report ; MRL 90-076(TR))  
MICROLOG 90-07128 1 fiche

The monitoring and analysis of mining-induced seismic activity in Northern Ontario became a mandate of CANMET in 1984 when the Canada/Ontario/Industry Rockburst Project was inaugurated. To implement these objectives, CANMET supports the operation of 5 regional seismographic stations and 5 macroseismic systems in Ontario mines that are experiencing rockbursts, as well as a state-of-the-art portable seismograph to carry out local seismic activity surveys in the epicentral distance range not covered by these two types of networks. The Creighton mine of Inco was chosen as a test site since it has been subjected to the largest mine-induced seismic events ever recorded among the Sudbury mines and other mines in Northern Ontario. The survey was conducted between October 5 and December 13, 1989 and wave analysis was performed on

the data collected.

### Locational equilibrium of two facilities on a tree

by H.A. Eiselt and G. Laporte. Montreal : Université de Montréal, Centre de recherche sur les transports, 1990. 19 p. : ill. Bibliogr. (Publication ; no. 696)  
MICROLOG 90-06641 1 fiche

This paper considers the location of two facilities on a tree. In particular, conditions for the existence of an equilibrium are derived and an efficient computational procedure is described for finding such an equilibrium, if one exists. Conditions for the so-called 'first-entry paradox' are examined in which the first entrant to a market may not always have an advantage over his opponent, as commonly thought. Relationships between the occurrence of this problem and the existence of a Nash equilibrium are demonstrated.

# **Loi sur les heures d'affaires : document d'information**

Québec : Gouvernement du Québec, Ministère de l'industrie, du commerce et de la technologie, 1989. xxi, 171 p. CSI 66108.218 MICROLOG 90-06572 3 fiche

Depuis 1969, le Québec est doté d'une loi encadrant les heures d'ouverture des établissements commerciaux. Cette loi a dû s'ajuster au cours des années, tant par l'interprétation qui en était faite que par son libellé, à l'évolution de notre société et aux nouvelles situations d'équilibre que dictaient les dynamiques des divers intervenants. Ce document, portant sur les heures d'ouverture des établissements commerciaux du Québec, a pour objectif de dresser un tableau de la problématique et de la situation des intervenants concernés par ce débat.  
CO PR QU ST

# **Loi sur les heures d'affaires : document de consultation**

Québec : Gouvernement du Québec, Ministère de l'industrie, du commerce et de la technologie, 1990. 4 p. MICROLOG 90-06977 1 fiche

En vigueur depuis le 1er janvier 1970, la Loi sur les heures d'affaires des établissements commerciaux a été révisée en 1984. La loi impose en principe un cadre d'ouverture et de fermeture des établissements commerciaux identique pour toutes les municipalités du Québec. Toutefois, les 19 exceptions (ainsi que les diverses autorisations) prévues par la loi font que, pour un même secteur d'activité commerciale, différents régimes sont applicables. Cette multitude d'exceptions fait en sorte que l'équité entre établissements commerciaux n'est plus ressentie comme étant le principe de base du système. Ce document se penche sur cette question.  
CO PR QU

# **Loi sur les langues officielles**

par J.-C. Ducharme. Ottawa : Bibliothèque du Parlement, Service de recherche, 1988. 13 p. (Etude générale : BP-184F) L'éd. anglaise (Official Languages Act) sur la même fiche. ISBN 0-660-92689-X MICROLOG 90-01908 1 fiche

La Loi se compose d'un préambule et de 111 articles regroupés en 14 parties. Elle contient donc plusieurs nouveaux éléments, dont: le préambule et les parties concernant les débats et travaux parlementaires, la langue de travail; la participation des Canadiens francophones et anglophones; la promotion du français et de l'anglais; les attributions et obligations du Conseil du Trésor en matière de langues officielles; et, le recours judiciaire. Ce document se penche particulièrement sur les principales caractéristiques de la loi, qui sont: assurer l'égalité des langues officielles; appuyer le développement des minorités de langue officielle et la progression vers l'égalité de statut des langues officielles; et, préciser les pouvoirs et obligations des institutions fédérales en la matière.

### Long combination vehicles in Quebec and Ontario

by F.P. Nix and M. Boucher. Ottawa : Transport Canada, Policy and Coordination Group, Economic Analysis Directorate, 1987. iv, 45 p. Bibliogr.  
MICROLOG 90-04076 1 fiche

Investigation of the economic feasibility of allowing long truck combinations (over 30 metres) to operate on Quebec and Ontario four lane (or more) divided highways. These trucks already operate in Quebec, 3 other Canadian provinces, and 18 U.S. states. The 'special permits' mechanism for allowing them can be used to control every aspect of their operations (time of day, mechanical conditions, routing, driver qualifications, etc.). The long truck combinations investigated operate at the existing axle and total truck weight limits. Subjects investigated include flows, productivity and costs, shifts, highway and transportation costs, and road-user taxes. Topics not covered include road handling/performance, safety, access and/or staging, and road-pricing. The economics of freight handling by truck vs. railway was also not covered.

### Long-term energy outlook, 1987-2005 : working paper

Canada. Energy Market Analysis Division. Ottawa : The Division, 1988. i, 82 p. : ill. MICROLOG 90-00944 1 fiche

This report is a compendium of work prepared over 6 months to April 1988 on Canada's long-

term energy outlook. The individual components contain analysis of long-term trends in the world oil market, associated implications for domestic energy prices, macroeconomic assumptions and demand for major types of energy by sector and region within Canada to 2005, and supply and net trade projections for each of the major fuels. Two sets of summary tables are provided. The results are based on the use of the Inter-Fuel Substitution Demand (IFSD) modelling system. In the world oil market, 2 base-case price scenarios were developed consistent with a low but rising price pattern (\$15-\$24, \$18-\$32).

### Long-Term Temperature Monitoring Program, 1985 : Scotia-Fundy, Gulf of St. Lawrence, and Newfoundland

by R.E. Walker, D. Dobson and P. Stead. Dartmouth, N.S. : Bedford Institute of Oceanography, 1986. ix, 521 p. : ill. Bibliogr. (Canadian data report of hydrography and ocean sciences ; no. 49) ISSN 0711-6721  
MICROLOG 90-05161 6 fiche

Temperature records have been gathered in the Newfoundland area since 1967 and in the Scotia-Fundy and Gulf areas since 1978 as part of the long-term temperature monitoring program administered by the Bedford Institute of Oceanography. The success of the program depends upon maintenance of an inventory of Ryan Thermograph recorders, described in this report. The report gives daily mean sea temperatures and time-series plots of the temperatures measured at various depths in the Scotia-Fundy, Gulf of St. Lawrence, and Newfoundland areas and recovered in 1985, together with degree day calculations.

### Looking North : Canada's Arctic commitment

Ottawa : Dept. of Indian Affairs and Northern Development, 1989. 95 p. : ill. French ed. (*Regard sur le Nord...*) : 90-00959/2. ISBN 0-662-17120-9  
 MICROLOG 90-00960 2 fiche

Overview of current trends and activities in northern Canada, defined as the Yukon and Northwest Territories (NWT), the waters of Hudson and James Bays and the Arctic archipelago. This review covers the geography and history of the area, its political development and relations with the aboriginal population, and the social and cultural climate. Scientific research being conducted, by both Canadian and international sources, is described, along with the importance of the oil, gas and mining sectors to the economy. The review stresses the importance of protecting the northern environment and ensuring security. Methods of transportation via the ocean and the air are emphasized, as well as the importance of communications. The review concludes with the security agreements reached with the U.S. on the use of the waters of the Arctic, and the measures Canada has taken to strengthen its presence in the area. Descriptions are also given of cooperative scientific research undertaken with the Soviet Union and other polar nations.

### Low temperature Mossbauer spectroscopy of tin catalysts : final report

by G. Denes. Montreal : Concordia University, Dept. of Chemistry ; Laboratory of Solid State Chemistry and Mossbauer Spectroscopy, Laboratoires for Inorganic Materials, 1989. 100 p. : ill. Bibliogr. CANMET contract: 69097-01-ST.  
MICROLOG 90-02560 2 fiche

Report of research to characterize some tin and cobalt-molybdenum containing catalysts supported on a titanium-oxygen framework. Tin-119 Mossbauer spectroscopy was used to probe the tin sites in order to determine the tin oxidation state, evaluate the relative abundance of divalent and tetravalent tin, study the tin environment and identify the tin-containing species. Powder X-ray diffraction showed whether the samples were crystalline, microcrystalline or amorphous, and when Bragg peaks were observed, crystalline phases could be identified and the average particle diameter of microcrystalline phases determined. The texture of the solid catalysts and the particle size and shape were determined by scanning electron microscopy.

### Lutte contre les pluies acides : avantages potentiels en foresterie commerciale pour le Canada

par G.A. Fraser. Ottawa : Gouvernement du Canada, Service canadien des forêts, Direction de l'économie, 1989. vi, 28 p. : ill. Bibliogr. (Rapport d'information ; E-X-42F) L'éd. anglaise (*Acid rain control...*) : 90-02467/1. ISSN 0834-9398 ISBN 0-662-95603-6  
MICROLOG 90-02898 1 fiche

L'incidence globale des pluies acides sur les forêts du Canada et l'efficacité des programmes de lutte contre la pollution axés sur la prévention des dommages causés aux forêts sont extrêmement incertaines. Toutefois, une enquête menée auprès de spécialistes scientifiques par Forêts Canada jette un éclairage cru sur les incidences possibles. En premier lieu, les résultats de l'enquête servent de matière première à une analyse du risque d'endommagement qui pèse sur les forêts ainsi que des avantages que devraient avoir sur la productivité forestière deux nouveaux programmes de lutte contre la pollution. En deuxième lieu, on examine les rapports entre ces changements au niveau de la productivité forestière et la future récolte commerciale de bois d'oeuvre. Enfin, on fait une estimation des avantages sociaux et économiques des deux programmes de lutte contre la pollution.

### Mackenzie Environmental Monitoring Project, phase II : 1987 activities

LGL Limited...et al. Ottawa : Indian and Northern Affairs Canada, Northern Affairs Program, 1988. xxxv, 254 p. : ill. Bibliogr. (Environmental studies ; no. 56) ISBN 0-662-16577-2  
MICROLOG 90-04554 3 fiche

In 1983 the Beaufort Environmental Monitoring Project (BEMP) was initiated to provide the technical basis for the design, operation and evaluation of a comprehensive and defensible environmental research and monitoring program to accompany hydrocarbon development in the Beaufort Sea relative to the regulatory responsibilities of the sponsoring departments. In 1985, a comparable program was initiated to determine research and monitoring priorities related to possible effects of hydrocarbon development and transportation in the Mackenzie Delta and Valley regions (MEMP). A study was begun in 1987 to review recent relevant research, to comment on the need for revision of MEMP hypotheses and to provide an update of possible future hydrocarbon development plans for the MEMP study area. This report describes 1987 MEMP activities, including an updated hydrocarbon development scenario and research on the activities of red and arctic foxes and wolves on the off-shore sea ice of northern Labrador to test the hypothesis that increased hydrocarbon development would lead to a decrease in the numbers of these species.

### Mackenzie River water levels and the flooding of delta lakes

by P. Marsh and M. Hey. Saskatoon, Sask. :

Environment Canada, Ground Water Division, National Hydrology Research Institute, 1988. ii, 135 p. : ill., maps. Bibliogr. (NHRI contribution ; no. 88013) ISSN 0838-1992 MICROLOG 90-02454 2 fiche

The Mackenzie Delta is the largest delta in Canada and one of the major northern deltas in the world, second only in size to the Lena. In conjunction with permafrost, climatic and hydrologic conditions combine to create a large number of freshwater lakes, which cover up to 50% of the Mackenzie deltaic plain. Analysis of 12-25 years of Mackenzie River east channel water levels allowed the documentation of the relationship between flooding regime and sill elevation for lakes in the study area near Inuvik. #### A Magnetic field probe for use in extremely low frequency (ELF) animal exposure systems

by R. Scheer. Toronto : Ontario Hydro, Research Division, 1989. 6 p. : ill. (Report ; no. 89-159-K) MICROLOG 90-01168 1 fiche

As part of a program to measure the effects of extremely low frequency (ELF) fields on animals, a magnetic field probe was developed which could be suspended over a mouse cage to measure localized fields at the bottom of the cage. The device had to be small enough to fit inside a mouse cage, had to reproduce an ELF waveform accurately, its dynamic range should cover fields between 1  $\mu$ T and 5 mT, there must be a simple relationship between field strength and output signal, and signals outside the range of interest should be filtered out. This paper describes the design and testing of such a device. EN ON PR SC

#### Main findings report of the Canadian Blood Pressure Survey

Ottawa : Dept. of National Health and Welfare, 1989. iii, 13 p. Bibliogr. French ed. (*Principaux résultats de l'étude...*) on the same fiche. ISBN 0-662-16798-8 MICROLOG 90-02202 1 fiche

Overview of the results of the Canadian Blood Pressure Survey, carried out in 1985 to provide a data base for program and policy development in the prevention and control of cardiovascular disease. This is the first national survey designed specifically to assess the problem of high blood pressure in Canada and was undertaken to determine the extent of the public's knowledge of high blood pressure as a risk factor, the prevalence of high blood pressure in the general population, the degree of control of those at risk, and treatment patterns and compliance. A sample of 3,092 non-institutionalized Canadian residents in 10 provinces, 18 years of age and over drawn from 1,727 households, were interviewed by registered nurses. Blood pressure measurements were made before and after the interview. The report discusses the socio-demographic characteristics of the participants and response rates, prevalence and control, detection, treatment and compliance, knowledge, and combined risk factors for cardiovascular disease. A methodology is included. CA HE

#### Mainly money : the cause of Canadian inflation

by D.E.W. Laidler and W.B.P. Robson. Toronto : C.D. Howe Institute, 1990. 16 p. : ill. Bibliogr. (Inflation monitor ; no. 4) ISSN 0824-801X MICROLOG 90-04616 1 fiche

With consumer price inflation continuing to run over 5 percent and wage increases accelerating, some commentators have concluded that the Bank of Canada's fight against inflation is not working or cannot work. This paper argues that, on the contrary, the links between Bank policies and inflation remain intact. After examining the longer-term associations in Canada between increases in the money supply, real economic growth, and changes in the inflation rate, the paper suggests that recent inflationary pressure in Canada can be traced back to the looseness

of monetary policy around 1987.

#### Maintenir l'autonomie des personnes âgées : guide d'adaptation du domicile

Ottawa : Société canadienne d'hypothèques et de logement, 1989. v, 115 p. : ill. L'éd. anglaise (*Maintaining seniors' independence...*) : 90-05747/2. MICROLOG 90-05726 2 fiche

Il existe une relation directe entre le vieillissement et l'incapacité. Si la plupart des personnes âgées poursuivent leurs activités de la vie quotidienne avec un minimum d'efforts et de difficultés, pour certaines, le quotidien devient vite un défi. Ce document présente une étape qui comprend la création d'un questionnaire, appelé grille d'analyse, pour examiner les améliorations possibles à apporter au domicile et pour mettre à l'essai l'outil lui-même. Le document porte principalement sur le guide de l'utilisateur de la grille d'analyse et sur la grille d'analyse du domicile des personnes âgées en perte d'autonomie physique (schéma de conception). ## Major ion chemistry of the pre-melt snowpack, Turkey Lakes Watershed, 1980-88

by R.G. Semkin...et al. Burlington, Ont. : Canada Centre for Inland Waters, National Water Research Institute, 1989. 17 p. : ill. Bibliogr. (NWRI contribution ; 89-160)  
MICROLOG 90-02448 1 fiche

The Turkey Lakes Watershed, located on the Precambrian Shield 60 km north of Sault Ste. Marie, Ontario, is the site of multi-disciplinary studies into the aquatic and terrestrial effects of the long range transport of air pollutants. As a consequence of the significant contribution of snowmelt to the hydrological flux and to the biogeochemical cycling of major ions and nutrients in the basin, long-term research was established to clarify the physical and chemical properties of the parent snowpack. Composite cores from the pre-melt snowpack were collected at 11 sites from 1981-88.

## Major ion dynamics of surface waters of varying hydrologic order

by G. Howell. Moncton, N.B. : Environment Canada, Conservation and Protection, Inland Waters Directorate, Atlantic Region, Water Quality Branch, 1989. v, 132 p. : ill. Bibliogr.  
MICROLOG 90-03147 2 fiche

Kejimikujik National Park is situated in southwestern Nova Scotia and encompasses an area of approximately 377 sq km. Over the last decade, numerous lakes and rivers in this area were sampled to clarify the chemical response of systems which are sensitive to long range transport of acidic precipitation (LRTAP). As a result of these various sampling programs, there are high quality data sets available which can be used to address specific LRTAP related questions. This report considers the water chemistry seasonal dynamics of 10 surface waters and 1 well located within or near to the park. The surface water stations include 3 first order streams (Moose Pit Brook, Rodgers Brook, Atkins Brook), 3 streams draining one or more headwater lakes (West River, Mount Tom Brook, Whiteburn Brook), 2 higher order rivers (Mersey River, Little River) and 2 headwater lakes (Pebblelogitch Lake, Beaverskin Lake).

## Making a difference : the Canada land inventory

Ottawa : Canadian Wildlife Service, Sustainable Development Branch, 1988. 12 p. : ill., maps. (Fact sheet ; 88-5) ISBN 0-662-16305-2  
MICROLOG 90-00157 1 fiche

One of the most important sources of information about land capabilities nation-wide is the Canada Land Inventory (CLI). Launched as a federal-provincial cooperative venture in 1963 to support rural economic development programs, the CLI provided the first consistent measure of the renewable resource wealth of Canada. This factsheet reviews the CLI's contribution to resource management and land-use planning over the past 25 years and provides a brief overview of the inventory's key features, highlighting how and where the inventory has been applied. Finally, the CLI's national benefits and its future prospects are discussed.

#### Management of science and technology information projects supported by IDRC

record of a meeting of Science and Technology Information Project Managers ; prepared in conjunction with the Manitoba Institute of Management Inc. Ottawa : International Development Research Centre, 1989. xvi, 198 p. : ill. Bibliogr. (Manuscript report ; 230e)  
MICROLOG 90-00269 3 fiche (Available on fiche only)

The Information Sciences Division of the International Development Research Centre (IDRC), assists developing countries to develop and run appropriate information systems through the funding of projects negotiated with recipient institutions. One of the issues of importance to the Division has been the development of human resources, in particular within projects, in order to ensure the permanent strengthening of indigenous capabilities to carry out activities after the project has ended. To date however, the issue of project management has received little attention from the point of view of training. This

meeting therefore, sought to increase project management capacity and identify the weaknesses and gaps in knowledge required for better running of the projects. It also aimed to review the broad scope of STI projects and to lay the groundwork for greater mutual sharing of information, collaboration and cooperation amongst project managers. This document discusses the project management process, the project and its relationship with the IDRC, project management needs, project sustainability, and financial administration. A profile of STI projects is included. CA EX SC TE

#### Management of Solonchets soils -- Rev.

Edmonton : Alberta Agriculture, 1990. 11 p. : ill. (Agri-fax)  
MICROLOG 90-05951 1 fiche

Solonchets soils, often called burnout or gumbo soils, are characterized by a tough, impermeable hardpan that may vary from 5-30 cm or more below the surface. This pamphlet describes these soils, compares them to non-Solonchets soils, then describes their characteristics, occurrence, management and improvement. Farming equipment to use with this type of soil is also described. AG AL PR SC

### Managing international technology transfer : a strategic approach for developing countries

by K. Hoffman and N. Girvan. Ottawa : International Development Research Centre, 1990. ix, 312 p. Bibliogr. (Manuscript report ; 259e)  
MICROLOG 90-06137 4 fiche (Available on fiche only)

The core lectures presented in this document from the IDRC Science and Technology Policy Workshop Programme concentrate on exploring two themes. The first is that it is possible for Third World governments and firms consciously to devise policies that can both foster the process of accumulation of indigenous technological capacities and create conditions that allow effective deployment of these domestic capabilities to solve local problems. The second theme of the Workshop was concerned not with the formulation of policies but more with understanding the processes by which indigenous technological capacities could be created and accumulated.

**Manitoba. Dyking Commissioner : Annual report 1989**

Winnipeg : The Commissioner, 1990. i, 36 p.  
CSI 41119.004.  
MICROLOG 90-06165 1 fiche

The Dyking Authority Act D110, passed in 1952, is meant to ensure that the dykes and pumping stations constructed subsequent to the 1950 flood are maintained in a state of readiness to combat future floods. Authority and control over dykes and pumping stations is invested with the city or rural municipality in which they are situated, but provision has been made for the appointment of a Dyking Commissioner with powers to inspect dykes and pumping stations and to order work to be undertaken to maintain an integrated system of flood defences as well as to establish the location of the line of defence. The annual report reviews general mandate and its changes, current issues, current action on issues, inspection of facilities, reports by the City of Winnipeg and the University of Manitoba, operation of pumping states and gates, additional works constructed and recommendations.

Winnipeg : Environment Canada : Manitoba Natural Resources, 1988. 2 v. : ill., maps. Bibliogr. Contents: Vol. 1 : Phase I, planning and design -- vol. 2 : Phase II, application and evaluation. At head of title: Canada-Manitoba Flood Damage Reduction Program. MICROLOG 90-03441 5 fiche

Report of Phase I of a 2-phase study covering 5 years in which improved spring flood forecasting procedures were to be developed and implemented for the Red, Assiniboine and Souris River basins in Manitoba. Phase I was to determine whether the use of continuous deterministic or parametric hydrological simulation models could significantly improve the accuracy and lead time of streamflow forecasts over that attainable with the traditional approach based on multiple regression, unit hydrograph and index values. The Boyne River watershed was used to compare and test the simple parametric SLURP model, the intermediate complex SSARR model and the complex deterministic HSPF model. The presently used MANAPI regression model was used as a benchmark. Channel routing studies within the Boyne River watershed and the testing of real-time data acquisition systems were also carried out.

#### Manual for condition rating of flexible pavements : distress manifestations

by G.J. Chong, W.A. Phang and G.A. Wrong. Downsview, Ont. : Ministry of Transportation, Research and Development Branch, 1989. iii, 111 p. : ill. Bibliogr. ISSN 0226-9414 ISBN 0-7729-5831-9

MICROLOG 90-01943 2 fiche

This manual categorizes distress manifestations and provides illustrations of each category to lend uniformity to reporting and interpretation. Descriptions of the density of occurrence and the severity of each type of distress manifestation are made to conform to standard words which precisely express the relative density or severity on a scale of 1-5. Probable causes of each distress manifestation are presented, together with comments on progressive deterioration or other behaviour which might affect remedial treatment. Possible remedial measures are included under each distress manifestation.

#### Manual for condition rating of gravel surface roads

by G.J. Chong and G.A. Wrong. Downsview, Ont. : Ministry of Transportation, Research and Development Branch, 1989. iii, 61 p. : ill. Bibliogr. ISSN 0226-9414 ISBN 0-7729-5832-7

MICROLOG 90-01944 1 fiche

The existing pavement condition rating systems used in Ontario are designed only for hard surfaced roads. To date, there has been no system designed and developed specially to address the unique performance pattern of gravel surface roads. This document was prepared to meet this need and to present a roadway surface condition rating system for gravel surface roads. The manual covers the

rating system, distress manifestations, procedures for roadway evaluation, surface defects, surface deformation, and shoulder distress manifestations.

ON PR PS SC TR

#### Manual for condition rating of surface-treated pavements : distress manifestations

by G.J. Chong, W.A. Phang and G.A. Wrong. Toronto : Ministry of Transportation, Research and Development Branch, 1989. iii, 73 p. : ill. ISSN 0226-9414 ISBN 0-7729-5428-3

MICROLOG 90-01345 1 fiche

Rating of highway pavement surface condition is used by highway system authorities as a measure of the ability of the pavement to continue to provide required service to the public. Ratings are based on riding quality and distress manifestations which currently apply only to those roads surfaced with asphaltic concrete and Portland-cement concrete. There is also a network of bituminous surface-treated roads for smaller and more remote population centres which has, to date, had no scheme designed and developed specifically to address their performance pattern. This manual presents a pavement surface condition rating scheme for such roads, based on the same interrelated measures used on the highway system. The manual describes the scheme, and gives a procedure for evaluation, defines riding quality, and details such distress manifestations as surface defects and deformation and cracking, shoulder distress, and maintenance treatments.

#### A Manual for scallop culture in British Columbia

by N. Bourne, C.A. Hodgson and J.N.C. Whyte. Nanaimo, B.C. : Dept. of Fisheries and Oceans, Fisheries Research Branch, Pacific Biological Station, 1989. xiv, 215 p. : ill. Bibliogr. (Canadian technical report of fisheries and aquatic sciences ; no. 1694) ISSN 0706-6457

MICROLOG 90-00153 3 fiche

Scallops are highly prized seafood, but scallop resources in B.C. are too small to support a large sustained fishery. Development of a sizeable industry will therefore have to rely on culture operations. In 1981, a program was initiated to investigate the feasibility of scallop culture in B.C. with major focus on production of large numbers of juveniles in hatcheries. Work was primarily on the exotic Japanese scallop *Patinopecten yessoensis* and the native rock scallop *Crassadoma gigantea*. This manual describes the results of some of the work in the program, including details on the biology of scallops, design and location of hatcheries, operations of hatcheries and nurseries, and initial stages of growout work.

#### Manual for the identification of redfish species of the north Atlantic and adjacent areas

by V.V. Barsukov, N.I. Litvinenko and V.P. Serebryakov. Ottawa : National Research Council, Canada Institute for Scientific and Technical Information, 1985. 25 p. : ill. (Canadian translation of fisheries and aquatic sciences ; no. 5168) Originally published in Russian. ISSN 0704-3716

MICROLOG 90-00076 1 fiche

Redfish of the genus *Sebastes* are an important target of the international and Soviet fishery in the North Atlantic. In order to study usable stocks, predict catches, and regulate the fishery, it is necessary to know the species composition of catches and the distribution and migration of populations, estimate usable stocks, and give recommendations on the fishery for particular species and stocks. This manual gives the identification of the species affiliation

of larvae, fingerlings, and adult redfish.

#### Manual of Nearctic Diptera, vol. 1

coordinated by J.F. McAlpine...et al. Ottawa : Agriculture Canada, Research Branch, 1981. vi, 674 p. : ill. Bibliogr. (Monograph ; no. 27) ISBN 0-660-10731-7

MICROLOG 90-03199 7 fiche

Manual providing an up-to-date, well-illustrated, easily interpretable means for identifying the families and genera of two-winged flies of America north of Mexico. It is also designed to be a basic reference to a wide spectrum of biosystematic information on Diptera. Vol. 1 includes morphology and terminology of the adult and larval stages, and keys to the families of the order based on both adults and larvae. It also contains the treatments of the 24 families of the Nematocera and the 19 families of the orthorrhaphous Brachycera.

#### Manual of plant species suitability for reclamation in Alberta -- 2d ed.

Hardy BBT Limited. Edmonton : Alberta Land Conservation and Reclamation Council, Reclamation Research Technical Advisory Committee, 1989. ix, 444 p. : ill., maps. (Report ; RRTAC 89-4)

MICROLOG 90-05206 5 fiche

This plant species manual has been prepared to aid in the selection of plant species suitable for reclamation in Alberta. It is designed to enable the user to select appropriate plant species that are adapted to specific site conditions. Species suitability is listed by region, cross indexed to grasses, forbs, and shrubs and trees suitable for each area. For each species listed, information is given on its biology, origin and range, growth habit, longevity, ecological setting, tolerances, and reclamation considerations.

#### Manuel d'aménagement forestier

Québec : Gouvernement du Québec, Ministère de l'énergie et des ressources, 1989. 255 p. : ill., cartes géogr. Bibliogr. ISBN 2-550-19931-6

MICROLOG 90-03947 3 fiche

La loi sur les forêts assure la participation de l'industrie forestière à l'aménagement et à la mise en valeur des forêts du domaine public en instaurant un nouveau mode d'attribution des bois basé sur l'octroi de contrats d'approvisionnement et d'aménagement forestier. Ce manuel d'aménagement forestier est conçu pour établir les relations formelles entre le ministère de l'Énergie et des Ressources et les bénéficiaires de contrats d'approvisionnement et d'aménagement forestier. Il examine particulièrement les points suivants: le contexte et champs d'application du manuel d'aménagement forestier; la méthode et les hypothèses de calcul de la possibilité annuelle de coupe; les modes de vérification par échantillonnage des traitements sylvicoles; et la méthode de mesure des effets réels des traitements sylvicoles.

#### Manufactured housing study : land use planning, issues and guidelines

prepared by Lovatt Planning Consultants and IMC Consulting Group Inc. ; on behalf of Alberta Municipal Affairs and Manufactured Housing Association of Alberta and Saskatchewan. Edmonton : Alberta Municipal Affairs, 1990. 50 p. : ill.  
MICROLOG 90-07371 1 fiche

This study was undertaken to foster a better understanding of the current manufactured housing product and to encourage municipal authorities to consider accommodating this form of housing in their communities. Manufactured housing in this study means any dwelling unit, manufactured in single or multiple sections, either in whole or in part, at an off-site

location, designed to be used with or without a permanent foundation, constructed to be transported from the point of manufacture to its destination of residence at time of manufacture, conforming to CAN/CSA Z240MH Series-M86, and is capable of being transported on its own chassis. These are not modular units manufactured in component pieces in a factory and then assembled on site. The study identified the key issues surrounding manufactured housing in Alberta today and developed land use planning and design guidelines related to manufactured housing, along with recommendations for implementing such guidelines.

#### Le Marché du travail : son évolution dans les années 80 -- Rev.

par K. Kerr. Ottawa : Bibliothèque du Parlement, Service de recherche, 1989. 16 p. Bibliogr. (Bulletin d'actualité , 89-1F) *L'éd. anglaise (Labour market developments...)* sur la même fiche. ISBN 0-660-92721-7  
MICROLOG 90-01844 1 fiche

La main-d'oeuvre, le facteur de production le plus couramment utilisé et le plus coûteux, fait l'objet d'échanges sur un marché caractérisé par un état de flux constant. D'après de récentes estimations, plus de quatre millions de personnes trouvent du travail chaque année, et un nombre à peu près équivalent tombent en chômage ou quittent le marché du travail. Pendant les années 80, la conjoncture sur ce marché a subi l'influence d'un certain nombre de facteurs dont les principaux ont été la dévastatrice récession de 1981-1982, la croissance extrêmement inégale du nombre d'emplois dans les régions pendant la reprise, et l'augmentation de l'incidence du chômage de longue durée. Ce sont ces facteurs, et d'autres tendances qui se sont dessinées depuis le début de la décennie, qui font l'objet du présent bulletin.

### Marine birds and aquaculture in British Columbia : assessment and management of interactions, phase II report : assessment of geographical overlap

by J. Booth and H. Rueggeberg. Ottawa : Canadian Wildlife Service, Pacific and Yukon Region, 1989. xiii, 79 p. Bibliogr. (Technical report series ; no. 73) ISSN 0831-6481 ISBN 0-662-21717-X MICROLOG 90-02387 1 fiche

This report documents the results of Phase II of a project to assess the effects of British Columbia's growing aquaculture industry on its marine bird populations. The extent of geographical overlap between areas of current and potential aquaculture development and areas used by marine birds was examined, indicating the bird species, types of aquaculture and areas of the coast involved. A computer-based geographic information and spatial analysis system was used to store, analyze and display the distributions of aquaculture and marine bird use within the study area. The location and size of sites currently committed for finfish, shellfish and marine plant culture were digitally mapped. Areas classified as biophysically suitable for salmon farming were also compiled and digitally mapped. Distribution data for 24 bird species and species groups were collected from compiled survey data and mapped, as were the size and location of colonies of 14 species and of summer moulting concentrations of 3 species. ### Marine birds and aquaculture in British Columbia : assessment and management of interactions, phase III report : preventing predation by scoters on a west coast mussel farm

by H. Rueggeberg and J. Booth. Delta, B.C. : Canadian Wildlife Service, Pacific and Yukon

Region, 1989. vi, 27 p. : ill. Bibliogr. (Technical report series ; no. 74) ISSN 0831-6481 ISBN 0-662-17189-6 MICROLOG 90-02353 1 fiche

Report of the results of Phase III of a project aimed at assessing the effects of B.C.'s growing aquaculture industry on its marine bird populations. Phase III consists of 2 studies examining on-site interactions between birds and salmon farming and mussel farming. This report covers mussel farming. Since predation by overwintering scoters is a major problem to mussel farming, this study investigated ways of improving predator protection measures that would be effective in preventing predation but would not entangle birds and would be relatively inexpensive and convenient to install and maintain. Using a raft culture site located on the west coast of Vancouver Island, an experimental underwater predator net was designed to examine differences in mesh size, colour and weight on the occurrence of predation and entanglement of diving birds. A net fence was tested for its ability to prevent bird access from the surface and from the air. BC CA EV FI SC

### Marine geological and geotechnical investigations in Wellington, Byam Martin, Austin, and adjacent channels, Canadian Arctic Archipelago

by B. MacLean...et al. Ottawa : Energy, Mines and Resources Canada, Geological Survey of Canada, 1989. 75 p. : ill., maps. (Paper ; 89-11) ISSN 0068-7650 ISBN 0-660-13256-7 MICROLOG 90-01107 1 fiche

Wellington, Byam Martin, Austin, and adjacent channels were investigated in 1986 from CSS HUDSON using marine geological and geophysical methods. These methods provided information on the distribution, composition, thickness, geotechnical properties, magnetic susceptibility, paleo-oceanography, and depositional environments of the unconsolidated seabed sediments, and on the near surface structure of the underlying bedrock. The work was conducted as part of the Northern Oil and Gas Action Program. CA NO NR PS SC

### Marine ichthyoplankton data from the Canadian Beaufort Sea shelf, July and September, 1984

by D.B. Chipchak...et al. Winnipeg : Dept. of Fisheries and Oceans, Central and Arctic Region, 1990. v, 45 p. Bibliogr. (Canadian data report of fisheries and aquatic sciences ; no. 779) This is the 43rd data report from the Central and Arctic Region, Winnipeg. ISSN 0706-6465 MICROLOG 90-04052 1 fiche

Ichthyoplankton data in this report were collected as part of the Beaufort Shelf fish habitat research subproject, one component of the critical Arctic estuarine and marine habitat project of the Northern Oil and Gas Action Program. The report presents data on ichthyoplankton collected from 760 m Wisconsin net and 500 m neuston net plankton tows in July and September 1984 along the Canadian Beaufort Sea Shelf. Standard length, total length, and wet-weight measurements were made on 1,123 larval fish of which 1,097 were Arctic cod. A total of 126 fish were analyzed for stomach contents. ● CA CF FI LS NO SC

### Marine migration and natural mortality of North American Atlantic salmon *Salmo salar* L.

by J.A. Ritter. Halifax : Dept. of Fisheries and Oceans, Biological Sciences Branch, Freshwater and Anadromous Division, 1989. x, 136 p. : ill., maps. Bibliogr. (Canadian manuscript report of fisheries and aquatic sciences ; no. 2041) ISSN 0706-6473 MICROLOG 90-04781 2 fiche

The present natural breeding range of the anadromous Atlantic salmon in North America extends from the Pawcatuck River in Rhode Island to Ungava Bay, Quebec. These salmon are harvested in coastal fisheries along their feeding and return migrations routes and in their native rivers. This report uses marking and field sampling data and catch statistics to describe the migrations of North American Atlantic salmon and to quantify and explain variations in marine natural mortality.

**Market information and market monitoring : preliminary study on needs and prospects for the development of external, computer-based marketing information systems for the Norwegian fishing industry**

by R. Lines. Ottawa : National Research Council, Canada Institute for Scientific and Technical Information, 1989. 264 p. : ill. Bibliogr. (Canadian translation of fisheries and aquatic sciences ; no. 5477) *Originally published in Norwegian, by F.T.F.I. at Tromsø, Norway.* ISSN 0704-3716  
MICROLOG 90-00590 3 fiche

Discussion of the needs and conditions for use, and the sources of information, on market conditions for the Norwegian fishing industry. The first part of the report discusses some important factors for establishing such a system, including the number of users and their needs, and the qualifications of the use of such market information. An outline of the system is given and how the information could be organized. The second part consists of a collection of notes discussing the different problem areas. Some methods are tested and evaluated, and an outline of a decision support system for choice of distribution channels is given. A micro market model as a component in the information system is evaluated.

**Marketing study of British Columbia's gypsum in the Pacific Rim area of North America**

a joint effort of Queenstake Resources Ltd., and King, Murphy Lavalin, Consultants. Vancouver, B.C. : Queenstake Resources Ltd., 1989. v, 243 p. : ill., maps. Bibliogr. *Funded under: The Canada-British Columbia Mineral Development Agreement.*  
MICROLOG 90-00190 3 fiche

Gypsum is a relatively low cost, high bulk mineral commodity, usually produced from deposits in close proximity to areas where markets exist. Gypsum production in Canada responds directly to demand from the wallboard industries in the U.S. and domestically, and are in turn tied to the construction industry. Canadian production of gypsum is mainly from the Atlantic provinces. This study develops a marketing scenario for B.C. gypsum for existing markets from California to Alaska as well as the non-coastal provinces of Alberta and the Yukon Territory and the State of Nevada. Markets include wallboard, portland cement, agriculture, pulp and paper, extender and fillers, and other specialty markets. The study gives an overview of the history, properties, mining and processing, and end use of gypsum. The quality of B.C.'s gypsum deposits is given following a thorough review of specification requirements, then trends in North America are addressed, with forecasts for construction activities in the U.S. and Canada.

A review of the price structure, along with a review of suppliers and producers, is also included.

### Markham MTS no. 2 : grounding system studies

by R.P. Pillai. Toronto : Ontario Hydro, Research Division, 1990. 21 p. : ill. Bibliogr. (Report ; no. 90-84-K)

MICROLOG 90-06102 1 fiche

Markham MTS no. 2 is a new customer-owned 230kV transformer station located at the corner of Hwy 48 and 14th Avenue in the Town of Markham. Verification of the grounding system design values was required especially in view of the extensive grounding network of overhead and underground conductors. Measurements were performed at the station and at the junction under simulated fault conditions to confirm the adequacy of the grounding system performance at both locations. This report presents the results of those tests.

### The Measurement of dose at 70 micrometres' depth using thermoluminescent dosimeters (TLDs)

by A.R. Jones. Ottawa : Atomic Energy Control Board, 1989. iii, 25 p. : ill. Bibliogr. (Report ; INFO-0305)

MICROLOG 90-00460 1 fiche

The measurement of dose with thermoluminescent dosimeters (TLD) at a tissue-equivalent depth of 70 um can be done by using very thin TLDs made by cementing fine, powdered, TLD particles to a high-temperature plastic film; opaque TLDs whose surface alone is sensitive; and at least 3 TLDs covered with absorbers of differing thickness. The approaches were studied using examples of dosimeter arrangements of the 3 types. Characteristics measured to form a basis of comparison were the performance at high and low doses; the effect of changing angle of incidence and beta-ray energy; and the effect on performance of repeated irradiation, annealing and reading.

### Measurement of outdoor air supply rate

Ottawa : Public Works Canada, Architectural and Engineering Services, 1988. vi, 38, vi, 43 p. : ill. Bibliogr. (Building performance evaluation series ; Document D37) Bilingual (Mesure de la vitesse...).  
MICROLOG 90-02178 2 fiche

This document presents a method for using tracer gases to evaluate the effectiveness of ventilation systems in supplying outdoor air. The techniques presented are intended for use in large multi-storey office buildings but can be adapted for use in other types of buildings. A number of factors have led to increased concern about air quality in buildings, including improved airtightness of building envelopes, reductions in the amount of outdoor air supply in the interest of energy conservation, new approaches to ventilation system design, and increased use of synthetic materials in the building fabric and in furnishings. The methods outlined measure the rate at which a ventilation system supplies outdoor air. The results can be input as specific parameters in energy analysis models to estimate how outside air introduced by the ventilation system affects the total energy consumption of the building and whether these figures are acceptable. These data, along with findings from other tests, are used to determine if modifications to the system are required and if the building meets current Public Works Canada standards.

### Measurement of the thickness of the bronchial epithelium

by D.H. Bowden and F. Baldwin. Ottawa : Atomic Energy Control Board, 1989. vi, 54 p. : ill. Bibliogr. (Report ; INFO-0304)  
MICROLOG 90-00459 2 fiche

Cancer of the lung in uranium miners is thought to be related to the inhalation of gaseous radon daughters which become attached to molecules of water vapour or to dust particles. Since the depth of tissue penetration by alpha particles is short, the thickness of the epithelium that lines the bronchial tree may be a critical factor in the development of cancers at specific sites in the lung. This study measured the thickness of human bronchial epithelium; determined the distribution and depth of the nuclei of basal cells in the bronchial epithelium, and compared these parameters in groups of smokers and non-smokers. Twenty-nine surgically removed specimens of the lung were examined: 26 smokers, 3 non-smokers.

### Measuring the profitability and effectiveness of foreign exchange market intervention : some Canadian evidence

by J. Murray, M. Zelmer and S. Williamson. Ottawa : Bank of Canada, 1990. ii, 32 p. : ill. Bibliogr. (Technical report ; 53)  
MICROLOG 90-03759 1 fiche

When the major industrial countries decided to move to a system of managed flexible exchange rates following the collapse of the Bretton Woods system, many observers thought that this would reduce, if not eliminate, the need for official foreign exchange market intervention. During the past fifteen years, however, intervention in most countries, including Canada, has risen steadily in both frequency and intensity. This paper presents new empirical evidence on the profitability and effectiveness of Canadian intervention from 1975 to 1988.

#### Meech Lake : from centre to periphery : the impact of the 1987 Constitutional Accord on Canadian settlements : a speculation

Hilda Symonds and H. Peter Oberlander, editors. Vancouver, B.C. : University of British Columbia, Centre for Human Settlements, 1988. v, 194 p. Bibliogr. ISBN 0-88365-347-6  
MICROLOG 90-01815 3 fiche (Available on fiche only)

Up to and including the 1982 Constitution Act, Canada's settlements have been the creatures of provincial governments. The papers presented in this publication review this relationship and speculate on whether the 1987 Meech Lake Accord is likely to change this traditional relationship explicitly or implicitly.

#### Meech Lake : implications for federal-provincial fiscal relations

by D. Bedford. Toronto : Ontario Legislative Library, 1988. 15 p. Bibliogr. (Current issue paper ; no. 75) ISSN 0835-0299  
MICROLOG 90-01591 1 fiche

Following a short introduction to present federal-provincial division of responsibilities and cost-sharing programs this issue paper notes some questions raised by the 1987 Meech Lake Accord for constitutional amendment. Several theories of federalism and a short history of federal-provincial spending agreements are presented. Next, sections 106A and 40 are analysed and possible scenarios are discussed.

#### The Meech Lake Accord : a constitutional conundrum

by B. Carson. Ottawa : Library of Parliament, Research Branch, 1989. 26 p. Bibliogr. (Backgrounder ; BP-186E) French ed. (L'Accord du lac Meech...) on the same fiche. ISBN 0-660-13291-5  
MICROLOG 90-01910 1 fiche

This paper presents the arguments both in favour and against each clause of the Accord. The paper is divided into three parts, each of which discusses the appropriate part of the Accord: distribution of powers, institutions, and people.  
CA CI PA

#### The Meech Lake Accord : linguistic duality and the distinct society

by B. Carson. Ottawa : Library of Parliament, Research Branch, 1989. 13 p. (Backgrounder ; BP-211E) French ed. (L'Accord du lac Meech...) on the same fiche. ISBN 0-660-13488-8  
MICROLOG 90-05358 1 fiche

The purpose of this paper is to set out the various arguments for and against the distinct society clause. These arguments concentrate upon the relationship of this clause to the Charter of Rights and Freedoms. Its supporters claim that the clause would adversely affect the equality rights in the Charter, while its opponents fear that it would jeopardize a number of hard-won Charter rights.

### Meeting the Ontario Waste Management Corporation's needs for transportation and transfer station services

by F. Piorusso. Toronto : VHB Research & Consulting Group, 1987. 23 p.  
MICROLOG 90-02876 1 fiche

This study determined whether the existing transportation industry is capable of and willing to expand to meet the additional demand for services that may arise, assuming that the OWMC reaches its planned operating volumes. The Ontario Ministry of the Environment's manifest information system was used to compile summary data on sources, destinations and volumes of wastes transported in Ontario and to identify the major carriers and transfer station operators. Interviews were conducted with representatives of 10 carriers and 5 transfer station operators to determine if there were any financial, regulatory, geographic or other barriers to expansion; whether the additional demand could be served with existing capacity; if not, whether the industry could grow to meet the additional demand; and any instance where the industry will be unwilling or unable to fill the need for transportation and transfer station services in a manner that is environmentally acceptable and provides an adequate level of service at reasonable costs.

### Members committee report : critical point one

Calgary, Alta. : Acid Deposition Research Program, 1989. 42 p.  
MICROLOG 90-03274 1 fiche (Available on fiche only)

The program was initiated in 1984 to carry out research on the effects of acidifying compounds in the environment. This publication reviews the objectives for the medical diagnostic review, the occupational health feasibility study and the biophysical research program. The biophysical research program consisted of continuous air monitoring for oxides of sulphur and oxides of nitrogen from sites on Fortress Mountain and in Crossfield. The medical diagnostic review carried out a health survey of the residents of Pincher Creek in the vicinity of the sour gas plant and compared it to a control group. The occupational health feasibility study conducted a study of the effects of acid deposition on workers.

**Mesure de la vitesse d'échange d'air  
extérieur**

Ottawa : Travaux publics Canada, Services  
d'architecture et de génie, 1988. vi, 43, vi,  
38 p. : ill. Bibliogr. (Série sur l'évaluation du  
rendement des immeubles ; Document D37)  
*Bilingue (Measurement of outdoor air...)*.  
MICROLOG 90-02178 2 fiche

Ce document décrit une méthode qui permet  
grâce à des gaz traceurs d'évaluer la capacité  
des systèmes de ventilation de fournir de l'air  
extérieur. Les techniques proposées  
s'appliquent surtout aux grandes tours à  
bureaux, mais on peut les adapter aux autres  
types d'immeubles. De plus, il est important  
de connaître le taux d'échange entre l'air  
intérieur et l'air extérieur, c'est le principal  
critère de la performance d'un système de  
ventilation. Le document propose d'évaluer

cette performance grâce à une technique  
utilisant un gaz traceur unique pour déterminer  
le taux global de renouvellement d'air d'un  
immeuble réalisé par le système de ventilation.

**Metallurgical investigation of main  
steam line weldment cracking,  
Lakeview TGS**

by H.J. Westwood. Toronto : Ontario Hydro,  
Research Division, 1989. iv, 42 p. : ill. Bibliogr.  
(Report ; no. 89-233-K)  
MICROLOG 90-03531 1 fiche

In early March, 1989, a steam leakage in the  
vicinity of the west main steam stop valve  
caused a shutdown of Unit 3 at Lakeview  
Thermal Generating Station. Insulation removal  
and inspection revealed a large through-wall  
circumferential crack adjacent to the weld  
between a T piece and the main steam stop  
valve. Similar, but less advanced damage was  
then disclosed in the east main steam line and  
also in both east and west lines of the identical  
Unit 4 at the same location. All these sections  
were removed and sent for metallurgical  
investigation, as were other suspect sections  
from these units and units 6 and 7. This  
report concerns the conventional destructive  
metallurgical investigation which was carried out  
on the removed sections from failed, damaged  
and suspect locations to characterize the  
damage mechanism in detail and to investigate  
the reasons for the damage.

**A Method to measure the coal gas release from run of the mine coal**

by D.A. Young. Ottawa : Canada Centre for Mineral and Energy Technology, Coal Research Laboratories, 1989. vi, 49 p. : ill. Bibliogr. (Report ; CRL 89-52(TR))  
MICROLOG 90-00166 1 fiche

The Cape Breton Coal Research Laboratory environmental group is studying the sources of gas emissions into the coal mines of the Cape Breton Development Corporation. This report deals with the release of coal gas to the mine's ventilation network upon transportation of the coal from the mine. The method incorporates the use of a dry test meter and lightweight sample container that can be used in the immediate mining area to measure the amount of coal gas. The results of 8 field trials are used to present a graphical description of these release patterns.

**Méthode d'analyse des polychlorodibenzoparadiioxines (PCDD), des polychlorodibenzofuranes (PCDF) et des polychlorobiphényles (PCB) dans les échantillons de résidus de combustion d'incinérateurs de PCB -- Rev.**

Centre environnemental de River Road. Division de la chimie. Ottawa : Environnement Canada, Service de la protection de l'environnement, 1990. viii, 39, viii, 36 p. : ill. (Rapport ; SPE 1/RM/3) *Bilingue (A Method for the analysis of...)*. ISBN 0-662-57519-9  
MICROLOG 90-05700 1 fiche

La méthode d'analyse décrite dans ce document sert à doser les PCDD, les PCDF et les PCB présents dans des échantillons de la charge, des gaz de cheminées et des résidus solides des incinérateurs de déchets contenant des PCB. Les résultats des dosages permettent d'évaluer le rendement des incinérateurs ainsi que le niveau de leurs émissions. La méthode présentée comprend un mode opératoire pour l'extraction des échantillons, leur purification et leur séparation par chromatographie et la confirmation de l'identité et le dosage des composés.

### The Methodology of forecasting the numbers of chum salmon *Oncorhynchus keta*, (Walbaum) and its justification

by O.F. Gritsenko and A.A. Kovtun. Ottawa : National Research Council, Canada Institute for Scientific and Technical Information, 1989. 4 p. (Canadian translation of fisheries and aquatic sciences ; no. 5465) Originally published in Russian. ISSN 0704-3716 MICROLOG 90-00605 1 fiche

The data on the reproduction indexes of chum salmon in the Tym' River basin, northeastern coast of Sakhalin, collected over the past 25 years, have allowed calculations of the size of generations, the rate of maturation, and the coefficient of return of the generations as a whole, as well as of individual age groups with regard to the number of juvenile downstream-migrants. The forecasting includes the total

number of downstream-migrants from the natural spawning grounds and the Ado-Tymovskii fish-rearing station. An analysis of these data carried out in 1985 made it possible to develop a methodology forecasting the size of a population 1-2 years in advance.

### Methods for measuring the air heater leakage in a coal fired thermal generating station

by S.-D. Chang. Toronto : Ontario Hydro, Research Division, 1989. ii, 15 p. (Report ; no. 89-98-K) MICROLOG 90-00410 1 fiche

The tracer gas technique can be used to measure the air leakage to the flue gas in the air heater of a coal fired thermal generating station but the results must be verified if poor mixing is encountered. Because there is no possibility of direct measurement through conventional instrumentation, an indirect method is needed. This report presents the results of 2 methods, one based on the carbon dioxide balance, and the other based on the oxygen balance. EN ON PR PS SC

### Methods for producing liquid hydrocarbons from coal

Edmonton : Alberta Energy, Scientific and Engineering Services and Research Division, 1990. 17 p. : ill. Bibliogr. ISBN 0-86499-651-9 MICROLOG 90-03612 1 fiche

Summaries of research projects for producing liquid hydrocarbon from coal. Projects include a description of the initial coal liquefaction studies; results from a 2-kg continuous-flow bench-scale liquefaction unit used to liquify Highvale and Vesta coals in a dispersed-catalyst process involving various catalysts and single- or two-stage processing; supercritical gas extraction of coal using a lignite from Saskatchewan and a high-volatile bituminous coal from Alberta; the liquefaction of coal with natural gas; and coal conversion waste water treatment. ### Methods to utilize tobacco kilns for curing (drying) and/or storage of alternate crops : interim report

by D.L. Van Hooren and A.J. Ratajcius. Guelph, Ont. : Agricultural Energy Centre, 1989. 91 p. : ill. (Report ; no. 89-5103) MICROLOG 90-03942 1 fiche

In recent years, Ontario tobacco producers have had to reduce production levels due to a declining demand for flue-cured tobacco. Some of these producers have tried growing other crops to supplement their income, some of which require curing and/or storage. Every flue-curing tobacco farm in the province is equipped with either stick or bulk kilns and one or more tobacco storage barns. In 1988, projects were undertaken to develop techniques for utilizing tobacco kilns for curing and/or storage of popcorn, ginseng, peanuts, spanish onions, dried flowers and sweet potatoes. This report presents those findings. AG ON PR SC

**Metro cordon count program, 1987**

Toronto : Metropolitan Toronto Planning Dept., Transportation Division, 1988. x, 103 p. : ill., maps. *CSI 89181.003*.  
MICROLOG 90-06564 2 fiche

The program collects data on weekday vehicle and person travel throughout the Metropolitan area and uses it to monitor travel trends and the impacts of improvements to the transportation system. The 1987 program was actually conducted over 2 years, with the downtown cordon and downtown core surveyed in 1986 and the remainder of Metro Toronto in 1987. The Regional Municipalities of York and Peel also conducted cordon counts in 1987 at the same time, using similar counting standards and incorporating Metro data for the boundary crossings. The report presents a summary of the data on vehicle and person movements, distribution of trips by time; automobile occupancy; usage of subways, commuter rail services, and expressways; and the distribution of person trips between the automobile, transit and commuter rail.

Metropolitan Toronto (Ont.). Transportation Division. Toronto : The Division, 1989. 85 p. : ill., maps. (Metropolitan plan review : report ; no. 8)  
MICROLOG 90-00655 1 fiche

This report is part of a series of background and proposal papers prepared for a review of the official plan for the Municipality of Metropolitan Toronto, covering the cities of Toronto, Etobicoke, York, North York and Scarborough and the Borough of East York. The official plan is based on a transportation system consisting of a transit network (buses, streetcars, intermediate capacity transit, and subway) and a road network (urban expressways and arterial roads) which are supported by provincial (highways and inter-regional transit - GO) and local (collector and local roads) transportation networks, concentrating on urban transit. This paper examines the future conditions that are expected to impact the Metro road network, and the challenges and issues that will have to be addressed. It also outlines new and expanded official plan policies which place greater emphasis on the planning and operation of the Metro road system.

MICROLOG 90-00079 1 fiche

In 1887, T.H. Bean described a petromyzont which he called *Lampetra spadicea*, based on a single specimen sent to him from Guanajuato. In the Spanish translation of Bean's work, published in 1892, the common name of "Jacana eel" was assigned to the species. Little attention has been given to this member of the Petromyzonidae since those early accounts. As there were only 6 known specimens of *Lampetra spadicea*, 1,354 ammocoetes and approximately 100 adults were captured and studied in Jacana and Zamora in the state of Michoacán and in Chapala Lake in Jalisco. This paper describes the growth, feeding habits and other general biological features of both the normal sized form of the eel and a dwarf form called *Tetrapleurodon geminis*.

**Mid-Cambrian trilobites from the lowest part of the Cow Head Group, western Newfoundland**

by G.A. Young and R. Ludvigsen. Ottawa : Energy, Mines and Resources Canada, Geological Survey of Canada, 1989. 49 p. : ill. Bibliogr. (Bulletin ; 392) ISBN 0-660-13251-6  
MICROLOG 90-00012 1 fiche

The diverse trilobite faunas described in this report belong to the C.H. Kindle collection of western Newfoundland trilobites. In 1978, the GSC acquired Kindle's collection of approximately 20,000 specimens, which he had extracted over 40 years from fossiliferous boulders of the mid-Cambrian to Middle Ordovician Cow Head Group conglomerates. This work is the first systematic study of trilobites from Kindle's collection. Of the 1300 specimens studied, 29 species representing 20 genera are described and 11 of the species are new. Three trilobite biofacies are defined based on the abundance of genera in separate boulders. The report begins with a biofacies analysis of specimen abundance of genera (or higher taxa) and then proceeds to a zonal analysis of the presence of species.

**Mid-scale testing of dispersant effectiveness**

by R. Belore. Ottawa : Environmental Studies Research Funds ; S.L. Ross Environmental Research Limited, 1987. vi, 82 p. : ill. Bibliogr. (Environmental Studies Research Funds report ; no. 068) ISBN 0-920783-69-4  
MICROLOG 90-06961 1 fiche

Ever since chemical dispersants were produced to treat offshore oil spills, attempts have been made to develop a simple laboratory test with which to predict their effectiveness under actual field conditions. This project developed a mid-scale test for dispersant effectiveness that would incorporate all factors believed to be important in field applications. Field-scale dispersant application gear was used to apply dispersant to the oil-water system and mixing energy was generated by waves and wind to better simulate oceanic mixing. Sixteen tests were conducted to evaluate the potential of the experimental set-up and procedure. The effectiveness of two dispersants (Corexit 9527 and Enersperse 700) were evaluated on two oil types (fresh and weathered Alberta sweet mixed blend) at two thicknesses (1 mm and 0.5 mm) and at two mixing energy levels. The dispersant-to-oil ratio used was 1:20 and the water temperature was 15°C.

**Might suicide underreporting affect hypothesis test? The case of suicide and divorce**

by M. Speechley and F. Trovato. Edmonton : University of Alberta, Dept. of Sociology, 1989. 10 p. Bibliogr. (Research discussion paper ; no. 60) ISSN 0317-2473  
MICROLOG 90-06442 1 fiche

While there is virtual consensus that true suicides are underreported in vital statistics, the issue whether the overall extent of underreporting is sufficient to mislead epidemiologic inquiry remains unsettled. One method of estimating the completeness of official returns consists of adding to the suicide rate deaths from other mortality categories that are themselves suspected of containing misclassified suicides. The purpose of this study is to extend this approach by retesting an actual suicide hypothesis using two reformulated rates that presumably contain most missed suicides. The hypothesis to be tested concerns the positive association between rates of suicide and divorce that has recently been studied by Trovato using Canadian data.

**The Military use of space**

Ottawa : Canadian Institute for International Peace and Security, 1989. 2 p. Bibliogr. (Factsheet ; 11) French ed. (L'Utilisation militaire...) on the same fiche. ISBN 0-662-17346-5  
MICROLOG 90-01975 1 fiche

Just as the military has made use of land, sea and air to carry out its operations, so too does it make use of space. The use of space by the military falls into two broad categories: the use of space for systems other than weapons, and the direct use of space for weapons purposes. This factsheet presents information on the utilization of space by the military.

**Millbank 400 MW combustion turbine generating station : environmental impact assessment : final report**

Fredericton : NB Power, 1990. vii, 398 p. : ill., maps. Bibliogr. French ed. (Etude d'impact sur...Millbank...) : 90-06525/5.  
MICROLOG 90-06524 5 fiche

In late 1989, an opportunity arose for NB Power to sell 400 MW of peaking power to Hydro Québec beginning in 1991. Combustion turbine generating units are the only technology which could be built in time to take advantage of this opportunity. NB Power proposes to construct a thermal generating station at Millbank, on the northern shore of the Miramichi River across from the Chatham Generating Station. The proposed plant is to consist of 4x100MW combustion turbine units

fuelled with No.2 diesel oil. The plant will include on-site fuel storage tanks, a stand-alone water supply, a switchyard, and transmission facilities to connect with the existing grid. This assessment deals with the construction, operation and decommissioning of the plant in an area up to 5 km from the plant. Investigations included potential impacts on groundwater and the local airshed, noise during construction and operation, and socioeconomic impacts.

**The Mineral characteristics that affect metal recoveries from the Cu, Zn, Pb and Ag ores from Manitoba, part 2 : a mineralogical evaluation of the behaviour of metallic minerals in the Trout Lake concentrator circuit**

by R.E. Healy. Ottawa : Canada Centre for Mineral and Energy Technology, Mineral Sciences Laboratories, 1988. 2 v. : ill. Bibliogr. (Report ; MSL 88-61(IR)) Contents: Vol. 1 : Report and appendices -- vol. 2 : Detailed statistical appendices.

MICROLOG 90-05720 7 fiche

The Trout Lake deposit is a volcanogenic massive sulphide deposit that contains the recoverable metals Cu, Zn, Au, Ag, Pb, Cd, Co and Se. The study was undertaken to establish whether the volcanogenic massive sulphide deposits of Manitoba contain unique mineralogical characteristics, and whether these characteristics can be utilized to modify metallurgical practises, so that recovery could be optimised. The study was divided into part 1, which defined the mineralogical characteristics that could have a bearing on mining and mineral processing, and part 2, a mineralogical study of the behaviour of the minerals in the concentrator. This report covers part 2, which involves sampling the Trout Lake concentrator circuit, and performing sieve size, chemical, petrographic and image analysis on each of the products sampled. The image analysis included modal, grain size, and mineral liberation analysis. Material balance calculations were performed on a wide variety of the analytical data thus gathered, to determine the behaviour and inter-relationships of the metals and the minerals through the circuit.

**The Mineral characteristics that affect metal recoveries from the Cu, Zn, Pb and Ag ores from Manitoba, part 3 : a mineralogical evaluation of the behaviour of metallic minerals in the HBMS concentrator circuit**

by R.E. Healy and W. Petruk. Ottawa : Canada Centre for Mineral and Energy Technology, Mineral Sciences Laboratories, 1989. viii, 150 p. : ill. Bibliogr. (Report ; MSL 89-139(IR))

MICROLOG 90-02559 2 fiche

Low grade Cu, Zn, Au and Ag ore fed to the HBMS concentrator circuit was supplied by the Centennial and South Main (Flin Flon) mines. Circuit samples were assayed for 15 elements, and image analysis was done to determine the modal quantities, grain size distributions and liberations of the minerals. Material balances were done to simulate the behaviour, and to determine the recovery of metals, minerals, and of free and unliberated grains of the valuable minerals at each point in the circuit.

**A Mineral resource assessment of the Chilkol Lake planning area**

by G.P. McLaren. Victoria : Ministry of Energy, Mines and Petroleum Resources, Mineral Resources Division, Geological Survey Branch, 1990. xiv, 117 p. : ill., maps. Bibliogr. (Bulletin ; 81) *Fold. maps not filmed.* ISSN 0226-7497 ISBN 0-7718-8869-4 MICROLOG 90-05842 2 fiche

The Chilkol Lake planning area encompasses a portion of the transition zone between the mountains of the Coast Ranges and the rolling terrain of the interior plateau in south-central B.C. It comprises an area of high wildlife and recreational resource values that have long been studied as a candidate for a provincial park with a region of high mineral potential. This mineral resource assessment was undertaken to determine the mineral potential of the planning area in detail. A program of 1:50,000 scale geological mapping, detailed stream-sediment sampling, and prospecting with extensive rock chip sampling was conducted to identify the mineral potential. BC NR PR PS SC

**Mineralogical examination of tailings from the Heath Steele Mill, Newcastle area, New Brunswick**

by J.L. Jambor and D.W. Blowes. Ottawa : Canada Centre for Mineral and Energy Technology, Mineral Sciences Laboratories, 1989. ii, 23 p. : ill. Bibliogr. (Report ; MSL 89-137(IR)) MICROLOG 90-07116 1 fiche

The Heath Steele minesite is about 51 km northwest of Newcastle, New Brunswick. The exploited orebodies are of the massive sulphide type, and consist of a lead-zinc ore hosted predominantly by pyrite, and a copper-rich ore in which the main iron sulphide is pyrrhotite. Production began in 1957, but periodic shutdowns have occurred. Mill tailings were deposited in 2 impoundments. As part of a comparative study of cemented layers in the tailings, 10 samples were analysed and characterized both visually and microscopically. This report presents the results of the analysis. • AP CA CM NR PS SC

**The Mineralogy and geochemistry of the Hemlo gold deposit, Ontario**

by D.C. Harris. Ottawa : Geological Survey of Canada, 1989. 92 p. : ill., maps. (Economic geology report ; no. 38) ISBN 0-660-13269-9 MICROLOG 90-01132 1 fiche

The Hemlo gold deposit is near the northeast shore of Lake Superior, 35 km east of Marathon, Ontario, adjacent to the TransCanada Highway. This report describes the mineralogy of the main Hemlo gold deposit, the distribution of the various minerals and some geochemical

characteristics of the ore zones. The study was carried out by reflected light and transmitted light microscopy, quantitative and qualitative electron-microprobe analysis and geochemical analysis. CA NR ON PS SC

**Mineralogy of the Lake Zone, Thor Lake, N.W.T. : final report**

by D.R. Pinckston and D.G.W. Smith. Yellowknife : Indian and Northern Affairs Canada, NWT Geology Division, 1988. 13 p. Bibliogr. MICROLOG 90-00029 1 fiche

An economically significant beryllium, niobium, tantalum, REE, yttrium, zirconium, gallium deposit, known as the Thor Lake rare-metal deposit, lies approximately 100 km southeast of Yellowknife and about 5 km north of Great Slave Lake. Mineralization is associated with a peralkaline pluton containing the Thor Lake syenite and Grace Lake granite which is, in turn, part of a larger body known as the Blachford Lake intrusive suite. Five zones in this deposit have been identified. The T, R, S, Lake and Fluorite zones. This report presents the results of a mineralogical study. NO NR PR PS SC

**Minimum ignition temperatures of dust layers using the Setchkin apparatus**

by K.J. Mintz. Ottawa : Canada Centre for Mineral and Energy Technology, Mining Research Laboratories, 1990. iii, 22 p. : ill. Bibliogr. (Report ; MRL 90-037(TR))  
MICROLOG 90-07124 1 fiche

The ignition of dust layers on hot surfaces is a potential hazard in many industries, because it can result in a major fire or even an explosion. There are two methods for measuring the minimum ignition temperature (MIT), the second of which is addressed in this paper. This second method is the furnace method, in which the sample is surrounded by a uniform temperature. This project developed a method for routine use of the Setchkin apparatus for measuring the MIT of dust layers and studied the effects of the various parameters on the results. Pittsburgh standard coal dust and lycopodium are widely used as standards; both of them were used in this study.

### Ministry of Forests guideline to selecting parent trees in B.C.

British Columbia. Ministry of Forests. Victoria : The Ministry, 1990. 44 p. : ill. Bibliogr.  
MICROLOG 90-04746 1 fiche

Guideline to introduce the concepts and procedures of parent tree selection. The guide discusses recommended planning procedures; reviews various field selection methods used in B.C.; provides selection criteria pertaining to most conifer species in B.C.; presents instructions to complete the parent tree record form and mark selected trees for field identification; and outlines registration procedures for newly selected parent trees.

### Minority language education rights : section 23 of the Charter

by J.-C. Ducharme. Ottawa : Library of Parliament, Research Branch, 1989. 18 p. Bibliogr. (Current issue review ; 89-6E) French ed. (Les Droits à l'instruction...) on the same fiche. ISBN 0-660-13327-X  
MICROLOG 90-01849 1 fiche

Section 23 of the Charter enables Canadian parents to have their children educated in the official language of their choice. However, the right to minority language education is not an absolute one; certain conditions must be met before the right can be claimed. After a brief discussion of the relationship between denominational and linguistic rights, this paper describes conditions for exercising rights to minority language education and the scope of these rights.

### Mobile water treatment plant testing at the Obed Washery : June-December, 1985

by K.A. Hashmi, et al. Ottawa : Canada Centre for Mineral and Energy Technology, Coal Research Laboratories, 1987. iv, 179 p. : ill. (Report ; CRL 87-38(CF))  
MICROLOG 90-02427 2 fiche

Coal washing produces effluents containing fine coal, clay, shale particles, and other solid matter. The volume produced depends on the washery capacity and the type of beneficiation methods employed and accounts for a significant portion of total processing costs.

This report gives the results of both bench scale and pilot scale tests to assist in the selection of suitable flocculants for the water treatment circuit at the Obed Mountain Coal Co. The evaluation included flocculants from 5 suppliers (Allied Colloids, Alchem, Calgon, Hart, and Diachem), with the Allied flocculants (8C26 and 8852) currently being used in the washery. The test work included a performance evaluation of the supplied flocculants on both bench scale and pilot scale using the FPL mobile water treatment plant. The mobile plant includes a 2.44m diameter thickener and appropriate auxiliary equipment.

### Un Modèle de gestion

par J.L. Manion. Ottawa : Centre canadien de gestion, 1989. 14, 14 p. *Bilingue (A Management model)*. ISBN 0-662-56701-3  
MICROLOG 90-03216 1 fiche

La gestion, comme science, fait pâle figure auprès des équations astreignantes et des preuves rigoureuses de la physique ou de la chimie. Des observateurs ont extrait d'une masse de caractéristiques, des traits communs que se partagent les gestionnaires d'entreprises prospères. Bien qu'il soit plus difficile de pratiquer une saine gestion (et de la mesurer) au sein du gouvernement fédéral que dans l'entreprise privée, quelques éléments semblent toujours en ressortir. Evidemment, de nombreux facteurs contribuent à assurer le succès d'un ministère parmi lesquels ressortent l'orientation politique, les lignes de conduite judiciaires et une saine législation. Ce document aborde sept facteurs que contribuent à assurer le succès d'un ministère.

### Modelling of molten metal penetration into a particulate layer

Kanata, Ont. : Arctec Canada Limited, 1988. ii, 77 p. : ill. Bibliogr. *CANMET contract: OSQ85-00341*.  
MICROLOG 90-05663 1 fiche

Toughness and resistance to abrasion are the 2 most important properties needed for parts such as digger teeth but these two requirements conflict. However, by providing an abrasion resistant surface layer and a tough core, the desired combination of properties can

be achieved. A model was developed to define attributes to predict the penetration of molten alloy into a particulate layer. This study considers tungsten carbide as the powder and steel as the molten alloy. Results are presented for flow of molten steel through the powder bed under 3 gauge pressures. A Peclet number is used to estimate the relative magnitude of heat transfer due to convection and conduction in the axial direction, from which an eddy conductivity value is calculated.

### Modelling the container fleet management problem using a stochastic dynamic approach

by T.G. Crainic, P. Dejax and M. Gendreau. Montreal : Université de Montréal, Centre de recherche sur les transports, 1990. 22 p.  
Bibliogr. (Publication ; no. 685)  
MICROLOG 90-04330 1 fiche

A two-level approach is proposed for the global, integrated planning of the land distribution and transportation of containers. The topmost level is concerned with strategic/tactical planning issues such as depot selection, allocation of clients to depots, and determination of major interdepot empty container flows. The second component corresponds to the level of the day-to-day operational planning of the company's activities. The paper focuses on the description of the operational decision-support system and its two main components: the dynamic stochastic empty container allocation model and the model for routing loaded and empty containers.

### Modelling the daily traffic flows on an hourly basis

by H. Spiess and D. Suter. Montreal : Université de Montréal, Centre de recherche sur les transports, 1990. 10 p. : ill. Bibliogr. (Publication ; no. 700)  
MICROLOG 90-06426 1 fiche

This paper describes a new approach to model the variations of the traffic flows within the day, without leaving the steady-state framework. A small set of basic states, each represented by a demand matrix, is defined and each hour of the day is represented by a characteristic combination of these states. Given hourly traffic counts on a subset of links, the set of coefficients for each hour is determined by combining the equilibrium assignment model with a multiple linear regression. The result is a practical model for forecasting the traffic volumes and speeds on the entire network for each hour of the day. The model was successfully applied to the city of Basel, Switzerland, using a network of 330 traffic

zones, 2200 street links and 220 countposts with hourly counts.

**Modification and testing of a segmented model of an icebreaker to evaluate ice resistance mathematical models**

prepared for the Transportation Development Centre ; by I.F. Glen, R. Abdelnour and M. Steele. Kanata, Ont. : Fleet Technology Limited, 1989. xxx, 150 p. : ill.  
MICROLOG 90-01750 2 fiche

The 3d phase of an experimental program designed to investigate the components of ice resistance on the hull of a vessel using a physically segmented model was completed. This phase compared the loads measured on portions of the hull of an icebreaker with those predicted by mathematical prediction models, to obtain a greater understanding of the ship/ice interaction process. Further development and testing in ice of a segmented model of the R-class icebreaker was completed. The segmentation system comprises free floating panels of the hull on the port side bow, instrumented to measure load on the segment. The data were analyzed to investigate the local ship/ice interaction phenomena and to determine the contribution to resistance from each portion of the hull. The results were then compared with the mathematical predictor models RICE, a semi-empirical model, and the analytical model of Dr. D. Carter.

**Modification du règlement déterminant la liste des diplômes donnant accès à la Corporation professionnelle des diététistes du Québec**

avis au Ministre responsable de l'application du Code des professions. Sainte-Foy, Québec : Gouvernement du Québec, Conseil des universités, 1990. 5 p. (Avis ; no 89.11)  
ISSN 0709-3985 ISBN 2-550-20584-7  
MICROLOG 90-03557 1 fiche

Trois universités québécoises offrent des programmes de baccalauréat dont le diplôme donne accès à la Corporation des diététistes du Québec (CPDQ) ; l'Université Laval, l'Université de Montréal et l'Université McGill. Cette dernière vient de changer l'appellation de son diplôme pour que celle-ci reflète mieux les objectifs et le contenu du programme correspondant et se conforme aux appellations utilisées par l'Université Laval et l'Université de Montréal. Le Conseil recommande l'adoption de ce projet de règlement. Ce document fait la lumière sur la question.

**A Modified colorimetric method of small amount hydrogen peroxide and its contents in some marine foods**

by S. Umemoto. Ottawa : National Research Council, Canada Institute for Scientific and Technical Information, 1989. 17 p. Bibliogr. (Canadian translation of fisheries and aquatic sciences ; no. 5482) *Originally published in Japanese, by the Tokai Regional Fisheries Research Laboratory in Japan.* ISSN 0704-3716  
MICROLOG 90-01678 1 fiche

In the past, the volume of residual hydrogen peroxide in food in Japan was set at 100 ppm or less for noodles, boiled fish paste and such, and at 30 ppm or less for the other food articles. Recently, however, as the carcinogenicity of hydrogen peroxide became a cause for concern, a revision of regulations meant that the hydrogen peroxide had to be degraded or removed prior to producing the final food products. To be able to comply with these stricter regulations, it was necessary to develop a method for the analysis of trace hydrogen peroxide in food articles. This paper describes the use of the colorimetric method, the fluorescence method and other methods used to analyze trace hydrogen peroxide. The paper examined an analytical method involving an oxygen reaction in the analytical operation stages so as to avoid as much as possible any effect upon the measurement values from other oxidative matters which might be admixed in the samples.

**Modified radioactive filter transportation package : accidental impact simulation for 9 m drop orientations**

by D.R. Metzger and R.G. Sauvé. Toronto : Ontario Hydro, Research Division, 1990. iv, 132 p. : ill. Bibliogr. (Report ; no. 90-1-K)  
MICROLOG 90-06101 2 fiche

Packages used in the road transportation of low level radioactive wastes must demonstrate the ability to withstand severe impacts such as those prescribed in the AECB regulations. One such package is the radioactive filter transportation package. This report presents the results of structural assessments of the most recent design when subjected to postulated accidental impact scenarios involving two 9 m drop orientations using 1/4 scale analytical models. Particular emphasis was given to the overpack lid to body bolted connection which has undergone modification.

### Money after Meech

by D.E.W. Laidler. Toronto : C.D. Howe Institute, 1990. 12 p. Bibliogr. (Commentary ; no. 22) ISSN 0824-8001 ISBN 0-88806-266-4  
MICROLOG 90-07176 1 fiche

In the aftermath of the failure of the Meech Lake Accord, and as part of a move toward greater political autonomy, there is a question of whether Quebec should, or will, create its own currency. This Commentary argues, in turn: that the prospect of the dissolution of the Canadian monetary system might disturb international capital markets; that Quebec nevertheless has a strong interest in maintaining the current monetary system; that this interest involves the maintenance of other economic ties, too; and that these economic ties argue for the continued existence of a Canadian federal government in which Quebec is represented.

### Monitoring costs and their implications for direct dischargers in the Ontario inorganic chemical industry : final report

Toronto : Ministry of the Environment, Policy and Planning Branch, Socio-Economic Section, 1989. v, 47 p. : ill. Bibliogr. ISBN 0-7729-5821-1  
MICROLOG 90-01032 1 fiche

The municipal-industrial strategy for abatement (MISA) intends to achieve the virtual elimination of toxic contaminants in municipal and industrial discharges into waterways. The MISA program consists of regulations, effluent limits, abatement programs and enforcement activities, and a comprehensive economic assessment program. This report presents estimates of incremental costs to the 22 inorganic chemical sector plants in Ontario of the requirements of the sector monitoring regulation. The report gives an estimate of what the costs will be under the inorganic chemical sector regulations and what the costs could be if potential costs were incurred under a more comprehensive, across-the-board set of requirements. The report also provides estimates of the economic implications of the monitoring costs on the sector, and where possible, on individual firms or plants.

### Monitoring costs and their implications for direct dischargers in the Ontario metal casting industry : report

Ontario. Ministry of the Environment. Socio-Economic Section. Toronto : The Ministry, 1989. vi, 61 p. : ill. Bibliogr.  
MICROLOG 90-03861 1 fiche

The Municipal-Industrial Strategy for Abatement (MISA) is intended to achieve the virtual elimination of toxic contaminants in municipal and industrial discharges into waterways. This investigation is part of the economic assessment component of the MISA program and applies to the metal casting sector, consisting of those establishments that manufacture metallic objects by cooling molten metal in a mold or die. The Regulation applies to only 13 out of about 300 plants in Ontario. Six of the 13 firms that own these plants are private companies and the other 7 are public firms. Capital and operating costs are estimated by plant for each of the major monitoring activities of sampling, characterization, routine analyses, toxicity testing, flow measurement, and reporting. The

capital cost estimates and some of the operating cost estimates were provided by company officials.

### Monitoring costs and their implications for direct dischargers in the Ontario mineral industry : group B, industrial minerals sector

Ontario. Ministry of the Environment, Socio-Economic Section. Toronto : The Ministry, 1989. x, 107 p. : ill. Bibliogr. ISBN 0-7729-6421-1  
MICROLOG 90-03228 2 fiche

The Municipal-Industrial Strategy for Abatement (MISA) is intended to achieve the virtual elimination of toxic contaminants in municipal and industrial discharges into waterways. Economic assessments are a fundamental component of the MISA program by determining the magnitude of the costs and benefits of various regulations and other program elements, their distribution, and by determining the least-cost mechanisms. This report presents estimates of the incremental costs to industrial minerals plants which are direct dischargers subject to the MISA monitoring regulations. A total of 72 firms with 125 Ontario plant locations are affected, covering cement, chemical lime, clay and shale, graphite, gypsum, magnesium, quarries, sand and gravel and talc. Capital and operating and maintenance costs are estimated by firm for each of sampling requirements, flow measurement, routine analyses, characterization analyses, toxicity testing and reporting.

### Monitoring methodology for assessing the impact of forest herbicide use on small mammal populations in British Columbia

by C. Ritchie and T.P. Sullivan. S.I. : Forest Resource Development Agreement, 1989. viii, 23 p. Bibliogr. (FRDA report ; 081) ISSN 0835-0752  
MICROLOG 90-01252 1 fiche

Several small mammals were identified as useful target species to monitor herbicide impacts in the coastal western hemlock biogeoclimatic zone on Vancouver Island and the coastal mainland, and in the sub-boreal spruce biogeoclimatic zone. Target biogeoclimatic subzones were also identified. Because of the variability within small mammal populations, intensive monitoring is the only objective and rigorous method to assess potential impacts from habitat alteration. A method for vegetation monitoring is also presented.

### Monitoring steelhead trout at the Keogh River as an index of stock status and smolt-to-adult survival : correlations with other data sources

by B.R. Ward and J.C. Wightman. Victoria : Ministry of Environment, 1989. i, 21 p. : ill. Bibliogr. (Fisheries management report ; no. 95) ISSN 0705-5390 ISBN 0-7726-1033-9  
MICROLOG 90-00641 1 fiche

An index stream must reflect fish population trends in other river systems to be of management value. This report examines the feasibility of the Keogh River as an index stream or indicator of stock status, after 13 years of data collection. Estimates of the adult steelhead populations of the Keogh River were used in correlation analyses with catch data from local rivers, typical winter-run streams on Vancouver Island, the wild catch on Vancouver Island, and underwater counts from 2 summer-run streams. Six years of estimates of survival of steelhead smolts to return at fish fences at the Keogh River and Snow Creek were also compared.

### Monitoring, auditing and administration costs for revisions to Regulation 308

SENEC Consultants Limited. Toronto : Environment Ontario, Policy and Planning Branch, 1990. vi, 225 p. Bibliogr. ISBN 0-7729-7284-2  
MICROLOG 90-07010 3 fiche

Since 1971, one of the main means of controlling air pollution in Ontario has been the Environmental Protection Act and the regulations pursuant to the Act, in particular Regulation 308, which specifies the maximum permitted concentration of numerous contaminants at a point of impingement from a source of contamination (other than a motor vehicle). It is proposed that Reg. 308 be revised so that the existing point of impingement standards are replaced with new ambient air standards and technology-based emission limits. The proposed revisions are expected to result in greater control of emissions and increased control of costs. This study estimated the additional monitoring, auditing and administration costs required to ensure compliance with the proposed revisions for each major industrial sector, for waste disposal companies, for municipalities, and for the MOE.

### Monthly means of temperature, salinity and sigma-t for the Gulf of St. Lawrence

by B. Petrie. Dartmouth, N.S. : Bedford Institute of Oceanography, 1990. iv, 137 p. : maps. Bibliogr. (Canadian technical report of hydrography and ocean sciences ; no. 126) ISSN 0711-6774  
MICROLOG 90-05147 2 fiche

Report on the monthly means and standard deviations of temperature and salinity data collected in the Gulf of St. Lawrence. Statistics of sigma-t, derived from the data, are compiled as well. The Gulf was divided into 17 areas extending from the Estuary to the Strait of Belle Isle and to Cabot Strait. The means and standard deviations were calculated at standard depths from archived bottle and CTD data collected between 1915 and 1987. The data are presented in tables for all areas and as time series plots at selected depths for several areas. In addition, where sufficient data were available, the annual and semi-annual components were computed using harmonic analysis.

### Moored current and pressure data from the Labrador/Newfoundland Shelf, June 1985-July 1987

by D.G. Wright, J.R.N. Lazier and W. Armstrong. Dartmouth, N.S. : Bedford Institute of Oceanography, 1988. x, 258 p. : ill., maps. (Canadian data report of hydrography and ocean sciences ; no. 62) ISSN 0711-6721  
MICROLOG 90-06587 3 fiche

From 1985-86, there were 11 records of sub-surface pressure and 11 records of currents collected over the Labrador-Nfld. Shelf, each extending more than 90 days. From 1986-87, there were 17 additional pressure records and 26 additional current meter records. Several CTD sections were also collected across the shelf. This report presents those data as sections of temperature, salinity, density and buoyancy frequency; tidal constituents for pressures and currents; frequency distributions of de-tided pressure variations and current speeds; spectra of pressure and current variations; progressive vector diagrams and 'stick plots' of low-pass filtered currents; and time series plots of low-pass filtered pressure, temperature, salinity, density and current components. Residual currents are presented in east-west/north-south as well as major/minor axis coordinate systems and basic statistics are briefly summarized for each.

### Moose damage to pre-commercially thinned balsam fir stands : review of research and management implications

by I.D. Thompson and W.J. Curran. St. John's : Forestry Canada, Newfoundland and Labrador Region, 1989. iii, 17 p. : ill. Bibliogr. (Information report ; N-X-272) ISSN 0704-7657 ISBN 0-662-17585-9  
MICROLOG 90-05792 1 fiche

During the summer of 1986, 21 thinned stands and 16 adjacent unthinned stands located in the western and central areas of Newfoundland were surveyed for browsing damage by moose. Sites were chosen if thinning had occurred during the fall of 1983 or the spring of 1984, giving 2 years of growth. Stands were surveyed for stem density and damage by moose using a plotless method which involves placing a number of points within a stand and measuring 3 distances from point to plant, and from plant to plant. Trees were divided into heights of 0.5-2.9 m and greater than 3.0 m, since moose browse up to 3 m in height. Species, height, and level of browsing damage was recorded for each tree in both height classes. Moose winter pellets were counted on 20 randomly placed 10 m circular plots as an indirect estimate of time spent by moose in each stand. T-tests were used to examine differences in vegetation variables and pellet density between thinned and unthinned stands and multiple linear regression was used to examine the percentage of stems browsed in all stands.

### A Morphological and electrophoretic comparison of rainbow trout *Salmo gairdneri* above and below barriers on five streams on Vancouver Island, B.C.

by E. Parkinson, R.J. Behnke and W. Pollard. Victoria : Ministry of Environment, 1984. i, 15 p. Bibliogr. (Fisheries management report ; no. 83) ISSN 0705-5390 ISBN 0-7726-0309-X  
MICROLOG 90-06970 1 fiche

Headwater areas of B.C. coastal streams, above barriers impassable to anadromous species, are generally inhabited by either rainbow trout or coastal cutthroat trout. It is important to know which form of rainbow is present above falls so that the appropriate set of regulations can be applied. In this study, the taxonomic status of trout in the headwater areas (above barriers) of 5 streams was determined morphologically and electrophoretically. Where rainbow trout were found, a second objective was to establish methods of differentiating between resident and anadromous forms.

The basic method adopted for the study was that of analysis of proportional mortality, supplemented by internal comparisons using case-control methodology. LA ON PR

**Mortality among employees of the Bendix Automotive Corporation, Windsor, Ontario**

by M.M. Finkelstein. Toronto : Ministry of Labour, Health Studies Service, 1988. 40 p. Bibliogr. MICROLOG 90-01074 1 fiche

This study aimed to investigate whether exposure to asbestos was associated with an increased risk of death from asbestos-related diseases. It presents the results of a study of mortality among 1657 workers who were employed at Bendix for one year or more. Deaths occurring between January 1, 1950 and December 31, 1985 were ascertained by a computerized linkage with the Canadian Mortality Data Base at Statistics Canada and form the basis for the analysis. ## Le Mouvement d'immigration au Québec depuis 1980

Québec : Communautés culturelles et immigration, 1989. 40 p. : ill. (Consultation sur les niveaux d'immigration) ISSN 0831-0335 ISBN 2-550-19887-5 MICROLOG 90-02625 1 fiche

Le Québec a accueilli 182 532 ressortissants étrangers depuis 1980, soit une moyenne annuelle de 20 281 immigrants sur l'ensemble de la période 1980-88 mais l'évolution des volumes annuels d'immigration a été influencée par différents facteurs qui expliquent les fluctuations survenues dans le mouvement depuis 1980. De plus de 21 000 admissions annuelles de 1980 à 1982, le nombre d'entrées internationales a chuté jusqu'à moins de 15 000 en 1985 et depuis augmente pour se situer à plus de 25 000 pour les deux dernières années. Ce document se penche sur le mouvement d'immigration au Québec depuis 1980 et en fait ressortir les points saillants.

## Multiplier effects in a municipality dependent on fisheries : total economy fleet/factory

by E. Fasmer...et al. Ottawa : National Research Council, Canada Institute for Scientific and Technical Information, 1986. 9 p. Bibliogr. (Canadian translation of fisheries and aquatic sciences ; no. 5261) Originally published in Norwegian. ISSN 0704-3716 MICROLOG 90-02732 1 fiche

Description of a disaggregated economic base model developed to analyse the multiplier effects of changes in a municipality dependent on

fisheries. The model analyses the employment consequences occurring as a result of changes in the structure of the fleet, raw material landed, or use of raw material. Employment consequences are studied in the fishing industry, sub-suppliers, consumer industries, and the municipal sector. A case study is based on the municipality of Skjervoy in North Troms.

### Municipal solid waste management : whose problem is it?

Toronto : Association of Municipalities of Ontario, 1990. v, 91 p. (AMO report : waste management series 1990)  
MICROLOG 90-07154 2 fiche (Available on fiche only)

The Association of Municipalities of Ontario (AMO) represents more than 700 of Ontario's 839 municipalities. During the late 1980s, AMO began to receive urgent appeals from its members, many supported by council resolutions, for help to deal with what was becoming a solid waste management crisis. The AMO has reviewed Ontario municipalities' solid waste management concerns and published two reports calling for action. This third report looks at the roles, responsibilities, costs and funding of the federal, provincial and municipal governments as well as industry and consumers. Each sector is studied separately as to its roles in, and the funding of, municipal solid waste management. Recommendations are then offered for improvement or in new areas which that sector could address.

#### National action plan for biosphere reserves in Canada

Ottawa : Canada/MAB, Canadian Commission for Unesco, 1987. x, 23, x, 27 p. Bibliogr. (Report : 19) *Bilingual (Plan d'action national...)*. ISSN 0317-5693. MICROLOG 90-00361 1 fiche (Available on fiche only)

Among international agencies, UNESCO has taken a leading role in addressing people's relationship to the environment through its establishment of the Man and the Biosphere (MAB) program in 1971. MAB projects are currently being carried out in most countries, and a world-wide network of research and pilot projects, with education and training components, has been established. One of the MAB program's major objectives is the development of a global network of biosphere reserves, consisting of a protected core and an adjacent or surrounding developed area. As of 1987, 4 biosphere reserves had been established in Canada, with more to be so designated. To expand the existing network, Canada/MAB has prepared the National Action Plan for Biosphere Reserves to establish an effective biosphere reserve network in Canada, and to provide Canadian support for the UNESCO international action plan. This paper contains an introduction and definition of

biosphere reserves, and a list of actions proposed by Canada/MAB.

#### National air pollution surveillance : annual summary, 1987

Ottawa : Environment Canada, Conservation and Protection, Environmental Protection, Technology Development and Technical Services Branch, 1989. xx, 74 p. *Bilingual (Surveillance nationale...)*. CSI 22142.003. MICROLOG 90-00285 1 fiche

The National Air Pollution Surveillance program is a joint project of the federal and provincial governments to monitor and assess, on a continuing basis, the quality of the ambient air in the urban regions of Canada. The data reported in this summary were gathered by cooperating agencies from 415 sampling instruments in 59 cities and compiled by Environment Canada. Measurements were made for sulphur dioxide, carbon monoxide, nitrogen dioxide, ozone, soiling index, suspended particulates, lead, dustfall and sulphation rate. The first part of the summary presents the compilation of the data obtained and the second part compares that data with the National Air Quality Objectives.

#### National air pollution surveillance : annual summary, 1988

Ottawa : Environment Canada, Environmental Protection Service, 1989. xx, 74 p. (Report : EPS 7/AP/21) *Bilingual (Surveillance nationale de la pollution...)*. CSI 22142.003. ISBN 0-662-57139-8. MICROLOG 90-02194 2 fiche

The National Air Pollution Surveillance Program is a joint project of the federal and provincial levels of government to monitor and assess, on a continuing basis, the quality of the ambient air in the urban regions of Canada. This annual summary presents data reported from 407 sampling instruments in 52 cities across the 10 provinces and the 2 territories. Measurements were made for sulphur dioxide, carbon monoxide, nitrogen dioxide, ozone, soiling index, suspended particulates, lead, dustfall and sulphation rate. The summary also compares the 1988 data with national air quality objectives for sulphur dioxide, carbon monoxide, nitrogen dioxide, ozone and suspended particulates.

#### National Alcohol and Other Drugs Survey : highlights report

Ottawa : Health and Welfare Canada, Health Services and Promotion Branch, Health Promotion Directorate, 1990. x, 42 p. : ill. Bibliogr. *French ed. (Enquête nationale sur l'alcool...)* on the same fiche. CSI 21112.212. ISBN 0-662-17860-2. MICROLOG 90-06515 2 fiche

There is ample evidence to suggest that the abuse of alcohol and other drugs affects a significant number of Canadians directly, and many more indirectly. This document describes the results of Canada's National Alcohol and Other Drugs Survey. The survey was carried out by Statistics Canada on behalf of Health and Welfare Canada in March 1989. In total, 11,634 adult Canadians age 15 and over participated in the survey. Respondents were asked about their use of alcohol and other drugs. They were questioned about health, social, and economic problems arising from the misuse of alcohol, illicit, prescription, and over-the-counter drugs, and they were asked what could or should be done to prevent such problems.

#### National Housing Act mortgage loan insurance policy in special risk communities : discussion paper

Ottawa : Canada Mortgage and Housing Corporation, 1988. 17, 21 p. *Bilingual (Lignes de conduite régissant...)*. MICROLOG 90-00945 1 fiche

Canada Mortgage and Housing Corporation (CMHC) is working toward increasing borrower access to mortgage financing insured under the National Housing Act (NHA) in communities where their economic characteristics suggest a potential of unacceptable mortgage defaults and claim losses to the Mortgage Insurance Fund (MIF). In May of 1986, CMHC initiated a consultative review of public mortgage loan insurance on behalf of the federal government. Many points of consensus emerged in the consultations. Above all, consultation participants endorsed the continuation of public mortgage loan insurance as the means to achieve throughout Canada federal housing goals of supporting access to home ownership

and facilitating rental production. This report discusses the past lending policy, the proposed lending policy, tripartite risk sharing options, implementation options, and rejected options. CA CO SA

# **The National Incinerator Testing and Evaluation Program : characterization of residues from a modular municipal waste incinerator with line-based air pollution control**

by S.E. Sawell, T.W. Constable and R. Klicius. Ottawa : Environment Canada, 1989. 66 p. : ill. Bibliogr. (Report ; IP-101)  
MICROLOG 90-02384 1 fiche

In 1984, Environment Canada established the National Incinerator Testing and Evaluation Program (NITEP) to examine the impact of municipal waste incineration on the environment and human health. The chemical properties and leachability of residues collected from 2 different types of municipal solid waste (MSW) incinerator systems and an air pollution control pilot plant were evaluated. Based on the results from these and other studies, concern was expressed over the potential release of toxic substances from improper disposal of MSW residues. This resulted in an expansion of the NITEP ash characterization studies to include the evaluation of ashes from several other different incinerators in Canada and the U.S. The first study in this expanded program evaluated ashes from a coarse refuse derived fuel (semi-suspension) combustion system. This report describes the results of the second study, which evaluated bottom, boiler, economizer and combined conditioning tower/fabric filter ash from the London Victoria Hospital energy-from-waste facility in London, Ontario. ● CA CI EV MU ON SC

# **National Information and Informatics Policies in Africa : report and proceedings of a regional seminar**

Shahid Akhtar, editor. Ottawa : International Development Research Centre, 1990. vii, 298 p. Bibliogr. (Manuscript report ; 233e) MICROLOG 90-06129 4 fiche (Available on fiche only)

The Seminar took place at the Headquarters of the Economic Commission for Africa in Addis Ababa, Ethiopia. This gathering was unique in being the first of its kind to examine information and informatics policies for development in Africa, particularly for a select number of countries in the east and southern

African sub-region. The ten papers selected for the publication provide a comprehensive coverage of the seminar's proceedings. Experiences and views of the participants can be described under seven general headings, including information and public policy; rationale and need for national information and informatics policies; scope of national policies; instruments of policy; the policy process and its key actors; policy issues; and recommendations. ### Natural convection in the cavity of a basement block wall

by O.J. Svec and L.E. Goodrich. Ottawa : National Research Council Canada, Institute for Research in Construction, 1986. 7 p. : ill. MICROLOG 90-00163 1 fiche (Available on fiche only)

During the last decade, energy conservation became an important factor for the construction industry. The problem of heat losses through all components of a building envelope received considerable attention and a large amount of research work was done on heat losses from basements, taking into account various types of wall construction, insulation, type of soil surrounding basements, soil moisture content together with soil thermal characteristics and, of course, the effect of climatological conditions. The effect of natural convection in the cavity of a block wall was not sufficiently addressed however. This paper examines the overall heat flow through a block wall as well as the consequences of enhanced wall internal cooling by natural convection.

### Natural gas bus implementation at TTC's Lansdowne garage

by J.E. Turner, R. Monster and T. Topaloglu. Toronto : Ministry of Transportation, Transportation Technology and Energy Branch, 1989. vii, 53 p. : ill. MICROLOG 90-00770 1 fiche

The Toronto Transit Commission (TTC) recently made a commitment to purchase and operate natural-gas-powered buses. This decision necessitated a detailed investigation into the facilities and operations at the TTC's Lansdowne garage, where these buses are to be first implemented. This report details the findings of the investigation, and provides the information required to define the natural gas refuelling equipment and to forecast the impact on current operations. The study was conducted in August 1988 and concentrated on diesel bus refuelling and servicing. An analysis of this data led to the formulation of recommendations regarding natural gas refuelling facilities and bus queuing requirements.

### Natural reproduction of red pine *Pinus resinosa* ait. in Newfoundland

by B.A. Roberts. St. John's : Canadian Forestry Service, Newfoundland Forestry Centre, 1989. vi, 36 p. : ill., maps. Bibliogr. (Information report ; N-X-273) ISSN 0704-7657 ISBN 0-662-17586-7 MICROLOG 90-04477 1 fiche

Red pine, the rarest indigenous coniferous tree species in Newfoundland, is known from only 22 stands located in 3 distinct geographic parts of the Island. This study investigated the various sexual reproductive phases leading to seed production, determined if there were differences in cone development amongst the various stands, and established that Newfoundland red pine produces viable seeds. The lack of regeneration in the Newfoundland sites might then be related to other factors, such as seedbed condition.

### NAV-ICE/MARINE-VUE integration : final report

prepared for Transportation Development Centre, Policy and Coordination Group, Transport Canada, by R.T. Lowry and J.G. McAvoy. Calgary, Alta. : Intera Technologies Ltd., 1989. ix, 33 p. : ill. Bibliogr. MICROLOG 90-04085 1 fiche

Recent developments in ship-borne radar workstations have centred on the support of the MV ARCTIC and the development of systems for the display and analysis of both airborne SAR and the ship's marine radar data. Previous work has shown the need for a new type of marine display whose abilities including the view of the image side by side, in daylight, with the airborne SAR data, freezing the display, with no fading of the image, and communicating data (image and control) from the marine display to the SAR display. This report describes work done to overcome those shortcomings, and to complete the integration of the marine radar into the SAR for tactical ice navigation. The Folsom Scan converter was modified, and additional control, data processing, and display hardware were designed and fabricated. The modified scan converter system was integrated with STAR-VUE, the airborne radar display system on the MV ARCTIC, and was installed for the final voyage of the ship in November 1988.

**The Need for a rehabilitation program for water distribution and sewage collection systems in Ontario**

by J.C. Elstad. Toronto : Ministry of the Environment, Environmental Approvals and Project Engineering Branch, 1987. vi, 56 p. : ill. Bibliogr.

MICROLOG 90-01416 1 fiche

Findings of a study to assess the need for a rehabilitation program in Ontario by determining the age and condition of the Province's water distribution and sewage collection systems. Data were gathered for water and sewer systems serving 80% of the entire serviced population in Ontario. The study also sought to discover any special problems in implementing a rehabilitation program in Ontario's smaller municipalities. Detailed information was gathered during visits to over 70 small municipalities.

MICROLOG 90-04618 1 fiche

C'est en 1969 que les Etats-Unis et l'Union soviétique ont engagé les premières négociations officielles sur la limitation des armes stratégiques. Le processus se poursuit depuis lors, ponctué d'interruptions et de reprises. Jusqu'à présent, il a débouché sur deux accords (SALT I et II) visant à limiter le déploiement des armes stratégiques offensives, ainsi que sur un traité restreignant considérablement la mise en place de défenses anti-missiles balistiques (le Traité ABM). Ce document se penche sur la question et en fournit un sommaire.

**The Nestucca oil spill : fate and effects to May 31, 1989**

by L.E. Harding and J.R. Englar. Ottawa : Environment Canada, Conservation and Protection, Environmental Protection Service, 1989. x, 91 p. : ill., maps, fold. maps. Bibliogr. (Regional program report ; 89-01)

MICROLOG 90-06279 2 fiche

Approximately 875,000 litres of Bunker C fuel oil were spilled off the Washington coast during the early morning of December 23, 1988. The oil was first reported on the B.C. coast near Carmanah Point on December 31, 1988, and progressed north, arriving as small patches at Cape Scott about January 14, 1989. Oiling was reported as far south as Victoria, and traces of Nestucca oil landed on islands of the northern mainland near Bella Bella. This report documents the distribution and movements of oil along the Vancouver Island coastline as a basis for further studies of the longer term impacts. It also summarizes those environmental impacts that occurred and could be documented during the initial period. The report is part of the full assessment of the spill requested by the federal and provincial ministers of the environment.

**Nestucca oil spill : impact assessment on avian populations and habitat**

by M.S. Rodway, et al. Ottawa : Canadian Wildlife Service, Pacific and Yukon Region, 1989. v, 48 p. : maps. (Technical report series ; no. 68) ISSN 0831-6481 ISBN 0-662-17025-3

MICROLOG 90-02385 1 fiche

According to U.S. authorities, the Nestucca barge was damaged and began leaking oil off Grays Harbour, Washington on December 23, 1988. The barge was towed offshore, still leaking oil, to the edge of the continental shelf. Oil travelled northward and was first recorded on the British Columbia coast on December 31, 1988. As part of the impact assessment of the Nestucca oil spill in British Columbia, oiled bird mortality was quantified and analysed, surveillance was maintained for the presence of oil on seabird breeding colony sites and known wintering and migration areas, and critical habitat in proximity to oiled areas for wintering waterbird concentrations were surveyed. In the course of those surveys, conducted between January 8 and February 3, 1988, records were kept of oil in other areas.

**Net basal area response 9 years after fertilizing thinned and unthinned Douglas-fir**

by S.A.Y. Omule. S.I. : Forest Resource Development Agreement ; Victoria : Ministry of Forests, 1990. vi, 20 p. : ill. Bibliogr. (FRDA report ; 097) ISSN 0835-0752 ISBN 0-7726-1077-0

MICROLOG 90-04739 1 fiche

Fertilizing Douglas-fir forests with nitrogen (N) can temporarily boost tree growth and accelerate stand dynamics. The potential, magnitude and duration of the response may vary with fertilizer dose and type, site characteristics such as soil moisture and nutrient status, environmental conditions, and tree and stand history. This report presents empirical regression equations for predicting response of thinned and unthinned immature Douglas-fir to N fertilization in some sites in the eastern variant of the very dry maritime Coastal Western Hemlock subzone. It is based on 9 years of measurement and conservation.

compiled by Kevin Craig. Fredericton : Dept. of Natural Resources and Energy, Fish and Wildlife Branch, 1990. 72 p. : ill., maps. *Bibliogr. French ed. (Nouveau-Brunswick projet...)* : 90-07224/1. CSI 46172.001.  
MICROLOG 90-06905 1 fiche

After several years of high black bear harvests and increasing numbers of hunters purchasing bear licences, concern was expressed that bear populations may be being over-exploited in some areas of N.B. In the spring of 1989, a 2-year project to address N.B.'s black bear management concerns was proposed to develop a strategic plan for black bear population management; to obtain data on hunter effort and distribution through a survey of resident and non-resident hunters and outfitters; to analyze harvest, hunter effort, and biological data to assess bear population status and provide data for incorporation into strategic planning, and to provide data on black bear reproductive biology for incorporation into population models used in strategic planning. Data is collected through field and lab studies of harvested female black bears. This report covers the first year of the project.

**New Brunswick Crown Lands and Forests Act : the first five years**

New Brunswick. Dept. of Natural Resources and Energy. Fredericton : The Dept., 1989. ii, 38, ii, 42 p. *Bilingual (La Loi sur les terres.)*  
MICROLOG 90-04105 1 fiche

In 1980 the Legislative Assembly passed an Act, to come into effect in March 1982, as a framework for a new management system for Crown lands. The new Act required the licensee to plan for the total management of all resources in the licensed area on both a 5-year and 25-year time horizon and made the licensee responsible for implementing these plans. This report outlines the background and evolution of the 1982 change in New Brunswick's forest policy; the performance of licensees in the first 5 years; an assessment of how the policy was implemented and operated in the first 5 years; and what the lessons are for the future of Crown forest management in New Brunswick.

**New Brunswick subsurface drainage project : a study of water quality effects of intensive agricultural production**

by H.J. O'Neill...et al. Moncton, N.B. : Environment Canada, Conservation and Protection, Inland Waters Directorate, Atlantic Region, Water Quality Branch, 1990. viii, 70 p. : ill. MICROLOG 90-06947 1 fiche

The principal environmental impacts associated with agriculture are elevated levels of nutrients in surface waters draining agricultural fields and chemical contamination due to pesticide usage. Concern for surface water quality led to conducting toxic chemical surveys centering on regional in-use agricultural pesticides, particularly residues in subsurface drainage systems. The study investigated the fate of in-use pesticides on tile drained potato fields where drainage flow, precipitation amounts and application rates of pesticides were known, while a point source was provided for sample collection. This report presents the results of the study, conducted at 5 sites. The methodology is also included. AG AP CA EV SC

#### **A New free-living nematode connected with Arctic sea ice**

by A.V. Tchesunov. Ottawa : National Research Council, Canada Institute for Scientific and Technical Information, 1988. 8 p. : ill. Bibliogr. (Canadian translation of fisheries and aquatic sciences ; no. 5354) *Originally published in Russian, by the Academy of Sciences of the U.S.S.R., at Moscow, U.S.S.R. ISSN 0704-3716*  
MICROLOG 90-01486 1 fiche

Some publications on the biology of the Arctic sea ice mention nematodes among the animals inhabiting the inner spaces and the lower surfaces of ice floes. Until recently, however, very little information was available on the taxonomic composition of these nematode populations, nor was it clear whether they lived in this highly unusual biotope as permanent, specific or casual inhabitants. This paper describes one species of nematode collected at the drifting station North Pole-22 in 1980-81 in

the central Arctic Basin.

### A Newton-SOR method for solving the spatial price equilibrium problem

by P. Marcotte, G. Marquis and L. Zubieta. Montreal : Université de Montréal, Centre de recherche sur les transports, 1990. 25 p. (Publication ; no. 679)  
MICROLOG 90-02984 1 fiche

Paper proposing an efficient Newton-SOR algorithm for solving the separable spatial price equilibrium problem. The algorithms presented are aimed at solving the class of market equilibrium problems where supply, demand and transportation cost functions are nonlinear and separable. This approach consists in successive linearizations of the cost functions, each linearized subproblem being solved by a very fast block SOR (block Gauss-Seidel) scheme.

### Niagara District fisheries management plan, 1989-2000

Toronto : Ministry of Natural Resources, 1989. iv, 64 p.  
MICROLOG 90-00869 2 fiche

Outline of the long-term management direction (1989-2000) for both inland and Great Lakes fisheries within the Niagara District. An adjacent portion of Lake Erie within Simcoe District is also included in the Niagara plan. The plan provides guidance to local fisheries managers and indicates future management direction to the public by specifying objectives based on current resource information and listing strategies to achieve these objectives. The plan covers the sport fishery, the commercial food fish fishery and the commercial bait fishery, as well as rare and endangered species.

### Non-stoichiometric tantalum magnetites

by N.F.H. Bright and A.C. Turnock. Ottawa : Canada Centre for Mineral and Energy Technology, Mineral Sciences Laboratories, 1965. 6 p. (Report ; MS 65-99)  
MICROLOG 90-04687 1 fiche

Density measurements were made on two pairs of samples of tantalum magnetites having differing Fe-Ta atomic ratios, one member of each pair being stoichiometric in cation:anion ratio and the other being non-stoichiometric. The measurements were made using a two-millilitre pycnometer with pure toluene as the immersion liquid. Owing to the smallness of the available samples, only one determination

on each material could be made. The non-stoichiometry was achieved by exposure of the stoichiometric spinels to an atmosphere sufficiently reducing that oxygen was lost from the sample. The extent of the loss was determined from the weight of the sample. From the oxygen content and the known starting Fe:Ta ratios, the at.% compositions were computed

**The Norwegian fillet industry : thoughts regarding the technology of the future**

by A. Haugslett. Ottawa : National Research Council, Canada Institute for Scientific and Technical Information, 1985. iii, 142 p. : ill. Bibliogr. (Canadian translation of fisheries and aquatic sciences ; no. 5131) Originally published in Norwegian, by FiFi at Tromsø, Norway. ISSN 0704-3716  
MICROLOG 90-00133 2 fiche

In the latter part of the winter of 1980, the Norwegian fishing industry was in crisis due to a lack of raw material, new labour conditions extending the number of days notice needed before layoffs, and the lack of seasonal workers. This report evaluates new technology available to the industry in the transport system, the receiving of round fish and the provision of night-safes, during gutting, cleaning, sorting, washing and weighing; methods of determining catch volume; design of storage rooms; filleting lines and their use of raw material; production of fish pulp and animal feed; the maintenance of refrigerated conditions between the various production units; the freezing section, with cold storage; and expansion, including production-oriented and technical developments.

**Norwegian spring-spawning herring : a bio-economic analysis of future resource management**

by S. Kristmannson. Ottawa : National Research Council, Canada Institute for Scientific and Technical Information, 1986. 6 p. (Canadian translation of fisheries and aquatic sciences ; no. 5259) Originally published in Norwegian. ISSN 0704-3716  
MICROLOG 90-02730 1 fiche

At the end of the 1960s the stock of spring-spawning herring was almost fished out, causing a cessation of a number of important seasonal fisheries. A small part of this stock survived as whitebait and severe restrictions in the 1970s resulted in a resurgence of the stock, leading to demands for increased quotas. This paper calculates the total socio-economic results of the herring fishery by the use of a model. The model simulates the development of stock as a function of utilization where recruitment, growth and natural mortality are included as parameters. Yield of weight plus the balance of the stock are then converted into monetary units, with consideration being given to relevant market conditions. The expenditure side includes the community's costs incurred by catching, processing and marketing of herring and herring products. The model is built on information from the herring fishermen, involving biological, economic and fisheries-technical data. Only the table of contents and the introduction are reproduced.

**Nos deux langues officielles au fil des ans**

Ottawa : Commissariat aux langues officielles, 1990. xiii, 44, xiii, 40 p. Bilingue (Our two official...)  
MICROLOG 90-07166 2 fiche

La langue est beaucoup plus qu'un moyen de communication. Elle forme des communautés et façonne les liens entre celles-ci. A mesure qu'une société devient plus complexe, ses caractéristiques linguistiques se diversifient. Ce survol chronologique préparé par le Commissariat aux langues officielles n'a qu'un objectif: résumer les récents textes législatifs fédéraux et provinciaux intéressant le statut du français et de l'anglais au Canada. Ce document se penche sur cette question en fournissant de nombreux renseignements importants.

**Not-so-fine tuning : Bank of Canada policy and inflation since 1986**

by W.B.P. Robson. Toronto : C.D. Howe Institute, 1990. 12 p. : ill. (Inflation monitor ; no. 5) ISSN 0824-801X ISBN 0-8806-263-X  
MICROLOG 90-06450 1 fiche

This paper argues that recent experience illustrates clearly the Bank's ability, through its control of the stock of money, to determine Canadian inflation. It also suggests that the Bank appears, during the 1986-88 period, to have put too much emphasis on 'fine-tuning' real economic activity through management of interest rates and the exchange rate, and too little emphasis on money growth. It concludes that if the Bank intends to keep Canada on a course for price stability, it must rededicate itself to the task of controlling money growth.

**A Note of the seaward migration of pink salmon fry**

by T. Kobayashi. Ottawa : National Research Council, Canada Institute for Scientific and Technical Information, 1985. 14 p. : ill. (Canadian translation of fisheries and aquatic sciences ; no. 5136) Originally published in Japanese, in Japan. ISSN 0704-3716  
MICROLOG 90-00113 1 fiche

It is known that pink salmon fry hatched artificially start their seaward migration very quickly when they are released and their activity is quite different from that of salmon fry. However, there has been very little opportunity to investigate pink salmon fry hatched naturally. In order to obtain basic data for the reproduction of pink salmon, 50 mature females and 50 males were released in the upper stream (the Onsen River) of the Isaobetsu River in October 1965. The spawning mechanism and the development of fry from the spawning ground were observed. This paper reports the results of these observations.

**Notes explicatives sur l'avant-projet de modification de l'impôt sur le revenu**

Ottawa : Ministère des finances, 1990. x, 401 p. L'éd. anglaise (Explanatory notes...draft...) : 90-06871/5.  
MICROLOG 90-06870 5 fiche

L'avant-projet de loi qui est l'objet de ces notes renferme les propositions de modification à la Loi de l'impôt sur le revenu, aux Règles de 1971 concernant l'application de l'impôt sur le revenu, au Régime de pensions du Canada, à la loi sur l'exportation et l'importation de biens culturels, à la Loi sur l'interprétation des conventions en matière d'impôts sur le revenu, à la Loi sur l'assurance-chômage et à certaines lois connexes. Ces modifications ont pour objet de mettre en oeuvre les mesures

fiscales annoncées dans le budget du 20 février 1990, ainsi que d'autres propositions rendues publiques avant juillet 1990 dont la mise en oeuvre entraîne des modifications à la Loi de l'impôt sur le revenu. En outre, l'avant-projet contient un grand nombre de modifications de forme qui visent à préciser et, dans certains cas, à rectifier l'application de la Loi de l'impôt sur le revenu et de lois connexes. Ce document présente les notes visant à donner une explication détaillée de chacune des modifications proposées à l'intention des députés et sénateurs, des contribuables et de leurs conseillers professionnels.

# **Nouveau-Brunswick projet ours noir, 1989-90 : rapport d'étape, an 1**

par K. Craig. Fredericton : Ministère des ressources naturelles et de l'énergie, Direction de la pêche sportive et de la chasse, 1990. 72 p. : ill., cartes géogr. Bibliogr. L'éd. anglaise (New Brunswick Black...) : 90-06905/1. CSI 46172.001F.  
MICROLOG 90-07224 1 fiche

Les changements rapides survenus récemment au niveau de la demande et de la perception que l'on a de l'ours noir ont suscité l'inquiétude quant à l'avenir de la population d'ours noir au Nouveau-Brunswick, d'où le besoin d'une meilleure information en vue de l'aménagement. Ce document se penche sur cette question en examinant particulièrement les points suivants: le projet ours noir 1989; le sondage auprès des chasseurs d'ours noir au Nouveau-Brunswick; le modèle démographique de l'ours noir; l'élaboration du plan d'aménagement de l'ours noir; l'estimation de l'abondance d'ours noirs; et, l'index de production des fruits et graines.

# **Nouveaux logements densifiables**

Ottawa : Société canadienne d'hypothèques et de logement, 1989. 33 p. : ill. L'éd. anglaise (New made-to-convert housing) sur la même fiche. ISBN 0-662-94693-6  
MICROLOG 90-01692 1 fiche

L'objectif de cette étude est d'explorer les possibilités de concevoir et de construire de nouveaux logements capables d'inclure un logement locatif autonome, alors qu'il est toujours occupé, et montrer que cela peut être réalisé avec un minimum de déragement, à

prix abordable. Dix-huit logements 'densifiables' ont été retenus et on y a préparé les plans de vingt-deux différents logements accessoires. Finalement, l'étude démontre que le logement 'densifiable' est physiquement réalisable et intéressant d'un point de vue économique.

# **La Nouvelle loi sur les coopératives : document de travail**

Fredericton : Ministère de la justice, Division des services juridiques, Direction des coopératives, 1990. iv, 56, iii, 56 p. Bilingue (A New co-operatives...).  
MICROLOG 90-06084 2 fiche

Ce document de travail a été préparé par la Direction des coopératives du ministère de la Justice en vue de faire valoir leurs préoccupations au sujet de la loi en vigueur, et de tenter d'obtenir un consensus sur l'orientation législative du mouvement coopératif. Les pages de ce document résument les principales questions qui semblent devoir être incluses dans la loi. Elles contiennent des suggestions précises. En outre, on trouvera dans ce document une ébauche du contenu de chaque partie de la nouvelle loi. Une bonne part du contenu de la loi proposée renvoie à la Loi sur les corporations commerciales.

# **Les Nouvelles techniques de reproduction**

par P. Begin. Ottawa : Bibliothèque du Parlement, Service de recherche, 1989. 59 p. Bibliogr. (Etude générale : BP-204F) L'éd. anglaise (New reproductive technologies) : 90-01900/1.  
MICROLOG 90-02612 1 fiche

Depuis 1977, une coalition canadienne de groupes féministes, la Coalition canadienne pour la création d'une commission royale d'enquête sur les nouvelles technologies de la reproduction humaine, réclame la mise sur pied d'une commission d'enquête "pour étudier l'incidence et la réglementation des nouvelles techniques de reproduction". Selon son porte-

parole, il est essentiel de tenir un débat national sur les progrès réalisés en matière de reproduction avant d'adopter des règlements ou des lois dans les provinces. C'est sur quoi ce document se penche en plus d'aborder les points suivants: les nouvelles techniques de reproduction; la réglementation des techniques de reproduction en ce qui a trait aux recommandations récentes; et, les questions non examinées dans le rapport Warnock et celui de l'Ontario.

### Les Nouvelles technologies de l'information : innovation et diffusion

par L. Deschênes. Laval, Québec : Ministère des communications, Centre canadien de recherche sur l'informatisation du travail, Direction de la recherche organisationnelle, 1989. 31 p. Bibliogr. Texte préparé dans le cadre de la conférence Technologie de l'information : globalisation, diffusion, innovation et formation. L'éd. anglaise (New information...) : 90-03232/1. ISBN 0-662-95655-9  
MICROLOG 90-02333 1 fiche

Lorsqu'on parle de l'avènement de la société de l'information, on fait généralement référence à l'impact des nouvelles technologies de l'information, conçues pour traiter, emmagasiner, reproduire et transmettre de l'information et ce, dans tous les secteurs de l'activité humaine. Afin de faire la lumière sur l'évolution en cours, ce document présente un aperçu des innovations associées à la diffusion de l'information, des développements suscités au sein des organisations et des facteurs influençant le degré d'informatisation.

### Nouvelles technologies de l'information, emploi et travail : l'exemple des secrétaires

par L. Deschênes. Laval, Québec : Communications Canada, Centre canadien de recherche sur l'informatisation du travail, Direction de la recherche organisationnelle, 1988. 22, 22 p. Bibliogr. Bilingue (New information technologies...). Communication présentée lors du colloque La Technologie et le bureau bilingue. ISBN 0-662-94878-5  
MICROLOG 90-02332 1 fiche

Les effets des nouvelles technologies de l'information sur l'emploi constituent sans contredit l'impact social majeur découlant de l'information du travail, une inquiétude révélée par les sondages d'opinion publique, mais également par l'intérêt soutenu des gouvernements et syndicats ainsi que des chercheurs pour la question. Le débat concernant l'impact des nouvelles technologies de l'information sur l'emploi reprend néanmoins sensiblement les mêmes thèses que celui sur l'automatisation qui avait eu lieu au début du siècle. Ce document se penche sur les impacts des nouvelles technologies de l'information sur l'emploi et le travail en examinant particulièrement les pessimistes, les optimistes, les effets nets sur l'emploi, la déqualification du travail, la qualification croissante du travail et la bipolarisation des qualifications.

**Nova Scotia. Mines and Minerals  
Branch : Report of activities, 1987 :  
part B**

edited by D.R. MacDonald and Y. Brown  
Halifax : Dept. of Mines and Energy, Mines and Minerals Branch, 1988. vii, 304 p. : ill., maps. Bibliogr. (Report : 88-1)  
CSI 51112.009.  
MICROLOG 90-00565 4 fiche

Results of a variety of projects carried out or coordinated by the Department in 1987. The provincial and federal governments are partners in the exploration for and development of Nova Scotia's mineral resources through the 5-year Canada-Nova Scotia Mineral Development Agreement, implemented in 1984. Gold exploration and development continued to be the highlight of the mineral industry, and this is reflected in the number of projects reported. Continuing work on coal resources reflects the long-term importance of coal. Results of the examination of other mineral resources, as well as regional geological and geochemical surveys to evaluate the mineral potential of large areas of the province are also given. Projects are categorized by division (energy resources, mineral development, mineral resources, university research, external abstracts and conference presentations, and Geological Survey of Canada projects). Projects also include petroleum related offshore and onshore activity, and oil shale occurrences.

### NRC B-2400 single cylinder research engine test facility : dynamometer system upgrade

by B.W. Moyes...et al. Ottawa : National Research Council Canada, Division of Mechanical Engineering, Fuels and Lubricants Laboratory, 1990. ix, 49 p. : ill. (Laboratory memorandum ; LM-FL-016)  
MICROLOG 90-06534 1 fiche

A Bombardier B-2400 single cylinder research engine was acquired in 1986 for fuels, lubricants and component research. Initial installation of the hardware began in the winter of 1985/6, with commissioning in January 1987. During the initial tests, persistent failures were experienced on the coupling between the dynamometer and the engine. It was concluded that the dynamometer was too large for this engine application. This report documents the details of the dynamometer upgrade, including system requirements, acquisition program objective, and evaluation tests/results.

### Nuclear emergency plan, part III : Bruce

Toronto : The Province, 1989. vi, 61 p. : ill. ISBN 0-7729-6352-5  
MICROLOG 90-04756 1 fiche

The Province of Ontario nuclear emergency plan parts I through VIII were developed pursuant to Section 8 of the Emergency Plans Act, 1983. This part III prescribes measures to be taken to deal with a nuclear emergency caused by the Bruce Nuclear Power Development. This plan deals mainly with actions at the provincial level and should be supplemented by the appropriate municipal plan from the Townships of Bruce and Kincardine and the Village of Tiverton. This document gives details on the plan data and organization and measures to be taken for internal and external notification, operations in general and for liquid emissions, and the provision of emergency information and public direction. Appendices detail response sector boundaries, alerting and lead times, outline plan and times for evacuation, the location of emergency facilities, and communications through television, radio and telephone.

### Numerical computation of underwater explosions due to fuel-coolant interactions

by J.H.S. Lee...et al. Ottawa : Atomic Energy Control Board, 1989. 116 p. : ill. Bibliogr. (Research report ; INFO-0312)  
MICROLOG 90-01367 2 fiche

If coarse molten material is released into a coolant the possibility exists for a violent steam explosion. A detailed quantitative description of the processes involved in steam explosions is currently beyond the capabilities of the scientific community. However, a conservative estimate of the pressure transients resulting from a steam explosion can be obtained by studying the dynamics of the shock associated with the expansion of a high-pressure vapour bubble. In this study, the hydrodynamic equations governing the shock propagation of an expanding bubble were integrated numerically using the flux corrected transport code. Simpler acoustic models based on experience with underwater explosions were also developed and used to estimate pressure transients and to calculate the peak pressures for benchmark cases. A simplified version of the Henry model was developed by neglecting the complex

description of the 2-phase flow inside the ruptured tube and the arbitrarily assumed heat transfer and condensation rates.

### Nutrient deficiency symptoms in container-grown Douglas-fir and white spruce seedlings

by R. Van den Driessche. S.I. : Forest Resource Development Agreement : Victoria : Ministry of Forests, 1989. vii, 29 p. : ill. Bibliogr. (FRDA report ; 100) ISSN 0835-0752 ISBN 0-7726-1057-6  
MICROLOG 90-03813 1 fiche

Douglas-fir and white spruce were grown in a container nursery at different levels of macro- and micronutrients to produce deficiency symptoms. In 1987, seedlings were grown in 3-13 styroblocks using peat and perlite rooting medium, and each of the macronutrients was applied at 4 levels, including 0. High levels were N=200, P=50, K=100, Mg=50 and S=75 mg L<sup>-1</sup> of nutrient solution. Different levels of Ca were obtained by adding CaCO<sub>3</sub> to the rooting medium. In 1988, seedlings were grown in perlite contained in Leach cells, and deionized water was used for preparing nutrient solutions and for watering. Four levels of the micronutrients Cu, Zn, Mn, Mo, B, and Fe were tested, with the 4th level about 10 times the usually recommended to look for toxicity symptoms.

### Nutrition and the Hitra disease : the Bjuhn project : a feeding trial with large salmon

by O. Lie...et al. Ottawa : National Research Council, Canada Institute for Scientific and Technical Information, 1988. 21 p. Bibliogr. (Canadian translation of fisheries and aquatic sciences ; no. 5345) Originally published in Norwegian, by the Nutrition Institute of the Fisheries Directorate, at Bergen, Norway. ISSN 0704-3716  
MICROLOG 90-01479 1 fiche

The Bjuhn project studied the significance of nutrition in outbreaks of Hitra disease. A feeding trial with large salmon (average weight 1.4 kg) was started in 10 enclosures in September 1984 and concluded in May 1985. The fish were sampled 8 times at even intervals, with each sample consisting of 20 fishes per group for analysis and another 10 fishes to gather more data on weight and length. The sampling material was complemented by samples of healthy and Hitra-diseased salmon from a commercial fish farm. Analyses were done on blood, livers, whole fish, fillets, and feed.

### Occupational inventory of certified engineering technicians and technologists in Manitoba

Dalcor Innovations Ltd. Ottawa : Employment and Immigration Canada, Labour Market Outlook and Structural Analysis Branch, 1987. 53 p. *French ed. (Répertoire de techniciens...)* : 90-00699/1. MICROLOG 90-00698 1 fiche

Report based on the MANSCETT data development project, which includes the development of survey questionnaires and completion of a mail survey of the membership of the Manitoba Society of Certified Engineering Technicians and Technologists, and a computerized inventory of the Manitoba membership including basic biographic, demographic, geographic, education, employment, occupation and industry characteristics. The survey of the members was carried out in December 1986 with follow-up in January and February 1987. The report details the methodology of the survey and the hardware and software used, as well as non-member estimates by type of occupation. Recommendations are given for improvements in various areas of the project.

### The Occurrence and mobility of hazardous organic chemicals in groundwater at several Ontario landfills : final report

by J.F. Barker...et al. Toronto : Environment Ontario, 1989. iii, 587 p. : ill. Bibliogr. MICROLOG 90-00234 7 fiche

For the past 4 years, the occurrence of organic contaminants in groundwaters at 6 sanitary landfill sites and at one waste disposal facility in southern Ontario was examined to determine what organics are contaminating groundwaters, how rapidly these contaminants travel and how persistent these organics are. The landfill sites selected represent a variety of hydrogeological conditions, representative of most sanitary landfill sites in southern Ontario. At all sites, the organic compounds found in water that percolated through the fill (leachate) were examined and certain common, toxic and readily-analyzed organics were selected for detailed study. Their distribution was determined by analyzing a large number of groundwaters collected from numerous wells placed to give a good, 3-dimensional picture. Sampling was often repeated through the study to define the variability of concentrations over time. At all sites, the organics chosen included volatile hydrocarbons and volatile aromatics. A technical summary is given of each landfill site.

### The Occurrence of *Myxosoma cerebrales* spores in individual organs of the California trout

by S. Gradjanin and M. Cankovic. Ottawa : National Research Council, Canada Institute for Scientific and Technical Information, 1987. 12 p. Bibliogr. (Canadian translation of fisheries and aquatic sciences ; no. 5300) Originally published in *Serbo-Croatian*, in *Yugoslavia*. ISSN 0704-3716 MICROLOG 90-02115 1 fiche

Salmonid young at fish farms and in open water are particularly threatened by parasites of the phylum Protozoa, on which there is very little information. This paper describes the incidence of myxosomatosis, its causes, the extent and intensity of infestation by spores of *Myxosoma cerebrales* of the brain, the liver, the spleen, the kidneys, and the contents of the intestine during the first year of the fish's life. Four samples, each of 30 specimens of juvenile California trout that exhibited clinical signs of myxosomatosis were examined by the native preparation method between July and December and dissection and microscopic examination were carried out.

### Ocean Dumping Control Act : Annual report 1987-88

Ottawa : Environment Canada, 1989. 32, 33 p. Bilingual. Cover title: *Keeping the ocean clean*. CSI 21111.004. ISBN 0-662-56994-6 MICROLOG 90-02141 1 fiche

The Ocean Dumping Control Act (ODCA) was passed in 1975 to reflect Canada's commitment to marine environmental quality and to fulfill international obligations under the London Dumping Convention (LDC). The ODCA is part of Environment Canada's regulatory mandate. This annual report covers permits issued in the calendar year 1987, current permit trends and a forecast of 1989, a review of major enforcement and compliance activities; a review of ocean dumping research; and highlights of recent and upcoming LDC activities. The report also covers trends in dredging in the Atlantic and Pacific regions, the Arctic region, and in the Quebec region. Forecasts are given for dredging operations in the Miramichi River, New Brunswick and at Cap-aux-Meules, Quebec and in agriculture, solid waste disposal, disposal of sewage sludge, incineration at sea and radioactive wastes.

### Oceanic changes associated with global increases in atmospheric carbon dioxide : a preliminary report for the Atlantic coast of Canada

by D.G. Wright...et al. Dartmouth, N.S. : Dept. of Fisheries and Oceans, Bedford Institute of Oceanography, Biological Sciences Branch, Marine Fish Division, 1986. vii, 78 p. : ill., maps. Bibliogr. (Canadian technical report of fisheries and aquatic sciences ; no. 1426) ISSN 0706-6457 MICROLOG 90-00683 1 fiche

Examination of possible changes in the marine environment which may influence the Atlantic Canadian fisheries industry. The report describes the ocean as it is today, including the current understanding of the dynamics that determine this state, and then, based on this framework, puts together a scenario of possible tendencies associated with predicted atmospheric changes. Changes in atmospheric conditions predicted for a doubling of atmospheric CO<sub>2</sub> concentrations are summarized, possible changes in the large-scale temperature and salinity structure of the North Atlantic Ocean are considered, possible changes in sea-ice conditions are discussed, the wind-driven circulation of the North Atlantic ocean are considered, and changes in the physical oceanographic conditions on the continental shelves are considered. Some of the problems facing modellers who attempt to predict changes in the Earth's atmosphere-ocean-cryosphere system are considered.

### Oceanographic and meteorological observations from the Hibernia region of Newfoundland Grand Banks

by B. Petrie and D. Warnell. Dartmouth, N.S. : Bedford Institute of Oceanography, 1988. iv, 270 p. : ill., maps. Bibliogr. (Canadian data report of hydrography and ocean sciences ; no. 69) ISSN 0711-6721 MICROLOG 90-06586 3 fiche

Report on the oceanographic and meteorological aspects of the Grand Banks, taken from current meter time series primarily from Hibernia, satellite-tracked drifter trajectories for the Grand Banks, sea level data from St. John's, hydrographic observations at Station 27, and wind observations from St. John's generally covering 1980-84. Maps of the mean currents for 3 depth intervals are presented, along with current, temperature and salinity time series for 3 depth intervals and for the total water depth less than and exceeding 100 m. Maps are also presented for mean, maximum and variable currents. Sea level and adjusted sea level data from St. John's are given, along with wind speed and direction data for 1980-86.

**Oceanographic observations during LIMEX, March, 1987**

by C.L. Tang. Dartmouth, N.S. : Bedford Institute of Oceanography, 1989. vii, 202 p. : ill., maps. Bibliogr. (Canadian data report of hydrography and ocean sciences ; no. 72) ISSN 0711-6721  
MICROLOG 90-05520 3 fiche

During the winter and spring months, the waters of the northern Grand Banks and the Newfoundland Shelf are covered with sea ice, which, under severe conditions, can interfere with offshore drilling operations and hamper marine shipping. For planning of safe offshore operations, it is important to understand the dynamics of ice movement and to develop techniques to predict the extent of ice cover. In March 1987, a multi-disciplinary research program (LIMEX) was launched to collect field data for a number of sea ice studies. An expedition to the Newfoundland Shelf on CSS BAFFIN was organized in conjunction with an aircraft program of the remote sensing study based at Gander, Newfoundland. Data collected on BAFFIN include wind, ocean current, temperature and salinity under ice and in the open ocean, and ice drift. This report presents graphs of the data and gives information about the methods of data collection and data processing.

**L'Offre en transport et les changements d'utilisation fonctionnelle du sol à Montréal entre 1964 et 1983**

par J.-P. Rodrigue. Montréal : Université de Montréal, Centre de recherche sur les transports, 1989. 36 p. : ill. Bibliogr. (Publication ; no. 665)  
MICROLOG 90-01612 1 fiche

Dans la recherche sur les transports, la modélisation est une procédure souvent employée pour tenter d'apporter des réponses à des hypothèses de comportement dans une situation aux paramètres définis. Une des lacunes de cette méthodologie est l'absence de considération des implications à l'échelle spatiale du réseau de transport étudié. Cet article propose l'intégration du concept de l'offre en transport aux changements de l'utilisation fonctionnelle du sol à Montréal pour trois types de transport routier urbain: le transport privé, le transport en commun et le transport de marchandise. Des équations pour déterminer l'offre en transport selon la distance des infrastructures sont également élaborées.

#### Oil and gas exploration, drilling and production summary, 1986

by T.R. Carter. Toronto : Ministry of Natural Resources, 1989. iv, 132 p. (Oil and gas paper ; no. 9) CS1 55116.009. ISSN 0229-8074  
MICROLOG 90-00837 2 fiche

This annual summary was compiled from records submitted by licensed operators and covers the calendar year 1986. The report covers leasing licenses and activity onshore in southwestern Ontario, offshore in Lake Erie, and in the Hudson and James Bay lowlands; geophysical and geochemical activity; drilling licenses, permits and activity; production of oil and natural gas; and natural gas and salt cavern storage. An explanation of the operations and organization of the Section are included, as well as a listing of licenses issued and a summary of wells drilled.

#### Oil and gas fiscal regimes of the western Canadian provinces

Edmonton : Alberta Energy, Projects and Supply Development Division, Conventional Oil, Gas and Coal Branch, 1988. 33 p. ISBN 0-86499-467-2  
MICROLOG 90-02493 1 fiche

This report compares the fiscal regimes in British Columbia, Alberta, Saskatchewan and Manitoba. Since 1985, federal and provincial governments have made numerous fiscal changes, many in response to the drop in world oil prices. The new fiscal policies generally have reflected governments' willingness to forego revenues in an effort to aid the oil and gas industry, with certain exemptions. The federal government has also begun the tax reform process, the full effects of which have yet to be realized. In this document, the existing corporate tax regime is described. A comparison of fiscal regimes must recognize the differing scale and nature of oil and gas operations among the 4 provinces, with Alberta accounting for 80-90% of Canada's oil and gas productions, while British Columbia, Saskatchewan and Manitoba are much smaller producers. The document describes Crown royalties and incentives and freehold taxes for each type of fuel (crude oil, natural gas, natural gas byproducts, nonconventional oil).

#### Oil and gas in Alberta : an uncertain future : a discussion paper

prepared by Energy and Non-renewable Resources Sub-Committee, Public Advisory Committees to the Environment Council of Alberta ; for the Alberta Conservation Strategy Project. Edmonton : Environment Council of Alberta, 1989. vii, 53 p. : ill. Bibliogr.  
MICROLOG 90-02294 1 fiche

The demand for Alberta's oil and gas resources has been a major factor behind the province's economic growth in recent decades. The province has also experienced the effects of an economic recession when petroleum prices declined dramatically. This paper discusses Alberta's oil and gas resources, their development and economic significance, and the supply of and demand for these resources. Oil and gas reserves cannot be developed without interactions with other resources and resource users. These impacts are discussed, as well as the legislative framework within which development occurs. The paper

concludes with a section on managing Alberta's non-renewable resources for the future and some ideas for an energy strategy. A glossary is included.

#### Oil Crops : proceedings

edited by Abbas Omran. Ottawa : International Development Research Centre, 1989. xi, 332 p. : ill. Bibliogr. (Manuscript report ; 252e)  
MICROLOG 90-03843 4 fiche (Available on fiche only)

The Oilcrops Network was established in 1981 by the International Development Research Centre (IDRC) to serve, advise, and co-ordinate the efforts of oilcrop scientists of the IDRC-supported projects in eastern/southern Africa and South Asia. Four subnetworks were established in 1987, dealing with brassica, sunflower, sesame, and other oilcrops. This volume includes the proceedings of the 2nd meeting of the brassica subnetwork, the first meeting of the other oilcrops subnetworks, and the first meeting of the oilcrops network steering committee. A number of papers were presented at each of these meetings, dealing with oilseed crops in India, Egypt, Ethiopia, Kenya, Cyprus, Shanghai, Nepal, Bhutan, Pakistan, Bihar, and Bangladesh. Papers cover research into varieties of oilseed crops, pests and diseases, and production.

#### Oil pipeline performance review, 1986

S.I. : Canadian Petroleum Association, Pipeline Division, 1986. 23 p. CS1 99512.004.  
MICROLOG 90-03302 1 fiche (Available on fiche only)

All liquid hydrocarbon pipelines in Canada, including crude oil, refined products and High Vapour Pressure (HVP) lines were requested to participate in an industry analysis by submitting voluntary, confidential performance and failure reports. Pipelines included in this review fall within the scope of Canadian Standards Association Standard Z183-M86, oil pipeline transportation systems. However, only oil lines downstream of production facilities and refined petroleum product lines are covered. Multi-phase lines, producer operated pipelines and flow lines now included in Z183-M86 are not covered. Incidents resulting in a spill of 1.5 cu m or more of oil, or any amount of HVP material, and any incident involving an injury, a death, a fire, or an explosion are classified as reportable. A list of participating pipelines is included.

### Oil Sands Geology Forum

Oil Sands Geology Forum (2d : 1989 : Calgary, Alta.). Edmonton : Alberta Research Council, Alberta Geological Survey ; Alberta Dept. of Energy, Alberta. Oil Sands Technology and Research Authority, 1989. 64 p. : ill. Bibliogr. MICROLOG 90-05581 1 fiche

Papers presented at the forum, giving results from the reservoir analysis program and from the resource characterization program. Reservoir analysis studies reservoirs in detail to develop new methodologies for application to enhanced oil recovery, including integration of geological studies with the petrographic image analysis of pore systems. The resource characterization program covers strategic geology research, primarily the AOSTRA underground test facility, and including mapping the AOSTRA lease and surrounding area and delineating reservoir characteristics and developing exploitation strategies.

### Oil spill preparedness in the upstream petroleum industry

S.I. : Canadian Petroleum Association ; Independent Petroleum Association of Canada, 1989. ix, 116 p. Bibliogr. MICROLOG 90-03394 2 fiche (Available on fiche only)

Assessment of the Canadian upstream petroleum industry's current state-of-preparedness for dealing with oil spills resulting from exploration and producing activities. The study uses realistic worst case scenarios to assess the industry's ability to respond to large offshore spills caused by oilwell blow-outs in the Beaufort Sea, Grand Banks, and Scotian Shelf areas during drilling and onshore oil spills from a variety of sources. It does not address future production scenarios in the Beaufort Sea, off the east coast or future exploration activities off the west coast.

### Oldman River Dam design report, vol. 1 -- Updated

prepared by UMA Engineering Ltd. ; in association with Acres International Limited. Edmonton : Alberta Public Works, Supply and Services, 1988. xiii, 163 p. : ill., fold. maps. Bibliogr. MICROLOG 90-03848 3 fiche

The Oldman River Dam project will provide slow regulation and onstream storage of a dependable supply of water which will permit multi-purpose use and irrigation service area expansion in southern Alberta. This report presents the concepts, criteria, parameters and methods used to design the earth and rock fill dam across the river valley; the earth fill dyke located across the low saddle to the northeast of the dam; the excavation of the spillway approach channel and for the spillway headworks, chute, flip bucket and plunge pool; the drainage tunnels in both river banks, which will also provide access to the reservoir control valve chamber; the grout curtain from west of the spillway, across the river valley along the dam axis and to the east of the valve chamber; the five road embankments; parts of the permanent road across the top of the dam, dyke and spillway approaches; and instrumentation to measure the performance of the dam. This report supplements the preliminary engineering report (1986) and supersedes the design brief for these structures, first issued in 1986.

### Oldman River Dam design report, vol. 3 : appendix C -- Updated

prepared by UMA Engineering Ltd. ; in association with Acres International Limited. Edmonton : Alberta Public Works, Supply and Services, 1988. 165 p. : ill. Bibliogr. MICROLOG 90-03850 4 fiche

Analysis of the stability of the Oldman River dam and dyke for both static and earthquake induced dynamic loading conditions. The conventional 2-dimensional static limit equilibrium method of slices was used to calculate the safety factors against shear failure of the dam and dyke during the conditions that will exist in the embankment at the end of dam construction, during steady state seepage, during rapid reservoir drawdown, and following an earthquake. The last condition was analyzed using a pseudo-static seismic simulation of the earthquake loading. A static non-linear finite element analysis of the stresses that will exist at the end of dam construction was done to examine the stress transfer between the core and the shells of the dam, to determine if hydraulic fracturing of the core

might occur, to check that no continuous overstressed zones will exist and to provide basic input to the dynamic analysis on the stress-deformation condition prior to the application of seismic loading. The ability of the dam to resist seismic forces was analyzed using a rigorous dynamic finite element program which incorporates strain dependent shear modulus and damping parameters. The results were compared with the simplified earthquake induced permanent displacement approach and the pseudo-static limit equilibrium method.

### Oldman River Dam Project : review of Greggs & Associates report

prepared for Alberta Public Works, Supply and Services ; by UMA Engineering Ltd. ; in association with Acres International Limited. Edmonton : UMA Engineers Ltd. ; Acres International Limited, 1989. 161 p. : ill., maps. Bibliogr. MICROLOG 90-03810 2 fiche

A report on the bedrock structure of the Oldman River dam site area was prepared by Dr. R.G. Greggs in February 1989 for Friends of the Oldman River, Calgary, Alberta. Dr. Greggs' report states that the lower reservoir and dam site areas of the Oldman River dam project are traversed by vertical faults which are subject to intermittent movement, adversely affecting the dam and related structures. This report evaluates the statements made by Dr. Greggs. Geological data collected on the project are presented and the statements made by Dr. Greggs regarding faults and fault movements are assessed in the light of the collected data.

### Oldman River Dam spillway design report

prepared for Alberta Public Works, Supply and Services ; by UMA Engineering Ltd. ; in association with Acres International Limited. Edmonton : UMA Engineering Ltd. ; Acres International Limited, 1989. 152 p. : ill., fold. maps. Bibliogr. MICROLOG 90-03811 2 fiche

Summary of the design concepts, criteria and parameters which formed the basis for the design of the spillway of the Oldman River dam project. The main items of work include final excavation for the spillway headworks, chute and flip bucket; supply and installation of rock support; foundation preparation; supply and installation of the drainage system; construction of the reinforced concrete spillway structure approximately 340 m long and 95-40 m wide comprising the headworks, chute and flip bucket; supply and installation of embedded items in primary concrete for the gates and stoplogs; construction of the precast prestressed concrete bridge structure; placement of backfill and riprap erosion protection; supply and installation of electrical and mechanical systems for the spillway and drainage tunnels; and supply and installation of instrumentation. This design report covers the works to be completed under the entire spillway contract.
